DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS	☐ a. YES ☐ b. NO	490-59
UDC LEAK ALARM TRIGGERS AUTOMATIC PUMP SHUTDOWN	☐ a. YES ☐ b. NO	490-60
FAILURE / DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN	☐ a. YES ☐ b. NO	490-61
UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER.	☐ a. YES ☐ b. NO	490-62

2. UDC CONSTRUCTION IS ☐ 1. SINGLE-WALLED ☐ 2. DOUBLE-WALLED 490-51

IF DOUBLE WALLED: 490-64a
UDC INTERSTITIAL SPACE IS MONITORED BY: ☐ 1. LIQUID ☐ 2. PRESSURE ☐ 3. VACUUM

A LEAK WITHIN THE SECONDARY CONTAINMENT OF THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS ☐ a. YES ☐ b. NO 490-64b

VII. PERIODIC SYSTEM TESTING

☐ 1. ELD TESTING: THIS FACILITY HAS BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT ENHANCED LEAK DETECTION (ELD) MUST BE PERFORMED. PERIODIC ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED. (23 CCR 2664.1.) 490-65

☒ 2. SECONDARY CONTAINMENT COMPONENTS ARE TESTED EVERY 36 MONTHS. 490-66

☒ 3. SPILL BUCKETS ARE TESTED ANNUALLY. 490-67

VIII. RECORDKEEPING

The following monitoring/maintenance records are kept for this facility:

☒ Alarm logs 490-68a ☐ Visual Inspection Records 490-68b
☐ SIR testing results (and supporting documentation records). 490-68d
☒ ATG Testing results (and supporting documentation records). 490-68f
☒ Equipment maintenance and calibration records 490-68h
☒ Tank integrity testing results 490-68e
☒ Tank gauging results (and supporting documentation records). 490-68g
☐ Corrosion Protection 60-day logs 490-68g

IX. TRAINING

☒ Personnel with UST monitoring responsibilities are familiar with all of the following documents relevant to their job duties. 490-69a

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply)

☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN (Required) 490-69b
☒ OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT (Required) 490-69c
☐ CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS 490-69d
☐ CALIFORNIA UNDERGROUND STORAGE TANK LAW 490-69e
☐ STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION" 490-69f
☐ SWRCB PUBLICATION: "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" 490-69g
☐ OTHER (Specify): 490-69h, M69i

☒ This facility has a "Designated UST Operator" who has passed the California UST System Operator Exam administered by the International Code Council (ICC). The "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems annually, and within 30 days of hire. This training will include, but is not limited to, the following:

- Operation of the UST systems in a manner consistent with the facility's best management practices
- The facility employee's role with regard to the monitoring equipment as specified in this UST Monitoring Plan
- The facility employee's role with regard to spills and overfills as specified in the UST Response Plan
- Names of contact person(s) for emergencies and monitoring alarms. 490-70

X. COMMENTS/ADDITIONAL INFORMATION

Provide additional comments here or indicate how many pages with additional information on specific monitoring procedures are attached to this plan. 490-71
MONITOR RESPONSE PLANS LOCATED AT VEEDERROOT TLS350

XI. PERSONNEL RESPONSIBILITIES

The UST Owner/Operator is responsible for ensuring that: 1) the daily/routine UST monitoring activities and maintenance of UST leak detection equipment covered by this plan occurs, 2) all conditions that indicate a possible release are investigated, and 3) all monitoring records are maintained properly.
The following person(s) are responsible for performing the monitoring and equipment maintenance:

NAME JOE ROBELO 490-72 TITLE CHIEF ENGINEER
490-73

NAME LUIS FAVELA 490-74 TITLE
490-75

The Designated Operator shall perform a monthly visual inspection of the facility, provide a report to the owner/operator, and inform the owner/operator of any conditions that need follow-up action.

XII. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

APPLICANT SIGNATURE 490-76: x Trinidad Mossman
DATE: 490-77: x 12-23-10

REPRESENTING: ☐ 1. Tank Owner/Operator ☐ 2. Facility Owner/Operator ☒ 3. Authorized Representative of Owner

APPLICANT NAME (print): 490-78: x TRINIDAD MOSSMAN
APPLICANT TITLE: 490-79: x AVP, FACILITIES MGR

(Agency Use Only) This plan has been reviewed and: ☐ Approved ☐ Approved With Conditions

Comments or Special Conditions

UST Monitoring Plan – Page 2 Instructions

Complete a separate UST Monitoring Plan for each UST monitoring system at the facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. Please note that your local agency may require you to obtain approval prior to installing or modifying monitoring equipment. (Note: Numbering of these instructions follows the data element numbers on the form.)

490-54a. MONITORING OF THE UNDER DISPENSER CONTAINMENT- Indicate the method used for UDC monitoring
490-54b. SPECIFY-If 99 "Other" is checked, describe other method used.
If VI-1-1, VI-1-2 or VI-1-3 or VI-1-99 is checked, complete 490-55 to 490-64b.
490-55. PANEL MANUFACTURER –Enter the name of the manufacturer of the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this space blank.
490-56. MODEL # - Enter the model number for the monitoring system control panel (console) If there is no control panel (e.g , only an electrical relay box is installed) leave this
space blank
490-57. LEAK SENSOR MANUFACTURER – Enter the name of the manufacturer of the sensor(s).
490-58. MODEL #(S) - Enter the model number of the sensor(s) installed If additional space is needed, use Section X.
490-59. DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS. Indicate Yes or No
490-60. UDC LEAK ALARM TRIGGERS PUMP SHUTDOWN - Indicate Yes or No
490-61. FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN - Indicate Yes or No
490-62. UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER - Indicate Yes or No.
490-63. UDC CONSTRUCTION - Indicate if the construction of the UDC is single-walled, or double-walled.
490-64a. DOUBLE-WALLED INTERSTITIAL SPACE MONITORING – Indicate what is used to monitor the interstitial space.
490-64b. LEAK WITHIN THE SECONDARY CONTAIMENT OF UDC TRIGGERS AUDIBLE AND VISUAL ALARMS - Indicate Yes or No
490-65. VI-1 ELD TESTING - Check the box if you have been notified by the State Water Resources Control Board (SWRCB) that the UST(s) covered by this plan is/are subject to Enhanced Leak Detection Requirements (i.e., UST has any single-wall component and is located within 1,000 feet of a public drinking water well).
490-66. TESTING OF SECONDARY CONTAINMENT COMPONENTS EVERY 36 MONTHS - Check the box if you have secondary containment that requires testing.
490-67. SPILL BUCKET TESTING - Check the box if you have spill buckets
490-68a-h VII. RECORDKEEPING -Indicate which monitoring and equipment maintenance records are maintained for this facility
490-69a IX TRAINING STATEMENT - Check the box to verify that the statement is true.
REFERENCE DOCUMENTS MAINTAINED AT FACILITY – Check the appropriate boxes to describe reference documents maintained at the facility. Note that the first two items on the list must be kept at the facility.
490-69b MONITORING PLAN: Indicate that this plan is kept as a reference document.
490-69c. OPERATING MANUALS FOR ELECTRONIC EQUIPMENT: Indicate that this plan is kept as a reference document.
490-69d. CA UST REGULATIONS - Indicate that this is kept as a reference document.
490-69e. CA UST LAW - Indicate that this is kept as a reference document.
490-69f STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION - "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION - Indicate that this is kept as a reference document.
490-69g. SWRCB PUBLICATION: "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS": Indicate that this is kept as a reference document
490-69h. OTHER - Indicate that other reference documents are kept
490-69i. SPECIFY-If "OTHER" is checked, enter a brief description of the other document(s) maintained at the facility. If additional space is needed, see Section X.
490-70 DESIGNATED OPERATOR TRAINING - Check this box to verify that this statement is true.
490-71 COMMENTS/ADDITIONAL INFORMATION – Make additional comments or you may attach and identify the number of additional pages of information to describe any additional UST system monitoring-related information (e.g., additional information required by your local agency). Attach any monitoring logs that you will be using for the monitoring of your tank system.
490-72 NAME – Enter the name of the person who routinely conducts the monitoring and equipment maintenance under this plan.
490-73 TITLE - Enter the title of the person.
490-74 NAME – Enter the name of the second person, if applicable, who routinely conducts the monitoring and equipment maintenance under this plan.
490-75 TITLE – Enter the title of the second person.
OWNER/OPERATOR SIGNATURE – The tank owner/operator, facility owner/operator, or an authorized representative of the owner shall sign in the space provided. This signature certifies that the signer believes that all information submitted is true, accurate, and complete, and that the training program specified in Section IX has been implemented.
490-76 REPRESENTING – Check the appropriate box to indicate whether the signer is the UST owner/operator, the UST facility owner/operator, or an authorized representative of the owner.
490-77. DATE – Enter the date the plan was signed.
490-78. APPLICANT NAME – Print or type the name of the person signing this plan
490-79. APPLICANT TITLE – Enter the title of the person signing the plan.

VI. UNDER DISPENSER CONTAINMENT (UDC) MONITORING

1. UDC MONITORING IS PERFORMED USING THE FOLLOWING METHOD 490-59a 490-59b

☐ 1. CONTINUOUS ELECTRONIC MONITORING ☐ 2. FLOAT AND CHAIN ASSEMBLY ☐ 3. ELECTRONIC STAND-ALONE
☒ 4. NO DISPENSERS ☐ 95. OTHER (Specify):

PANEL MANUFACTURER 490-55		MODEL #:	490-56
LEAK SENSOR MANUFACTURER: 490-57		MODEL #(S):	490-58

DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS	☐ a. YES	☐ b. NO	490-59
UDC LEAK ALARM TRIGGERS AUTOMATIC PUMP SHUTDOWN	☐ a. YES	☐ b. NO	490-60
FAILURE / DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN.	☐ a. YES	☐ b. NO	490-61
UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER.	☒ a. YES	☐ b. NO	490-62

2. UDC CONSTRUCTION IS ☐ 1. SINGLE-WALLED ☐ 2. DOUBLE-WALLED 490-63

IF DOUBLE WALLED: 490-64
UDC INTERSTITIAL SPACE IS MONITORED BY: ☐ 1. LIQUID ☐ 2. PRESSURE ☐ 3. VACUUM
A LEAK WITHIN THE SECONDARY CONTAINMENT OF THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS ☐ a. YES ☐ b. NO 490-64b

VII. PERIODIC SYSTEM TESTING

☐ 1. ELD TESTING: THIS FACILITY HAS BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT ENHANCED LEAK DETECTION (ELD) MUST BE PERFORMED. PERIODIC ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED. (23 CCR §2644.1) 490-65

☒ 2. SECONDARY CONTAINMENT COMPONENTS ARE TESTED EVERY 36 MONTHS. 490-66

☒ 3. SPILL BUCKETS ARE TESTED ANNUALLY 490-67

VIII. RECORDKEEPING

The following monitoring/maintenance records are kept for this facility:

☒ Alarm logs 490-68a ☐ Visual Inspection Records 490-68b
☐ SIR testing results (and supporting documentation records) 490-68d
☒ ATG Testing results (and supporting documentation records). 490-68f
☒ Tank integrity testing results 490-68c
☒ Tank gauging results (and supporting documentation records). 490-68e
☐ Corrosion Protection 60-day logs 490-68g
☒ Equipment maintenance and calibration records. 490-68h

IX. TRAINING

☒ Personnel with UST monitoring responsibilities are familiar with all of the following documents relevant to their job duties. 490-69f

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply)

☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN (Required) 490-69a

☐ SWRCB PUBLICATION: "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" 490-69g
☐ OTHER (Specify): M49h, M49i

☒ This facility has a "Designated UST Operator" who has passed the California UST System Operator Exam administered by the International Code Council (ICC). The "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems annually, and within 30 days of hire. This training will include, but is not limited to, the following:

- Operation of the UST systems in a manner consistent with the facility's best management practices
- The facility employee's role with regard to the monitoring equipment as specified in this UST Monitoring Plan
- The facility employee's role with regard to spills and overfills as specified in the UST Response Plan
- Names of contact person(s) for emergencies and monitoring alarms 490-70

X. COMMENTS/ADDITIONAL INFORMATION

Provide additional comments here or indicate how many pages with additional information on specific monitoring procedures are attached to this plan. 490-71
MONITOR RESPONSE PLANS LOCATED AT VEEDERROOT TLS350

XI. PERSONNEL RESPONSIBILITIES

The UST Owner/Operator is responsible for ensuring that: 1) the daily/routine UST monitoring activities and maintenance of UST leak detection equipment covered by this plan occurs, 2) all conditions that indicate a possible release are investigated, and 3) all monitoring records are maintained properly.
The following person(s) are responsible for performing the monitoring and equipment maintenance

NAME JOE ROBELO 490-72 TITLE CHIEF ENGINEER 490-73

NAME LUIS PAVELA 490-74 TITLE 490-75

The Designated Operator shall perform a monthly visual inspection of the facility, provide a report to the owner/operator, and inform the owner/operator of any conditions that need follow-up action.

XII. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

UST Monitoring Plan – Page 2 Instructions

Complete a separate UST Monitoring Plan for each UST monitoring system at the facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. Please note that your local agency may require you to obtain approval prior to installing or modifying monitoring equipment. (Note: Numbering of these instructions follows the data element numbers on the form.)

490-54a. MONITORING OF THE UNDER DISPENSER CONTAINMENT- Indicate the method used for UDC monitoring.
490-54b. SPECIFY- If 99 "Other" is checked, describe other method used.
If VI-1-1, VI-1-2 or VI-1-3 or VI-1-99 is checked, complete 490-55 to 490-64b
490-55. PANEL MANUFACTURER –Enter the name of the manufacturer of the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this space blank.
490-56. MODEL # - Enter the model number for the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this
space blank.
490-57. LEAK SENSOR MANUFACTURER – Enter the name of the manufacturer of the sensor(s).
490-58. MODEL #(S) – Enter the model number of the sensor(s) installed. If additional space is needed, use Section X.
490-59. DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS. Indicate Yes or No
490-60. UDC LEAK ALARM TRIGGERS PUMP SHUTDOWN - Indicate Yes or No
490-61. FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN - Indicate Yes or No
490-62. UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER – Indicate Yes or No.
490-63. UDC CONSTRUCTION - Indicate if the construction of the UDC is single-walled, or double-walled.
490-64a DOUBLE-WALLED INTERSTITIAL SPACE MONITORING - Indicate what is used to monitor the interstitial space.
490-64b. LEAK WITHIN THE SECONDARY CONTAINMENT OF UDC TRIGGERS AUDIBLE AND VISUAL ALARMS - Indicate Yes or No
490-65. VI-1 FIELD TESTING - Check the box if you have been notified by the State Water Resources Control Board (SWRCB) that the UST(s) covered by this plan is/are subject to Enhanced Leak Detection Requirements (i.e., UST has any single-wall component and is located within 1,000 feet of a public drinking water well)
490-66. TESTING OF SECONDARY CONTAINMENT COMPONENTS EVERY 36 MONTHS - Check the box if you have secondary containment that requires testing.
490-67. SPILL BUCKET TESTING - Check the box if you have spill buckets.
490-68a-h. VII RECORDKEEPING -Indicate which monitoring and equipment maintenance records are maintained for this facility.
490-69a IX TRAINING STATEMENT - Check the box to verify that the statement is true.
REFERENCE DOCUMENTS MAINTAINED AT FACILITY – Check the appropriate boxes to describe reference documents maintained at the facility. Note that the first two items on the list must be kept at the facility.
490-69b MONITORING PLAN: Indicate that this plan is kept as a reference document.
490-69c OPERATING MANUALS FOR ELECTRONIC EQUIPMENT: Indicate that this plan is kept as a reference document.
490-69d CA UST REGULATIONS - Indicate that this is kept as a reference document.
490-69e CA UST LAW - Indicate that this is kept as a reference document.
490-69f STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION - "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION - Indicate if or this is kept as a reference document.
490-69g SWRCB PUBLICATION: "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS": Indicate that this is kept as a reference document.
490-69h OTHER - Indicate that other reference documents are kept.
490-69i. SPECIFY-IF "OTHER" is checked, enter a brief description of the other document(s) maintained at the facility. If additional space is needed, see Section X.
490-70. DESIGNATED OPERATOR TRAINING – Check this box to verify that this statement is true.
490-71. COMMENTS/ADDITIONAL INFORMATION – Make additional comments or you may attach and identify the number of additional pages of information to describe any additional UST system monitoring-related information (e.g., additional information required by your local agency). Attach any monitoring logs that you will be using for the monitoring of your tank system.
490-72. NAME – Enter the name of the person who routinely conducts the monitoring and equipment maintenance under this plan.
490-73. TITLE - Enter the title of the person.
490-74. NAME – Enter the name of the second person, if applicable, who routinely conducts the monitoring and equipment maintenance under this plan.
490-75. TITLE - Enter the title of the second person.
OWNER/OPERATOR SIGNATURE – The tank owner/operator, facility owner/operator, or an authorized representative of the owner shall sign in the space provided. This signature certifies that the signer believes that all information submitted is true, accurate, and complete, and that the training program specified in Section IX has been implemented.
490-76. REPRESENTING – Check the appropriate box to indicate whether the signer is the UST owner/operator, the UST facility owner/operator, or an authorized representative of the owner.
490-77. DATE – Enter the date the plan was signed.
490-78. APPLICANT NAME - Print or type the name of the person signing the plan.
490-79. APPLICANT TITLE - Enter the title of the person signing the plan.

UNIFIED PROGRAM CONSOLIDATED FORM

UNDERGROUND STORAGE TANKS
RESPONSE PLAN – PAGE 1

(one page per site)

R39

TYPE OF ACTION ☑ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION

I. FACILITY INFORMATION

FACILITY ID *(Agency Use Only)* 3 0 – – R02

FACILITY NAME: BANK OF THE WEST R03

FACILITY STREET ADDRESS: 1977 SATURN AVE CITY: MONTEREY PARK R04

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan.

- It is safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove to contain hazardous material from the UST system.
- Liquid in secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 10 calendar days or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material may be reused until it becomes too saturated to be effective. It will then be managed properly. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container.
- Facility personnel will determine whether or not any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be dispersed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage when any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly and after each use, and supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: (Complete only if applicable)

EQUIPMENT	LOCATION	AVAILABILITY
R10.	R20.	R30.
R11.	R21.	R31.
R12.	R22.	R32.
R13.	R23.	R33.
R14.	R24.	R34.
R15.	R25.	R35.

IV. RESPONSIBLE PERSONS

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME	TITLE
R40. X TRINIDAD HOSSMAN	R50. X AVP, FACILITIES MANAGER
R41. X JOE REBELO	R51. X CHIEF ENGINEER
R42.	R52.
R43.	R53.

V. INDIRECT HAZARD DETERMINATION

This information is required only when the presence of the hazardous substance can not be determined directly by the monitoring method used (e.g., where liquid level measurements in a tank annular space or secondary piping are used as the basis for leak determination).

THE FOLLOWING STEPS WILL BE TAKEN TO DETERMINE THE PRESENCE OR ABSENCE OF HAZARDOUS SUBSTANCE IN THE SECONDARY CONTAINMENT IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE:

R61

UNIFIED PROGRAM CONSOLIDATED FORM

UNDERGROUND STORAGE TANKS RESPONSE PLAN – PAGE 2

(one page per site)

VI. LEAK INTERCEPTION AND DETECTION SYSTEM

This information is required only for motor vehicle fuel UST systems constructed per the Alternate Construction Requirements of 23 CCR §2633, and only if the Leak Interception and Detection System (LIDS) does not meet the volumetric requirements of 23 CCR §2631(d)(1) through (5) (i.e., when accounting for rainfall and backfill material, the secondary containment volume is less than 100% of primary tank volume for a single UST, or in the case of multiple USTs in shared secondary containment 150% of the largest primary tank volume or 10% of aggregate primary tank volume, whichever is greater)

ATTACH AN ADDITIONAL PAGE TO THIS PLAN CONTAINING THE FOLLOWING INFORMATION:

- The volume of the LIDS in relation to the volume of the primary container;
- The amount of time the LIDS shall provide containment related to the time between detection of an unauthorized release and cleanup of the leaked substance;
- The depth from the bottom of the LIDS to the highest anticipated level of groundwater;
- The nature of the unsaturated soils under the LIDS and their ability to absorb contaminants or to allow movement of contaminants;
- The methods and scheduling for removal of all hazardous substances which may have been discharged from primary containment and are located in the unsaturated soils between the primary containment and groundwater, including the LIDS sump.

VII. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The time at which the release was discovered;
- The time at which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water;
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 2 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

VIII. OWNER/OPERATOR SIGNATURE

*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. **Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; (check all that apply):** [■] System set-up [■] Alarm history report

Technician Name (print): Rich Ruston Signature:

Certification No: 5246183-vt ANSO License No: 517336

Testing Company Name: Orange County Tank Testing Phone No: (714) 778-0300

Testing Company Address: 225 N. Loara Street, Anaheim CA 92801 Date of Testing/Servicing: 10/7/2011

C 695033

D. **Results of Testing/Servicing**

Software Vers on Installed: 9.0

Complete the following checklist:

✓ Yes	No*	s the audible alarm operational?
✓ Yes	No*	Is the visual alarm operationa ?
✓ Yes	No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
✓ Yes	No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
Yes	No* ✓ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
Yes	No* ✓ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, is is to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? *(Check all that apply)* Sump/Trench Sensors; Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? Yes. No.
Yes	No* ✓ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed): Is the overfill warning alarm visible and audible at the fank fi points) and operating properly? If so, at what percent of tank capacity does the alarm trigger? ____ %
Yes*	✓ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
✓ Yes*	No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* Product; Water. If yes, describe causes in Section E, below.
✓ Yes	No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
✓ Yes	No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. **Comments:**

Small Amount of Water Removed at time of Inspection.

F. **In-Tank Gauging / SIR Equipment:**

Check this box if tank gauging is used only for inventory control.
Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

✓ Yes	No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
✓ Yes	No*	Were all tank gauging probes visually inspected for damage and residue buildup?
✓ Yes	No*	Was accuracy of system product level readings tested?
✓ Yes	No*	Was accuracy of system water level readings tested?
✓ Yes	No*	Were all probes reinstalled properly?
✓ Yes	No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

G. **Line Leak Detectors (LLD):** ✓ Check this box if LLDs are not installed.

Complete the following checklist:

Yes	No* N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: 3 g.p.h.; 0.1 g.p.h.; 0.2 g.p.h.
Yes	No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
Yes	No*	Was the testing apparatus properly calibrated?
Yes	No* N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
Yes	No* N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
Yes	No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

H. **Comments:**

Double Wall Suction System

SWRCB, January 2006

Spill Bucket Testing Report Form

This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report (check all that apply): System set-up Alarm history report

Technician Name (print): Rich Rusnon Signature:

Certification No: 5245183-vt License No: 517336

Testing Company Name: Orange County Tank Testing Phone No: (714) 776-0300

Testing Company Address: 225 N. Logre Street, Anaheim, CA 92801 Date of Testing/Servicing: 10/12/2012

D. Results of Testing/Servicing

Software Version Installed: 9.00

Complete the following checklist:

✓ Yes	No*	Is the audible alarm operational?
✓ Yes	No*	Is the visual alarm operational?
✓ Yes	No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
✓ Yes	No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
Yes	No* ✓ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
Yes	No* ✓ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shutdown? (Check all that apply) Sump/Trench Sensors; Dispenser Containment Sensors. Did you confirm positive shutdown due to leaks and sensor failure/disconnection? Yes No
Yes	No* ✓ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
Yes*	✓ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
✓ Yes*	No	Was liquid found inside any secondary containment systems designed as dry systems? (Check all that apply) Product; ✓ Water. If yes, see Section E, below.
✓ Yes	No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable.
✓ Yes	No*	Is all monitoring equipment operational per manufacturer's specifications?

* In Section E below, describe how and when these deficiencies were or will be corrected.

E. Comments:

* Small Amount of Liquid found in 2K Diesel Tank. Removed at time of Inspection.

* Overfill Probes tested with Sump test on this date

F. In-Tank Gauging / SIR Equipment: ☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

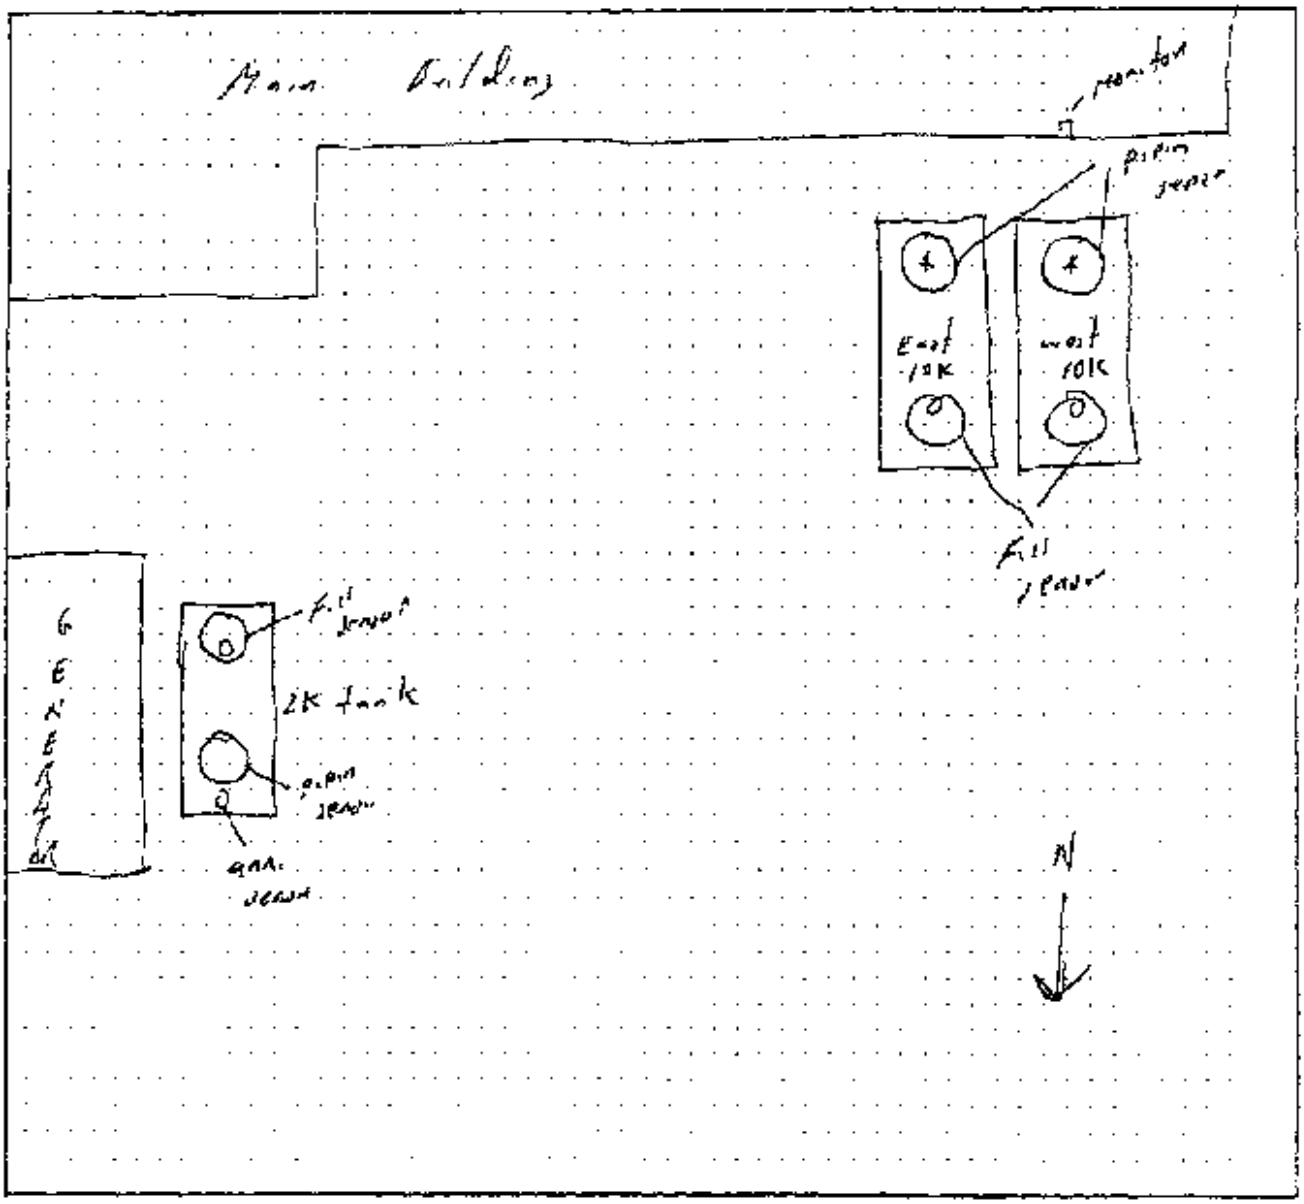
✓ Yes ☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?	
✓ Yes ☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?	
✓ Yes ☐ No*	Was accuracy of system product level readings tested?	
✓ Yes ☐ No*	Was accuracy of system water level readings tested?	
✓ Yes ☐ No*	Were all probes reinstalled properly?	
✓ Yes ☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?	

*In the Section H, below, describe how and when these deficiencies were or will be corrected.

G. Line Leak Detectors (LLD): ✓ Check this box if LLDs are not installed.

Complete the following checklist:

☐ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: ☐ 3 g.p.h. ☐ 0.1 g.p.h. ☐ 0.2 g.p.h.
☐ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☐ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☐ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?



*In the Section H, below, describe how and when these deficiencies were or will be corrected.

H. Comments:

Double Wall Suction System.

UST Monitoring Site Plan

Site Address: 1977 Safeway

Date map was drawn: 10/24/07

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

Secondary Containment Testing Report Form

This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name:	Bank of the West	Date of Testing:	10/12/12
Facility Address:	1977 Saturn St, Monterey Park, CA 91755		
Facility Contact:		Phone:	
Date Local Agency Was Notified of Testing :		8/31/12 Notification # 3832	
Name of Local Agency Inspector *(if present during testing)*		Miguel Cervantes LA County Public Works	

2. TESTING CONTRACTOR INFORMATION

Company Name:	Clean Air Testing		
Technician Conducting Test:	Steven Loara		
Credentials:	x CSLB Licensed Contractor	SWRCB Licensed Tank Tester	
License Type:	C61 D40	License Number: 474291

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: Bank Of The West Bldg No.

Site Address: 1977 Saturn St. City: Monterey Park Zip: 91755

Facility Contact Person: Joe Robelo Contact Phone No.: (323) 727-3636

Make/Model of Monitoring System: Veeder-Root TLS350 Date of Testing/Servicing: 10/11/2013

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturer's guidelines. Attached to this Certification is information (e.g. manufacturer's checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; (check all that apply): ☐ System set-up ☐ Alarm history report

Technician Name (print): Rich Ruston Signature:

Certification No.: 5246183-UST-A32KO License No.: 517338

Testing Company Name: Orange County Tank Testing Phone No.: (714) 778-0300

Testing Company Address: 225 N. Loara Street, Anaheim, CA 92801 Date of Testing/Servicing: 10/11/2013

2/21/07

D. Results of Testing/Servicing

Software Version Installed: 9.00

Complete the following checklist:

✓ Yes	No*	Is the audible alarm operational?
✓ Yes	No*	Is the visual alarm operational?
✓ Yes	No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
✓ Yes	No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
Yes	No* ✓ N/A	If alarms are relayed to a remote monitoring station, is all communication equipment (e.g. modem) operational?
Yes	No* ✓ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? *(Check all that apply)* Sump/Trench Sensors; Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failures set to operate? Yes No
Yes	No* ✓ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
Yes*	✓ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
Yes*	✓ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* Product; Water. If yes, describe causes in Section E, below.
✓ Yes	No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable.
✓ Yes	No*	Is all monitoring equipment operational per manufacturer's specifications?

