

SPARKLE FISH

TAKE AND MAKE

Materials:

- 2 strips of cardstock
- Glue stick
- Sequins
- 2 googly eyes
- 2 glue dots
- Markers
- Scissors

Directions:

- Cut a triangle shape out of the end of one of the pieces of paper, then set the paper scrap aside.
- Bend the other paper strip in half so the ends touch each other, but don't make a folded crease in the paper. Cut a triangle shape out of the bent side of the paper. You'll end up with a diamond shaped hole. This is your fish's mouth.
- Cut the diamond in half to get two separate triangles.
- Use your markers to draw lines on the big and small triangles to look like fish fins. Turn the larger triangle (the tail) over and draw lines on the back too.
- Glue the pointy end of the large triangle to the inside of one side of the body.
- Place one glue dot above the tail and the other below it. Fold the body in half again and seal it closed by pressing the edges together.
- Glue one googly eye onto each side of the fish.
- Add some sparkle by gluing sequins onto your fish!