* In Section E below, describe how and when these deficiencies were or will be corrected.

E. Comments:

F. **In-Tank Gauging / SIR Equipment:** Check this box if tank gauging is used only for inventory control. Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

✓ Yes	No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
✓ Yes	No*	Were all tank gauging probes visually inspected for damage and residue buildup?
✓ Yes	No*	Was accuracy of system product level readings tested?
✓ Yes	No*	Was accuracy of system water level readings tested?
✓ Yes	No*	Were all probes reinstalled properly?
✓ Yes	No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

G. **Line Leak Detectors (LLD).** ✓ Check this box if LLDs are not installed.

Complete the following checklist:

Yes	No* N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: 3 g p h 0.1 g p h 0.2 g p h
Yes	No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
Yes	No*	Was the testing apparatus properly calibrated?
Yes	No* N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
Yes	No* N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
Yes	No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

H. **Comments:**

Double Wall Suction System for Emergency Generators

Spill Bucket Testing Report Form

This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name: Bank Of The West	Date of Testing: 10/11/2013
Facility Address: 1977 Saturn St	
Facility Contact: Joe	Phone: 323-727 3636
Date Local Agency Was Notified of Testing:	
Name of Local Agency Inspector *(If present during testing)*:

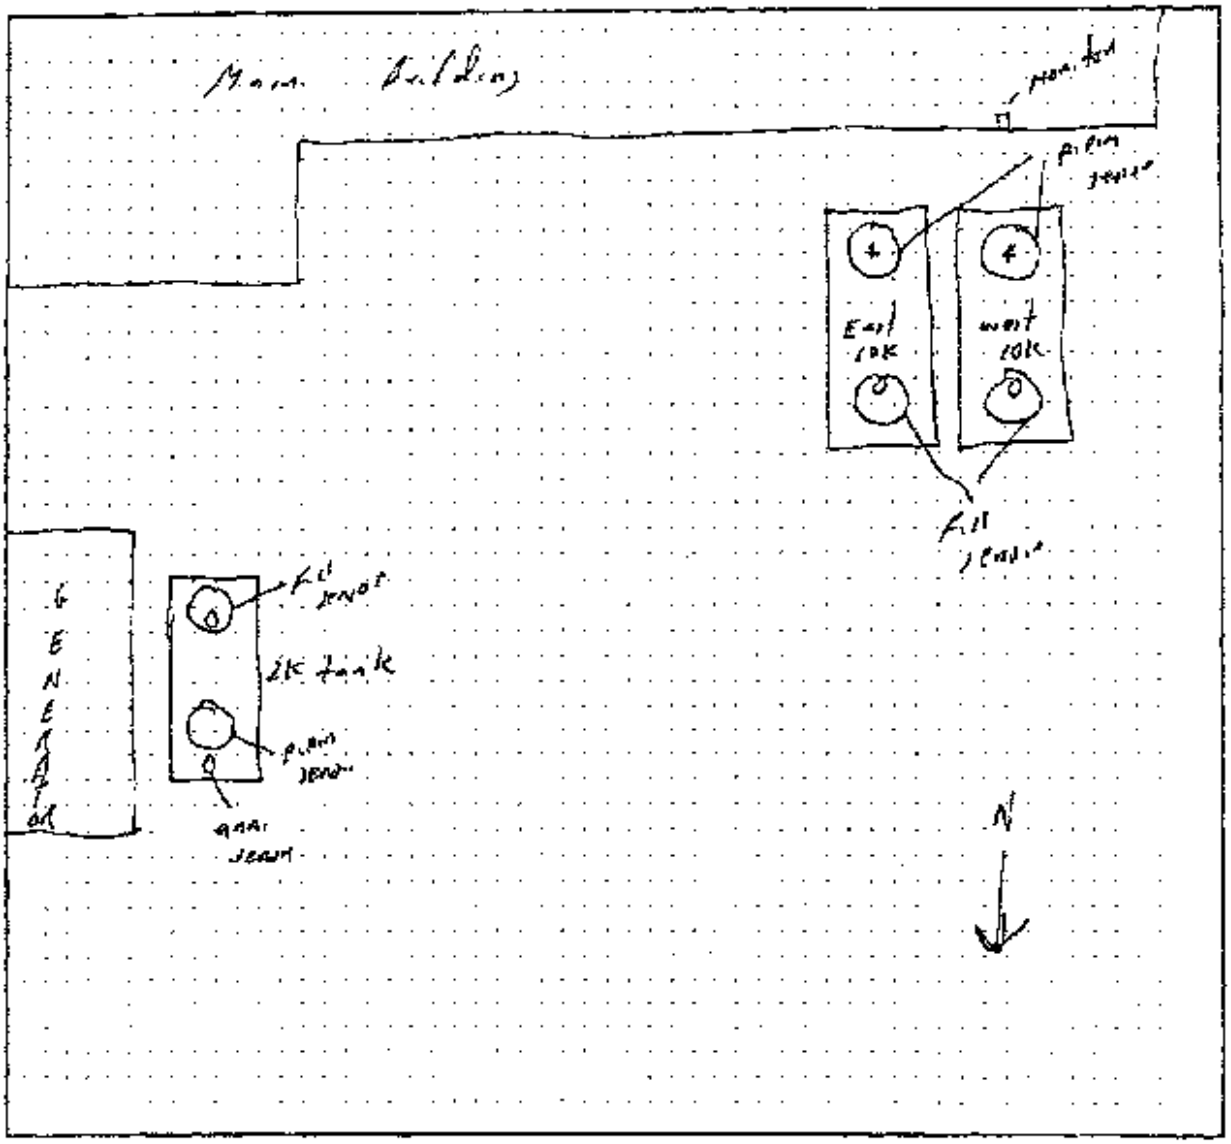
Final Reading (R_F):	13.5"	12.5"	11.75"	
Test Duration ($T_E - T_S$):	1HR.	1HR	1HR	
Change in Reading ($R_F - R_I$):	-.00	-.00	-.00	
Pass/Fail. Threshold or Criteria:	± .00	± .00	± .00	
Test Result:	☑ Pass ☐ Fail	☑ Pass ☐ Fail	☑ Pass ☐ Fail	☐ Pass ☐ Fail

Comments *(include information on repairs made prior to testing, and recommended follow-up for failed tests)*

CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING



I hereby certify that all the information contained in this report is true, accurate, and in full compliance with legal requirements.

Technician's Signature: _____ Date: 10/11/13

[1] State laws and regulations do not currently require testing to be performed by a qualified contractor. However, local requirement may be more stringent.

UST Monitoring Site Plan

Site Address: 1477 Salinas

Date map was drawn: 11/24/07

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: in-tank monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

STORAGE TANK CERTIFICATE OF INSURANCE TO DEMONSTRATE FINANCIAL RESPONSIBILITY STATE OF CALIFORNIA

Facility Name and Address:
Monterey Park Service Center (Data Center) located at 1977 Saturn Street in Monterey Park, CA 91755

Insurer Name and Address:
ACE American Insurance Company c/o ACE Environmental Risk, P.O. Box 1000, 436 Walnut Street WA07A, Philadelphia, PA 19106

Policy Number: UST G27168747 001

RECEIVED

NOV 06 2013

DEPARTMENT OF PUBLIC WORKS ENVIRONMENTAL PROGRAM

Policy Period:
From 12:01am December 5, 2012 to 12:01am December 5, 2013

Insured Name and Address:
Bank of the West located at 2527 Camino Ramon NC-B07-2L-I in San Ramon, CA 94583

I. The Insurer, as identified above, hereby certifies that it has issued liability insurance covering the following Underground Storage Tanks:

Facility	Identification No.	Number of Tanks
Monterey Park Service Center (Data Center)	N/A	3

for taking corrective action and/or compensating third parties for bodily injury and property damage caused by either sudden accidental releases or non-sudden accidental releases or accidental releases in accordance with and subject to the limits of liability, exclusions, conditions, and other terms of the Policy arising from operating the underground storage tanks identified above.

The Limits of Liability are:

a.	$1,000,000	Each Occurrence
b.	$2,000,000	Annual Aggregate

exclusive of legal defense costs, which are subject to a separate limit under the policy. This coverage is provided under policy number UST G27168747 001. The effective date of said policy is December 5, 2012

II. The Insurer further certifies the following with respect to the insurance described in Paragraph I:

A. Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the Policy to which this certificate applies.

B. The Insurer is liable for the payment of amounts within any deductible applicable to the Policy to the provider of corrective action or a damaged third party, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision does not apply with respect to that amount of any deductible for which coverage is demonstrated under another mechanism or combination of mechanisms as specified in 40 CFR 280.95-280.102.

C. Whenever requested by a Director of an implementing agency, the Insurer agrees to furnish to the Director a signed duplicate original of the Policy and all endorsements.

ACE USA Copyright 2007

D. Cancellation or any other termination of the Insurance by the Insurer, except for non-payment of premium or misrepresentation by the Insured will be effective only upon written notice and only after the expiration of 60 days after a copy of such written notice is received by the Insured. Cancellation for non-payment of premium or misrepresentation by the Insured will be effective only upon written notice and only after expiration of a minimum of 10 days after a copy of such written notice is received by the Insured.

E. The Insurance covers claims otherwise covered by the Policy that are reported to the Insurer within six months of the effective date of cancellation or non-renewal of the Policy except where the new or renewed Policy has the same Retroactive Date or a Retroactive Date earlier than that of the prior policy, and which arise out of any covered occurrence that commenced after the Policy Retroactive Date, if applicable, and prior to such renewal or termination date. Claims reported during such extended reporting period are subject to the terms, conditions, limits, including limits of liability, and exclusions of the Policy.

I hereby certify that the wording of this instrument is identical to the wording in 40 CFR 280.97 (b) (2) and that the Insurer is eligible to provide insurance as an excess or surplus lines insurer in one or more states

(Copies of Monitoring System Certification form and UST Monitoring Plot Plan available at http://www.waterboards.ca.gov.)

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: Bank Of The West Bldg. No: _____

Site Address: 1977 Saturn St. City: Monterey Park Zip: 91755

Facility Contact Person: Joe Robelo Contact Phone No.: (323) -727-3636

Make/Model of Monitoring System: Veeder-Root TLS 350 Date of Testing/Servicing: 10/10/2014

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: #1 Diesel EAST TANK ☑ In-Tank Gauging Probe. Model: MAG ☐ Annular Space or Vault Sensor. Model: _____ ☑ Piping Sump / Trench Sensor(s). Model: 794390-357 ☑ Fill Sump Sensor(s). Model: 794380-208 ☐ Mechanical Line Leak Detector. Model: _____ ☐ Electronic Line Leak Detector. Model: _____ ☑ Tank Overfill / High-Level Sensor. Model: Flapper Valve ☐ Other (specify equipment type and model in Section E on Page 2).	Tank ID: 2K Diesel ☐ In-Tank Gauging Probe. Model: _____ ☑ Annular Space or Vault Sensor. Model: 794390-357 ☑ Piping Sump / Trench Sensor(s). Model: 794380-208 ☑ Fill Sump Sensor(s). Model: 794380-208 ☐ Mechanical Line Leak Detector. Model: _____ ☐ Electronic Line Leak Detector. Model: _____ ☐ Tank Overfill / High-Level Sensor. Model: _____ ☐ Other (specify equipment type and model in Section E on Page 2).
Tank ID: #2 Diesel WEST TANK ☑ In-Tank Gauging Probe. Model: MAG ☐ Annular Space or Vault Sensor. Model: _____ ☑ Piping Sump / Trench Sensor(s). Model: 794390-357 ☑ Fill Sump Sensor(s). Model: 794380-208 ☐ Mechanical Line Leak Detector. Model: _____ ☐ Electronic Line Leak Detector. Model: _____ ☑ Tank Overfill / High-Level Sensor. Model: Flapper Valve ☐ Other (specify equipment type and model in Section E on Page 2).	Tank ID: _____ ☐ In-Tank Gauging Probe. Model: _____ ☐ Annular Space or Vault Sensor. Model: _____ ☐ Piping Sump / Trench Sensor(s). Model: _____ ☐ Fill Sump Sensor(s). Model: _____ ☐ Mechanical Line Leak Detector. Model: _____ ☐ Electronic Line Leak Detector. Model: _____ ☐ Tank Overfill / High-Level Sensor. Model: _____ ☐ Other (specify equipment type and model in Section E on Page 2).
Dispenser ID: Dsl Tank 1-3 ☑ Dispenser Containment Sensor(s). Model: Float Sensor [redacted] ☑ Dispenser Containment Float(s) and Chain(s).	Dispenser ID: _____ ☐ Dispenser Containment Sensor(s). Model: _____ ☐ Shear Valve(s). ☐ Dispenser Containment Float(s) and Chain(s).
Dispenser ID: _____ ☐ Dispenser Containment Sensor(s). Model: _____ ☐ Shear Valve(s). ☐ Dispenser Containment Float(s) and Chain(s).	Dispenser ID: _____ ☐ Dispenser Containment Sensor(s). Model: _____ ☐ Shear Valve(s). ☐ Dispenser Containment Float(s) and Chain(s).
Dispenser ID: _____ ☐ Dispenser Containment Sensor(s). Model: _____ ☐ Shear Valve(s). ☐ Dispenser Containment Float(s) and Chain(s).	Dispenser ID: _____ ☐ Dispenser Containment Sensor(s). Model: _____ ☐ Shear Valve(s). ☐ Dispenser Containment Float(s) and Chain(s).

* If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. **Certification** - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; (check all that apply): ☑ System set-up ☐ Alarm history report

Technician Name (print): Rich Ruston Signature: _____

Certification No: 5246183-UST A30050 License No: 517336

Testing Company Name: Orange County Tank Testing Phone No.: (714) 776-0300

Testing Company Address: 225 N. Loara Street, Anaheim, CA 92801 Date of Testing/Servicing: 10/10/2014

D. Results of Testing/Servicing

Software Version Installed: 9.00

Complete the following checklist:

✓ Yes	☐ No*	Is the audible alarm operational?
✓ Yes	☐ No*	Is the visual alarm operational?
✓ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
✓ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ✓ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☐ Yes	☐ No* ✓ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? *(Check all that apply)* ☐ Sump/Trench Sensors; ☐ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☐ Yes; ☐ No.
☐ Yes	☐ No* ✓ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? ____%.
☐ Yes*	✓ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	✓ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
✓ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable.
✓ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments:

Double Wall Safe Suction System for Emergency Generators

F. **In-Tank Gauging / SIR Equipment:**

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☑ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☑ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☑ Yes	☐ No*	Was accuracy of system product level readings tested?
☑ Yes	☐ No*	Was accuracy of system water level readings tested?
☑ Yes	☐ No*	Were all probes reinstalled properly?
☑ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. **Line Leak Detectors (LLD):** ☑ Check this box if LLDs are not installed.

Complete the following checklist:

☐ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☐ 3 g.p.h.; ☐ 0.1 g.p.h.; ☐ 0.2 g.p.h.
☐ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☐ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☐ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

H. **Comments:**

Double Wall Steel Suction System.

Spill Bucket Testing Report Form

This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name: Bank Of The West	Date of Testing: 10/10/2014
Facility Address: 1977 Saturn St.	
Facility Contact: Joe Robello	Phone: 323-727-3636
Date Local Agency Was Notified of Testing:	
Name of Local Agency Inspector *(if present during testing)*	

2. TESTING CONTRACTOR INFORMATION

Company Name: ORANGE COUNTY TANK TESTING	
Technician Conducting Test: Rich Ruston	
Credentials[1]: ☐ CSLB Contractor ☑ ICC Service Tech. ☑ SWRCB Tank Tester ☐ Other *(Specify)*	
License Number(s): 517336 524182-UT	

3. SPILL BUCKET TESTING INFORMATION

Test Method Used: ☑ Hydrostatic ☐ Vacuum ☐ Other

Test Equipment Used: Visual — Equipment Resolution:

Identify Spill Bucket: *(By Tank Number, Stored Product, etc.)*	1 W. Diesel Fill	2 E. Diesel Fill	3	4
Bucket Installation Type:	☐ Direct Bury ☑ Contained in Sump	☐ Direct Bury ☑ Contained in Sump	☐ Direct Bury ☐ Contained in Sump	☐ Direct Bury ☐ Contained in Sump
Bucket Diameter	12"	12"

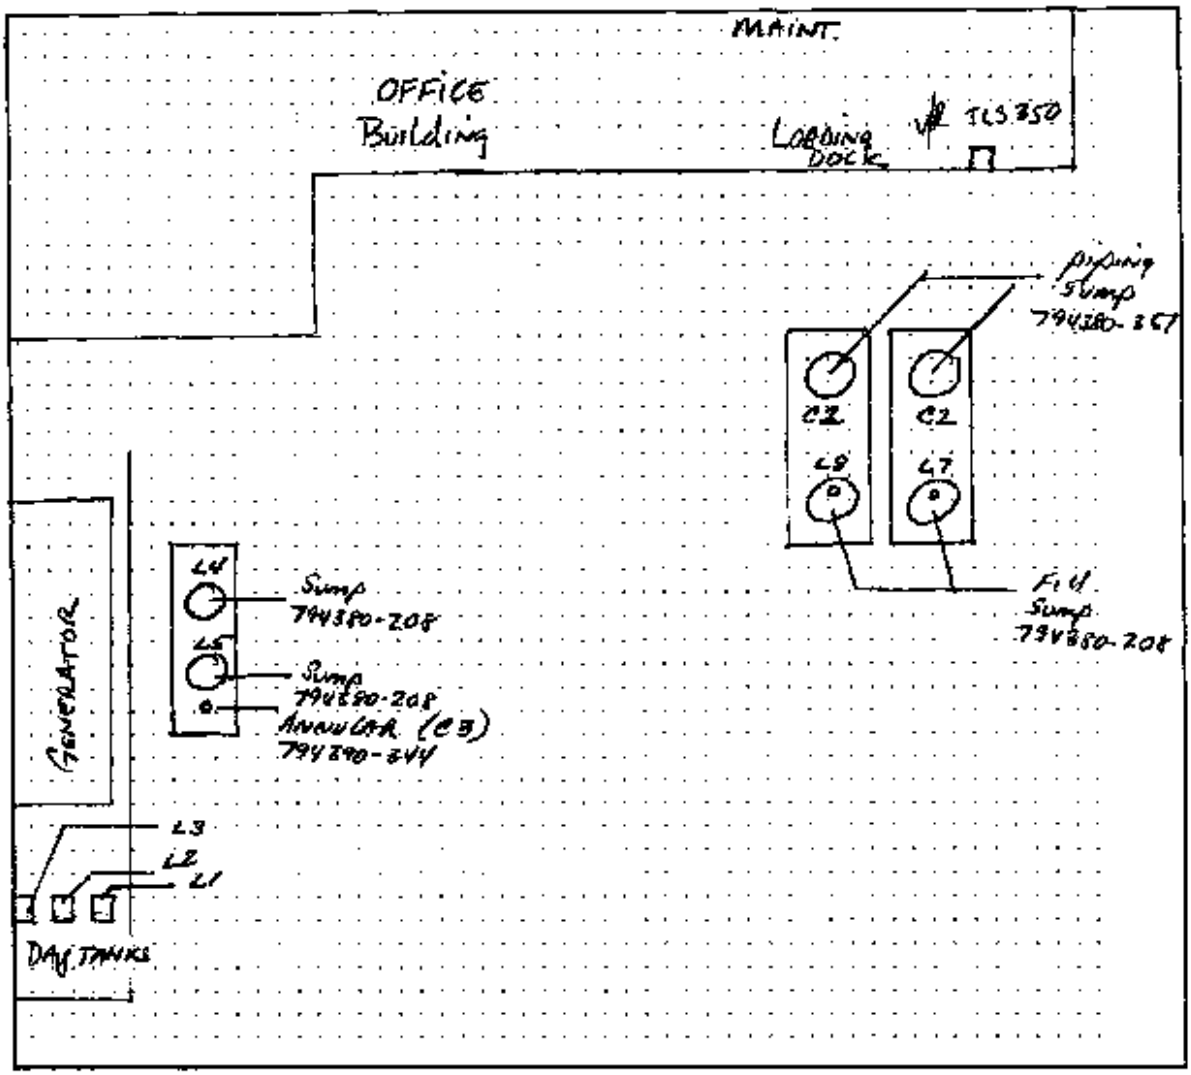
Comments - *(include information on repairs made prior to testing, and recommended follow up for failed tests)*

CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING



I hereby certify that all the information contained in this report is true, accurate, and in full compliance with legal requirements.

Technician's Signature: _____ Date: 10/10/14

[1]State laws and regulations do not currently require testing to be performed by a qualified contractor. However, local requirements may be more stringent.

UST Monitoring Site Plan

Site Address: 1977 Saturn St., Monterey Park, California 91755

Date map was drawn 10 / 10 / 14

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels, sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
"To Enrich Lives Through Effective And Caring Service"
www.CleanLA.com

ENVIRONMENTAL PROGRAMS DIVISION
NOTICE OF VIOLATION ORDER TO COMPLY

Date _____ Permit _____

Owner/Operator _____ Site/Fac _____

Site Name _____ Violation # _____

Site Address _____ City, Zip _____

Mailing Address _____ City, Zip _____

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous materials underground storage tanks (USTs) which are violations of California Health and Safety Code (CH&SC) Chapter 6.7; Los Angeles County Code (LACC), Title 11, Division 4 and/or the conditions and limitations of the above permit.

YOU ARE HEREBY DIRECTED to submit to the office indicated below, the following items checked:

☐ **OPERATING WITHOUT A CERTIFIED / OPERATING MONITORING SYSTEM – CH&SC 25293**

YOU ARE HEREBY DIRECTED to have the monitoring system and the USTs certified immediately and the results received by this office no later than 7 Days from the date of this Notice or the contents of all underground storage tank systems are to be removed within this time period.

☐ **MISSING TEST RESULTS** – Test must be conducted and results received by this office.

- ☐ Secondary Containment Testing
- ☐ Tank Integrity Testing
- ☐ Corrosion Protection Certification
- ☐ API 2161 Testing
- ☐ Line Testing
- ☐ Line Leak Detection Testing
- ☐ Financial Responsibility Certification
- ☐ Owner Statement of Designated Operator
- ☐ Facility Employee Training
- ☐ Missing Designated Operator Monthly Form
- ☐ Monitoring/Response Plan
- ☐ _____
- ☐ _____
- ☐ _____

☐ **UNREGISTERED TANKS – CH&SC 25286**

☐ **OPERATING WITHOUT A PERMIT DUE TO A CHANGE OF OWNERSHIP – CH&SC 25284 (c)**

- ☐ Complete and sign the Transfer of Ownership Application (yellow form).
- ☐ An application fee of $_____ payable to the County of Los Angeles Department of Public Works.
- ☐ Verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) https://cersbusiness.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f, including all UP UST Facility Information data, UP UST Tank Information data, for each UST and UST Monitoring Plan data (You must include the Board of Equalization Number.)
- ☐ Complete and sign the Certificate of Financial Responsibility Form.
- ☐ completed and signed Response Plan
- ☐ completed and signed Owner Statement of Designated Operator
- ☐ Provide Monitoring System Certification which is current (performed within the last 12 months).

☐ **OUT OF SERVICE UNDERGROUND STORAGE TANKS – CH&SC 25298**

Immediately remove all residual liquids, solids, or sludge stored within the USTs to a legal disposal facility. Provide copy of proof of legal disposal.

- ☐ Complete, and sign the Application for Closure.
- ☐ An Application for Closure fee of $_____ payable to the County of Los Angeles Department of Public Works.
- ☐ Complete and sign Permit Application Supplemental Notice to File.
- ☐ Verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) https://cersbusiness.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f, including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data (You must include the Board of Equalization Number)
- ☐ Complete and sign the Certificate of Financial Responsibility Form.
- ☐ An Operating Permit Application fee of $_____ payable to the County of Los Angeles, Department of Public Works.
- ☐ Submit an Annual Permit Maintenance fee of $_____ payable to the County of Los Angeles Department of Public Works.

YOU ARE FURTHER DIRECTED to submit to the office below evidence of compliance with the above directives by no later than fifteen (15) days from the date on this Notice, unless otherwise directed above. Failure to comply with the Underground Storage Tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $5,000, or by one year in county jail or both. Additionally pursuant to LACC Title 1, § 1.25.040, each violation of any provision of this Code and each separate offense is subject to an administrative fine up to $1,000 for each separate day during which any violation occurs or continues. Furthermore, a noncompliance fee may be imposed to recover the cost incurred by this Department in the enforcement of LACC.

If you have any questions regarding this matter, please contact _____, [ ] Monday through Friday, 9 a.m. to 5:30 p.m. or [ ] Monday through Thursday, 7 a.m. to 5:30 p.m. at ( ) _____.

UNDERGROUND STORAGE TANK INSPECTION REPORT

www.CleanLA.com

Date 10-10-14
Site Name BANK OF THE WEST
Street Address 1977 SATURN ST
Facility Contact JOE REYES
Phone No. 323-722-3636

Permit Number 5594T
Site-File Number UU6994-UU7311
City/Zip Code MONTEREY PARK CA. 91755
Inspection Number 788451
Inspected By WARREN LOTANAKE

Refer to Title 23 of the California Code of Regulations (CCR), Chapters 6.7 of the Health and Safety Code (CHSC).

CERS ID # 10268183

The following Code sections are either in violation (V) of, or in compliance (C) with, the Underground Storage Tank laws and regulations, or compliance is not applicable (N).

	Tank ID	Tank ID	Tank ID	Tank ID	Tank ID
	001	002	003		
Tank Manufacturer	MID VALLEY	OLIVERS	OLIVERS		
Contents	DIESEL	DIESEL	DIESEL		
Install Date	08/01/91	01/01/80	01/01/80		
Size	2K	10K	10K		

	TYPE ID	INSPECTION ITEM	V	C	N	V	C	N	V	C	N	V	C	N	V	C	N
		ADMINISTRATION/DOCUMENTATION															
1	2010001	Current BOE number submitted to the CUPA and/or CERS? UU6183		V			C				N						
2	2030021	Facility has a valid permit to operate from the CUPA?		V			C				N						
3	2010007	Financial Responsilbity current and on file? (exp. 12/05/14)		V			C				N						
4	2010010A	Submitted an accurate CUPA UST Operating Permit Application for Facility Information?		V			C				N						
5	2010010B	Submitted an accurate CUPA UST Operating Permit Application for Tank Information?		V			C				N						
6	2030011A	Has statement of UST compliance certification been submitted?		V			C				N						
7	2030011B	Has designated operator current certification been submitted?		V			C				N						
8	2010003	Has the owner/operator designated a UST operator?		V			C				N						
9	2030014A	Owner/operator received approval for a training program at an unstaffed facility?		V			C				N						
10	2030014B	Owner/operator implemented the approved training program?		V			C				N						
11	2030037	Did they submit an owner/operator agreement?		V			C				N						
12	2030041	A complete and accurate plot plan has been submitted, approved and maintained?		V			C				N						
13	2030046	A complete and accurate response plan has beeen submitted, approved and maintained?		V			C				N						
14	2030007	Did they submit and maintain documentation regarding positive statement of compatibility for UST system components?		V			C				N						
15	2010008D	Have they maintained written performance claims pertaining to release detection systems and calibration and maintenance records for such systems for 5 years?		V			C				N						
16	2030068	Was enhanced leak detection testing conducted for the double-walled UST systems located within 1,000 feet of a public drinking water well?		V			C				N						
17	2030066	Was appropriate action taken to repair and retest any component of a double-walled UST system that is leaking liquid or vapor which is discovered from an enhanced leak detection test for UST system located within 1,000 feet of a public drinking water well?		V			C				N						
18	2030067	ELD testing conducted every 36 months on USTs located within 1,000 feet of a public drinking well? (singlewalled components)		V			C				N						
19	2010008A	Have they maintained records of repairs, lining, and upgrades for life of UST?															
20	2010008B	Have they maintained written monitoring and maintenance records for 3 years?															
21	2010008C	Have they maintained cathodic protection records for 6 1/2 years?															
22	2030033	Is an approved monitoring plan maintained on-site?															
23	2030002A	Has monitoring system been certified annually? 10/10/14															
24	2030002B	Monitoring System Certification submitted within thirty days?															
25	2030055	Have spill buckets been tested annually? 10/10/14															
26	2060016	Was secondary containment testing conducted at installation?															
27	2030047	Secondary containment maintained tight and has been confirmed by testing? 10/12/12															
28	2030048A	Was secondary containment testing conducted within 6 months of install/repair?															
29	2030048B	Has Secondary Containment Testing been conducted every 36 months?															
30	2010009	Has Secondary Containment Test been submitted within thirty days?															
31	2030064	Was Notification given 48 hours prior to testing?															
32	2010011	Has data been electronically submitted into CERS?															
		ENFORCEMENT															
33	2030044	Did the owner/operator deposit or allow the deposit of petroleum into a UST that has a red tag affixed to the fill pipe?															
34	2030045	Has the Red Tag been removed, defaced, altered, or otherwise tampered with so that the information on the tag is not legible?															
35	2030063	Were temporary closure requirements complied with?															
36	2030038	Were permanent closure requirements complied with?															
37	2030061	Was a suspected or actual unauthorized release recorded and/or reported in an appropriate time frame?															
38	2010006	Owner/Operator has not made false statements or representation on any required document?															
39	2030039	Did they comply with all of the operating permit conditions?

		MAINTENANCE															
40	2030059	UST system maintained in accordance with exclusion/exemption status?			/			/			/						
		TECHNICANS															
41	2030023A	Has the service technician obtained and maintained a current ICC certification?		/			/			/							
42	2030024A	Has the service technician obtained and maintained a proper license?		/			/			/							
43	2030031A	Has the service technician obtained and maintained a manufacturer certification?		/			/			/							
44	2030023C	Has the installer obtained and maintained a current ICC certification?		/			/			/							
45	2030024B	Has the installer obtained and maintained a proper license?		/			/			/							
46	2030031B	Has the Installer obtained and maintained a manufacturer certification?		/			/			/							
		DESIGNATED OPERATOR															
47	2030023B	Has the designated operator obtained and maintained a current ICC certification?		/			/			/							
48	2010004A	Have they maintained a copy of monthly designated operator reports for 12 months?		/			/			/							
49	2010004B	Have they maintained a list of trained employees?		/			/			/							
50	2030012A	Has training been provided to facility employee(s) responsible for proper operation and maintenance every 12 months?		/			/			/							
51	2030012B	Did they train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire?		/			/			/							
52	2030012C	Is there at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system?		/			/			/							
53	2030010	Has the designated operator notified the owner or operator of any condition discovered during the monthly visual inspection that may require follow-up actions?		/			/			/							
54	2030013A	Was the monthly alarm history report inspected by the designated operator?		/			/			/							
55	2030013B	Was a copy of the alarm history report attached to the monthly designated operator report?		/			/			/							
56	2030013C	Was the spill container/spill bucket inspected for the presence of liquid/debris by the designated operator?		/			/			/							
57	2030013D	Was the UDC inspected by the designated operator for the presence of liquid/debris?		/			/			/							
58	2030013E	Was the UDC Inspected by the designated operator to ensure that monitoring equipment is placed in the proper position?		/			/			/							
59	2030013F	Did the designated operator inspect for liquid/debris in the containment sump where an alarm occurred?		/			/			/							
60	2030013G	Did the designated operator inspect the containment sump for liquid/debris for which there is no record of a service visit?		/			/			/							
61	2030013H	Has all testing and maintenance been completed and documented?		/			/			/							
62	2030001	Were leak detection alarm logs, maintenance and records of appropriate follow-up actions maintained?		/			/			/							
		UST															
63	2030043	Has the leak detection equipment been properly programmed and properly operated?		/			/			/							
64	2030016A	Is the interstitial space of the tank continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected?		/			/			/							
		Monitoring System Manufacturer's Name and Model #	VR7L335														
65	2030034	Was a tag/sticker properly affixed to the monitoring equipment being certified, repaired, or replaced?		/			/			/							
66	2030003	Leak detection system maintains continuous an audible and visual alarm		/			/			/							
		SPILL BUCKET															
67	2060020A	Are spill buckets installed?			/			/			/						
68	2060020B	Does the spill bucket/container have a functional drain valve or other liquid removal method?			/			/			/						
69	2060020C	Is the spill bucket resistant to galvanic corrosion?			/			/			/						
70	2030054A	Are the spill buckets in good condition?			/			/			/						
71	2030054B	Are the spill buckets free of debris/liquid?			/			/			/						
72	2030054C	Were spill bucket contents removed when a release was observed?			/			/			/						
73	2060019	Do spill buckets have a minimum capacity of five gallons?			/			/			/						
		OVERFILL PREVENTION															
74	2030035	Was the UST system operated to prevent spills and/or overfills?			/			/			/						
75	2030036A	Overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm (Ball float or external alarm at 90%); or			/			/			/						
76	2030036B	2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills (Ball float and external alarm); or			/			/			/						
77	2030036C	3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity (Flapper at 95%); or			/			/			/						
78	2030036D	4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling (Flapper below tank top fitting)			/			/			/

		SUMP															
79	2030008C	Are the sumps in good condition?		✓			✓			✓							
80	2030008D	Are the sumps free of debris/liquid?		✓			✓			✓							
81	2030008E	Is the secondary containment in good condition?		✓			✓			✓							
82	2030008F	Is the secondary containment free of debris/liquid?		✓			✓			✓							
83	2030060	Is entry fitting maintained such that it properly seals to the containment?		✓			✓			✓							
84	2030040	Is the secondarily contained piping maintained to allow drainback to the sump in the event of a leak?		✓			✓			✓							
85	2030026B	Does the electronic leak detection equipment successfully trigger an audible/visual alarm?		✓			✓			✓							
86	2030016C	Are the sumps continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected?		✓			✓			✓							
87	2030062	Is leak detection equipment set up such that the monitoring system would detect a leak at the earliest opportunity and/or alert the owner/operator of a leak?		✓			✓			✓							
88	2060015	Are the sensors located in the proper position/location?		✓			✓			✓							
		Line Leak Detectors															
89	2060012	Does the pressurized piping system have a line leak detector installed?			✓			✓			✓						
		Line Leak Detector Model #															
90	2030026A	Is the line leak detector certified to detect a 3gph leak and restrict or shutoff the flow of product through the piping when a leak is detected?			✓			✓			✓						
91	2060017	Is an automatic line leak detector installed which is capable of shutting off the pump when a release occurs, fails, or is disconnected? (Single Walled)			✓			✓			✓						
92	2060014	Is the leak detection equipment correct for the type of system?			✓			✓			✓						
		PIPING															
		Product Piping Manufacturing	Asmith														
		Singlewalled Pressurized Piping															
93	2030027	Does the pump shut down when a leak is detected or when line leak detector is disconnected? (Positive shutdown/failsafe)			✓			✓			✓						
94	2060018	Was it demonstrated that existing single wall pressurized pipe containing motor vehicle fuel is constructed of glass fiber reinforced plastic, cathodically protected steel, or steel clad with glass reinforced plastic?			✓			✓			✓						
95	2030052	Was pressurized pipe containing motor vehicle fuel monitored at least hourly at any pressure and was a 0.2 gph monthly line integrity test or 0.1 gph annual line integrity test performed?			✓			✓			✓						
		Singlewalled Conventional Suction Piping															
96	2030049	Was daily monitoring conducted for air in the pipe and were the results logged?			✓			✓			✓						
97	2030050	Was a 0.1 gph piping integrity test conducted every three years?			✓			✓			✓						
		Singlewalled Gravity Piping															
98	2030051	Was a 0.1 gph piping integrity test or overfill integrity test conducted every two years?			✓			✓			✓						
		Singlewalled Safe Suction Piping															
99	2030053A	Does piping drain back into UST if the suction is released?			✓			✓			✓						
100	2030053B	Does piping have a check valve on the piping located directly below the suction pump?			✓			✓			✓						
		Double Walled Safe, Conventional, Gravity Piping															
101	2060006	Does secondary containment piping slope back to the collection sump?		✓			✓			✓							
		Double Walled Pressurized Piping															
102	2030042A	Was an annual line integrity test performed for pressurized pipe that does not utilize fail safe or shut down?			✓			✓			✓						
103	2030042B	Was a passing result achieved on the annual line integrity test for pressurized pipe that does not utilize fail safe or shut down?			✓			✓			✓						
104	2030016B	Is the piping continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected?			✓			✓			✓						
105	2030017	Product piping outside the UDC is fail-safe and shuts down the pump or restricts flow?			✓			✓			✓						
106	2030018	Is the double wall pressurized piping in the turbine sump continuously monitored with a system that activates an audible and visual alarm or restricts or stops flow at dispenser when a leak is detected?			✓			✓			✓						
107	2030025A	Is the pressurized piping able to monitor at least hourly with the ability to detect of release of 3.0 gph or trigger an audible/visual alarm?			✓			✓			✓						
108	2030025B	Does the pressurized piping restrict product flow through the piping when a release occurs?			✓			✓			✓						
109	2030025C	Does the pressurized piping trigger an alarm when a release occurs?			✓			✓			✓						
		Other Piping															
110	2030020	Unburied fuel piping (connected to an emergency tank system) visually inspected at least monthly and log kept?			✓			✓			✓						
111	2030020X	Buried fuel piping connected to an emergency genrator tank systems, the monitoring system checked at least daily by either remote electronic access or visually inspected and log kept onsite?			✓			✓			✓

		UDC															
112	2030008A	Are the UDCs in good condition?															
113	2030008B	Are the UDCs free of debris/liquid?															
114	2030019	Monitoring system in the UDCs activates an audible and visual alarm or stops the flow at the UDC?	N/A														
		Sensor Model # or Type															
		INSPECTION															
115	2060001	Were as-built plans submitted for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application?			✓			✓			✓						
116	2060010	Does the UST storing a hazardous substance have secondary containment?		✓				✓			✓						
117	2060007	Was non-integral secondary containment designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry core or engineering standard?			✓			✓			✓						
118	2060009	Was a permit obtained to install, replace, repair, or modify part of the UST system containment or leak detection equipment? PENDING		✓			✓			✓							
119	2060021	Is a striker plate installed & positioned correctly under any opening that could be used for manual dipsticking or do they have a drop-tube mounted bottom protector?			✓			✓			✓						
120	2010005	Were enhanced leak detection testing results submitted to the board and the local agency within 60 days of test completion?			✓			✓			✓						
121	2030069	Is the secondary containment free of liquid and debris for a tank installed after January 1, 1984?		✓			✓	✓		✓	✓						
122	2030070	The primary containment maintained product-tight for a tank installed after January 1, 1984?		✓			✓			✓							
123	2030071	Maintain primary containment as product-tight and compatible with the stored product for a tank installed after July 1, 2004?			✓			✓			✓						
124	2030072	Maintain the primary containment as product-tight and compatible with stored product for a tank installed after July 1, 2003 and before July 1, 2004?			✓			✓			✓						
125	2030073	Corrective items noted by on an inspection report have been returned to compliance?		✓		✓			✓								
126	2060025	Secondary Contaimment free of liquid and debris for tank installed after January 1, 1984?		✓			✓			✓							
127	2060026	Primary containment is product ight for tank installed after January 1, 1984?		✓			✓			✓							
128	2060027	Maintain primary containment as product-tight and compatible with the stored for tank installed after July 1, 2004?			✓			✓			✓						
129	2060028	Primary containment as product-tight and compatible with stored product for tank installed after July 1, 2003 and before July 1, 2004?			✓			✓			✓						
		DOUBLE WALLED PRE 2003 TANKS															
130	2060005	Was system constructed with a monitoring system capable of detecting entry into secondary containment?		✓			✓			✓							
		TANKS 2003 - PRESENT															
131	2030065	Is the interstitial space maintained under constant vacuum, pressure, or hydrostatic conditions, such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment? (VPH - 7/2004)															
132	2060008	Was enhanced leak detection testing performed before the tank was placed in use?			N/A			N/A									
133	2060022A	Is the UST system installed on or after July 1, 2003 and before July 1, 2004, designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment? (Including Vent/Vapor Piping)															
134	2060022B	Is the UST system installed on or after July 1, 2003 and before July 1, 2004, capable of detecting water intrusion into the secondary containment? (Including Vent/Vapor Piping)															
135	2060023	Is the UST system installed on or after July 1, 2004, designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment? (VPH)

		LINED TANKS															
136	2060024	UST system is made of or lined with material that are compatible with the substance stored?															
137	2030028A	Was a proper written tank lining certification submitted within 30 days of completion of the inspection?															
138	2030028B	Was a tank integrity test performed?															
139	2030028C	Was a vacuum test performed following lining? N/A															
140	2030028D	Did they employ a proper coatings expert and/or special inspector?															
141	2030029	Lined or repaired steel tank was inspected within 10 years of lining and every 5 years after?															
142	2060003	Were components inspected at the install site using an electrical resistance holiday detector and repaired if necessary?															
		SINGLE WALLED TANK MONITORING															
143	2010002A	Have they maintained records of cathodic protection systems testing conducted within six months of installation and at least every three years thereafter?			/			/			/						
144	2010002B	Have they maintained records for the 60 calendar day inspection of the impressed-current system?			/			/			/						
145	2010002C	Have they maintained records for sacrificial anodes testing every three years?			/			/			/						
146	2010002D	Do they have written monitoring and maintenance records on-site or off-site at a readily available location if approved?			/		/			/							
147	2030004	Automatic tank gauge programmed to test the tank at least once per month at 0.1 gallons per hour?			/			/			/						
148	2030005	The 0.2 gallons per hour continuous in tank lek decteciton performed?			/			/			/						
149	2030006A	Monthly 0.2 gallons per hour automatic tank gauging performed?			/		/			/							
150	2030006B	Did the automatic tank gauge generate and print a hard copy of the monthly 0.2 gph test?			/		/			/							
151	2030009A	Was the impressed-current system inspected every 60 calendar days?			/			/			/						
152	2030009C	Was the impressed-current system inspected within six months of installation and at least every three years thereafter?			/			/			/						
153	2030009D	Were the sacrificial anodes tested once every three years in accordance with the manufacturer's instructions?			/			/			/						
154	2030015	Facility exhibited that the method used to monitor the tank meets the monitoring methods in 2643(f)?			/		/			/							
155	2030056	Was an annual SIR report submitted?			/			/			/						
156	2030030	Weekly manual tank gauging performed in accordance to the required specifications?			/			/			/						
157	2030057A	Did they notify of a possible release within 24 hours?			/			/			/						
158	2030057B	Was a copy of the release report submitted within 10 days?			/			/			/						
159	2030057C	Were records inspected for errors and the UST system physically inspected within 24 hours?			/			/			/						
160	2030057D	Were meters recalibrated within 48 hours of receipt of report?			/			/			/						
161	2030058A	Were measurements taken daily (SIR)?			/			/			/						
162	2030058B	Was monthly inventory calculated(SIR)?			/			/			/						
163	2030058C	Is the system capable of detecting a 0.2 gph release(SIR)?			/			/			/						
164	2030058D	Was a tank integrity test conducted every two years(SIR)?			/			/			/						
165	2030058E	Was piping test conducted within 15 days of receipt of two successive SIR reports which were inconclusive or which indicated a possible release(SIR)?			/			/			/						
166	2030058F	Were dispenser meters calibrated annually(SIR)?			/			/			/						
167	2060002	Automatic tank gauging/continuous in tank leak detection system installed/properly functioning?			/			/			/						
168	2060004A	Is UST corrosion protection installed?			/			/			/						
169	2060004B	Does field-installed cathodic protection meet the consensus standards?			/			/			/

NOTICE OF VIOLATION ORDER TO COMPLY

Date 10-10-14 Permit 55945

Owner/Operator JOE REBELO Site/File 006994-007311

Site Name BANK OF THE WEST Violation # 287564

Site Address 1977 SATURN ST City, Zip MONTEREY PARK CA. 91755

Mailing Address _____ City, Zip _____

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous materials underground storage tanks (USTs) which are violations of California Health and Safety Code (CH&SC) Chapter 6.7; Los Angeles County Code (LACC), Title 11, Division 4 and/or the conditions and limitations of the above permit.

YOU ARE HEREBY DIRECTED to submit to the office indicated below, the following items checked:

☐ **OPERATING WITHOUT A CERTIFIED / OPERATING MONITORING SYSTEM – CH&SC 25293**

YOU ARE HEREBY DIRECTED to have the monitoring system and the USTs certified immediately and the results received by this office no later than 7 Days from the date of this Notice or the contents of all underground storage tank systems are to be removed within this time period.

☑ **MISSING TEST RESULTS** – Test must be conducted and results received by this office.

- ☑ Secondary Containment Testing FAILED 10/7/14
- ☐ Tank Integrity Testing
- ☐ Corrosion Protection Certification
- ☐ AB 2481 Testing
- ☐ Line Testing
- ☐ Line Leak Detection Testing
- ☐ Financial Responsibility Certification
- ☐ Owner Statement of Designated Operator
- ☐ Facility Employee Training
- ☐ Missing Designated Operator Monthly Form
- ☐ Monitoring/Response Plan
- ☐ _____
- ☐ _____
- ☐ _____

☐ **UNREGISTERED TANKS – CH&SC 25286**

☐ **OPERATING WITHOUT A PERMIT DUE TO A CHANGE OF OWNERSHIP – CH&SC 25284 (c)**

- ☐ Complete and sign the Transfer of Ownership Application (yellow form).
- ☐ An application fee of $_____ payable to the County of Los Angeles Department of Public Works.
- ☐ verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) http://cersbusiness.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f, including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data (You must include the Board of Equalization Number)
- ☐ Complete and sign the Certificate of Financial Responsibility Form
- ☐ completed and signed Response Plan
- ☐ completed and signed Owner Statement of Designated Operator
- ☐ Provide Monitoring System Certification, which is current (performed within the last 12 months).

☐ **OUT OF SERVICE UNDERGROUND STORAGE TANKS – CH&SC 25298**

Immediately remove all residual liquids, solids, or sludge stored within the USTs to a legal disposal facility. Provide copy of proof of legal disposal.

- ☐ Complete, and sign the Application for Closure.
- ☐ An Application for Closure fee of $_____ payable to the County of Los Angeles Department of Public Works.
- ☐ Complete and sign Permit Application Supplemental/Notice to File.
- ☐ verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) http://cersbusiness.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f, including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data (You must include the Board of Equalization Number)
- ☐ Complete and sign the Certificate of Financial Responsibility Form
- ☐ An Operating Permit Application fee of $_____ payable to the County of Los Angeles, Department of Public Works.
- ☐ Submit an Annual Permit Maintenance fee of $_____ payable to the County of Los Angeles Department of Public Works.

YOU ARE FURTHER DIRECTED to submit to the office below evidence of compliance with the above directives by no later than fifteen (15) days from the date on this Notice, unless otherwise directed above. Failure to comply with the Underground Storage Tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $5,000, or by one year in county jail or both. Additionally pursuant to LACC Title 1, § 1.25.040, each violation of any provision of this Code and each separate offense is subject to an administrative fine up to $1,000 for each separate day during which any violation occurs or continues. Furthermore, a noncompliance fee may be imposed to recover the cost incurred by this Department in the enforcement of LACC.

If you have any questions regarding this matter, please contact WALTER/ LIETDANOBE, [✓] Monday through Friday, 8 a.m. to 9:30 a.m. or [ ] Monday through Thursday, 7 a.m. to 5:30 p.m. at (323) 881-7031

		DESIGNATED OPERATOR															
47	2030023B	Has the designated operator obtained and maintained a current ICC certification?		/			/			/							
48	2010004A	Have they maintained a copy of monthly designated operator reports for 12 months?		/			/			/							
49	2010004B	Have they maintained a list of trained employees?		/			/			/							
50	2030012A	Has training been provided to facility employee(s) responsible for proper operation and maintenance every 12 months?		/			/			/							
51	2030012B	Did they train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire?		/			/			/							
52	2030012C	Is there at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system?		/			/			/							
53	2030010	Has the designated operator notified the owner or operator of any condition discovered during the monthly visual inspection that may require follow-up actions?		/			/			/							
54	2030013A	Was the monthly alarm history report inspected by the designated operator?		/			/			/							
55	2030013B	Was a copy of the alarm history report attached to the monthly designated operator report?		/			/			/							
56	2030013C	Was the spill container/spill bucket inspected for the presence of liquid/debris by the designated operator?		/			/			/							
57	2030013D	Was the UDC inspected by the designated operator for the presence of liquid/debris?		/			/			/							
58	2030013E	Was the UDC Inspected by the designated operator to ensure that monitoring equipment is placed in the proper position?		/			/			/							
59	2030013F	Did the designated operator inspect for liquid/debris in the containment sump where an alarm occurred?		/			/			/							
60	2030013G	Did the designated operator inspect the containment sump for liquid/debris for which there is no record of a service visit?		/			/			/							
61	2030013H	Has all testing and maintenance been completed and documented?		/			/			/							
62	2030001	Were leak detection alarm logs, maintenance and records of appropriate follow-up actions maintained?		/			/			/							
		UST															
63	2030043	Has the leak detection equipment been properly programmed and properly operated?		/			/			/							
64	2030016A	Is the interstitial space of the tank continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected?		/			/			/							
		Monitoring System Manufacturer's Name and Model #	VR7L335														
65	2030034	Was a tag/sticker properly affixed to the monitoring equipment being certified, repaired, or replaced?		/			/			/							
66	2030003	Leak detection system maintains continuous an audible and visual alarm		/			/			/							
		SPILL BUCKET															
67	2060020A	Are spill buckets installed?			/			/			/						
68	2060020B	Does the spill bucket/container have a functional drain valve or other liquid removal method?			/			/			/						
69	2060020C	Is the spill bucket resistant to galvanic corrosion?			/			/			/						
70	2030054A	Are the spill buckets in good condition?			/			/			/						
71	2030054B	Are the spill buckets free of debris/liquid?			/			/			/						
72	2030054C	Were spill bucket contents removed when a release was observed?			/			/			/						
73	2060019	Do spill buckets have a minimum capacity of five gallons?			/			/			/						
		OVERFILL PREVENTION															
74	2030035	Was the UST system operated to prevent spills and/or overfills?			/			/			/						
75	2030036A	Overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm (Ball float or external alarm at 90%); or			/			/			/						
76	2030036B	2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills (Ball float and external alarm); or			/			/			/						
77	2030036C	3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity (Flapper at 95%); or			/			/			/						
78	2030036D	4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling (Flapper below tank top fitting)			/			/			/

		SUMP															
79	2030008C	Are the sumps in good condition?		✓			✓			✓							
80	2030008D	Are the sumps free of debris/liquid?		✓			✓			✓							
81	2030008E	Is the secondary containment in good condition?		✓			✓			✓							
82	2030008F	Is the secondary containment free of debris/liquid?		✓			✓			✓							
83	2030060	Is entry fitting maintained such that it properly seals to the containment?		✓			✓			✓							
84	2030040	Is the secondarily contained piping maintained to allow drainback to the sump in the event of a leak?		✓			✓			✓							
85	2030026B	Does the electronic leak detection equipment successfully trigger an audible/visual alarm?		✓			✓			✓							
86	2030016C	Are the sumps continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected?		✓			✓			✓							
87	2030062	Is leak detection equipment set up such that the monitoring system would detect a leak at the earliest opportunity and/or alert the owner/operator of a leak?		✓			✓			✓							
88	2060015	Are the sensors located in the proper position/location?		✓			✓			✓							
		Line Leak Detectors															
89	2060012	Does the pressurized piping system have a line leak detector installed?			✓			✓			✓						
		Line Leak Detector Model #															
90	2030026A	Is the line leak detector certified to detect a 3gph leak and restrict or shutoff the flow of product through the piping when a leak is detected?			✓			✓			✓						
91	2060017	Is an automatic line leak detector installed which is capable of shutting off the pump when a release occurs, fails, or is disconnected? (Single Walled)			✓			✓			✓						
92	2060014	Is the leak detection equipment correct for the type of system?			✓			✓			✓						
		PIPING															
		Product Piping Manufacturing	Asmith														
		Singlewalled Pressurized Piping															
93	2030027	Does the pump shut down when a leak is detected or when line leak detector is disconnected? (Positive shutdown/failsafe)			✓			✓			✓						
94	2060018	Was it demonstrated that existing single wall pressurized pipe containing motor vehicle fuel is constructed of glass fiber reinforced plastic, cathodically protected steel, or steel clad with glass reinforced plastic?			✓			✓			✓						
95	2030052	Was pressurized pipe containing motor vehicle fuel monitored at least hourly at any pressure and was a 0.2 gph monthly line integrity test or 0.1 gph annual line integrity test performed?			✓			✓			✓						
		Singlewalled Conventional Suction Piping															
96	2030049	Was daily monitoring conducted for air in the pipe and were the results logged?			✓			✓			✓						
97	2030050	Was a 0.1 gph piping integrity test conducted every three years?			✓			✓			✓						
		Singlewalled Gravity Piping															
98	2030051	Was a 0.1 gph piping integrity test or overfill integrity test conducted every two years?			✓			✓			✓						
		Singlewalled Safe Suction Piping															
99	2030053A	Does piping drain back into UST if the suction is released?			✓			✓			✓						
100	2030053B	Does piping have a check valve on the piping located directly below the suction pump?			✓			✓			✓						
		Double Walled Safe, Conventional, Gravity Piping															
101	2060006	Does secondary containment piping slope back to the collection sump?		✓			✓			✓							
		Double Walled Pressurized Piping															
102	2030042A	Was an annual line integrity test performed for pressurized pipe that does not utilize fail safe or shut down?			✓			✓			✓						
103	2030042B	Was a passing result achieved on the annual line integrity test for pressurized pipe that does not utilize fail safe or shut down?			✓			✓			✓						
104	2030016B	Is the piping continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected?			✓			✓			✓						
105	2030017	Product piping outside the UDC is fail-safe and shuts down the pump or restricts flow?			✓			✓			✓						
106	2030018	Is the double wall pressurized piping in the turbine sump continuously monitored with a system that activates an audible and visual alarm or restricts or stops flow at dispenser when a leak is detected?			✓			✓			✓						
107	2030025A	Is the pressurized piping able to monitor at least hourly with the ability to detect of release of 3.0 gph or trigger an audible/visual alarm?			✓			✓			✓						
108	2030025B	Does the pressurized piping restrict product flow through the piping when a release occurs?			✓			✓			✓						
109	2030025C	Does the pressurized piping trigger an alarm when a release occurs?			✓			✓			✓						
		Other Piping															
110	2030020	Unburied fuel piping (connected to an emergency tank system) visually inspected at least monthly and log kept?			✓			✓			✓						
111	2030020X	Buried fuel piping connected to an emergency genrator tank systems, the monitoring system checked at least daily by either remote electronic access or visually inspected and log kept onsite?			✓			✓			✓

		UDC															
112	2030008A	Are the UDCs in good condition?															
113	2030008B	Are the UDCs free of debris/liquid?															
114	2030019	Monitoring system in the UDCs activates an audible and visual alarm or stops the flow at the UDC?	N/A														
		Sensor Model # or Type															
		INSPECTION															
115	2060001	Were as-built plans submitted for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application?			✓			✓			✓						
116	2060010	Does the UST storing a hazardous substance have secondary containment?		✓				✓			✓						
117	2060007	Was non-integral secondary containment designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry core or engineering standard?			✓			✓			✓						
118	2060009	Was a permit obtained to install, replace, repair, or modify part of the UST system containment or leak detection equipment? PENDING		✓			✓			✓							
119	2060021	Is a striker plate installed & positioned correctly under any opening that could be used for manual dipsticking or do they have a drop-tube mounted bottom protector?			✓			✓			✓						
120	2010005	Were enhanced leak detection testing results submitted to the board and the local agency within 60 days of test completion?			✓			✓			✓						
121	2030069	Is the secondary containment free of liquid and debris for a tank installed after January 1, 1984?		✓			✓	✓		✓	✓						
122	2030070	The primary containment maintained product-tight for a tank installed after January 1, 1984?		✓			✓			✓							
123	2030071	Maintain primary containment as product-tight and compatible with the stored product for a tank installed after July 1, 2004?			✓			✓			✓						
124	2030072	Maintain the primary containment as product-tight and compatible with stored product for a tank installed after July 1, 2003 and before July 1, 2004?			✓			✓			✓						
125	2030073	Corrective items noted by on an inspection report have been returned to compliance?		✓		✓			✓								
126	2060025	Secondary Contaimment free of liquid and debris for tank installed after January 1, 1984?		✓			✓			✓							
127	2060026	Primary containment is product ight for tank installed after January 1, 1984?		✓			✓			✓							
128	2060027	Maintain primary containment as product-tight and compatible with the stored for tank installed after July 1, 2004?			✓			✓			✓						
129	2060028	Primary containment as product-tight and compatible with stored product for tank installed after July 1, 2003 and before July 1, 2004?			✓			✓			✓						
		DOUBLE WALLED PRE 2003 TANKS															
130	2060005	Was system constructed with a monitoring system capable of detecting entry into secondary containment?		✓			✓			✓							
		TANKS 2003 - PRESENT															
131	2030065	Is the interstitial space maintained under constant vacuum, pressure, or hydrostatic conditions, such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment? (VPH - 7/2004)															
132	2060008	Was enhanced leak detection testing performed before the tank was placed in use?			N/A			N/A									
133	2060022A	Is the UST system installed on or after July 1, 2003 and before July 1, 2004, designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment? (Including Vent/Vapor Piping)															
134	2060022B	Is the UST system installed on or after July 1, 2003 and before July 1, 2004, capable of detecting water intrusion into the secondary containment? (Including Vent/Vapor Piping)															
135	2060023	Is the UST system installed on or after July 1, 2004, designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment? (VPH)															
		ONSITE TANK TOP INSPECTION															
		Annular Space Sensors (if applicable)	N/A			N/A			N/A								
		Fill Sump Sensors	001			002			003								
		Piping Sump Sensors	001			002			003

		LINED TANKS															
136	2060024	UST system is made of or lined with material that are compatible with the substance stored?															
137	2030028A	Was a proper written tank lining certification submitted within 30 days of completion of the inspection?															
138	2030028B	Was a tank integrity test performed?															
139	2030028C	Was a vacuum test performed following lining? N/A															
140	2030028D	Did they employ a proper coatings expert and/or special inspector?															
141	2030029	Lined or repaired steel tank was inspected within 10 years of lining and every 5 years after?															
142	2060003	Were components inspected at the install site using an electrical resistance holiday detector and repaired if necessary?															
		SINGLE WALLED TANK MONITORING															
143	2010002A	Have they maintained records of cathodic protection systems testing conducted within six months of installation and at least every three years thereafter?			/			/			/						
144	2010002B	Have they maintained records for the 60 calendar day inspection of the impressed-current system?			/			/			/						
145	2010002C	Have they maintained records for sacrificial anodes testing every three years?			/			/			/						
146	2010002D	Do they have written monitoring and maintenance records on-site or off-site at a readily available location if approved?			/		/			/							
147	2030004	Automatic tank gauge programmed to test the tank at least once per month at 0.1 gallons per hour?			/			/			/						
148	2030005	The 0.2 gallons per hour continuous in tank lek decteciton performed?			/			/			/						
149	2030006A	Monthly 0.2 gallons per hour automatic tank gauging performed?			/		/			/							
150	2030006B	Did the automatic tank gauge generate and print a hard copy of the monthly 0.2 gph test?			/		/			/							
151	2030009A	Was the impressed-current system inspected every 60 calendar days?			/			/			/						
152	2030009C	Was the impressed-current system inspected within six months of installation and at least every three years thereafter?			/			/			/						
153	2030009D	Were the sacrificial anodes tested once every three years in accordance with the manufacturer's instructions?			/			/			/						
154	2030015	Facility exhibited that the method used to monitor the tank meets the monitoring methods in 2643(f)?			/		/			/							
155	2030056	Was an annual SIR report submitted?			/			/			/						
156	2030030	Weekly manual tank gauging performed in accordance to the required specifications?			/			/			/						
157	2030057A	Did they notify of a possible release within 24 hours?			/			/			/						
158	2030057B	Was a copy of the release report submitted within 10 days?			/			/			/						
159	2030057C	Were records inspected for errors and the UST system physically inspected within 24 hours?			/			/			/						
160	2030057D	Were meters recalibrated within 48 hours of receipt of report?			/			/			/						
161	2030058A	Were measurements taken daily (SIR)?			/			/			/						
162	2030058B	Was monthly inventory calculated(SIR)?			/			/			/						
163	2030058C	Is the system capable of detecting a 0.2 gph release(SIR)?			/			/			/						
164	2030058D	Was a tank integrity test conducted every two years(SIR)?			/			/			/						
165	2030058E	Was piping test conducted within 15 days of receipt of two successive SIR reports which were inconclusive or which indicated a possible release(SIR)?			/			/			/						
166	2030058F	Were dispenser meters calibrated annually(SIR)?			/			/			/						
167	2060002	Automatic tank gauging/continuous in tank leak detection system installed/properly functioning?			/			/			/						
168	2060004A	Is UST corrosion protection installed?			/			/			/						
169	2060004B	Does field-installed cathodic protection meet the consensus standards?			/			/			/

NOTICE OF VIOLATION ORDER TO COMPLY

Date 10-10-14 Permit 55945

Owner/Operator JOE REBELO Site/File 006994-007311

Site Name BANK OF THE WEST Violation # 287564

Site Address 1977 SATURN ST City, Zip MONTEREY PARK CA. 91755

Mailing Address _____ City, Zip _____

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous materials underground storage tanks (USTs) which are violations of California Health and Safety Code (CH&SC) Chapter 6.7; Los Angeles County Code (LACC), Title 11, Division 4 and/or the conditions and limitations of the above permit.

YOU ARE HEREBY DIRECTED to submit to the office indicated below, the following items checked:

☐ **OPERATING WITHOUT A CERTIFIED / OPERATING MONITORING SYSTEM – CH&SC 25293**

YOU ARE HEREBY DIRECTED to have the monitoring system and the USTs certified immediately and the results received by this office no later than 7 Days from the date of this Notice or the contents of all underground storage tank systems are to be removed within this time period.

☑ **MISSING TEST RESULTS** – Test must be conducted and results received by this office.

- ☑ Secondary Containment Testing FAILED 10/7/14
- ☐ Tank Integrity Testing
- ☐ Corrosion Protection Certification
- ☐ AB 2481 Testing
- ☐ Line Testing
- ☐ Line Leak Detection Testing
- ☐ Financial Responsibility Certification
- ☐ Owner Statement of Designated Operator
- ☐ Facility Employee Training
- ☐ Missing Designated Operator Monthly Form
- ☐ Monitoring/Response Plan
- ☐ _____
- ☐ _____
- ☐ _____

☐ **UNREGISTERED TANKS – CH&SC 25286**

☐ **OPERATING WITHOUT A PERMIT DUE TO A CHANGE OF OWNERSHIP – CH&SC 25284 (c)**

- ☐ Complete and sign the Transfer of Ownership Application (yellow form).
- ☐ An application fee of $_____ payable to the County of Los Angeles Department of Public Works.
- ☐ verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) http://cersbusiness.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f, including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data (You must include the Board of Equalization Number)
- ☐ Complete and sign the Certificate of Financial Responsibility Form
- ☐ completed and signed Response Plan
- ☐ completed and signed Owner Statement of Designated Operator
- ☐ Provide Monitoring System Certification, which is current (performed within the last 12 months).

☐ **OUT OF SERVICE UNDERGROUND STORAGE TANKS – CH&SC 25298**

Immediately remove all residual liquids, solids, or sludge stored within the USTs to a legal disposal facility. Provide copy of proof of legal disposal.

- ☐ Complete, and sign the Application for Closure.
- ☐ An Application for Closure fee of $_____ payable to the County of Los Angeles Department of Public Works.
- ☐ Complete and sign Permit Application Supplemental/Notice to File.
- ☐ verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) http://cersbusiness.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f, including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data (You must include the Board of Equalization Number)
- ☐ Complete and sign the Certificate of Financial Responsibility Form
- ☐ An Operating Permit Application fee of $_____ payable to the County of Los Angeles, Department of Public Works.
- ☐ Submit an Annual Permit Maintenance fee of $_____ payable to the County of Los Angeles Department of Public Works.

YOU ARE FURTHER DIRECTED to submit to the office below evidence of compliance with the above directives by no later than fifteen (15) days from the date on this Notice, unless otherwise directed above. Failure to comply with the Underground Storage Tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $5,000, or by one year in county jail or both. Additionally pursuant to LACC Title 1, § 1.25.040, each violation of any provision of this Code and each separate offense is subject to an administrative fine up to $1,000 for each separate day during which any violation occurs or continues. Furthermore, a noncompliance fee may be imposed to recover the cost incurred by this Department in the enforcement of LACC.

If you have any questions regarding this matter, please contact WALTER/ LIETDANOBE, [✓] Monday through Friday, 8 a.m. to 9:30 a.m. or [ ] Monday through Thursday, 7 a.m. to 5:30 p.m. at (323) 881-7031

ENVIRONMENTAL PROGRAMS DIVISION
NOTICE OF VIOLATION ORDER TO COMPLY

Date: 11-15-16 Permit: 812530

Owner/Operator: KAIYUNG JUNES Site/Fac: 006994 - 062151

Site Name: ~~1977~~ 1977 SATURN Violation #: 8470916

Site Address: 1977 SATURN ST City, Zip: MONTEREY PARK, CA. 91755

Mailing Address: 801 N BRAND AVE SUITE 220 City, Zip: GLENDALE, CA. 91203

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous substance underground storage tanks (USTs) which are in violation of California Health and Safety Code (CH&SC) Chapter 6.7 and/or 6.11, Los Angeles County Code (LACC) Title 11 Division 4 or applicable conditions and limitations of the above permit. YOU ARE HEREBY DIRECTED to submit to the office indicated below the following items checked:

☐ OPERATING WITHOUT A CERTIFIED/OPERATING MONITORING SYSTEM – CH&SC 25290

YOU ARE HEREBY DIRECTED to have the monitoring system and the UST system certified, tested and its results reviewed by this office no later than 7 days from the date of this Notice and the contents of all UST systems are to be removed within this time period.

☐ MISSING TEST RESULTS / DOCUMENTS – Required testing/items must be conducted and results reviewed by this office

- ☐ Secondary Containment Testing
- ☐ Tank Integrity Testing
- ☐ Corrosion Protection Certification
- ☐ AB 2481 Testing
- ☐ Line Testing
- ☐ Line Leak Detector Testing
- ☐ Facility Employee Training
- ☐ Missing Designated Operator Monthly Form(s)
- ☐

☑ REQUIRED DOCUMENTS / ITEMS MUST BE SUBMITTED TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) –

- ☐ Facility Information Page
- ☐ Tank Information Page
- ☐ Tank Plot Plan
- ☐ Financial Responsibility Certification
- ☐ Chief Financial Officer Letter
- ☐ Owner Statement of Designated Operator
- ☐ Monitoring Plan
- ☐ Response Plan
- ☐ Owner/Operator Agreement
- ☑ Corrections needed as outline in the attached CERS printout
- ☐

YOU ARE FURTHER DIRECTED to submit to the office below evidence of compliance with the above directives by no later than fifteen (15) days from the date of this Notice. Unless otherwise noted above, failure to comply with the Underground Storage Tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $5000, or by one year in county jail or both. Finally, pursuant to Title 11 of the Los Angeles County Code, Sections 11.72.015 and 11.96.020, it is a misdemeanor to violate any of the laws and regulations governing USTs including provisions of CH&SC, Division 20, Chapter 6.7 and 6.11 and regulations that are set forth in the CCR, Title 23, Division 3, Chapter 16. Failure to comply with this Notice may therefore result in criminal prosecution. Furthermore, a reinspection fee may be imposed to recover the cost incurred by this Department in the enforcement of LACC.

If you have any questions regarding this matter, please contact: LAUREN MARANAGE ☑ Monday through Friday, 8 a.m. to 9:30 a.m. or ☐ Monday through Thursday, 7 a.m. to 8:00 a.m. at (323) 890-4145

Site Name 1977 Saturn

Site Address 1977 Saturn St.

Mailing Address 401 N. Brand Ave. Ste 220

Permit #42830

Site/File 6994-62151

Violation # 647333

City/Zip Monterey Park, 91755

City/Zip Glendale, 91203

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous substance underground storage tanks (USTs) which are in violation of California Health and Safety Code (CH&SC) Chapter 6.7 and/or Title 11 Los Angeles County Code (LACC) Title 11 Division 4 and/or the conditions and limitations of the above permit. YOU ARE HEREBY DIRECTED to submit to the office indicated below the following items checked:

X OPERATING WITHOUT A CERTIFIED/OPERATING MONITORING SYSTEM CH&SC 25293

(1) YOU ARE HEREBY DIRECTED to have the monitoring system and the UST system each tested annually and the results received by this office no later than 7 Days from the date of this Notice or the contents of all UST systems are to be removed within this time period.

X MISSING TEST RESULTS / DOCUMENTS – Required testing/items must be conducted and results received by this office.

- X Secondary Containment Testing (2)
- ☐ Tank Integrity Testing
- ☐ Corrosion Protection Certification
- ☐ AB 2481 Testing
- ☐ Line Testing
- ☐ Line Leak Detection Testing
- X Facility Employee Training
- X Missing Designated Operator Monthly Form(s)
- X Underground Storage tank operating permit (keep on site)

X REQUIRED DOCUMENTS / ITEMS MUST BE SUBMITTED TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) –

- ☐ Facility Information Page
- X Tank Information Page
- ☐ Tank Diagram
- ☐ Financial Responsibility Certification
- ☐ Chief Financial Officer Letter
- X Owner Statement of Designated Operator
- ☐ Monitoring Plan
- X Response Plan
- X Certain/Corrosion Agreement
- X Corrections needed as outlined on the attached CERS printout
- ☐ _____

X OTHER

(1) You are required to submit your monitoring system certification test results for 2015 and 2016.

(2) A permit may be required to make repairs on previously failing items.

YOU ARE FURTHER DIRECTED to submit to the office below evidence of compliance with the above directives by no later than fifteen (15) days from the date of this Notice unless otherwise directed above. Failure to comply with the Underground Storage Tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $5000, or by one year in county jail or both. Finally, pursuant to Title 11 of the Los Angeles County Code, Sections 11.72.045 and 11.36.020, it is a misdemeanor to violate any of the laws and regulations governing USTs, including provisions of CH&SC, Division 20, Chapter 6.7 and 6.11 and regulations that are set forth in the CCR, Title 23, Division 3, Chapter 16. Failure to comply with this Notice may therefore result in criminal prosecution. Furthermore, a noncompliance fee may be imposed to recover the costs incurred by the Department in the enforcement of LACC.

If you have any questions regarding this matter, please contact William Edwards at (626) 652-8605 X Monday through Friday, 8 a.m. to 5:00 p.m. or ☐ Monday through Thursday, 7 a.m. to 5:30 p.m.

June 7, 2017

Mr. Dean Christian
BRE CA Office Owner LLC
801 North Brand Avenue, Suite 220
Glendale, CA 91203-3245

Dear Mr. Christian:

NOTICE OF RED TAGGING AND ORDER TO COMPLY (V861516)
NONCOMPLIANT UNDERGROUND STORAGE TANK
1977 SATURN
FACILITY LOCATED AT 1977 SATURN ST, MONTEREY PARK

A review of office records indicates 1977 Saturn has failed to comply with the following Notices:

- Notice of Violation and Order to Comply (V834769) dated June 20, 2016
- Notice of Violation and Order to Comply (V847096) dated November 15, 2016
- Notice of Violation and Order to Comply (V847333) dated November 23, 2016

Pursuant to California Code of Regulations (CCR), Title 23, Division 3, Chapter 16; California Health and Safety Code (CH&SC), Division 20, Chapter 6.7 and 6.11, and Los Angeles County Code (LACC), Title 11, Division 4, 1977 Saturn is directed to fully comply with this Notice and correct the following outstanding underground storage tank (UST) violation:

Records indicate that the UST's are out of service and temporary closure permit A842831 expired on April 24, 2017. Pursuant to the CH&SC, Division 20, Chapter 6.7, and LACC, Title 11, Division 4, no person shall abandon, or temporarily cease operating a UST system.

UST permanently taken out of service (Removed). In order to place the USTs permanently out of service, the following items are required to be submitted to this office:

1. completed and signed Permanent Closure Permit Application (enclosed)
2. closure application fee of $1,182 payable to the County of Los Angeles Department of Public Works
3. a plot plan to scale showing the location of the tank(s) in relation to other structures or equipment
4. Verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) https://cers2.calepa.ca.gov/Account/SignIn?ReturnUrl=%2F, including all UP UST Facility Information data, UP UST Tank Information data, for each UST and UST Monitoring Plan data, UST Response Plan, Certificate of Financial Responsibility and Owner Statement of Designated Operator.
5. documentation that the contents of USTs have been properly removed

You are directed to submit all correspondence items to our office no later than June 19, 2017.

1977 Saturn is cautioned that the fees quoted are based on a review of office records indicating three USTs exist at the facility; should the number of USTs at the facility differ, additional fees will be required.

Additionally, pursuant to CCR, Title 23, Division 3, Chapter 16, Article 10.5, Section 2717(a)(3), 1977 Saturn has engaged in a pattern of neglect or disregard with respect to the requirements of the CH&SC, Division 20, Chapter 6.7, resulting in a "significant violation". Therefore, pursuant to CH&SC, Division 20, Chapter 6.7, Section 25292.3, 1977 Saturn is notified that failure to comply entirely with this Notice will result in inspectors from this office affixing red tags to the USTs at the facility on or after June 20, 2017. No owner or operator of a facility may deposit or allow the deposit of petroleum into a UST system that has a red tag affixed to the system's fill pipe.

Furthermore, pursuant to the CH&SC, Division 20, Chapter 6.7, as well as the LACC, any operator or owner of a UST system may be liable for civil or administrative penalties of as much as five thousand dollars ($5,000) for each UST, for each day of a violation.

Additionally, pursuant to LACC, Title 11, Division 4, Sections 11.82.014 and 11.82.040, upon determination that significant violations(s) exist for any UST, if a Red Tag is

affixed to said UST(s) a permit noncompliance fee of $1,486 shall be collected from the permittee. The permit noncompliance fee is separate from and in addition to any civil or criminal fines or penalties that may also be imposed for violations.

Finally, pursuant to LACC, Title 11, Division 4, Sections 11.72.045 and 11.86.020, it is a misdemeanor to violate any of the laws and regulations governing USTs, including provisions of CH&SC, Division 20, Chapter 6.7, and regulations that are set forth in the CCR, Title 23, Division 3, Chapter 16. Failure to comply with this Notice may therefore result in criminal prosecution.

Your cooperation in this matter is appreciated. If you have any questions, please contact Mr. Joseph Balocco at (626) 458-3559, Monday through Thursday, 7 a.m. to 5:30 p.m.

Very truly yours,

MARK PESTRELLA
Director of Public Works

Appendix VI

(Copies of Monitoring System Certification form and UST Monitoring Plot Plan available at http://www.waterboards.ca.gov.)

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

D Results of Testing/Servicing

Software Version Installed:

Complete the following checklist:

X Yes		No*	Is the audible alarm operational?
X Yes		No*	Is the visual alarm operational?
X Yes		No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
X Yes		No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
Yes	X	No* N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
Yes	X	No* N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment sensing system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? *(Check all that apply)* Sump/Trench Sensors. Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? Yes No
Yes	X	No* N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger?
Yes*	X	No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
Yes*	X	No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* Product. Water. If yes, describe causes in Section E, below.
X Yes		No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable.
X Yes		No*	Is all monitoring equipment operational per manufacturer's specifications?

* In Section E below, describe how and when these deficiencies were or will be corrected.

E. Comments:

F. In-Tank Gauging / SIR Equipment: X Check this box if tank gauging is used only for inventory control.
Check this box if no tank gauging or SIR equipment is installed

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

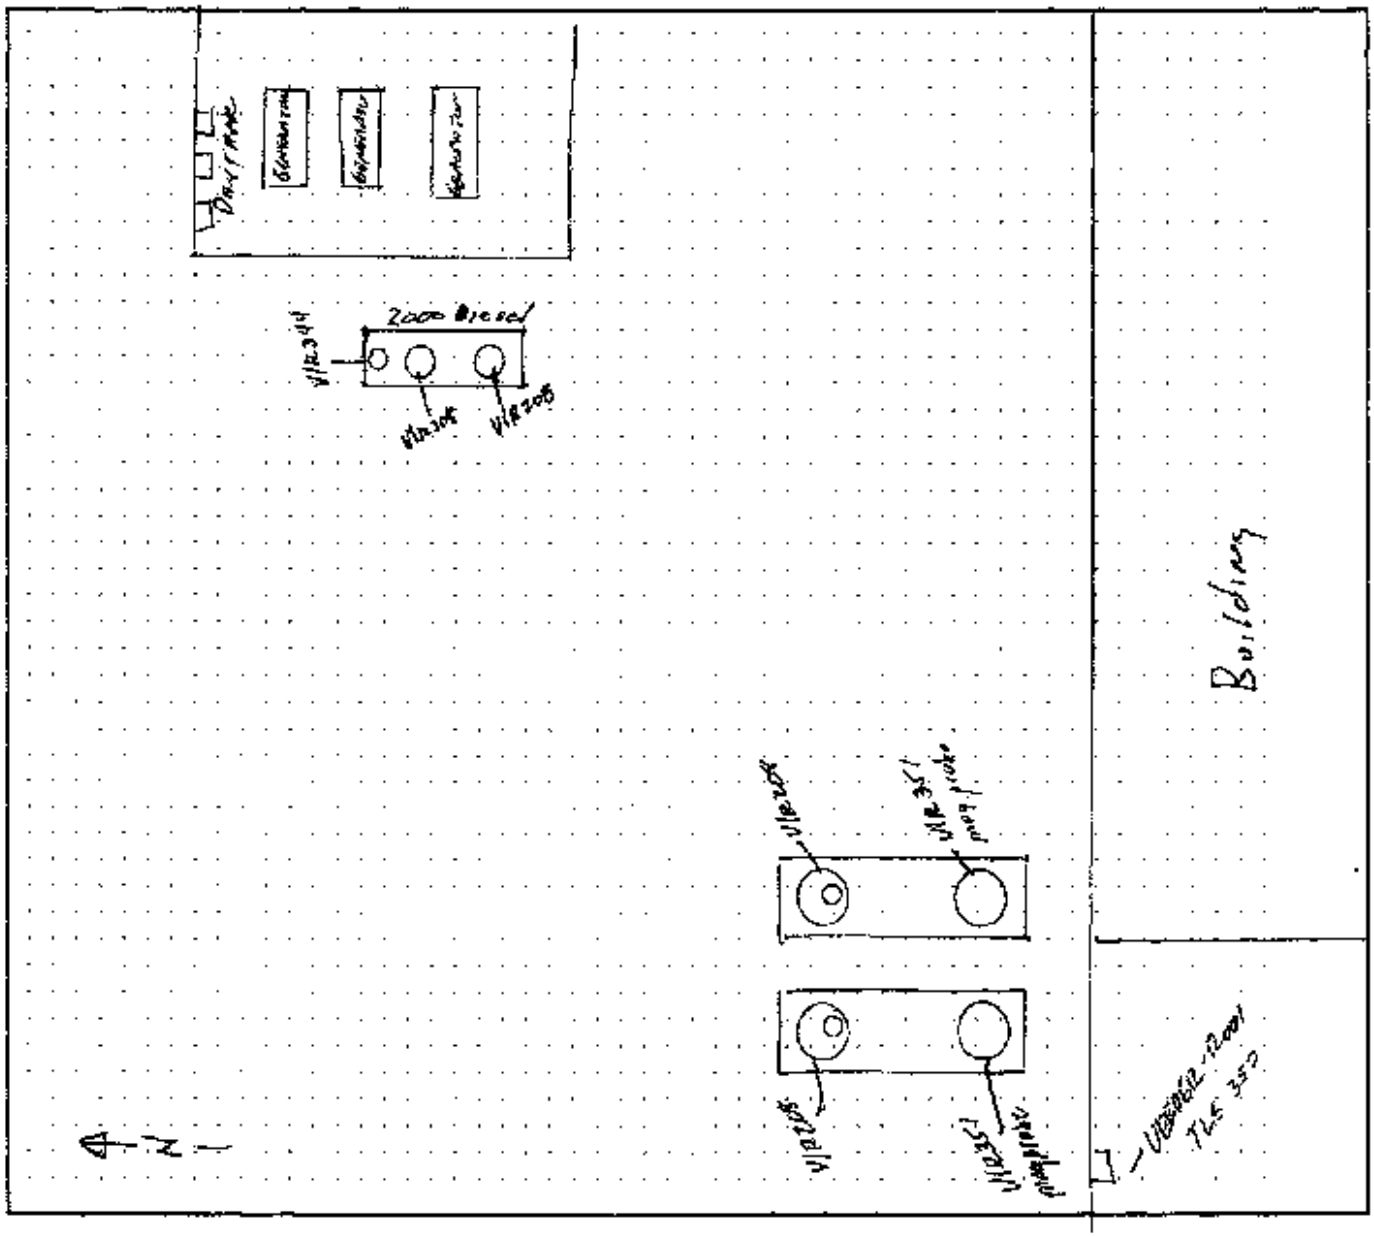
Complete the following checklist:

X Yes	No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
X Yes	No*	Were all tank gauging probes visually inspected for damage and residue buildup?
X Yes	No*	Was accuracy of system product level readings tested?
X Yes	No*	Was accuracy of system water level readings tested?
X Yes	No*	Were all probes reinstalled properly?
X Yes	No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

G. Line Leak Detectors (LLD): X Check this box if LLDs are not installed

Complete the following checklist:



Yes	No* N/A	✓ For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: 3 g.p.h; 0.1 g.p.h; 0.2 g.p.h
Yes	No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
Yes	No*	Was the testing apparatus properly calibrated?
Yes	No* N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
Yes	No* N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
Yes	No* N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
Yes	No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

H. Comments: _____

UST Monitoring Site Plan

Site Address: 1977 Saturn Ave Mooring Leak Co

Date map was drawn: ____/____/____.

Instructions

If you already have a diagram that shows all required information you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

Spill Bucket Testing Report Form

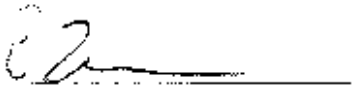
This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name: 1Saturn Street	Date of Testing: 12/01/2017
Facility Address: 1977 Saturn Street Monterey park, CA	
Facility Contact: Dean Christian	Phone: (805) 807-1916
Date Local Agency Was Notified of Testing :	
Name of Local Agency Inspector *(if present during testing)*:Warren Watanabe	

2. TESTING CONTRACTOR INFORMATION

Company Name: George Bryant Construction	
Technician Conducting Test: Ron Franklin	
Credentials[1]: X CSLB Contractor X ICC Service Tech. SWRCB Tank Tester Other *(Specify)*	
License Number(s): 718466	



3. SPILL BUCKET TESTING INFORMATION

Test Method Used:	X Hydrostatic	Vacuum	Other	
Test Equipment Used: Visual			Equipment Resolution:	
Identify Spill Bucket *(By Tank Number, Stored Product, etc.)*	**T-1 Diesel Fill Bucket West**	**T-2 Diesel Fill Bucket East**	**T-3**	**4**
Bucket Installation Type:	Direct Bury X Contained in Sump	Direct Bury X Contained in Sump	Direct Bury X Contained in Sump	Direct Bury Contained in Sump
Bucket Diameter:	12"	12"		
Bucket Depth:	12"	12"		
Wait time between applying vacuum/water and start of test:	5 Minutes	5 minutes		
Test Start Time (T_i):	8:00	8:00		
Initial Reading (R_i):	11"	11"		
Test End Time (T_f):	9:00	9:00		
Final Reading (R_f):	11"	11"		
Test Duration ($T_f - T_i$):	1 hour	1 hour		
Change in Reading ($R_f - R_i$):	0	0		
Pass/Fail Threshold or Criteria:	.002"	.002"		
Test Result:	**X Pass ☐ Fail**	**X Pass ☐ Fail**	**Pass ☐ Fail**	**Pass ☐ Fail**

Comments – *(include information on repairs made prior to testing, and recommended follow-up for failed tests)*

CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING

I hereby certify that all the information contained in this report is true, accurate, and in full compliance with legal requirements.

[1] State laws and regulations do not currently require testing to be performed by a qualified contractor. However, local requirements may be more stringent.

28	2030048B	Has secondary containment testing been conducted every 36 months		✓			✓			✓							
29	2010009	Has secondary containment test been submitted within 30 days		✓			✓			✓							
30	2030064	Was notification given 48 hours prior to testing (**local agency requires 72 hours)		✓			✓			✓							
31	2060024	UST system is made of or lined with materials that are compatible with the substance stored		✓			✓			✓							
		DESIGNATED OPERATOR															
32	2010004A	Have they maintained a copy of monthly designated operator reports for 12 consecutive months								✓							
33	2010015	Maintained a list of employees trained by the Designated Operator								✓							
34	2030012A	Has training been provided to facility employee(s) responsible for proper operation and maintenance every 12 months								✓							
35	2030012B	Did they train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire								✓							
36	2030012C	Is there at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system								✓							
37	2030013A	Was the monthly alarm history report inspected by the designated operator															
38	2030013B	Was a copy of the alarm history report attached to the monthly designated operator report								✓							
39	2030013C	Was the spill container/spill bucket inspected for the presence of liquid/debris by the designated operator								✓							
40	2030013D	Was the UDC inspected by the designated operator for the presence of liquid/debris														✓	
41	2030013E	Was the UDC inspected by the designated operator to ensure that monitoring equipment is placed in the proper position														✓	
42	2030013F	Did the designated operator inspect for liquid/debris in the containment sump where an alarm occurred								✓							
43	2030013G	Did the designated operator inspect the containment sump for liquid/debris for which there is no record of a service visit								✓							
44	2030013H	Has all testing and maintenance been completed and documented								✓							
45	2030001	Were leak detection alarm logs, maintenance and records of appropriate follow-up actions maintained								✓							
		UST															
46	2030076	Tank system in below-grade structure met the conditions to exempt from UST regulations			✓			✓			✓						
47	2030043	Has the leak detection equipment been properly programmed and properly operated		✓			✓			✓							
48	2030016A	Is the interstitial space of the tank continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected		✓			✓			✓							
49	2030034	Was a tag/sticker properly affixed to the monitoring equipment being certified, repaired, or replaced		✓			✓			✓							
50	2030003	Leak detection system maintains an audible and visual alarm		✓			✓			✓							
51	2060027	Maintain primary containment as product-tight		✓			✓			✓							
		LINED TANKS ☐ Check this box is following section is N/A															
52	2030028A	Was a proper written tank lining certification submitted															
53	2030028B	Was a tank integrity test performed															
54	2030028C	Was a vacuum test performed following lining															
55	2030028D	Did they employ a proper coatings expert and/or special inspector															
56	2030029	Lined or repaired steel tank was inspected within 10 years of lining and every 5 years after															
57	2010002A	Have they maintained records of cathodic protection systems testing conducted within six months of installation and at least every three years thereafter															
58	2010002B	Have they maintained records for the 60 calendar day inspection of the impressed-current system															
59	2010002C	Have they maintained records for sacrificial anodes testing every three years

		SINGLE WALLED TANK MONITORING						☐ Check this box is following section is N/A									
60	2010002D	Do they have written monitoring and maintenance records on-site or off-site at a readily available location if approved			✓			✓			✓						
61	2030004	Automatic tank gauge test the tank at least once per month at 0.1 gallons per hour			✓			✓			✓						
62	2030005	The 0.2 gallons per hour continuous in tank leak detection performed			✓		✓			✓							
63	2030006A	Monthly 0.2 gallons per hour automatic tank gauging performed			✓			✓			✓						
64	2030006B	Did the automatic tank gauge generate and print a hard copy of the monthly 0.2 gph test			✓		✓			✓							
65	2060004A	Is UST corrosion protection installed			✓			✓			✓						
66	2060004B	Does field-installed cathodic protection meet the consensus standards			✓			✓			✓						
67	2030009A	Was the impressed-current system inspected every 60 calendar days			✓			✓			✓						
68	2030009C	Was the impressed-current system inspected by a cathodic protection tester within six months of installation and at least every three years thereafter			✓			✓			✓						
69	2030009D	Were the sacrificial anodes checked by a cathodic protection tester once every three years in accordance with the manufacturer's instructions			✓			✓			✓						
70	2030015	Facility exhibited that the method used to monitor the tank meets the monitoring methods in 2643(f)			✓			✓			✓						
71	2060002	Automatic tank gauging/continuous in tank leak detection system installed/properly functioning			✓			✓			✓						
		DOUBLE WALLED PRE 2003 TANKS						☐ Check this box is following section is N/A									
72	2060005	Was system constructed with a monitoring system capable of detecting entry into secondary containment		✓				✓			✓						
		TANKS 2003 - PRESENT						☑ Check this box is following section is N/A									
73	2060008	Was enhanced leak detection testing performed before the tank was placed in use															
74	2060022A	Is the UST system installed on or after July 1, 2003 and before July 1, 2004, and designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment (Including Vent/Vapor Piping)															
75	2060022B	Is the UST system installed on or after July 1, 2003 and before July 1, 2004, and capable of detecting water intrusion into the secondary containment (Including Vent/Vapor Piping)															
76	2030065	Is the interstitial space maintained under constant vacuum, pressure, or hydrostatic conditions, such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment? (VPH - 7/2004)															
77	2060023	Is the UST system installed on or after July 1, 2004, and designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment (VPH)															
		SPILL BUCKETS															
78	2060020A	Are spill buckets installed			✓		✓			✓							
79	2060020B	Does the spill bucket/container have a functional drain valve or other liquid removal method			✓		✓			✓							
80	2060020C	Is the spill bucket resistant to galvanic corrosion			✓		✓			✓							
		SUMPS															
81	2030008C	Are the sumps in good condition		✓			✓			✓							
82	2030008D	Are the sumps free of debris/liquid		✓			✓			✓							
83	2030008E	Is the secondary containment in good condition		✓			✓			✓							
84	2030008F	Is the secondary containment free of debris/liquid		✓			✓			✓							
85	2030040	Is the secondarily contained piping allowed to drain back into the sump in the event of a leak		✓			✓			✓

86	2030016C	Are the sumps continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected		✓			✓			✓							
87	2030062	Is leak detection equipment set up such that the monitoring system would detect a leak at the earliest opportunity and/or alert the owner/operator of a leak (** exludes test port location at 6 o'clock postion, see line 130)		✓			✓			✓							
88	2060015	Are the sensors located in the proper position/location		✓			✓			✓							
		UDC															
89	2030008A	Are the UDCs in good condition	N/A														
90	2030008B	Are the UDCs free of debris/liquid	↓														
		Sensor Model # or Type															
		OVERFILL PROTECTION															
91	2030035	Was the UST system operated to prevent spills and/or overfills		✓			✓			✓							
92	2030036A	**Overfill prevention system to meet one of the following requirements:** 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm (Ball float or external alarm at 90%); **or**			✓			✓			✓						
93	2030036B	2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills (Ball float and external alarm); **or**			✓			✓			✓						
94	2030036C	3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity (Flapper at 95%); **or**		✓			✓			✓							
95	2030036D	4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling (Flapper below tank top fitting)		✓			✓			✓							
		LINE LEAK DETECTORS															
96	2030075	Does the emergency generator system meet requirement for no LLD: system has audible and visual alarm, monitoring system is checked daily and/or logged.			✓			✓			✓						
97	2060012	Does the pressurized piping system have a line leak detector installed			✓			✓			✓						
		PIPING															
		Single walled Pressurized Piping — ✓ Check this box is following section is N/A															
98	2030027	Does the pump shut down when a leak is detected or when line leak detector is disconnected (Positive shutdown/failsafe)															
99	2030052	Was pressurized pipe containing motor vehicle fuel monitored at least hourly at any pressure and a 0.2 gph monthly line integrity test or 0.1 gph annual line integrity test performed															
		Single Walled Conventional Suction Piping — ✓ Check this box is following section is N/A															
100	2030049	Was daily monitoring conducted for air in the pipe and were the results logged															
101	2030050	Was a 0.1 gph piping integrity test conducted every three years															
		Single Walled Gravity Piping — ✓ Check this box is following section is N/A															
102	2030051	Was a 0.1 gph piping integrity test or overfill integrity test conducted every two yrs.															
		Single Walled Safe Suction Piping — ✓ Check this box is following section is N/A															
103	2030053A	Does piping drain back into UST if the suction is released															
104	2030053B	Does piping have a check valve on the piping located directly below the suction pump															
		Double Walled Pressurized Piping — ✓ Check this box is following section is N/A															
105	2030042A	Was an annual line integrity test performed for pressurized pipe that does not utilize fail safe or shut down															
106	2030042B	Was a passing result achieved on the annual line integrity test for pressurized pipe that does not utilize fail safe or shut down															
107	2030016B	Is the piping continuously monitored such that the leak detection activates an audible/visual alarm when a leak is detected															
108	2030017	Product piping outside the UDC is fail-safe and shuts down the pump or restricts flow

NOTICE OF VIOLATION ORDER TO COMPLY

Date 11-2-17 Permit 847830

Owner-Operator DEAN CHRISTIAN Facility 006994-6627 062151

Site Name 1977 SATURN ST Violation # 875125

Site Address 1977 SATURN ST City, Zip MONTEREY PARK, 91755

Mailing Address 801 N BRAND AVE SUITE 220 City, Zip GLENDALE 91203

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous substance underground storage tanks (UST) which are in violation of California Health and Safety Code (CH&SC) Chapter 6.7 and/or Title 31 Los Angeles County Code (LACC) Title 31, Division 4 and/or the conditions and limitations of the above permit. YOU ARE HEREBY DIRECTED to submit to this office indicated below the following items checked:

☐ OPERATING WITHOUT A CERTIFIED/OPERATING MONITORING SYSTEM – CH&SC 25293

YOU ARE HEREBY DIRECTED to have the monitoring system and the UST system certified immediately and the results reviewed by this office no later than 7 Days from the date of this Notice or the contents of all UST systems are to be removed within this time period.

☑ MISSING TEST RESULTS / DOCUMENTS – Required testing/documentation must be conducted and results reviewed by this office:

- ☑ Secondary Containment Testing (6 MONTH PIST PIPING)
- ☐ Tank Integrity Testing
- ☐ Corrosion Protection Certification
- ☐ API 2481 Testing
- ☐ Line Testing
- ☐ Line Leak Detector Testing
- ☐ Facility Employee Training
- ☐ Missing Designated Operator Monthly Form(s)
- ☐ _____

☑ REQUIRED DOCUMENTS / ITEMS MUST BE SUBMITTED TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) –

- ☐ Facility Information Page
- ☐ Tank Information Page
- ☐ Tank Plot Plan
- ☑ Financial Responsibility Certification (EXPIRED)
- ☐ Other Financial Officer Letter
- ☐ Owner Statement of Designated Operator
- ☑ Monitoring Plan
- ☐ Response Plan
- ☐ Owner/Operator Agreement
- ☑ Corrections needed as of time in the attached CERS printout
- ☐ _____

☑ OTHER

- YOU MUST RESUBMIT THE SB989 RESULTS DATED 04/26/17 TO HAVE THE CORRECT TEST DATE. THE TEST WAS ACTUALLY PERFORMED ON 04/18/17.
- YOU MUST RESUBMIT THE SB989 RESULTS DATED 11/22/16 TO INCLUDE THE ANNULAR SPACE (2K DIESEL) ON THE SUMMARY PAGE.
- YOU MUST RESUBMIT THE 6 MONTH PIST REPAIR SB989 TEST FOR THE REPAIRED SUMPS AND DIESEL SPILL BUCKET. REPAIR TEST DATE INITIAL RETURN TEST DATE WAS 04/26/17.

YOU ARE FURTHER DIRECTED to submit to this office below evidence of compliance with the above directives by no later than fifteen (15) days from the date of this Notice, unless otherwise noted above. Failure to comply with the Underground Storage Tank laws and regulations may subject you to civil penalties of not less than $500 or more than $5000, or by one year in county jail or both. Finally, pursuant to Title 1 of the Los Angeles County Code, Sections 1.12.045 and 11.56.060, it is a misdemeanor to violate any of the laws and regulations governing USTs, including provisions of CH&SC Division 20, Chapter 6.7 and 6.11 or Legislative findings set forth in the CCR, Title 23, Division 3, Chapter 16. Failure to comply with this Notice may therefore result in criminal prosecution. Furthermore, a penalty of up to $5000 per day may be imposed to recover the cost incurred by this Department in the enforcement of ACC.

If you have any questions regarding this matter, please contact LARRY LASTRADE ☑ Monday through Friday, 8 a.m. to 9:30 a.m. or ☐ Monday through Thursday 7 a.m. to 5:30 p.m. at (626) 851-7031

A recent inspection of your facility revealed the following conditions and/or practices relating to hazardous substance underground storage tanks (USTs) which are in violation of California Health and Safety Code (CH&SC) Chapter 6.7 & 6.11; Los Angeles County Code (LACC) Title 11, Division 4 and/or the conditions and limitations of the above permit. YOU ARE HEREBY DIRECTED to submit to the office indicated below, the following items checked:

☐ **ADDITIONS/MODIFICATIONS TO THE UNDERGROUND STORAGE TANK FACILITY – CH&SC 25284**

- ☐ Complete and sign the Application for Modification.
- ☐ An application fee (to be determined at time of submittal) payable to the County of Los Angeles Department of Public Works.
- ☐ Verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) https://cersbusiness.calepa.ca.gov/Account/Signin?ReturnUrl=%2f including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data, Certificate of Financial Responsibility, UP UST Response Plan, Owner Statement of Designated Operator. (CH&SC 25404)
- ☐ Scope of Work including all of the additions/modifications.
- ☐ Four (4) sets of plans indicating the location of all additions/modifications copies of contractor's licenses, ICC and manufacturer's certifications

Noted discrepancies from approved plans dated ____

(1) YOUR PERMIT TEMPORARY CLOSURE PERMIT EXPIRED ON 10/24/17

As-builts showing the above modifications and any other modifications which were not indicated on plans approved by this office.

☐ **OPERATING WITHOUT A PERMIT DUE TO A CHANGE OF OWNERSHIP – CH&SC 25284 (c) – MUST be submitted within thirty days of the transfer.**

- ☐ Complete and sign the Transfer of Ownership Application
- ☐ An application fee (to be determined at time of submittal) payable to the County of Los Angeles Department of Public Works.
- ☐ Verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) https://cersbusiness.calepa.ca.gov/Account/Signin?ReturnUrl=%2f including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data, Certificate of Financial Responsibility, UP UST Response Plan, Owner Statement of Designated Operator. You must include a valid the Board of Equalization Number. The submittal must be made under the existing CERS ID number for the site. (CH&SC 25404)

(2) ☑ **OUT OF SERVICE UNDERGROUND STORAGE TANKS – CH&SC 25298**

Immediately remove all residual liquids, solids, or sludge stored within the USTs to a legal disposal facility. Provide copy of proof of legal disposal.

- ☑ Complete and sign the Application for Closure and Signature Date the Closure Report Requirements Form.
- ☑ Submit a Tank Location Plot Plan
- ☑ An Application for Closure fee (to be determined at time of submittal) payable to the County of Los Angeles Department of Public Works.
- ☑ Complete and sign Permit Application Supplement/Notice to File.
- ☑ Verify that all Unified Program (UP) form data is accurate and uploaded to the California Environmental Reporting System (CERS) https://cersbusiness.calepa.ca.gov/Account/Signin?ReturnUrl=%2f including all UP UST Facility Information data, UP UST Tank Information data, for each UST, and UST Monitoring Plan data, Certificate of Financial Responsibility, UP UST Response Plan, Owner Statement of Designated Operator. You must include the Board of Equalization Number if applicable. (CH&SC 25404)
- ☑ An Operating Permit Application fee (to be determined at time of submittal) payable to the County of Los Angeles, Department of Public Works.
- ☑ Submit an Annual Permit Maintenance fee (to be determined at time of submittal) payable to the County of Los Angeles Department of Public Works.

YOU ARE FURTHER DIRECTED to submit to the office below evidence of compliance with the above directives by no later than fifteen (15) days from the date on this Notice, unless otherwise directed above. Failure to comply with the Underground Storage Tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $5,000, or by one year in county jail or both. Finally, pursuant to Title 11 of the Los Angeles County Code, Sections 11.72.045 and 11.86.020, it is a misdemeanor to violate any of the laws and regulations governing USTs including provisions of CH&SC, Division 20, Chapter 6.7 and 6.11 and regulations that are set forth in the CCR, Title 23, Division 3, Chapter 16. Failure to comply with this Notice may therefore result in criminal prosecution. Furthermore, a non-compliance fee may be imposed to recover the cost incurred by this Department in the enforcement of LACC.

If you have any questions regarding this matter, please contact EMANUEL CARRANZA Monday through Friday, 8 a.m. to 9:30 a.m. or Monday through Thursday, 7 a.m. to 5:30 p.m. at (323) 881-7023

Secondary Containment ReTest Report Form

This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

 Complete Certification of Compliance with Los Angeles County Lobbyist Ordinance on back ClosApp FORMAT DPW Rev. 07/17

UNDERGROUND STORAGE TANKS
CLOSURE INFORMATION

1. This authorization to temporarily or permanently close an underground storage tank (UST) pursuant to Los Angeles County Code, Title 11, Division 4. This authorization may also be used for product piping removal associated with an existing or removed USTs.

2. This authorization will not be approved unless a valid Hazardous Substance Underground Storage Permit (HSUSP) application is on file with the DPW or an Unified Program Facility Permit has been issued by the Certified Unified Program Agency (CUPA).

3. Submittals, including this authorization, made on behalf of the UST owner, operator, or Unified Program permit owner or operator shall be accompanied by written authorization.

4. USTs closed on site by removal, or cleaning and filling with an inert solid substance prior to January 1, 1984, need not comply with current closure requirements, however, contamination related to these USTs must be reported and investigated.

5. All work shall be carried out in full compliance with all applicable federal, state and local laws, ordinances, rules and regulations.

6. All fees due to DPW and/or to the CUPA for the operation and/or maintenance of the facility subject to closure through the date of closure shall be paid in full.

7. Closure authorizations are site specific and may be subject to additional sampling and site characterization requirements as necessary to protect the public health and safety, underground and surface water supplies, and may include requirements, requested by Federal, State or other regulatory agencies.

8. All inspection notification(s) shall be made as directed by the attached conditions of this approval.

9. Within 30 days after closure, all requirements of this Closure authorization shall be furnished to the DPW in a closure report per the DPW Closure Report Requirements and Supplements, describing; all work completed, results of any required sampling, disposition of any contaminated soils or substances found and any other requirements made part of the closure application as well as submittal to the CERS database of the Unified Program LIST FACILITY and LIST TANK information for each UST permanently closed. http://cers.calepa.ca.gov/

10. In all cases, closure authorizations expire 180 days from the date of issue unless otherwise specified. It is the responsibility of the owner or operator to make sure that the final report contains the required information and is submitted to the DPW within 30 days from the sampling date or 180 days from the date of the permit issuance, whichever is earlier. The total number of tanks listed on the HSUSP or UP Permit and the yearly annual permit maintenance billing will remain uncharged until the closure report is received by the DPW. Only one copy of the closure report needs to be submitted unless otherwise directed.

11. This Closure Authorization is considered complete when all requirements of this Closure Authorization and the Permit have been met.

12. The DPW will review the closure report and will issue closure certification with no further action when all requirements of this Closure Authorization and Permit have been met, and where no unauthorized release has been found.

13. If an unauthorized release has occurred or any detected constituent in soil or groundwater is found above the method detection limit of an analytical method as identified in the laboratory testing requirements, reporting of this unauthorized release must comply with the Health and Safety Code Division 20, Chapter 6.7.

14. Where an unauthorized release has occurred, referral of the closure report will be made to a Regional Water Quality Control Board or State Water Resources Control Board who will then provide further direction until closure certification is issued.

15. All correspondence related to this closure authorization shall include the SITE-FILE numbers listed on the front of this document, found in the upper right box and be addressed to the following location:

SUPPLEMENT
APPLICATION FOR TEMPORARY CLOSURE

COUNTY OF LOS ANGELES
DEPARTMENT OF PUBLIC WORKS
Environmental Programs Division

DPW USE ONLY:

SITE FILE NO. 6914 - [illegible] RO 314

APPLICATION NO. [illegible]

This supplement must be submitted with the Application For Closure. You must notify this office two working days in advance to schedule an appointment for an inspection of the temporary closure.

Pursuant to California Code of Regulations (CCR), Title 23, Division 3, Chapter 16, Article 7:

1. All residual liquid, solids, or sludge shall be removed and handled in accordance with the applicable provisions of Chapter 6.5 and Chapter 6.7 of Division 20 of the California Health and Safety Code (CH&SC). Copies of all completed hazardous waste manifests and bills of lading must be provided to this office prior to final approval of temporary closure.
2. If the underground storage tank(s) contained a hazardous substance that could produce flammable vapors at standard temperature and pressure, then the underground storage tank(s) shall be inerted, as often as necessary, to levels that will preclude an explosion or to such lower levels as may be required by this office.
3. Except for required venting, all fill and access locations and piping shall be sealed using locking caps or concrete plugs.
4. Power service shall be disconnected from all pumps associated with the use of the underground storage tank(s) unless the power services some other equipment which is not being closed, such as the impressed-current cathodic protection system, and/or the monitoring system and sensors.
5. The underground storage tank(s) shall be inspected by the owner or operator at least once every three months to verify that the temporary closure measures are still in place. The inspection shall include at least the following actions:
    a. Visual inspection of all locked caps and/or concrete plugs.
    b. If locking caps are used, at least one shall be removed to determine if any liquids or other substances have been added to the underground storage tank(s) or if there has been a change in the quantity or type of liquid added.

All approved monitoring requirements remain in place throughout the duration of the Temporary Closure. Monitoring equipment must continue to be certified annually.

Other:

_____

_____

_____

The owner may terminate the temporary closure at any time and reuse the underground storage tank(s) only if the USTs meet the requirements of CH&SC Division 20, Chapter 6.7, CCR Title 23, Division 3, Chapter 16 and with approval from this office. The Temporary Closure will expire 180 days from date of issuance (County Code 11.82.020 B). The Temporary Closure may be extended for an additional 180 days for one half the Closure Permit fee. At the conclusion of 12 months the extended Temporary Closure Permit is expired. Pursuant to CCR Title 23, Division 3, Chapter 16 Section 2670 (b), at the end of 12 consecutive months during which the tank is temporarily closed, this office may approve an extension of the temporary closure period for a maximum additional period of up to 12 months. Owners and operators shall complete a site assessment in accordance with CCR Title 23, Division 3, Chapter 16, Section 2672 (d) before an extension may be granted by this office.

UNDERGROUND STORAGE TANKS
CLOSURE INFORMATION

1. This authorization to temporarily or permanently close an underground storage tank (UST) pursuant to Los Angeles County Code, Title 11, Division 4. This authorization may also be used for product piping removal associated with an existing or removed USTs.

2. This authorization will not be approved unless a valid Hazardous Substance Underground Storage Permit (HSUSP) application is on file with the DPW or an Unified Program Facility Permit has been issued by the Certified Unified Program Agency (CUPA).

3. Submittals, including this authorization, made on behalf of the UST owner, operator, or Unified Program permit owner or operator shall be accompanied by written authorization.

4. USTs closed on site, by removal, or cleaning and filling with an inert solid substance prior to January 1, 1984, need not comply with current closure requirements. However, contamination related to those USTs must be reported and investigated.

5. All work shall be carried out in full compliance with all applicable federal, state and local laws, ordinances, rules and regulations.

6. All fees due to DPW and/or to the CUPA for the operation or the maintenance of the facility subject to closure through the date of closure shall be paid in full.

7. Closure authorizations are site specific and may be subject to additional sampling and site characterization requirements as necessary to protect the public health and safety, underground and surface water supplies, and may include requirements requested by Lenders, State or other regulatory agencies.

8. All inspection notification(s) shall be made as directed by the attached conditions of this approval.

9. Within 30 days of the closure, all requirements of this Closure Authorization shall be furnished to the DPW in a closure report per the DPW Closure Report Requirements and Supplements, describing all work completed, results of any required sampling, disposition of any contaminated soils or substances found and any other requirements made part of the closure application as well as submittal to the CERS database of the Unified Program UST FACILITY and UST TANK information for each UST permanently closed. http://cers.calepa.ca.gov/

10. In all cases, closure authorizations expire 180 days from the date of issue unless otherwise specified. It is the responsibility of the owner or operator to make sure that the final report contains the required information and is submitted to the DPW within 30 days from the sampling date or 180 days from the date of the permit issuance, whichever is earlier. The total number of tanks listed on the HSUSP or UF Permit and the yearly annual permit maintenance billing will remain unchanged until the closure report is received by the DPW. Only one copy of the closure report needs to be submitted - unless otherwise directed.

11. This Closure Authorization is considered complete when all requirements of this Closure Authorization and the Permit have been met.

12. The DPW will review the closure report and will issue closure certification within 90 days after all requirements of this Closure Authorization and Permit have been met, and where no unauthorized release has been found.

13. If an unauthorized release has occurred or any detected constituent in soil or groundwater is found above the method detection limit of an analytical method as identified in the laboratory testing requirements, reporting of this unauthorized release must comply with the Health and Safety Code Division 20, Chapter 6.7.

14. Where an unauthorized release has occurred, referral of the closure report will be made to a Regional Water Quality Control Board or State Water Resources Control Board who will then provide further direction until closure certification is issued.

15. All correspondence related to this closure authorization shall include the SITE-FILE numbers listed on the front of this document, found in the upper right box and be addressed to the following location:

ENVIRONMENTAL PROGRAMS DIVISION

CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the County of Los Angeles Department of Public Works, Environmental Programs Division, P.O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.
2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.
3. Description of methods for obtaining, handling, and transporting samples.
4. Time and date samples were obtained.
5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for Underground Storage Tank closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.
6. Chain-of-custody documentation initiated by person obtaining sample through person at a California Department of Health Services certified laboratory.
7. Disposal destination of tanks and evidence of legal disposal.
8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.
9. Documentation as to depth of groundwater at facility.
10. Manifests to document hazardous waste disposal of any removed soil and tank rinsate.
11. Evidence of legal disposal of soils designated as nonhazardous.
12. Any observations of site contamination.
13. Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.
14. Submit to the California Environmental Reporting System (CERS) the date the UST was permanently closed for all tanks removed or closed in-place.

UST Facility Operating Permit Application: [redacted]

Home » Prepare Submittal » UST: UST Facility Operating Permit Application (Draft)

You must complete this form within 30 days of all new permits, permit changes, or facility information changes. You will also need to update/confirm your tank monitoring plan and other pertinent UST-related forms.

All facilities **must** provide a BOE Number. Valid numbers are 8 digits long starting with the numbers 44... State and federal facilities should use 44032062. If **ALL** underground tanks at your facility **ONLY** contain NON petroleum productions, you can provide this generic BOE Number: 44000000. Contact your local regulator if you are unsure what number to provide.

The former paper version of this form was called "UST Operating Permit Application-Facility Information" (Form A).

More information about UST Financial Responsibility Mechanisms is available at the Water Board's Underground Storage Tank Cleanup Fund Financial Responsibility Web page.

UST Tank Information/Monitoring Plan: [redacted]

Home » Prepare Submittal » UST: UST Tank Information/Monitoring Plan (Draft)

Use this form to enter data for new UST systems or revise data for an existing UST system. You must complete a separate form for each affected tank. For tanks that are part of a compartmentalized unit, each compartment is considered a separate tank. This information is required within 30 days of permit or facility information changes, unless your local agency requires approval prior to making the changes.
The former paper version of this form was called "UST Operating Permit Application - Tank Information" (Form B).

CLOSURE – UNDERGROUND STORAGE TANKS

CONDITIONS A – GENERAL

1. Closure shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County, Department of County Engineer – Facilities; Los Angeles County Fire Department, Fire Prevention Division or the appropriate City Fire Department; South Coast Air Quality Management District; and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Department shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3)-business-day advance notification.
   b. Permanent closure of a tank in place or a temporary closure shall require a 30-day-in notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, when such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well-being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their original construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards: State of California" by the Department of Water Resources, contained in Bulletin 74 – 81, December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies the California Regional Water Quality Board, the Los Angeles County Department of Health Services and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original ingredients stored and its constituents.
   b. The personnel shall be sufficiently skilled to safely carry out such operation.
   c. Contaminated materials removed from such facility shall be disposed of at a legal point of discharge.
   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B – TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, "Abandonment or Removal of Underground Tanks," Part A and any other applicable Parts.

2. A temporary closure shall not exceed 180 days.

CONDITION C – PERMANENT TANK(S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Part B and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction of the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish site integrity is carried out by the County Engineer.

4. If an appointment has been arranged with a County Engineer Inspector to inspect the removal of a tank, the Inspector will only wait on the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another closure fee may be charged if the inspector has to return to the site.

5. After inspection, tank shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil, or waste oil, site integrity will be demonstrated using the soil sampling and analysis procedures described in CONDITIONS D below.

7. The site shall be filled and never exposed to excavation companions of 90 St.

CONDITIONS D – PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Parts B or C and any other applicable Parts.

2. Owners/operators shall demonstrate soil site integrity as follows:

   a. Test borings shall be standard to intercept a point beneath the center of the tank, if possible. If standard drilling is not feasible, the test boring may be drilled vertically and for the reason stated in the report at 2.h. below.
   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank, along the major axis of the tank.
   c. For multiple tanks, as a minimum, borings shall be placed at 20-foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered singly tanks for the purposes of test location and placement.
   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and all feet below grade level.
   e. A Shelby Tube or a Modified California Sampler shall be utilized for taking all soil samples.
   f. Soil samples shall not be exposed to the local air but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.
   g. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants, the County Engineer shall require a site investigation, as described in Chapter V of the County's "Underground Storage of Hazardous Materials – Guidelines."

4. A report shall be submitted to the County Engineer containing the results of the site investigation.

CLOSURE APPLICATION SUPPLEMENT
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

PART 1 OF 3

FOR OFFICE USE ONLY
FACILITY ID NO. Comp - 6215
APPLICATION NO. 96509

To satisfy the permanent closure requirements for underground storage tanks storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

***** Soil sampling will be required for Vent and Vapor Recovery piping for UST systems installed after July 1, 2003. *****

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 1B	3-4 feet beneath	TPH/D	8015M
2A, 2B	tank invert	BTEX, MTBE	
3A, 3B		Fuel Oxygenates	8260B
		Organic Lead	DOHS Meth
1 sample	3-4 feet below	same as	same as
	each UST	above	above
1 sample	3-4 feet below	same as	same as
	piping, dispenser	above	above
	and vent pipe		

Continued on Page 2

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date/time of sampling shall be included in the final report.

4. Conform to the analytical requirements table below for petroleum hydrocarbon sites. Apply EPA Method 5035 specified in the USEPA SW-846 version III (12/1996) for soil sample preparation and preservation in order to minimize volatile organic losses. Use the sample collection devices, or equivalent, specified in the method (e.g., the Encore[TM] sampler). If the Encore[TM] sampler is used, analyze sample within 48 hours from the collection. Analyze sample within 10 days for soil samples stored under frozen conditions.

UST CONTENTS	Analyte	Analytical Method	Required MDL Soil (ug/kg)	Required MDL Water (ug/L)
GASOLINE OR DIESEL	Total Petroleum Hydrocarbons (TPH) - Gasoline	EPA Method 8015 (M)	100-200	50-100
	Total Petroleum Hydrocarbons (TPH) - Diesel	EPA Method 8015 (M)	1,000	500
	Benzene	EPA Method 8260B (8021B)	1	0.5
	Toluene	EPA Method 8260B (8021B)	1	0.5
	Ethylbenzene	EPA Method 8260B (8021B)	1	0.5
	Xylenes (Total)	EPA Method 8260B (8021B)	1	0.5
	Methyl Tertiary Butyl Ether (MTBE)	EPA Method 8260B	2	1
	Diisopropyl ether (DIPE)	EPA Method 8260B	2	1
	Ethyl tertiary butyl ether (ETBE)	EPA Method 8260B	2	1
	Tertiary amyl methyl ether (TAME)	EPA Method 8260B	2	1
	Tertiary butyl alcohol (TBA)	EPA Method 8260B	20	10
	Ethanol	EPA Method 8260B	500	250
	Methanol	EPA Method 8015 (M)	1000	500
OTHER, WASTE OIL UNKNOWN	Total Recoverable Petroleum Hydrocarbons (TRPH) - Waste Oil	EPA Method 418.1 or EPA Method 8260B	1000	500

UST Permitted Contents,
all VOC's (EPA Method 8260)
+ To Be Determined

Continued on Page 3

5. All soil/groundwater samples shall be analyzed by a laboratory approved by the California Environmental Accreditation Laboratory Program (ELAP).

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determination; d) The method of analysis; e) Signature of chemist certifying results.

7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

10. A final report that contains all of the above required information shall be submitted to the office above within one (1) month form the sampling date or 180 days from the date of this permit, whichever is earlier.

11. All electronic data shall be submitted to the State Water Resources Control Board Geotracker database.

STATE OF CALIFORNIA
California Regional Water Quality Control Board
Los Angeles Region
(Underground Storage Tank Program)

General Laboratory Testing Requirements for Petroleum Hydrocarbon Impacted Sites

The purpose of this document is to supplement the Regional Board's Laboratory Report form (6/00) in order to update obsolete testing requirements and set forth the new requirements for fuel oxygenates and natural attenuation testing. Each analytical method used must be certified by the California Environmental Accreditation Laboratory Program (ELAP).

1. General Laboratory QA/QC Requirements

Conform to the Regional Board's Laboratory Report Form (6/00) in general except for items specified below:

2. Compounds to be Tested

Total petroleum hydrocarbons in gasoline range (TPHg) (C4 – C12); Total petroleum hydrocarbons in diesel range (TPHd) (C13 – C22); benzene, toluene, ethylbenzene, xylenes (BTEX); methyl tertiary butyl ether (MTBE); di-isopropyl ether (DIPE); ethyl tertiary butyl ether (ETBE); tertiary amyl methyl ether (TAME); tertiary butyl alcohol (TBA). If the gasoline tanks historically or currently contain methanol or ethanol, these compounds are also to be tested.

3. Analytical Test Methods and Detection Limits

Conform to Table 1 below. Report any concentration detected between the method detection limit (MDL) and estimated quantitation limit (EQL) for reporting limit (RL) in a numerical value with a "J" flag indicator. All "Non-Detect" (ND) shall be reported in the format with "< (numerical MDL)." Integrate all fuel oxygenate additive concentrations into total petroleum hydrocarbons (TPH) and report it as TPH. EPA Method 8021B may be used to substitute EPA Method 8260B at the sites where all fuel oxygenates have not been identified by EPA Method 8260B in soil and/or groundwater.

Table 1: Analytical Requirements

		Required MDL (Method detection limit)	
Analyte	Analytical Method	Soil (ug/kg)	Water (ug/L)
BTEX	EPA Method 8260B(8021B)	1	0.5
MTBE	EPA Method 8260B	2	1
DIPE	EPA Method 8260B	2	1
ETBE	EPA Method 8260B	2	1
TAME	EPA Method 8260B	2	1
TBA	EPA Method 8260B	20	10
TPHg	Cal-LUFT GC/FID or GC/MS	100-200	50-100
TPHd	Cal-LUFT GC/FID	1000	500
Methanol	Cal-LUFT GC/FID	1000	500
Ethanol	Cal-LUFT GC/FID(EPA8260B)	500	250

4. Use of EPA Method 5035 for Soil Samples

Apply EPA Method 5035A specified in the USEPA SW-846, (7/2002) for soil sample preparation and preservation in order to minimize volatile organic losses. Use the sample collection devices, or equivalent, specified in the method (e.g., the Encore™ sampler). If the Encore™ sampler is used, analyze sample within 48 hours from the collection. Analyze sample within 14 days for soil samples stored under frozen conditions.

5. Natural Attenuation Parameters

Natural attenuation processes include dispersion, dilution, sorption, volatilization, biodegradation, and chemical or biological transformation. A carefully controlled monitoring program for the natural attenuation can be used to confirm site-specific mass reduction and achieve remedial objectives. In order to test parameters to confirm the occurrence of natural attenuation, site characterization must be complete first.

5.1 Primary Natural Attenuation Criteria

Meet the following conditions prior to testing for the secondary natural attenuation parameters:

a) Groundwater contaminant plume must be fully defined.

b) Groundwater monitoring program on a quarterly basis must be completed for at least two years including data of MTBE and other oxygenates

c) Groundwater concentration has consistently decreased or been stable

d) Determination of site-specific hydraulic conductivity must be conducted. Refer the ASTM D4044-91 for the slug test procedures. Other field methods (e.g., pumping test) are also acceptable to determine hydraulic conductivity.

e) Characterization of MTBE and other oxygenates plume vertical extent must be completed with discrete multi-depth groundwater sampling at all groundwater vulnerable areas designated by the Board.

5.2 Secondary Natural Attenuation Parameters

Analyze the secondary natural attenuation parameters only after the primary natural attenuation criteria are met. Analyze the secondary natural attenuation parameters at all groundwater monitoring wells inside and outside of the plume. Conform to Table 2 below for parameters and testing methods

Table 2 Analytical Requirements for Secondary Natural Attenuation Parameters

Parameters	Test Method	Required MDL
pH	EPA Method 150.2 or Field instrument	n/a
Dissolved oxygen (DO)	EPA Method 360.1 or Field instrument	n/a
Redox potential (ORP)	Field instrument	n/a
Sulfate (SO_4)	EPA Method 300	5 mg/L
Nitrate (NO_3)	EPA Method 300	0.1 mg/L
Ferrous iron (Fe^{2+})	EPA Method 200	0.1 mg/L
Methane (CH_4)	EPA Method 8015(M)	5 µg/L

6. Electronic Submittal of Data Reporting

All analytical results shall be uploaded in an electronic format to the State GeoTracker Database.

NOTICE TO CLOSURE PERMIT APPLICANTS

The South Coast Air Quality Management District (SCAQMD) has adopted Rule 1166 regulating emissions of Volatile Organic Compounds (VOC) from decontamination of soil effective **August 5, 1988.**

In addition to the requirements of your Closure Permit, persons excavating any underground storage tank that previously contained VOCs must:

- Notify the SCAQMD by telephone at (909) 396-2326 or by fax at (909) 396-3342 using the SCAQMD notification form 24 hours prior to tank excavation. [1166(c)(1)(A)]
- Monitor the excavated material during the excavation for VOC contamination. [1166(c)(1)]
- When VOC contamination is detected:
  - Cease excavation.
  - Cover the contaminated soil until implementation of approved mitigation measures. [1166(c)(1)(C)]
  - Notify the SCAQMD at (909) 396-2326 within 24 hours of detection of VOC contaminated soil. [1166(c)(1)(A)]
- A person shall not engage in or allow any on- or off-site spreading of VOC contaminated soil which results in uncontrolled evaporation of VOC to the atmosphere. [1166(c)(3)]

Exemptions

- Treatment of less than one (1) cubic yard of contaminated soil. [1166(c)(1)(A)]
- Decontamination of soil containing organic compounds that have an initial boiling point of 302°F or greater, Reid Vapor Pressure less than 80 mm Hg or Absolute Vapor Pressure less than 36 mm Hg at 20°C. [1166(c)(1)(B)(i-iii)]
- Removal of soil for sampling purposes pursuant to Environmental Protection Agency methods. [1166(c)(1)(C)]
- Accidental spillage of five (5) gallons or less of VOC. [1166(c)(1)(D)]
- Documentation of soil which is contaminated through natural seepage of VOC from oil and gas wells or other natural sources. [1166(c)(1)(E)]

SPECIFIC QUESTIONS ON RULE 1166 SHOULD BE REFERRED TO THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (909) 396-2326

ATTENTION CONTRACTOR
NOTIFICATION/PERMIT REQUIREMENT COMPLIANCE

This Authorization is issued subject to compliance with all applicable laws and regulations relating to the performance of work including, but not limited to, business license requirements, Building Codes, Fire Codes, Air Quality regulations, Health and Safety Codes, Water Codes, and Transportation regulations.

Pursuant to Los Angeles County Code, Section 11.78.045, and the Conditions and Limitations of the attached Hazardous Substance Underground Storage Closure and/or New Construction/Addendum Authorization, you are required to complete **ALL** of the agency notifications indicated below within the time period specified prior to commencement of work.

**[X] 72 HOUR ELECTRONIC NOTIFICATION – DEPARTMENT OF PUBLIC WORKS, ENVIRONMENTAL PROGRAMS DIVISION

The owner/operator or contractor shall provide electronic notification to Public Works at least 72 working hours prior to the commencement of any of the following work:

- Closure Authorization Permit - Prior to sampling and backfilling any excavation
- New Construction/Addendum Permit - Prior to backfilling any excavation

Notifications shall only be made at the following link:

- http://dpw.lacounty.gov/GO/DPWJST/

[X] 48 HOUR (OR AS REQUIRED)–LOCAL FIRE DEPARTMENT FIRE PREVENTION INSPECTOR:

[X] City of Monterey Park

[ ] Los Angeles County Fire Department

[X] 24 HOUR–SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

[X] SOUTH COAST AQMD – Rule 1149 and Rule 1166
Telephone: (909) 396-2326
Fax: (909) 396-3342

Telephone: (661) 723-8070

[ ] COUNTY SERVES AS BUILDING OFFICIAL, SEE ATTACHED

[X] CITY SERVES AS BUILDING OFFICIAL

FAILURE TO PROVIDE NOTICE AS REQUIRED ABOVE MAY RESULT IN PERMIT REVOCATION, ADDITIONAL SITE ASSESSMENT REQUIREMENTS, AND/OR ADMINISTRATIVE PENALTIES AS PROVIDED BY LAW.

** See attached closure permit supplement for Public Works notification requirements.

As a condition of the closure permit, it is required that the contractor create a profile in this office's electronic notification system in order to schedule inspections.

As of January 12, 2016

County of Los Angeles Department of Public Works Underground Storage Tank Electronic Notification system will now accept notifications for Emergency Repair Work, Prior to Backfill appointments and Closure appointment. Notifications shall only be made at the following link.

http://dpw.lacounty.gov/GO/DPW_UST/

Faxes, emails or Telephone calls will not be accepted.

COUNTY OF LOS ANGELES
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION

ADDITIONAL CONDITIONS FOR UST CLOSURE/SITE ASSESSMENT

TITLE 23: CALIFORNIA CODE OF REGULATIONS - WATERS
DIVISION 3: STATE WATER RESOURCES CONTROL BOARD (SWRCB)
CHAPTER 30: ELECTRONIC SUBMITTAL OF INFORMATION

Article 1 – GENERAL PROVISIONS

Section 3890. General Intent, Content, and Applicability of Regulations

(a) The regulations in this Chapter are intended to provide electronic access to reports, including soil, vapor, and water data, prepared for the purpose of subsurface investigation or remediation of: (1) an unauthorized discharge or deposit of waste as defined in section 13050 of the Water Code, (2) an unauthorized release of a hazardous substance as defined in section 25281 of the Health and Safety Code, or (3) a discharge of waste to land subject to Division 2 of Title 27 or Division 3, Chapter 15, of Title 23 of the California Code of Regulations (CCR).

(b) The regulations in this Chapter require persons responsible for submitting certain reports to the State Board, a regional board, or a local agency to submit these reports electronically over the Internet to the State Board's Geotracker system.

(c) The requirements of this Chapter are in addition to, and not superseded by, any other applicable reporting requirements.

(d) Except as provided in Section 3895(b), the electronic reporting requirements of this Chapter are intended to replace requirements for the submittal of paper copies of reports, beginning July 1, 2005.

Authority cited: Sections 13196 and 13198(c), Water Code.

Reference: Sections 13196 and 13198, Water Code.

Article 2. - ELECTRONIC SUBMITTAL OF INFORMATION

Section 3891. Definition of Terms

"COELT" is the United States Army Corps of Engineers Loading Tool program. It is a relational database application that is designed to run with the Microsoft Windows operating system. COELT places laboratory data into the standardized Electronic Deliverable Format (EDF). The program can accept data from Laboratory Information Management System (LIMS) or manually entered data. COELT is an optional software application that is intended to help laboratories that require new software to produce the EDF data deliverable. COELT includes a report utility that allows hard copy laboratory reports to be printed that match the actual electronic data. For purposes of the requirements of this chapter, version 1.2a of COELT may be used. The program (coelt12i.exe) and documents (coelt 1.2i manual.zip) for version 1.2i of COELT are available through links provided at http://www.waterboards.ca.gov/ust "CSRS-H" is the California Spatial Reference System-Horizontal, which includes the High Precision Geodetic Network (HPGN), the High Precision Geodetic Network–Densification (HPGN-D) and other geodetic control positions. These control positions have been determined by Global Positioning System survey methods in accordance with first order or better standards and specifications from the Federal Geodetic Control Subcommittee (FGCS) of the Federal Geographic Data Committee. These control positions are published by the National Geodetic Survey, California Spatial Reference Center or its successor.

"EDCC" is the Electronic Deliverable Consistency Checker program, which was developed for the EDF 1.2i format, described below. The EDCC program is run upon completion of an EDF report and produces an error report. This error report identifies problems within the given data set based upon the EDF database structure, guidelines, restrictions, and valid values. The error report also indicates the nature of each problem, so that the submitter can correct them. For purposes of the requirements of this chapter, the interactive web-version 1.2i or personal computer version 1.2i of EDCC shall be used. Programs (edcc.zip and edccservicepack1.zip) for version 1.2i of EDCC are available through links provided at http://www.waterboards.ca.gov/ust.

"EDF" is the Electronic Deliverable Format, originally developed for the United States Army Corps of Engineers. It is a data standard designed to facilitate transfer of electronic data files from analytical laboratories to end-users. It is a relational database whose files are related to one another through key fields. Laboratories can produce electronic EDF files by using their own LIMS or COELT software. The data components include chain-of-custody information, laboratory results, and quality assurance information. For purposes of the requirements of this chapter, version 1.2i of EDF shall be used. Specifications for version 1.2i of EDF (The Electronic Deliverable Format [EDF] Version 1.2i data dictionary are available in Title 27, Division 3, Subdivision 2, Chapter 1 (Laboratory Results) CCR, through links provided at http://www.waterboards.ca.gov/ust.

"Geotracker" is the State Board's Internet-accessible database system used by the State Board, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. This system consists of a relational database, on-line compliance reporting features, a geographical information system (GIS) interface and other features that are utilized by the State Board, regional boards, local agencies, regulated industry and the public to input, manage, or access compliance and regulatory tracking data. Geotracker, initially known as the Geographical Environmental Information Management System (GEIMS) database, is available at http://geotracker.swrcb.ca.gov.

"PDF" means Portable Document Format. "PDF" files are self-contained and cross-platform documents. A PDF file will look the same on the screen and in print, regardless of what type of computer or printer a person uses or which software package originally created the file. Although PDF files contain the complete formatting of the original document, including fonts and images, they are highly compressed, allowing efficient transfer of complex information.

"Permanent monitoring well" means any artificial excavation by any method made for the purpose of monitoring fluctuations in groundwater levels, the quality of groundwater, or the concentration of contaminants in groundwater and which is used for at least thirty days.

"Report" means any document or item that is required for submittal in order for a person to comply with a regulation, directive, or order issued by the State Board, a regional board, or a local agency, including but not limited to, any analysis of material by a laboratory that has accreditation or certification pursuant to Article 3 (commencing with Section 100825) of Chapter 4 of Part 1 of Division 101 of the Health and Safety Code.

Authority cited: Sections 13196 and 13198 (e), Water Code.
Reference: Sections 13195 (b) and 13196, Water Code.

Section 3892. Reports

The following reports are subject to the requirements of this Chapter, when those reports are required for the purpose of subsurface investigation or remediation of: (1) an unauthorized discharge or deposit of waste as defined in section 13050 of the Water Code, (2) an unauthorized release of a hazardous substance as defined in section 25281 of the Health and Safety Code, or (3) a discharge of waste to land subject to Division 2 of Title 27 or Division 3, Chapter 15 of Title 23 of the California Code of Regulations (CCR).

(a) Reports submitted pursuant to Division 3, Chapter 16, Article 11 of Title 23 of the CCR.

(b) Reports submitted pursuant to Division 2 of Title 27 or Division 3, Chapter 15 of Title 23 of the CCR.

(c) Reports submitted pursuant to section 13304 of the Water Code.

(d) Reports submitted pursuant to section 13267 of the Water Code.

(e) Reports submitted pursuant to any order or directive of the State Board, a regional board or a local agency.

(f) Reports submitted pursuant to the Two-year Joint Cooperative Agreement Execution Plans under the Defense / State Memorandum of Agreement and Navy Cost Recovery Cooperative Agreement, for the State of California.

Authority cited: Sections 13196 and 13198 (c), Water Code

Reference: Sections 13196 (a) and 13198 (c), Water Code.

Section 3893. Electronic Submittal of Reports

(a) Persons responsible for submitting reports pursuant to this Chapter shall submit the following information described in subdivision (b) electronically over the Internet to the State Board's Geotracker system in conformance with data dictionaries found in Title 27, Division 3, Subdivision 2 (Monitoring and Release Information) and specifications contained in the State Water Resources Control Board EDF Guidelines and Restrictions (version 1.2) and Survey XYZ Guidelines and Restrictions (Version 6). These data dictionaries and documents are available through links provided at http: www.waterboards.ca.gov/ust.

(b) Data generated after the effective date of the regulations by chemical analysis of soil, vapor, or water samples (including surface water, groundwater and influent/effluent water samples from remediation systems), shall be submitted in EDF format. All data submitted in EDF format shall be checked for errors prior to and during submittal using the EDCC software consistency-checking tool. All data submitted in EDF format must pass this error-checking tool as well as meet normal regulatory requirements in order to be considered valid data. In addition, when required for reports subject to this Chapter, the following shall also be submitted electronically:

(1) The latitude and longitude of any permanent monitoring well for which data is reported in EDF format, accurate to within 1 meter and referenced to a minimum of two reference points from the California Spatial Reference System (CSRS-H), if available.

(2) The surveyed elevation relative to a geodetic datum of any permanent monitoring well.

(3) The elevation of groundwater in any permanent monitoring well relative to the surveyed elevation

(4) A site map or maps showing the location of all sampling points referred to in the report.

(5) The depth to the screened interval and the length of screened interval for any permanent monitoring well.

(6) Boring logs, in PDF format.

(7) A complete copy of the report, in PDF format, which includes the signed transmittal letter and professional certification.

(c) All deadlines and timeframes for submittals of reports are applicable to the information submitted electronically pursuant to this Chapter.

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 and13198 (c), Water Code.

Section 3894. Timing of Electronic Reporting Requirements

(a) Electronic submittals of information for sites subject to the requirements of Title 23, Division 3, Chapter 16, Article 11 of the California Code of Regulations, shall begin on December 16, 2004.

(b) Unless otherwise specifically noted, all other electronic submittals required pursuant to this Chapter shall begin January 1, 2005.

(c) Until July 1, 2005, the electronic reporting requirements of this Chapter are in addition to any existing paper or other reporting requirements.

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 (a) and 13198 (c), Water Code.

Section 3895. Submittal of Alternate Forms of Reports

(a) Beginning July 1, 2005, the successful submittal of electronic information in accordance with this Chapter shall replace the requirement for the submittal of a paper copy, except as provided in subdivision (b).

(b) In addition to the electronic submittal of reports required pursuant to this Chapter, a regulatory agency may require the submittal of a report, or portions thereof, in diskette, compact disc or other form if the agency determines that the alternative form is necessary. The burden, including cost, of these alternative forms shall bear a reasonable relationship to the need for alternative form and benefits to be obtained from the alternative form.

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 (a) and 13198 (c), Water Code

NOTICE: Original paper reports with wet ink signature and seal must continue to be submitted to this office pursuant to CCR Title 23, Division 3, Chapter 30, Article 2, Section 3895 (b), regardless if such report is required by regulation to be electronically uploaded to Geotracker.

APPLICATION FOR TRANSFER OF HAZARDOUS SUBSTANCES UNDERGROUND STORAGE PERMIT
COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
Environmental Programs Division
900 South Fremont Avenue, 3rd Floor Alhambra Building
Alhambra, CA 91803-1331
(626) 458-3517 FAX (626) 458-3541

Pursuant to Los Angeles County Code Title 11, Division 4, Section 11.80.170 application is hereby made for the transfer of ownership of an existing Hazardous Substances Underground Storage Permit (Permit) or Unified Program (UP) Facility Permit which incorporates Underground Storage Tanks (USTs).

COMPLETE THE FOLLOWING.

Date of Transfer _____ California Environmental Reporting System (CERS) ID# _____

New Facility Name _____

Facility Address _____ City _____

Assessor Parcel Number (APN) Map Book No _____ Page No _____ Parcel No _____

New Permittee name _____ Number of USTs _____

Email Address _____ Existing Permit No _____

THE NEW PERMITTEE IS:

☐ UST Owner and Operator ☐ UST Owner Only ☐ UST Operator Only
☐ Unified Program facility owner and operator (complete below)
☐ Unified Program facility owner only

IF UST OPERATOR IS NOT THE UST OWNER, AND IS NOT NAMED ON THE UNIFIED PROGRAM FACILITY PERMIT, COMPLETE THE FOLLOWING:

UST Operator Name _____ Telephone _____

UST Operator Address _____ State _____ Zip _____

***No fee required to notify of operator change if not replacing a person named in the Unified Program Facility Permit ***

This Application for Transfer must be signed and accompanied with the following:

- **OPERATING PERMIT TRANSFER FEE PAYABLE TO: "COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS"**

APPLICATION FOR TRANSFER FEE **$658.00** ( ) CASH ( ) CHECK # 137070

- SUBMIT TO CERS UST FACILITY DATA
- SUBMIT TO CERS UST TANK FORM DATA (ALL USTS)
- SUBMIT TO CERS UST MONITORING PLAN DATA
- SUBMIT TO CERS DESIGNATED OPERATOR FORM
- SUBMIT TO CERS FINANCIAL RESPONSIBILITY FORMS
- SUBMIT TO CERS RESPONSE PLAN FORM

BY SIGNING BELOW, THE PERMIT TRANSFER APPLICANT ACKNOWLEDGES HAVING READ ALL CONDITIONS FOR TRANSFER ON THE REVERSE SIDE OF THIS FORM, AGREES TO COMPLY WITH THE CONDITIONS AND LIMITATIONS OF AND ASSUMES THE OBLIGATIONS OF THE HAZARDOUS SUBSTANCE UNDERGROUND STORAGE PERMIT OR UNIFIED PROGRAM FACILITY PERMIT FOR WHICH TRANSFER IS REQUESTED.

INSTRUCTIONS

Hazardous Substances Underground Storage Permit (Permit) Application for Transfer Supplement

This Application for Permit Transfer form is to be used only for the transfer of an existing Permit or underground storage tank (UST) authorized under a Unified Program (UP) Facility Permit to a new owner or operator of a facility within the jurisdiction of the County of Los Angeles Department of Public Works (DPW).

The new Permit owner must complete and submit an Application for Transfer and Transfer Fee to DPW within 30 days of transfer. The application must be accompanied with uploaded UP form data to the California Environmental Reporting System (CERS), Business Portal: https://cers.calepa.ca.gov/ including all UP - UST FACILITY INFORMATION data, UP UST TANK INFORMATION data, UP UST MONITORING PLAN data, as well as uploaded and signed DESIGNATED OPERATOR FORM, FINANCIAL RESPONSIBILITY FORM (petroleum USTs), and UST RESPONSE PLAN FORM.

By applying for transfer of an existing Permit, the new Permit owner agrees to assume all obligations under the existing Permit including all fee installments, installation and maintenance of approved monitoring systems, and all reporting requirements. **IT IS THE APPLICANTS RESPONSIBILITY TO DETERMINE IF DELINQUENT FEES OR OTHER OUTSTANDING SUBMITTAL REQUIREMENTS, INCLUDING VIOLATION CORRECTIONS, ARE OWED TO DPW OR CUPA.**

The DPW may review and modify, or terminate the Transfer of Permit if it is determined the facility is not providing or threatens not to provide for the safe underground storage of hazardous substances.

The owner or operator of USTs shall monitor the facility using the method specified in the Permit. If the permittee of a facility is not the UST owner or UST operator, the Permittee shall provide a copy of the Permit to both the owner and operator. If the Permittee is a person other than the UST operator of the USTs, that person shall do all of the following: a) enter into a written contract with the UST operator which requires the UST operator to monitor the USTs as set forth in the Permit, b) provide the UST operator with a copy of California Health and Safety Code, Division 20, Chapter 6.7 and California Code of Regulations Title 23, Division 3, Chapter 16, and c) inform DPW within thirty (30) days of any change of UST operator.

The Permit annual maintenance fee will be billed under the County of Los Angeles Certified Unified Program Agency (CUPA) Consolidated Permit (Los Angeles County Code Title 12, Section 12.50.070) the following Fiscal Year (July 1 to June 30) to the Permittee authorized here, unless other specific arrangements have been approved by the DPW and CUPA. Regardless of billing arrangements, the UST owner is responsible for insuring payment of all fees and compliance with all monitoring requirements.

The Permittee, UST owner and UST operator shall comply with provisions of California Health and Safety Code, Division 20, Chapter 6.7, California Code of Regulations Title 23, Division 3, Chapter 16 and Chapter 18, and Los Angeles County Code, Title 11, Division 4.

CERTIFICATION OF COMPLIANCE WITH
LOS ANGELES COUNTY LOBBYIST ORDINANCE

I certify that I am the person applicant for the project located at:

(LOCATION ADDRESS)

and I am aware of the requirements of Los Angeles County Code, Chapter 2.160 (relating to the Los Angeles County Lobbyist Ordinance) and I (my firm, or my principals on behalf of which I have acted) will comply with such requirements through the application process.

UNDERGROUND STORAGE TANKS
CLOSURE INFORMATION

1. This authorization to temporarily or permanently close an underground storage tank (UST) pursuant to Los Angeles County Code, Title 11, Division 4. This authorization may also be used for product piping removal associated with an existing or removed USTs.

2. This authorization will not be approved unless a valid Hazardous Substance Underground Storage Permit (HSUSP) application is on file with the DPW or an Unified Program Facility Permit has been issued by the Certified Unified Program Agency (CUPA).

3. Submittals, including this authorization, made on behalf of the UST owner, operator, or Unified Program permit owner or operator shall be accompanied by written authorization.

4. USTs closed on site, by removal, or cleaning and filling with an inert solid substance prior to January 1, 1984, need not comply with current closure requirements. However, contaminations related to these USTs must be reported and investigated.

5. All work shall be carried out in full compliance with all applicable federal, state and local laws, ordinances, rules and regulations.

6. All fees due to DPW and/or to the CUPA for the operation and maintenance of the facility subject to closure through the date of closure shall be paid in full.

7. Closure authorizations are site specific and may be subject to additional sampling and site characterization requirements as necessary to protect the public health and safety, underground and surface water supplies, and may include requirements requested by Federal, State or other regulatory agencies.

8. All inspection notification(s) shall be made as directed by the attached conditions of this approval.

9. Within 30 days after closure, all requirements of this Closure authorization shall be furnished to the DPW in a closure report per the DPW Closure Report Requirements and Supplements, describing all work completed, results of any required sampling, disposition of any contaminated soils or substances found and any other requirements made part of the closure application as well as submittal to the CERS database of the Unified Program UST FACILITY and UST TANK information for each UST permanently closed. http://cers.calepa.ca.gov/

10. In all cases, closure authorizations expire 180 days from the date of issue unless otherwise specified. It is the responsibility of the owner or operator to make sure that the final report contains the required information and is submitted to the DPW within 30 days from the sampling date or 180 days from the date of the permit issuance, whichever is earlier. The total number of tanks listed on the HSUSP or UFP Permit and the yearly annual permit maintenance billing will remain unchanged until the closure report is received by the DPW. Only one copy of the closure report needs to be submitted, unless others are directed.

11. This Closure Authorization is considered complete when all requirements of this Closure Authorization and the Permit have been met.

12. The DPW will review the closure report and will issue closure certification with no further action when all requirements of this Closure Authorization and Permit have been met, and where no unauthorized release has been found.

13. If an unauthorized release has occurred or any detected constituent in soil or groundwater is found above the method detection limit of an analytical method as identified in the laboratory testing requirements, reporting of this unauthorized release must comply with the Health and Safety Code Division 20, Chapter 6.7.

14. Where an unauthorized release has occurred, referral of the closure report will be made to a Regional Water Quality Control Board or State Water Resources Control Board who will then provide further direction until closure certification is issued.

15. All correspondence related to this closure authorization shall include the SITE-FILE numbers listed on the front of this document found in the upper right box and be addressed to the following location:

ENVIRONMENTAL PROGRAMS DIVISION

CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the County of Los Angeles Department of Public Works, Environmental Programs Division, P.O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.
2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.
3. Description of methods for obtaining, handling, and transporting samples.
4. Time and date samples were obtained.
5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for Underground Storage Tank closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.
6. Chain-of-custody documentation initiated by person obtaining sample through person at a California Department of Health Services certified laboratory.
7. Disposal destination of tanks and evidence of legal disposal.
8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.
9. Documentation as to depth of groundwater at facility.
10. Manifests to document hazardous waste disposal of any removed soil and tank rinsate.
11. Evidence of legal disposal of soils designated as nonhazardous.
12. Any observations of site contamination.
13. Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.
14. Submit to the California Environmental Reporting System (CERS) the date the UST was permanently closed for all tanks removed or closed in-place.

UST Facility Operating Permit Application:

Home » Prepare Submittal » UST: UST Facility Operating Permit Application (Draft)

You must complete this form within 30 days of all new permits, permit changes, or facility information changes. You will also need to update/confirm your tank monitoring plan and other pertinent UST-related forms.

All facilities **must** provide a BOE Number - valid numbers are 8 digits long starting with the numbers 44 . State and federal facilities should use 44002062. If **ALL** underground tanks at your facility **ONLY** contain NON petroleum productions, you can provide this generic BOE Number: 44000000. Contact your local regulator if you are unsure what number to provide.

The former paper version of this form was called "UST - Operating Permit Application-Facility Information" (Form A)

More information about UST Financial Responsibility Mechanisms is available at the Water Board's Underground Storage Tank Cleanup Fund Finance & Responsibility web page.

UST Tank Information/Monitoring Plan: [redacted]

Use this form to enter data for new UST systems or revise data for an existing UST system. You must complete a separate form for each affected tank. For tanks that are part of a compartmentalized unit, each compartment is considered a separate tank. This information is required within 30 days of permit or facility information changes, unless your local agency requires approval prior to making the changes.

The former paper version of this form was called "UST Operating Permit Application–Tank Information" (Form B).

CLOSURE – UNDERGROUND STORAGE TANKS

CONDITIONS A – GENERAL

1. Closures shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County, Department of County Engineer – Facilities; Los Angeles County Fire Department, Fire Prevention Division; or the appropriate City Fire Department; South Coast Air Quality Management District and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Departments shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3)-business day advance notification.
   b. Permanent closure of a tank in place or a temporary closure shall require a 30-written notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, when such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well-being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their original construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards State of California" by the Department of Water Resources, contained in Bulletin 74 – 81 December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies the California Regional Water Quality Board, the Los Angeles County Department of Health Services, and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original liquid stored and its components.
   b. The personnel shall be sufficiently skilled to safely carry out such operation.
   c. Contaminated materials removed from each facility shall be disposed of at legal point of discharge.
   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B – TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, "Abandonment or Removal of Underground Tanks," Part A and any other applicable Parts.

2. A temporary closure shall not exceed 180 days.

CONDITION C – PERMANENT TANK (S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Part B and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction at the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish tank integrity is carried by the County Engineer.

4. If an appointment has been arranged with a County Engineer Inspector to inspect the removal of a tank, the inspector will only wait at the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another inspection fee may be charged if the inspector has to return to the site.

5. After inspection, tanks shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil or waste oil, the integrity shall be demonstrated using the soil samples and analysis procedures described in CONDITIONS D below.

7. The site shall be filled and compacted to the above ground level.

CONDITIONS D – PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Parts B no C, and any other applicable Parts.

2. Owners/operators shall demonstrate tank integrity as follows:

   a. Test borings shall be strategically placed to intercept a point beneath the center of the tank, if possible. If strict drilling is not feasible, the test boring may be drilled vertically and the reason stated in the report in 2.h. below.
   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank along the longer axis of the tank.
   c. For multiple tanks, as a minimum, borings shall be placed at 20-foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purposes of test location and placement.
   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and 40 feet below grade level.
   e. A Shelby Tube or a Modified California Sampler shall be utilized for taking all soil samples.
   f. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.
   g. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants the County Engineer shall require a site investigation as described in Chapter V of the County's "Underground Storage of Hazardous Materials – Guidelines."

4. A report shall be submitted to the County Engineer containing the results of the site investigation.

CLOSURE APPLICATION SUPPLEMENT
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

PART 1 OF 3

FOR OFFICE USE ONLY
SITE/FACILITY NO. 6494-[illegible]
APPLICATION NO. 4C5[illegible]

To satisfy the permanent closure requirements for underground storage tanks storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

***** Soil sampling will be required for Vent and Vapor Recovery piping for UST systems installed after July 1, 2003. *****

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 1B	2nd feet beneath	TPHD	8015M
2A, 2B	[illegible]	BTEX, MTBE	8260B
3A, 3B		Fuel Oxygenates	
		Organic lead	DOHS Meth.
1 sample	Soil feet below	[illegible]	Same as
	[illegible]	above	above
1 sample	2nd feet below	[illegible]	Same as
	[illegible]	above	above

[illegible]

Continued on Page 2

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date/time of sampling shall be included in the final report.

4. Conform to the analytical requirements table below for petroleum hydrocarbon sites. Apply EPA Method 5035 specified in the USEPA SW-846, version III (12/1996) for soil sample preparation and preservation in order to minimize volatile organic losses. Use the sample collection devices, or equivalent, specified in the method (e.g., the Encore™ sampler). If the Encore™ sampler is used, analyze sample within 48 hours from the collection. Analyze sample within 10 days for soil samples stored under frozen conditions.

UST CONTENTS	Analyte	Analytical Method	Required MDL: Soil (mg/kg)	Required MDL: Water (ug/L)
GASOLINE OR DIESEL	Total Petroleum Hydrocarbons (TPH) - Gasoline	EPA Method 8015 (M)	100-200	50-100
	Total Petroleum Hydrocarbons (TPH) - Diesel	EPA Method 8015 (M)	1000	500
	Benzene	EPA Method 8260B (8021B)	1	0.5
	Toluene	EPA Method 8260B (8021B)	1	0.5
	Ethylbenzene	EPA Method 8260B (8021B)	1	0.5
	Xylenes (total)	EPA Method 8260B (8021B)	1	0.5
	Methyl Tertiary Butyl Ether (MTBE)	EPA Method 8260B	2	1
	Diisopropyl ether (DIPE)	EPA Method 8260B	2	1
	Ethyl tertiary butyl ether (ETBE)	EPA Method 8260B	2	1
	Tertiary amyl methyl ether (TAME)	EPA Method 8260B	2	1
	Tertiary butyl alcohol (TBA)	EPA Method 8260B	20	10
	Ethanol	EPA Method 8260B	200	100
	Methanol	EPA Method 8015 (M)	500	500
WASTE OIL	Total Recoverable Petroleum Hydrocarbons (TRPH) - Waste Oil	EPA Method 418.1 EPA Method 8260B	1000	500
OTHER, UNKNOWN	UST Permitted Contents, all VOC's (EPA Method 8260) + To Be Determined			

Continued on Page 3

5. All soil/groundwater samples shall be analyzed by a laboratory approved by the California Environmental Accreditation Laboratory Program (ELAP).

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted, b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determination; d) The method of analysis; e) Signature of chemist certifying results.

7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

10. A final report that contains all of the above required information shall be submitted to the office above within one (1) month form the sampling date or 180 days from the date of this permit, whichever is earlier.

11. All electronic data shall be submitted to the State Water Resources Control Board Geotracker database.

STATE OF CALIFORNIA
California Regional Water Quality Control Board
Los Angeles Region
(Underground Storage Tank Program)

General Laboratory Testing Requirements for Petroleum Hydrocarbon Impacted Sites

The purpose of this document is to supplement the Regional Board's Laboratory Report Form (6/00) in order to update obsolete testing requirements and set forth the new requirements for fuel oxygenates and natural attenuation testing. Each analytical method used must be certified by the California Environmental Accreditation Laboratory Program (ELAP).

1. General Laboratory QA/QC Requirements

Conform to the Regional Board's Laboratory Report Form (6/00) in general, except for items specified below.

2. Compounds to be Tested

Total petroleum hydrocarbons in gasoline range (TPH[g]) (C4 – C12); Total petroleum hydrocarbons in diesel range (TPH[d]) (C13 – C22); benzene, toluene, ethylbenzene, xylenes (BTEX); methyl tertiary butyl ether (MTBE); di-isopropyl ether (DIPE); ethyl tertiary butyl ether (ETBE); tertiary amyl methyl ether (TAME); tertiary butyl alcohol (TBA). If the gasoline tanks historically or currently contain methanol or ethanol, these compounds are also to be tested.

3. Analytical Test Methods and Detection Limits

Conform to Table 1 below. Report any concentration detected between the method detection limit (MDL) and estimated quantitation limit (EQL) or reporting limit (RL) in a numerical value with a "J" flag indicator. All "Non-Detect" (ND) shall be reported in the format with "< (numerical MDL)." Integrate all fuel oxygenate additive concentrations into total petroleum hydrocarbons (TPH) and report it as TPH. EPA Method 8021B may be used to substitute EPA Method 8260B at the sites where all fuel oxygenates have not been identified by EPA Method 8260B in soil and/or groundwater.

Table 1: Analytical Requirements

		Required MDL (Method detection limit)	
Analyte	Analytical Method	Soil (µg/kg)	Water (µg/L)
BTEX	EPA Method 8260B(8021B)	1	0.5
MTBE	EPA Method 8260B	2	1
DIPE	EPA Method 8260B	2	1
ETBE	EPA Method 8260B	2	1
TAME	EPA Method 8260B	2	1
TBA	EPA Method 8260B	20	10
TPHg	Cal-LUFT GC/FID or GC/MS	100-200	50-100
TPHd	Cal-LUFT GC/FID	1000	500
Methanol	Cal-LUFT GC/FID	1000	500
Ethanol	Cal-LUFT GC/FID(EPA8260B)	500	250

4. Use of EPA Method 5b35 for Soil Samples

Apply EPA Method 5035A specified in the USEPA SW 846, (7/2002) for soil sample preparation and preservation in order to minimize volatile organic losses. Use the sample collection devices, or equivalent, specified in the method (e.g., the Encore™ sampler). If the Encore™ sampler is used, analyze sample within 48 hours from the collection. Analyze sample within 14 days for soil samples stored under frozen conditions.

5. Natural Attenuation Parameters

Natural attenuation processes include dispersion, dilution, sorption, volatilization, biodegradation, and chemical or biological transformation. A carefully controlled monitoring program for the natural attenuation can be used to confirm site-specific mass reduction and achieve remedial objectives. In order to test parameters to confirm the occurrence of natural attenuation, site characterization must be complete first.

5.1 Primary Natural Attenuation Criteria

Meet the following conditions prior to testing for the secondary natural attenuation parameters:

a) Groundwater contaminant plume must be fully defined.

b) Groundwater monitoring program on a quarterly basis must be completed for at least two years including data of MTBE and other oxygenates.

c) Groundwater concentration has consistently decreased or been stable.

d) Determination of site-specific hydraulic conductivity must be conducted. Refer the ASTM D4044-91 for the slug test procedures. Other field methods (e.g., pumping test) are also acceptable to determine hydraulic conductivity.

e) Characterization of MTBE and other oxygenates plume vertical extent must be completed with discrete multi-depth groundwater sampling at all groundwater vulnerable areas designated by the Board.

5.2 Secondary Natural Attenuation Parameters

Analyze the secondary natural attenuation parameters only after the primary natural attenuation criteria are met. Analyze the secondary natural attenuation parameters at all groundwater monitoring wells inside and outside of the plume. Conform to Table 2 below for parameters and testing methods.

Table 2: Analytical Requirements for Secondary Natural Attenuation Parameters

Parameters	Test Method	Required MDL
pH	EPA Method 150.2 or Field instrument	n/a
Dissolved oxygen (DO)	EPA Method 360.1 or Field instrument	n/a
Redox potential (ORP)	Field instrument	n/a
Sulfate (SO_4)	EPA Method 300	5 mg/L
Nitrate (NO_3)	EPA Method 300	0.1 mg/L
Ferrous iron (Fe^{+2})	EPA Method 200	0.1 mg/L
Methane (CH_4)	EPA Method 8015(M)	5 µg/L

6. Electronic Submittal of Data Reporting

All analytical results shall be uploaded in an electronic format to the State GeoTracker Database.

NOTICE TO CLOSURE PERMIT APPLICANTS

The South Coast Air Quality Management District (SCAQMD) has adopted Rule 1166 regulating emissions of Volatile Organic Compounds (VOC) from decontamination of soil effective **August 5, 1988**.

In addition to the requirements of your Closure Permit, persons excavating any underground storage tank that previously contained VOCs must:

- Notify the SCAQMD by telephone at (909) 396-2326 or by fax at (909) 396-3342 using the SCAQMD notification form 24 hours prior to tank excavation. 1166(d)(2)
- Monitor the excavated material during the excavation for VOC contamination 1166(c)(1)(E)
- When VOC contamination is detected,
  - Cease excavation.
  - Cover the contaminated soil until implementation of approved mitigation measures. 1166(c)(1)(C)
  - Notify the SCAQMD at (909) 396-2326 within 24 hours of detection of VOC contaminated soil. 1166(c)(1)(A)
- A person shall not engage in or allow any on- or off-site spreading of VOC contaminated soil which results in uncontrolled evaporation of VOC to the atmosphere. 1166(c)(3)

Exemptions

- Treatment of less than one (1) cubic yard of contaminated soil. 1166(d)(1)(A)
- Decontamination of soil containing organic compounds that have an initial boiling point of 302°F or greater, Reid Vapor Pressure less than 80 mm Hg or Absolute Vapor Pressure less than 38 mm Hg at 20°C. 1166(d)(1)(B)(i)
- Removal of soil for sampling purposes pursuant to Environmental Protection Agency methods. 1166(c)(1)(D)
- Accidental spillage of five (5) gallons or less of VOC. 1166(d)(1)(D)
- Documentation of soil which is contaminated through natural seepage of VOC from oil and gas wells or other natural sources. 1166(d)(1)(E)

SPECIFIC QUESTIONS ON RULE 1166 SHOULD BE REFERRED TO THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (909) 396-2326

ATTENTION CONTRACTOR
NOTIFICATION/PERMIT REQUIREMENT COMPLIANCE

This Authorization is issued subject to compliance with all applicable laws and regulations relating to the performance of work including, but not limited to, business license requirements, Building Codes, Fire Codes, Air Quality regulations, Health and Safety Codes, Water Codes, and Transportation regulations.

Pursuant to Los Angeles County Code, Section 11.78.045, and the Conditions and Limitations of the attached Hazardous Substance Underground Storage Closure and/or New Construction/Addendum Authorization, you are required to complete **ALL** of the agency notifications indicated below within the time period specified prior to commencement of work.

[X] 72 HOUR ELECTRONIC NOTIFICATION – DEPARTMENT OF PUBLIC WORKS, ENVIRONMENTAL PROGRAMS DIVISION

The owner/operator or contractor shall provide electronic notification to Public Works at least 72 working hours prior to the commencement of any of the following work:

- Closure Authorization Permit: Prior to sampling and backfilling any excavation
- New Construction/Addendum Permit: Prior to backfilling any excavation

Notifications shall only be made at the following link:

- http://dpw.lacounty.gov/GO/DPWJST/

[X] 48 HOUR (OR AS REQUIRED)–LOCAL FIRE DEPARTMENT FIRE PREVENTION INSPECTOR:

[X] City of Monterey Park

[ ] Los Angeles County Fire Department

[X] 24 HOUR–SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

[X] SOUTH COAST AQMD – Rule 1149 and Rule 1166
Telephone: (909) 396-2626
Fax: (909) 396-3342

[ ] ANTELOPE VALLEY AQMD – Rule 1149 and Rule 1166
Telephone: (661) 723-8070

[ ] COUNTY SERVES AS BUILDING OFFICIAL, SEE ATTACHED

[X] CITY SERVES AS BUILDING OFFICIAL

FAILURE TO PROVIDE NOTICE AS REQUIRED ABOVE MAY RESULT IN PERMIT REVOCATION, ADDITIONAL SITE ASSESSMENT REQUIREMENTS AND/OR ADMINISTRATIVE PENALTIES AS PROVIDED BY LAW.

** See attached closure permit supplement for Public Works notification requirements.

As a condition of the closure permit, it is required that the contractor create a profile in this office's electronic notification system in order to schedule inspections.

As of January 12, 2016

County of Los Angeles Department of Public Works Underground Storage Tank Electronic Notification system will now accept notifications for Emergency Repair Work, Prior to Backfill appointments and Closure appointment. Notifications shall only be made at the following link.

http://dpw.lacounty.gov/GO/DPWUST/

Faxes, emails or Telephone calls will not be accepted.

COUNTY OF LOS ANGELES
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION

ADDITIONAL CONDITIONS FOR UST CLOSURE/SITE ASSESSMENT

TITLE 23: CALIFORNIA CODE OF REGULATIONS - WATERS
DIVISION 3: STATE WATER RESOURCES CONTROL BOARD (SWRCB)
CHAPTER 30: ELECTRONIC SUBMITTAL OF INFORMATION

Article 1 GENERAL PROVISIONS

Section 3890. General Intent, Content, and Applicability of Regulations

(a) The regulations in this Chapter are intended to provide electronic access to reports, including soil, vapor, and water data, prepared for the purpose of subsurface investigation or remediation of: (1) an unauthorized discharge or deposit of waste as defined in section 13050 of the Water Code, (2) an unauthorized release of a hazardous substance as defined in section 25281 of the Health and Safety Code, or (3) a discharge of waste to land subject to Division 2 of Title 27 or Division 3, Chapter 15, of Title 23 of the California Code of Regulations (CCR).

(b) The regulations in this Chapter require persons responsible for submitting certain reports to the State Board, a regional board, or a local agency to submit these reports electronically over the Internet to the State Board's Geotracker system.

(c) The requirements of this Chapter are in addition to, and not superseded by, any other applicable reporting requirements.

(d) Except as provided in Section 3895(b), the electronic reporting requirements of this Chapter are intended to replace requirements for the submittal of paper copies of reports, beginning July 1, 2005.

Authority cited: Sections 13196 and 13198(c), Water Code.

Reference: Sections 13196 and 13198, Water Code.

Article 2. - ELECTRONIC SUBMITTAL OF INFORMATION

Section 3891. Definition of Terms

"COELT" is the United States Army Corps of Engineers Loading Tool program. It is a relational database application that is designed to run with the Microsoft Windows operating system. COELT places laboratory data into the standardized Electronic Deliverable Format (EDF). The program can accept data from Laboratory Information Management System (LIMS) or manually entered data. COELT is an optional software application that is intended to help laboratories that require new software to produce the EDF data deliverable. COELT includes a report utility that allows hard copy laboratory reports to be printed that match the actual electronic data. For purposes of the requirements of this chapter, version 1.2a of COELT may be used. The program (coelt12i.exe) and documents (coelt 1.2i manual.zip) for version 1.2i of COELT are available through links provided at http://www.waterboards.ca.gov/ust. "CSRS-H" is the California Spatial Reference System-Horizontal, which includes the High Precision Geodetic Network (HPGN), the High Precision Geodetic Network–Densification (HPGN-D) and other geodetic control positions. These control positions have been determined by Global Positioning System survey methods in accordance with first order or better standards and specifications from the Federal Geodetic Control Subcommittee (FGCS) of the Federal Geographic Data Committee. These control positions are published by the National Geodetic Survey, California Spatial Reference Center or its successor.

"EDCC" is the Electronic Deliverable Consistency Checker program, which was developed for the EDF1.2i format, described below. The EDCC program is run upon completion of an EDF report and produces an error report. This error report identifies problems within the given data set based upon the EDF database structure, guidelines, restrictions, and valid values. The error report also indicates the nature of each problem, so that the submitter can correct them. For purposes of the requirements of this chapter, the interactive web-version 1.2i or personal computer version 1.2i of EDCC shall be used. Programs (edcczip and edccservicepack.zip) for version 1.2i of EDCC are available through links provided at http://www.waterboards.ca.gov/lust.

"EDF" is the Electronic Deliverable Format, originally developed for the United States Army Corps of Engineers. It is a data standard designed to facilitate transfer of electronic data files from analytical laboratories to end-users. It is a relational database whose files are related to one another through key fields. Laboratories can produce electronic EDF files by using their own LIMS or COELT software. The data components include chain-of custody information, laboratory results, and quality assurance information. For purposes of the requirements of this chapter, version 1.2i of EDF shall be used. Specifications for version 1.2i of EDF (The Electronic Deliverable Format "EDF) Version 1.2i data dictionary are available in Title 27, Division 3, Subdivision 2, Chapter 7 (Laboratory Results) CCR, through links provided at http://www.waterboards.ca.gov/lust.

"Geotracker" is the State Board's Internet-accessible database system used by the State Board, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. This system consists of a relational database, on-line compliance reporting features, a geographical information system (GIS) interface and other features that are utilized by the State Board, regional boards, local agencies, regulated industry and the public to input, manage, or access compliance and regulatory tracking data. Geotracker, initially known as the Geographical Environmental Information Management System (GEIMS) database, is available at http://geotracker.swrcb.ca.gov/.

"PDF" means Portable Document Format. "PDF" files are self-contained and cross-platform documents. A PDF file will look the same on the screen and in print, regardless of what type of computer or printer a person uses or which software package originally created the file. Although PDF files contain the complete formatting of the original document, including fonts and images, they are highly compressed, allowing efficient transfer of complex information.

"Permanent monitoring well" means any artificial excavation by any method made for the purpose of monitoring fluctuations in groundwater levels, the quality of groundwater, or the concentration of contaminants in groundwater and which is used for at least thirty days.

"Report" means any document or item that is required for submittal in order for a person to comply with a regulation, directive, or order issued by the State Board, a regional board, or a local agency, including but not limited to, any analysis of material by a laboratory that has accreditation or certification pursuant to Article 3 (commencing with Section 100825) of Chapter 4 of Part 1 of Division 101 of the Health and Safety Code.
Authority cited: Sections 13196 and 13198 (c), Water Code.
Reference: Sections 13195 (b) and 13196, Water Code.

Section 3892. Reports

The following reports are subject to the requirements of this Chapter, when those reports are required for the purpose of subsurface investigation or remediation of: (1) an unauthorized discharge or deposit of waste as defined in section 13050 of the Water Code; (2) an unauthorized release of a hazardous substance as defined in section 25281 of the Health and Safety Code, or (3) a discharge of waste to land subject to Division 2 of Title 27 or Division 3, Chapter 15 of Title 23 of the California Code of Regulations (CCR).

(a) Reports submitted pursuant to Division 3, Chapter 16, Article 11 of Title 23 of the CCR.

(b) Reports submitted pursuant to Division 2 of Title 27 or Division 3, Chapter 15 of Title 23 of the CCR.

(c) Reports submitted pursuant to section 13304 of the Water Code.

(d) Reports submitted pursuant to section 13267 of the Water Code.

(e) Reports submitted pursuant to any order or directive of the State Board, a regional board or a local agency.

(f) Reports submitted pursuant to the Two-year Joint Cooperative Agreement Execution Plans under the DoD/State Memorandum of Agreement and Navy Cost Recovery Cooperative Agreement, for the State of California.

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 (a) and 13198 (c), Water Code.

Section 3893. Electronic Submittal of Reports

(a) Persons responsible for submitting reports pursuant to this Chapter shall submit the following information described in subdivision (b) electronically over the Internet to the State Board's Geotracker system in conformance with data dictionaries found in Title 27, Division 3, Subdivision 2 (Monitoring and Release Information) and specifications contained in the State Water Resources Control Board EDF Guidelines and Restrictions (version 1.2) and Survey XYZ Guidelines and Restrictions (Version 6). These data dictionaries and documents are available through links provided at http://www.waterboards.ca.gov/ust

(b) Data generated after the effective date of the regulations by chemical analysis of soil, vapor, or water samples (including surface water, groundwater and influent/effluent water samples from remediation systems), shall be submitted in EDF format. All data submitted in EDF format shall be checked for errors prior to and during submittal using the EDOC software consistency checking tool. All data submitted in EDF format must pass this error-checking tool as well as meet normal regulatory requirements in order to be considered valid data. In addition, when required for reports subject to this Chapter, the following shall also be submitted electronically:

(1) The latitude and longitude of any permanent monitoring well for which data is reported in EDF format, accurate to within 1 meter and referenced to a minimum of two reference points from the California Spatial Reference System (CSRS-H), if available.

(2) The surveyed elevation relative to a geodetic datum of any permanent monitoring well.

(3) The elevation of groundwater in any permanent monitoring well relative to the surveyed elevation.

(4) A site map or maps showing the location of all sampling points referred to in the report.

(5) The depth to the screened interval and the length of screened interval for any permanent monitoring well.

(6) Boring logs, in PDF format.

(7) A complete copy of the report in PDF format, which includes the signed transmittal letter and professional certification.

(c) All deadlines and timeframes for submittals of reports are applicable to the information submitted electronically pursuant to this Chapter.

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 and13198 (c), Water Code.

Section 3894. Timing of Electronic Reporting Requirements

(a) Electronic submittals of information for sites subject to the requirements of Title 23, Division 3, Chapter 16, Article 11 of the California Code of Regulations, shall begin on December 16, 2004.

(b) Unless otherwise specifically noted, all other electronic submittals required pursuant to this Chapter shall begin January 1, 2005.

(c) Until July 1, 2005, the electronic reporting requirements of this Chapter are in addition to any existing paper or other reporting requirements.

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 (a) and 13198 (c), Water Code.

Section 3895. Submittal of Alternate Forms of Reports

(a) Beginning July 1, 2005, the successful submittal of electronic information in accordance with this Chapter shall replace the requirement for the submittal of a paper copy, except as provided in subdivision (b).

(b) In addition to the electronic submittal of reports required pursuant to this Chapter, a regulatory agency may require the submittal of a report, or portions thereof, in diskette, compact disc or other form if the agency determines that the alternative form is necessary. The burden, including cost, of these alternative forms shall bear a reasonable relationship to the need for alternative form and benefits to be obtained from the alternative form

Authority cited: Sections 13196 and 13198 (c), Water Code.

Reference: Sections 13196 (a) and 13198 (c), Water Code

NOTICE: Original paper reports with wet ink signature and seal must continue to be submitted to this office pursuant to CCR Title 23, Division 3, Chapter 30, Article 2, Section 3895 (b), regardless if such report is required by regulation to be electronically uploaded to Geotracker.

SUBJECT: SOIL SAMPLING RESULTS RELATED TO UST SYSTEM REMOVALS
1977 SATURN STREET
MONTEREY PARK, CALIFORNIA 91755

Dear Sirs:

This report summarizes the results of tank system removals, and associated soil sampling activities completed at the subject site in Monterey Park, California (see attached Site Location Map - **Figure 1**).

The soil sampling activities were completed in general accordance with guidelines of Los Angeles County Department of Public Works (LADPW) and the Los Angeles Regional Water Quality Control Board (LARWQCB).

A copy of the UST removal permit is provided in attached **Appendix A.**

The tank removal activities were conducted by George Bryant Construction of Alta Loma, California (contractor). Soil sampling was completed by ALTA EM, Inc. (environmental consultant). A representative of the LACDPW (Mr. William Edwards) was scheduled to be on-site, but called the site contractor on-site within a few minutes of the scheduled inspection time, indicating he would not be able to be on site. Mr. Edwards authorized the UST removals and soil sampling to commence without his presence. A representative of ALTA EM, Inc. also spoke with Mr. Edwards verifying these approvals and provided him our contact info, and the license number of the responsible Professional Geologist prior to proceeding.

Site Setting / Hydrogeology

The site is located at the northern edge of the Coastal Plain of Los Angeles County, in the Merced / Montebello Hills. These hills consist of sedimentary rocks of the Pico Formation, and the site area is dominated by the structural feature known as the Montebello Anticline. The site area is not known to contain large-scale regional aquifers, as is the nearby/adjoining LA County Coastal Plain just to the south. The site is located just north and outside of the Montebello Forebay Area of the LA Coastal Plain Groundwater basin (DWR, 1961).

A review of the LACDPW water well database revealed no listed wells within one mile of the subject site (LACDPW, 2018). ALTA EM, Inc. also contacted a nearby cemetery east of the subject site (see **Figure 1**) asking about any potential well information at this location. The cemetery staff reported they have no wells (Resurrection Cemetery, 2018). A review of the Geotracker database for nearby LUST cases, with well data, revealed one facility approximately 0.5 miles south-southwest of the site with groundwater at approximately 70 feet deep in 2005. All other LUST sites with groundwater well data were greater than 0.75 miles away (Geotracker, 2018).

A-905166

C-9414-21

The site is located at the foot of a small hill, on a large graded earthen pad built for the construction of the commercial office complex which occupies the property. Atop the hill overlooking the site are large municipal water storage tanks, a landscaping nursery (Chuys Nursery) and a community park (Le Lorna Park) (see attached **Figure 2**).

While a regional aquifer is not anticipated beneath the site area, an accumulation of relatively shallow groundwater does exists beneath the site. The source of this groundwater is unknown (i.e. from nearby or on-site irrigation water? an accumulation of natural precipitation? an on-site water leak? combination of these sources?). Groundwater was initially encountered in the larger UST pit at approximately 6 feet, but stabilized at approximately 11.5 feet bgs overnight after it was pumped out to facility the UST removals. It is noted that groundwater appeared to be shallowest in the western-most portion of the area of investigation, even being encountered in a couple of the piping trench soil samples at 4 feet bgs.

Three monitoring wells were noted around the perimeter of the larger UST pit. All three wells appeared to have been partially destroyed (i.e. cement backfilled in their wells boxes). During excavation, the upper three to five feet of several of the wells was exposed and observed to be 4" PVC casing (presumed to also be backfilled). It is unknown if these wells were installed as groundwater monitoring wells or possibly vapose wells when groundwater was absent or deeper.

In summary, while a regional aquifer is not anticipated beneath the site area, an accumulation of relatively shallow groundwater exists beneath the site at 4 to 11.5 feet bgs. The direction of groundwater flow is unknown, though topography of the site would strongly indicate it is likely toward the west to southwest. This is contradicted by on site observations indicating the shallowest groundwaters in the western-most portion of the area investigated.

Tank Contents, Capacity, Construction

Details of the removed tanks were reported by the contractor as follows:

	Content	Capacity	Size	Construction
Tank #1	Diesel Fuel	10,000 gals	34' by 8'	Single-wall fiberglass w/rounded ends
Tank #2	Diesel Fuel	10,000 gals	34' by 8'	Single-wall fiberglass w/rounded ends
Tank #3	Diesel Fuel	2,500 gals	12' by 6'	Double-wall fiberglass coated steel

Larger Tanks 1 & 2 were located in a cluster, while Tank 3 was located approximately 140 feet east of the others. All three tanks contained diesel fuel, and were used to supply emergency generators. All three thanks were buried 3 to 4 feet bgs.

Attached **Figure 3** and **Photo nos. 1 and 2** show the two tank pit areas.

Soil Sampling Methods & Locations

All samples were collected on November 6, 2015.

Samples along the fuel product lines were collected at depths ranging from 3.5 to 5 feet bgs (at least 2 feet beneath removed lines), and were designated as samples no. PS1 to PS13. Attached **Photo nos. 3 through 7** show the various product line trenches which were sampled.

The Tanks 1 & 2 pit contained groundwater at approximately 11.5 feet bgs, and a large concrete pad underlying the tanks at approximately 13.5 feet bgs, precluding reasonable soil sampling. Attached **Photo no. 8** shows groundwater in the tank pit and the concrete pad depth. Given soil samples could not reasonably be collected, alternative groundwater samples were collected from this UST pit with a disposable polyethylene sampling bailer. Attached **Figure no. 3** shows the approximate locations of these two groundwater samples, designated TPGW1 and TPGW2.

The Tank 3 pit also contained an underlying concrete pad throughout the pit bottom at approximately 11.5 feet bgs, but no groundwater. This pad also precluded the reasonable collection of soil samples beneath

the concrete. Alternatively, soil samples were collected from the pit sidewalls just above the concrete pad level, at diagonally opposing corners of the former tank. The locations of these soil samples, designated T3-1-10 and T3-2-10, are shown on attached **Figure 3**.

Soil samples were obtained with the aid of a hand auger or backhoe. Samples were retained in general accordance with EPA method no. 5035 protocol. An additional amount of each sample (for non-VOC analyses) was also collected in laboratory approved 4 oz. glass jars. **Appendix B** includes further details of the sampling procedures.

Attached **Photos 9 & 10** show both UST pits after the tanks had been removed.

Field Observations

During the soil sampling, olfactory and visual observations, as well as soil types were recorded and are summarized in the table below:

SAMPLE NO.	SAMPLE LOCATION	SAMPLE DEPTH (feet bgs)	ODOR	COLOR	SOIL TYPE
PS1-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, damp, clayey F. SAND
PS2-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, wet, silty F. SAND
PS3-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, wet, F. SAND; with trace silt
PS4-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, wet, F. SAND; with trace silt
PS5-5	Piping trench	5	No Odor	No Discoloration	Yellowish brown, damp to moist, clayey gravelly F. SAND
PS6-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist, F. SAND
PS7-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist, gravelly F. SAND
PS8-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist, F. SAND
PS9-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist to wet, silty F. SAND
PS10-3.5	Piping trench	3.5	No Odor	No Discoloration	Yellowish brown, moist to wet, silty F. SAND
PS11-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, saturated, clayey silty F. SAND
PS12-3.5	Piping trench	3.5	No Odor	No Discoloration	Yellowish brown, damp to moist, clayey silty F. SAND
PS13-4	Piping trench	4	Very slight HC odor	No Discoloration	Yellowish brown, wollive motling, moist, sandy SILT; with trace clay
T3-1-10	Tank #3 pit	10	No Odor	No Discoloration	Yellowish orange brown, damp, clayey F. SAND
T3-2-10	Tank #3 pit	10	No Odor	No Discoloration	Yellowish brown, damp, F. SAND, with trace silt and Med Sand.

During the groundwater sampling, olfactory and visual observations were recorded and are also summarized in the table below:

SAMPLE NO.	SAMPLE LOCATION	SAMPLE DEPTH (feet bgs)	ODOR & VISUAL OBSERVATIONS	COMMENT
TPGW1	Tank #1 pit - North	11.5	No odor or sheen	Groundwater sample
TPGW2	Tank #1 pit - South	11.5	No odor or sheen	Groundwater sample

Analytical Methods / Results

All soil and groundwater samples were analyzed for TPH diesel (C_{10}-C_{28}), BTEX and Fuel Oxygenates. The UST removal permit initially indicated that organic lead analyses were also required; however, follow-up communications with Kattya Batres of the LACDPW confirmed the lead analyses were not required if the USTs historically only contained diesel fuel (which is the case) (see Appendix A).

The analyses were completed in general accordance with modified EPA method no. 8015 (for TPH diesel) and EPA method no. 5035/8260B (for BTEX & FUEL OXYENATES). Results are summarized as follows:

SOIL SAMPLES (all results in mg/kg)				
SAMPLE NO.	SAMPLE DEPTH (feet bgs)	TPH DIESEL (C_{10}-C_{28})	BTEX	FUEL OXYGENATES (MTBE, ETBE, DIPE, TAME, TBA)
PS1-4	4	ND	ND	ND
PS2-4	4	ND	ND	ND
PS3-4	4	ND	ND	ND
PS4-4	4	ND	ND	ND
PS5-5	5	ND	ND	ND
PS6-4	4	ND	ND	ND
PS7-4	4	ND	ND	ND
PS8-4	4	ND	ND	ND
PS9-4	4	ND	ND	ND
PS10-3.5	3.5	ND	ND	ND
PS11-4	4	ND	ND	ND
PS12-3.5	3.5	ND	ND	ND
PS13-4	4	15.2	ND	ND
T3-1-10	10	10.5	ND	ND
T3-2-10	10	ND	ND	ND
PQLs	N/A	10	0.005-0.01	0.005 - 0.05

GROUNDWATER SAMPLES (all results in ug/L)				
SAMPLE NO.	SAMPLE DEPTH (feet bgs)	TPH DIESEL (C_{10}-C_{28})	BTEX	FUEL OXYGENATES (MTBE, ETBE, DIPE, TAME, TBA)
TPGW1	11.5	ND	ND	ND
TPGW2	11.5	ND	ND	ND
PQLs	N/A	500	1-3	3-50

In summary, no significant TPH (C_{10}-C_{28}), BTEX or Fuel Oxygenates were detected in any of the soil or groundwater samples. Two soil samples were reported to contain minor detected TPH (C_{10}-C_{28}) at concentration of 15.2 and 10.5 mg/kg. No field evidence indicating major fuel impacts was observed at or nearby these two samples with detections. A laboratory report further detailing the results of the soil/water sample analyses is provided in attached **Appendix C**.

Other Documentation

Provide in attached **Appendix D** are copies of the tank cleaning rinsate manifest, and the tank destruction/recycling certificates.

Conclusions

Three USTs were removed from the subject site. Two UST were located in one pit, and the third was approximately 140 feet away. Soil samples PS-3-4 (piping trench) and T3-1.0 (Tank 3 pit) were reported to contain 15.2 and 10.5 mg/kg of TPH (C_9-C_{20}), but no detected BTEX or Fuel Oxygenates. Every other soil sample was reported to contain no detected TPH (C_{13}-C_{28}), BTEX or Fuel Oxygenates.

Shallow groundwater was encountered in the Tank 1 & 2 pit, as well as a concrete pad underlying the tanks. Two groundwater samples collected from this tank pit were also reported to contain no detected TPH (C_{13}-C_{28}), BTEX or Fuel Oxygenates.

Based on the field observations and laboratory data, there is no evidence to indicate a significant release of diesel fuel from the removed UST systems. No further action is recommended, and a no further action letter is requested from the responsible party. At the time of this report the site had no Geotracker case or global ID assigned, so this report and associated data could not be uploaded.

The opportunity to be of service is greatly appreciated. If you have any questions or comments, please do not hesitate to contact the office at (909) 476-2120.

Very Truly Yours,
ALTA ENV, INC.

Will any wells, including monitoring wells, be abandoned?	[ ]	[X]

NOTICE: CONTAMINATED TANKS AND RESIDUES IN TANKS TO BE CLOSED, MAY BE HAZARDOUS WASTE WHICH MUST BE TRANSPORTED AND DISPOSED OF PURSUANT TO CALIFORNIA HEALTH AND SAFETY CODE DIVISON 20, CHAPTER 6.5 AND MUST BE REPORTED IN THE CLOSURE REPORT. FAILURE TO COMPLY MAY BE PROSECUTED AS A FELONY VIOLATION.

By signature below, you certify that all statements and disclosures above are true and correct.
You have read and agree to abide by this authorization and all conditions and limitations on the back and attached.

Authorization Recipient (Print Name): Ronald Franklin Phone: 909 944 3517
Recipient's Signature: _____ Date: 10/25/18
Recipient is: UST Owner [ ] UST Operator [ ] or Contractor [X] Written authorization is required for submittals made by a staff of owner/operator.

TO BE COMPLETED BY THE DEPARTMENT OF PUBLIC WORKS

PURSUANT TO SECTION 11.30.070B, LOS ANGELES COUNTY CODE, PERMISSION IS HEREBY GRANTED TO PROCEED WITH THE CLOSURE DESCRIBED ABOVE SUBJECT TO THE ATTACHED CONDITIONS AND LIMITATIONS.

THIS AUTHORIZATION EXPIRES: 04/25/2019 *****SEE ATTACHMENTS*****

MARK PESTRELLA
Director of Public Works

By: _____ Date: 10/25/2018

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION

CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the County of Los Angeles Department of Public Works, Environmental Programs Division, P.O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.

2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.

3. Description of methods for obtaining, handling, and transporting samples.

4. Time and date samples were obtained.

5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for Underground Storage Tank closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.

6. Chain-of-custody documentation initiated by person obtaining sample through person at a California Department of Health Services certified laboratory.

7. Disposal destination of tanks and evidence of legal disposal.

8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.

9. Documentation as to depth of groundwater at facility.

10. Manifests to document hazardous waste disposal of any removed soil and tank rinsate.

11. Evidence of legal disposal of soils designated as nonhazardous.

12. Any observations of site contamination.

13. Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.

14. Submit to the California Environmental Reporting System (CERS) the date the UST was permanently closed for all tanks removed or closed in-place.

UST Facility Operating Permit Application:

Home » Prepare Submittal » UST: UST Facility Operating Permit Application (Draft)

Instructions/Help

You must complete this form within 30 days of all new permits, permit changes, or facility information changes. You will also need to update/confirm your tank, monitoring plan, and other pertinent UST-related forms.

All facilities **must** provide a BOE Number--valid numbers are 6 digits long starting with the numbers 44. . State and federal facilities should use 44032002. If **ALL** underground tanks at your facility **ONLY** contain NON-petroleum productions, you can provide this generic BOE Number: 44000000. Contact your local regulator if you are unsure what number to provide.

The former paper version of this form was called "UST Operating Permit Application-Facility Information" (Form A).

More information about UST Financial Responsibility Mechanisms is available at the Water Board's Underground Storage Tank Cleanup Fund Financial Responsibility web page.

Click this field to reflect permanent UST closure.

UST Tank Information/Monitoring Plan:

Instructions/Help

Use this form to enter data for new UST systems or revise data for an existing UST system. You must complete a separate form for each affected tank. For tanks that are part of a compartmentalized unit, each compartment is considered a separate tank. This information is required within 30 days of permit or facility information changes, unless your local agency requires approval prior to making the changes.
The former paper version of this form was called "UST Operating Permit Application-Tank Information" (Form B)

CLOSURE – UNDERGROUND STORAGE TANKS

CONDITIONS A – GENERAL

1. Closures shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County Department of County Engineer – Facilities; Los Angeles County Fire Department, Fire Prevention Division or the appropriate City Fire Department; South Coast Air Quality Management District; and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Departments shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3)-business day advance notification.
   b. Permanent closure of a tank in place or a temporary closure shall require a 30-working notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, where such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their initial construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards: State of California" by the Department of Water Resources, contained in Bulletin 74 – 81, December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 20 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies the California Regional Water Quality Board, the Los Angeles County Department of Health Services, and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original liquid stored and its components.
   b. The personnel shall be sufficiently skilled to safely carry out such operation.
   c. Contaminated materials removed from such facility shall be disposed of at legal point of discharge.
   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B – TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, "Abandonment or Removal of Underground Tanks, "Part A and any other applicable Parts.

2. A temporary closure shall not exceed 180 days.

CONDITION C – PERMANENT TANK(S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Part B and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction at the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish site integrity is carried by the County Engineer.

4. If an appointment has been arranged with a County Engineer inspector to inspect the removal of a tank, the inspector will only wait at the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another closure fee may be charged if the inspector has to return to the site.

5. After inspection, tank shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil or waste oil, site integrity shall be demonstrated using the soil sampling and analysis procedures described in CONDITIONS D below.

7. The site shall be filled and re-compacted to a relative compaction of 90%.

CONDITIONS D – PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Part B or C and any other applicable Parts.

2. Owners/operators shall demonstrate site integrity as follows:

   a. Test borings shall be slant drilled to intercept a point beneath the center of the tank, if possible. If slant drilling is not feasible, the test boring may be drilled vertically and the reason stated in the report in 2.h. below.
   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank along the major axis of the tank.
   c. For multiple tanks, as a minimum, boring shall be placed at 20 foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purposes of test locations and placement.
   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and 50 feet below grade level.
   e. A Shelby Tube or a Modified California Sampler shall be utilized for taking all soil samples.
   f. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.
   g. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants, the County Engineer shall require a site investigation as described in Chapter V of the County's "Underground Storage of Hazardous Materials – Guidelines."

4. A report shall be submitted to the County Engineer containing the results of the site investigation.

CLOSURE APPLICATION SUPPLEMENT
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

PART 1 OF 3

DPW USE ONLY
SITE FILE NO. G994-62151
APPLICATION NO 905099

To satisfy the permanent closure requirements for underground storage tanks storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

***** Soil sampling will be required for Vent and Vapor Recovery piping for UST systems installed after July 1, 2003. *****

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 1B	2-4 feet beneath	TPHD	→ 8015M
2A, 2B	tank invert	BTEX, MTBE	→ 8260B
3A, 3B		Fuel Oxygenates	→ 8260B
		Organic lead	→ DOHS Method
1 sample	2-4 feet below	Same as	Same as
each UDC		above	above
1 sample	2-4 feet below	Same as	Same as
piping, every 20 feet		above	above
starting from UDC's			

* Apply EPA Method 5035 for soil sample collection, preparation and analysis.

~~Test for organic lead if past UST contents or tested, or if it is unknown whether past UST contents were leaded.~~

Continued on Page 2

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date/time of sampling shall be included in the final report.

4. Conform to the analytical requirements table below for petroleum hydrocarbon sites. Apply EPA Method 5035 specified in the USEPA SW-846, version III (12/1996) for soil sample preparation and preservation in order to minimize volatile organic losses. Use the sample collection devices, or equivalent, specified in the method (e.g., the Encore™ sampler). If the Encore™ sampler is used, analyze sample within 48 hours from the collection. Analyze sample within 10 days for soil samples stored under frozen conditions.

UST CONTENTS	Analyte	Analytical Method	Required MDL Soil (mg/kg)	Required MDL Water (ug/L)
GASOLINE OR DIESEL	Total Petroleum Hydrocarbons (TPH) - Gasoline	EPA Method 8015 (M)	100-200	50-100
	Total Petroleum Hydrocarbons (TPH) - Diesel	EPA Method 8015 (M)	1000	500
	Benzene	EPA Method 8260B (8021B)	1	0.5
	Toluene	EPA Method 8260B (8021B)	1	0.5
	Ethylbenzene	EPA Method 8260B (8021B)	1	0.5
	Xylenes (Total)	EPA Method 8260B (8021B)	1	0.5
	Methyl Tertiary Butyl ether (MTBE)	EPA Method 8260B	2	1
	Diisopropyl ether (DIPE)	EPA Method 8260B	2	1
	Ethyl tertiary butyl ether (ETBE)	EPA Method 8260B	2	1
	Tertiary amyl methyl ether (TAME)	EPA Method 8260B	2	1
	Tertiary butyl alcohol (TBA)	EPA Method 8260B	20	10
	Ethanol	EPA Method 8260B	500	250
	Naphthalene	EPA Method 8015 (M)	1000	500
OTHER, WASTE OIL UNKNOWN	Total Recoverable Petroleum Hydrocarbons (TRPH) - Waste Oil	EPA Method 418.1 or EPA Method 1664A	1000	500
	UST Permitted Contents, all VOC's (EPA Method 8260) + To Be Determined			

Continued on Page 3

5. All soil/groundwater samples shall be analyzed by a laboratory approved by the California Environmental Accreditation Laboratory Program (ELAP).

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determination; d) The method of analysis; e) Signature of chemist certifying results.

7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

10. A final report that contains all of the above required information shall be submitted to the office above within one (1) month form the sampling date or 180 days from the date of this permit, whichever is earlier.

11. All electronic data shall be submitted to the State Water Resources Control Board Geotracker database.

Subject: 1977 Saturn St

Ron,

Attached you can find the pdf copy of the approved tank removal permit. In the soil sample laboratory analysis specification sheet, you can see that we require the samples to be analyzed for Organic Lead, with a note clarifying to test for it if the tanks' contents used to be leaded or if it is unknown whether they were leaded or not.
If the owner is sure these tanks never contained leaded fuel, the Organic Lead analysis can be disregarded. If there is some doubt, then it has to be included.

Best regards,
Kattya Batres

APPENDIX B

SOIL & GROUNDWATER SAMPLING PROCEDURES

APPENDIX B

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Samples

- Soil samples collected from the piping trenches were obtained using a hand auger. Soil samples collected from the tank pit were obtained with a backhoe.
- A relatively undisturbed portion of each sample was also retained in general accordance with EPA method no. 5035 protocol, using an EASYDRAW® syringe. An approximate five gram sample was collected with the syringe and ejected each into four pre-tared, 40 ml glass VOA vials (two vials containing pre-measured quantities of $NaHSO_4$, one vial containing MeOH, and one vial with no preservative).
- Additional sample (for non-VOC analyses) was also collected in a laboratory approved, 4-Oz. glass jar at each location.
- All collected samples was labeled with the sample number, date and project number.
- All samples were stored in an ice chest kept at approximately 40 to 50 degrees Fahrenheit prior to transportation to a State of California, Department of Health Services certified laboratory under strict chain-of-custody procedures.
- All reusable soil sampling equipment was washed prior to each sampling events with a solution of LIQUINOX (a phosphate free detergent), rinsed with potable tap water, and then rinsed again with de-ionized water.

Groundwater Samples

- Groundwater samples were obtained with a disposable polyethylene sampling bailer lowered into the groundwater in the bottom of the UST pit.
- The groundwater samples were each retained in a 1-liter amber glass bottle containing H_2SO_4, and three 40-ml glass VOA vials with no preservative.
- All collected samples was labeled with the sample number, date and project number.
- All samples were stored in an ice chest kept at approximately 40 to 50 degrees Fahrenheit prior to transportation to a State of California, Department of Health Services certified laboratory under strict chain-of-custody procedures.

SUBJECT: SOIL SAMPLING RESULTS RELATED TO UST SYSTEM REMOVALS
1977 SATURN STREET
MONTEREY PARK, CALIFORNIA 91755

Dear Sirs:

This report summarizes the results of tank system removals, and associated soil sampling activities, completed at the subject site in Monterey Park, California (see attached Site Location Map - **Figure 1**).

The soil sampling activities were completed in general accordance with guidelines of Los Angeles County Department of Public Works (LADPW) and the Los Angeles Regional Water Quality Control Board (LARWQCB).

A copy of the UST removal permit is provided in attached **Appendix A**.

The tank removal activities were conducted by George Bryant Construction of Alta Loma, California (contractor). Soil sampling was completed by ALTA EM, Inc. (environmental consultant). A representative of the LACDPW (Mr. William Edwards) was scheduled to be on-site, but called the site contractor on-site within a few minutes of the scheduled inspection time, indicating he would not be able to be on site. Mr. Edwards authorized the UST removals and soil sampling to commence without his presence. A representative of ALTA EM, Inc. also spoke with Mr. Edwards verifying these approvals, and provided him our contact info, and the license number of the responsible Professional Geologist prior to proceeding.

Site Setting / Hydrogeology

The site is located at the northern edge of the Coastal Plain of Los Angeles County, in the Merced / Montebello Hills. These hills consist of sedimentary rocks of the Pico Formation, and the site area is dominated by the structural feature known as the Montebello Anticline. The site area is not known to contain large-scale regional aquifers, as is the nearby/adjoining LA County Coastal Plain just to the south. The site is located just north and outside of the Montebello Forebay Area of the LA Coastal Plain Groundwater basin (DWR, 1961).

A review of the LACDPW water well database revealed no listed wells within one mile of the subject site (LACDPW, 2018). ALTA EM, Inc. also contacted a nearby cemetery east of the subject site (see **Figure 1**) asking about any potential well information at this location. The cemetery staff reported they have no wells (Resurrection Cemetery, 2018). A review of the Geotracker database for nearby LUST cases, with well data, revealed one facility approximately 0.5 miles south-southwest of the site with groundwater at approximately 70 feet deep in 2005. All other LUST sites with groundwater well data were greater than 0.75 miles away (Geotracker, 2018).

The site is located at the foot of a small hill, on a large graded earthen pad built for the construction of the commercial-office complex which occupies the property. Atop the hill overlooking the site are large municipal water storage tanks, a landscaping nursery (Chuys Nuersery), and a community park (La Loma Park) (see attached **Figure 2**).

While a regional aquifer is not anticipated beneath the site area, an accumulation of relatively shallow groundwater *does* exists beneath the site. The source of this groundwater is unknown (i.e. from nearby or on-site irrigation water? an accumulation of natural precipitation? an on-site water leak? combination of these sources?). Groundwater was initially encountered in the larger UST pit at approximately 5 feet, but stabilized at approximately 11.5 feet bgs overnight after it was pumped out to facility the UST removals. It is noted that groundwater appeared to be shallowest in the western-most portion of the area of investigation, even being encountered in a couple of the piping trench soil samples at 4 feet bgs.

Three monitoring wells were noted around the perimeter of the larger UST pit. All three wells appeared to have been partially destroyed (i.e. cement backfilled in their wells boxes). During excavation, the upper three to five feet of several of the wells was exposed and observed to be 4" PVC casing (presumed to also be backfilled). It is unknown if these wells were installed as groundwater monitoring wells, or possibly vadose wells when groundwater was absent or deeper.

In summary, while a regional aquifer is not anticipated beneath the site area, an accumulation of relatively shallow groundwater exists beneath the site at 4 to 11.5 feet bgs. The direction of groundwater flow is unknown, though topography of the site would strongly indicate it is likely toward the west to southwest. This is contradicted by on-site observations indicating the shallowest groundwater is in the western-most portion of the area investigated.

Tank Contents, Capacity, Construction

Details of the removed tanks were reported by the contractor as follows:

	Content	Capacity	Size	Construction
Tank #1	Diesel Fuel	10,000 gals	34' by 8'	Single-wall fiberglass w/rounded ends
Tank #2	Diesel Fuel	10,000 gals	34' by 8'	Single-wall fiberglass w/rounded ends
Tank #3	Diesel Fuel	2,500 gals	12' by 6'	Double-wall fiberglass coated steel

Larger Tanks 1 & 2 were located in a cluster, while Tank 3 was located approximately 140 feet east of the others. All three tanks contained diesel fuel, and were used to supply emergency generators. All three thanks were buried 3 to 4 feet bgs.

Attached **Figure 3** and **Photo nos. 1 and 2** show the two tank pit areas.

Soil Sampling Methods & Locations

All samples were collected on November 8, 2018.

Samples along the fuel product lines were collected at depths ranging from 3.5 to 5 feet bgs (at least 2 feet beneath removed lines), and were designated as samples no. PS1 to PS13. Attached **Photo nos. 3 through 7** show the various product line trenches which were sampled.

The Tanks 1 & 2 pit contained groundwater at approximately 11.5 feet bgs, and a large concrete pad underlying the tanks at approximately 13.5 feet bgs, precluding reasonable soil sampling. Attached **Photo no. 8** shows groundwater in the tank pit and the concrete pad depth. Given soil samples could not reasonably be collected, alternative groundwater samples were collected from this UST pit with a disposable polyethylene sampling bailer. Attached **Figure no. 3** shows the approximate locations of these two groundwater samples, designated TPGW1 and TPGW2.

The Tank 3 pit also contained an underlying concrete pad throughout the pit bottom at approximately 11.5 feet bgs, but no groundwater. This pad also precluded the reasonable collection of soil samples beneath

the concrete. Alternatively, soil samples were collected from the pit sidewalls, just above the concrete pad level, at diagonally opposing corners of the former tank. The locations of these soil samples, designated T3-1-10 and T3-2-10, are shown on attached **Figure 3**.

Soil samples were obtained with the aid of a hand auger or backhoe. Samples were retained in general accordance with EPA method no. 5035 protocol. An additional amount of each sample (for non-VOC analyses) was also collected in laboratory approved 4-oz. glass jars. **Appendix B** includes further details of the sampling procedures.

Attached **Photos 9 & 10** show both UST pits after the tanks had been removed.

Field Observations

During the soil sampling, olfactory and visual observations, as well as soil types, were recorded and are summarized in the table below:

SAMPLE NO.	SAMPLE LOCATION	SAMPLE DEPTH (feet bgs)	ODOR	COLOR	SOIL TYPE
PS1-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, damp, clayey F. SAND
PS2-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, wet, silty F. SAND
PS3-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, wet, F. SAND; with trace silt
PS4-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, wet, F. SAND; with trace silt
PS5-5	Pipingt rench	5	No Odor	No Discoloration	Yellowish brown, damp to moist, clayey gravelly F. SAND
PS6-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist, F. SAND
PS7-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist, gravelly F. SAND
PS8-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, most , F. SAND
PS9-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, moist to wet, silty F. SAND
PS10-3.5	Piping trench	3.5	No Odor	No Discoloration	Yellowish brown, moist to wet, silty F. SAND
PS11-4	Piping trench	4	No Odor	No Discoloration	Yellowish brown, saturated, clayey silty F. SAND
PS12-3.5	Piping trench	3.5	No Odor	No Discoloration	Yellowish brown, damp to moist, clayey silty F SAND
PS13-4	Piping trench	4	Very slight HC odor	No Discoloration	Yellowish brown w/olive mottling, moist, sandy SILT; with trace clay
T3-1-10	Tank #3 pit	10	No Odor	No Discoloration	Yellowish orange brown, damp, clayey F. SAND
T3-2-10	Tank #3 pit	10	No Odor	No Discoloration	Yellowish brown, damp, F. SAND; with trace silt and Med Sand.

During the groundwater sampling, olfactory and visual observations were recorded and are also summarized in the table below:

SAMPLE NO.	SAMPLE LOCATION	SAMPLE DEPTH (feet bgs)	ODOR & VISUAL OBSERVATIONS	COMMENT
TPGW1	Tank #1 pit - North	11.5	No odor or sheen	Groundwater sample
TPGW2	Tank #1 pit - South	11.5	No odor or sheen	Groundwater sample

Analytical Methods / Results

All soil and groundwater samples were analyzed for TPH diesel (C_{10}-C_{28}), BTEX and Fuel Oxygenates. The UST removal permit initially indicated that organic lead analyses were also required; however follow-up communications with Kattya Batres of the LACDPW confirmed the lead analyses were not required if the USTs historically only contained diesel fuel (which is the case) (see Appendix A).

The analyses were completed in general accordance with modified EPA method no. 8015 (for TPH diesel) and EPA method no. 5035/8260B (for BTEX & FUEL OXYENATES). Results are summarized as follows:

SOIL SAMPLES (all results in mg/kg)				
SAMPLE NO.	**SAMPLE DEPTH (feet bgs)**	**TPH DIESEL (C_{10}-C_{28})**	**BTEX**	**FUEL OXYGENATES (MTBE, ETBE, DIPE, TAME, TBA)**
PS1-4	4	ND	ND	ND
PS2-4	4	ND	ND	ND
PS3-4	4	ND	ND	ND
PS4-4	4	ND	ND	ND
PS5-5	5	ND	ND	ND
PS6-4	4	ND	ND	ND
PS7-4	4	ND	ND	ND
PS8-4	4	ND	ND	ND
PS9-4	4	ND	ND	ND
PS10-3.5	3.5	ND	ND	ND
PS11-4	4	ND	ND	ND
PS12-3.5	3.5	ND	ND	ND
PS13-4	4	**15.2**	ND	ND
T3-1-10	10	**10.5**	ND	ND
T3-2-10	10	ND	ND	ND
PQLs	**N/A**	**10**	**0.005-0.01**	**0.005 - 0.05**

GROUNDWATER SAMPLES (all results in ug/L)				
SAMPLE NO.	**SAMPLE DEPTH (feet bgs)**	**TPH DIESEL (C_{10}-C_{28})**	**BTEX**	**FUEL OXYGENATES (MTBE, ETBE, DIPE, TAME, TBA)**
TPGW1	11.5	ND	ND	ND
TPGW2	11.5	ND	ND	ND
PQLs	**N/A**	500	1-3	3-50

In summary, no significant TPH (C_{10}-C_{28}), BTEX or Fuel Oxygenates were detected in any of the soil or groundwater samples. Two soil samples were reported to contain minor detected TPH (C_{10}-C_{28}) at concentration of 15.2 and 10.5 mg/kg. No field evidence indicating major fuel impacts was observed at or nearby these two samples with detections. A laboratory report further detailing the results of the soil/water sample analyses is provided in attached **Appendix C**.

Other Documentation

Provide in attached **Appendix D** are copies of the tank cleaning rinsate manifest, and the tank destruction/recycling certificates.

Conclusions

Three USTs were removed from the subject site. Two UST were located in one pit, and the third was approximately 140 feet away. Soil samples PS13-4 (piping trench) and T3-1-10 (Tank 3 pit) were reported to contain 15.2 and 10.5 mgkg of TPH (C_{10}-C_{28}), but no detected BTEX or Fuel Oxygenates. Every other soil sample was reported to contain no detected TPH (C_{10}-C_{28}), BTEX or Fuel Oxygenates.

Shallow groundwater was encountered in the Tank 1 & 2 pit, as well as a concrete pad underlying the tanks. Two groundwater samples collected from this tank pit were also reported to contain no detected TPH (C_{10}-C_{28}), BTEX or Fuel Oxygenates.

Based on the field observations and laboratory data, there is no evidence to indicate a significant release of diesel fuel from the removed UST systems. No further action is recommended, and a no further action letter is requested from the responsible party. At the time of this report, the site had no Geotracker case or global ID assigned, so this report and associated data could not be uploaded.

The opportunity to be of service is greatly appreciated. If you have any questions or comments, please do nothesitate to contact the office at (909) 476-2120.

Very Truly Yours,
ALTA EM, INC.

CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the County of Los Angeles Department of Public Works, Environmental Programs Division, P.O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.
2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.
3. Description of methods for obtaining, handling, and transporting samples.
4. Time and date samples were obtained.
5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for Underground Storage Tank closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.
6. Chain-of-custody documentation initiated by person obtaining sample through person at a California Department of Health Services certified laboratory.
7. Disposal destination of tanks and evidence of legal disposal.
8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.
9. Documentation as to depth of groundwater at facility.
10. Manifests to document hazardous waste disposal of any removed soil and tank rinsate.
11. Evidence of legal disposal of soils designated as nonhazardous.
12. Any observations of site contamination.
13. Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.
14. Submit to the California Environmental Reporting System (CERS) the date the UST was permanently closed for all tanks removed or closed in-place.

UST Facility Operating Permit Application:

Home » Prepare Submittal » UST: UST Facility Operating Permit Application (Draft)

Instructions/Help

You must complete this form withing 30 days of all new permits, permit changes, or facility information changes. You will also need to update/confirm your tank, monitoring plan, and other pertinent UST-related forms.

All facilities **must** provide a BOE Number--valid numbers are 8 digits long starting with the numbers 44... State and federal facilities should use 44032062. If **ALL** underground tanks at your facility **ONLY** contain NON-petroleum productions, you can provide this generic BOE Number: 44000000. Contact your local regulator if you are unsure what number to provide.

The former paper version of this form was called "UST Operating Permit Application-Facility Information" (Form A).

More information about UST Financial Responsibility Mechanisms is available at the Water Board's Underground Storage Tank Cleanup Fund Financial Responsibility web page.

Click this field to reflect permanent UST closure.

UST Tank Information/Monitoring Plan:

Home » Prepare Submittal » UST: UST Tank Information/Monitoring Plan (Draft)

Instructions/Help

Use this form to enter data for new UST systems or revise data for an existing UST system. You must complete a separate form for each affected tank. For tanks that are part of a compartmentalized unit, each compartment is considered a separate tank. This information is required within 30 days of permit or facility information changes, unless your local agency requires approval prior to making the changes.
The former paper version of this form was called "UST Operating Permit Application-Tank Information" (Form B).

CLOSURE – UNDERGROUND STORAGE TANKS

CONDITIONS A – GENERAL

1. Closures shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County, Department of County Engineer – Facilities; Los Angeles County Fire Department, Fire Prevention Division or the appropriate City Fire Department; South Coast Air Quality Management District; and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Departments shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3)-business day advance notification.
   b. Permanent closure of a tank in place or a temporary closure shall require a 30-written notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, when such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well-being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their initial construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards: State of California" by the Department of Water Resources, contained in Bulletin 74 – 81, December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies the California Regional Water Quality Board, the Los Angeles County Department of Health Services, and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original liquid stored and its components.
   b. The personnel shall be sufficiently skilled to safely carry out such operation.
   c. Contaminated materials removed from such facility shall be disposed of at legal point of discharge.
   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B – TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, "Abandonment or Removal of Underground Tanks, "Part A and any other applicable Parts.

2. A temporary closure shall not exceed 180 days.

CONDITION C – PERMANENT TANK (S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Part D and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction at the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish site integrity is carried by the County Engineer.

4. If an appointment has been arranged with a County Engineer Inspector to inspect the removal of a tank, the inspector will only wait at the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another closure fee may be charged if the inspector has to return to the site.

5. After inspection, tank shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil or waste oil, site integrity shall be demonstrated using the soil sampling and analysis procedures described in CONDITIONS D below.

7. The site shall be filled and re-compacted to a relative compaction of 90%.

CONDITIONS D – PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A – Inspection Guide #6, Parts B or C, and any other applicable Parts.

2. Owners/operators shall demonstrate part site integrity as follows:

   a. Test borings shall be slant drilled to intercept a point beneath the center of the tank, if possible. If slant drilling is not feasible, the test boring may be drilled vertically and the reason stated in the report in 2.h. below.
   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank along the major axis of the tank.
   c. For multiple tanks, as a minimum, boring shall be placed at 20-foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purposes of test location and placement.
   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and 40 feet below grade level.
   e. A Shelby Tube or a Modified California Sampler shall be utilized for taking all soil samples.
   f. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.
   g. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants, the County Engineer shall require a site investigation as described in Chapter V of the County's "Underground Storage of Hazardous Materials – Guidelines."

4. A report shall be submitted to the County Engineer containing the results of the site investigation.

CLOSURE APPLICATION SUPPLEMENT **PART 1 OF 3**
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

DPW USE ONLY:
SITE-FILE NO. 6994-62151
APPLICATION NO. 905099

To satisfy the permanent closure requirements for underground storage tanks storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

***** Soil sampling will be required for Vent and Vapor Recovery piping for UST systems installed after July 1, 2003. *****

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 1B	2-4 feet beneath	TPHD	→ 8015M
2A, 2B	tank invert	BTEX, MTBE	8260B
3A, 3B		Fuel Oxygenates	8260B
		# Organic Lead	→ DOHS Method
1 sample	2-4 feet below	same as	same as
	each UDC	above	above
1 sample	2-4 feet below	Same as	Same as
	piping, every 20 feet	above	above
	starting from UDCs		

- Apply EPA Method 5035 for soil sample collection, preparation and preservation.

~~# Test for organic lead if past UST contents were tested, or if it is unknown whether past UST contents were leaded.~~

Continued on Page 2

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date/time of sampling shall be included in the final report.

4. Conform to the analytical requirements table below for petroleum hydrocarbon sites. Apply EPA Method 5035 specified in the USEPA SW-846, version III (12/1996) for soil sample preparation and preservation in order to minimize volatile organic losses. Use the sample collection devices, or equivalent, specified in the method (e.g., the Encore™ sampler). If the Encore™ sampler is used, analyze sample within 48 hours from the collection. Analyze sample within 10 days for soil samples stored under frozen conditions.

UST CONTENTS	Analyte	Analytical Method	Required MDL	
			Soil (ug/kg)	Water (ug/L)
GASOLINE OR DIESEL	Totoal Petroleum Hydrocarbons(TPH) - Gasoline	EPA Method 8015 (M)	100-200	50-100
	Total Petroleum Hydrocarbons (TPH) - Diesel	EPA Method 8015 (M)	1000	500
	Benzene	EPA Method 8260B (8021B)	1	0.5
	Toluene	EPA Method 8260B (8021B)	1	0.5
	Ethylbenzene	EPA Method 8260B (8021B)	1	0.5
	Xylenes (Total)	EPA Method 8260B (8021B)	1	0.5
	Methyl Tertiary Butyl Ether (MTBE)	EPA Method 8260B	2	1
	Di-isopropyl ether (DIPE)	EPA Method 8260B	2	1
	Ethyl tertiary butyl ether (ETBE)	EPA Method 8260B	2	1
	Tertiary amyl methyl ether (TAME)	EPA Method 8260B	2	1
	Tertiary butyl alcohol (TBA)	EPA Method 8260B	20	10
	Ethanol	EPA Method 8260B	500	250
	Methanol	EPA Method 8015 (M)	1000	500
WASTE OIL	Total Recoverable Petroleum Hydrocarbons (TRPH) - Waste Oil	EPA Method 418 + EPA Method 8260B	1000	500
OTHER, UNKNOWN	UST Permitted Contents, all VOC's (EPA Method 8260) + To Be Determined			

Continued on Page 3

5. All soil/groundwater samples shall be analyzed by a laboratory approved by the California Environmental Accreditation Laboratory Program (ELAP).

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determination; d) The method of analysis; e) Signature of chemist certifying results.

7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

10. A final report that contains all of the above required information shall be submitted to the office above within one (1) month form the sampling date or 180 days from the date of this permit, whichever is earlier.

11. All electronic data shall be submitted to the State Water Resources Control Board Geotracker database.

Ron,

Attached you can find the pdf copy of the approved tank removal permit. In the soil sample laboratory analysis specification sheet, you can see that we require the samples to be analyzed for Organic Lead, with a note clarifying to test for it if the tanks' contents used to be leaded or if it is unknown whether they were leaded or not.
If the owner is sure these tanks never contained leaded fuel, the Organic Lead analysis can be disregarded. If there is some doubt, then it has to be included.

Best regards,
Kattya Batres

APPENDIX B

SOIL & GROUNDWATER SAMPLING PROCEDURES

APPENDIX B

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Samples

- Soil samples collected from the piping trenches were obtained using a hand auger. Soil samples collected from the tank pit were obtained with a backhoe.
- A relatively undisturbed portion of each sample was also retained in general accordance with EPA method no. 5035 protocol, using an EASYDRAW® syringe. An approximate five gram sample was collected with the syringe and ejected each into four pre-tared, 40 ml glass VOA vials (two vials containing pre-measured quantities of $NaHSO_4$, one vial containing MeOH, and one vial with no preservative).
- Additional sample (for non VOC anlayses) was also collected in a laboratory approved, 4-Oz. glass jar at each location.
- All collected samples was labeled with the sample number, date and project number.
- All samples were stored in an ice chest kept at approximately 40 to 50 degrees Fahrenheit prior to transportation to a State of California, Department of Health Services certified laboratory under strict chain-of-custody procedures.
- All re-usable soil sampling equipment was washed prior to each sampling events with a solution of LIQUINOX (a phosphate free detergent), rinsed with potable tap water, and then rinsed again with de-ionized water.

Groundwater Samples

- Groundwater samples were obtained with a disposable polyethylene sampling bailer lowered into the groundwater in the bottom of the UST pit.
- The groundwater samples were each retained in a 1-liter amber glass bottle containing H_2SO_4, and three 40-ml glass VOA vials with no preservative.
- All collected samples was labeled with the sample number, date and project number.
- All samples were stored in an ice chest kept at approximately 40 to 50 degrees Fahrenheit prior to transportation to a State of California, Department of Health Services certified laboratory under strict chain-of-custody procedures.

Jessica. Curt and I discussed putting the orgamic lead analyses on hold for these soil samples picked up last Friday. The Regulator has approved NOT doing this particular analysis, so please do not.

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
UNDERGROUND STORAGE TANK PROGRAM

NOTICE OF VIOLATION ORDER TO COMPLY

Date: 3/27/2019 — Permit #: 892942

Contact/Owner: MS. KATRINA JONES — Site/Fac #: 006994 - 665226

Site Name: BRE CA SATURN LLC — Violation #: 91754-8

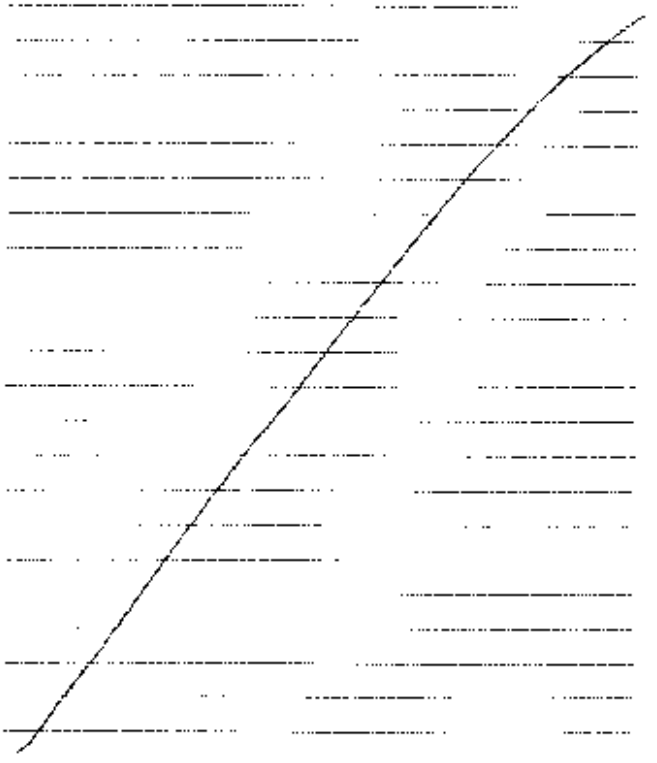
Site Address: 1977 SATURN ST — City/Zip: MONTEREY PARK, 91755

Mailing Address: SAME AS ABOVE — City, Zip:

A recent inspection of your facility revealed that the following conditions exist for petroleum underground storage tanks (USTs) which are in violation of California Health and Safety Code (H&SC) Chapter 6.7 and/or 23 California Code of Regulations (CCR) Division 3, and/or the conditions and limitations of the above permit. YOU ARE HEREBY DIRECTED to take the actions listed below on or before the following date(s) indicated:

☐ OPERATING WITHOUT A CERTIFIED / OPERATING MONITORING SYSTEM – CHSC 25292

YOU ARE HEREBY DIRECTED to have the monitoring system certified by an individual who meets the qualifications specified by this office by (Date): _____. The date of the last failure on the double-walled UST systems are to be resolved within the 45 period.



☐ MISSING TEST RESULTS / DOCUMENTS – Required testing/documents must be conducted and/or documents received by this office:

- ☐ Secondary Containment Testing
- ☐ Tank Integrity Testing
- ☐ Piping or Secondary Containment Testing
- ☐ Annual Testing
- ☐ Line Testing
- ☐ Line Leak Detector Testing
- ☐ Facility Employee Training
- ☐ Monthly Designated Operator Monitoring Form(s)
- ☐ _____

☑ REQUIRED DOCUMENTS / ITEMS MUST BE SUBMITTED TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) –

- ☐ Facility Information Page
- ☑ Tank Information Page
- ☐ Tank Profile
- ☑ Proof of Financial Responsibility Certificate
- ☐ Chief Financial Officer Letter
- ☐ Owner Statement of Designated Operator
- ☑ Monitoring Plan
- ☐ Response Plan
- ☐ Owner/Operator Agreement
- ☑ Current monitoring results and/or alarm history report (CERS printout)
- ☐ _____

☐ OTHER

YOU ARE HEREBY DIRECTED to submit to this office written evidence of compliance with the above directives by the later of the following: sixty days from the date on this Notice, or any other specific date above. Failure to comply with the underground storage tank laws and regulations may subject you to a civil penalty of not less than $500 or more than $10,000 or by one year in county jail or both. Finally, pursuant to Title 23 of the Los Angeles County Code, Section 7.24.040 and H&SC 25299.76, it is a misdemeanor to violate any of the laws and regulations governing USTs, including provisions of CHSC, Division 20, Chapter 6.7 and 23 CCR, Division 3, Chapter 16. Failure to comply with this Notice may therefore result in criminal prosecution. Furthermore, a notice of violation may be imposed to recover the cost incurred by this Department in the enforcement of this.

If you have any questions regarding this matter, please contact: ANDISH DEHBASHI

RETURN THIS APPLICATION, REQUIRED PLANS, SUPPORTING INFORMATION, AND AN APPLICATION/PLAN REVIEW FEE (CHECK FOR FEE AMOUNT) OF:	PAYABLE TO:
$ ...	COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS

Items to consider when applying for Industrial Waste Disposal Permit in Los Angeles County:

Application Form:

- The Permit application must be completely filled out and signed by the person responsible for the waste discharge. Since this is an operating permit application, the signature of the consultant is NOT acceptable.
- Alternatively, the responsible party can give their consent through a letter of authorization to another person such as a contractor or an architect. The authorization letter needs to be provided to us and must contain contact information of person responsible for the permit.
- Any proposed permit application may be subject to joint permit with County Sanitation District.

Plan Requirements:

- Two (2) sets of plans for Domestic Waste Clearance (i.e. sanitary waste only)
- Four (4) sets of plans for Public Works Industrial Waste:
  - All plans shall be to scale with minimum size of 11" x 17" and preferably 24" x 36"
  - Site plan shows location of existing buildings on the property with the proposed pre-treatment system(s) indicated, address, property line, sanitary sewer and sewer connections where applies, parking spaces, occupancies of all adjoining suites, the direction North, etc.
  - Architectural floor plan identifying each area in the building by its use, i.e., food preparation, car wash, plating, laboratory, storage, office, restrooms, etc.
  - Plumbing plan showing all drains including floor drains, floor sinks, trench drains, service sinks, and supply/waste lines and facilities handling industrial wastewater from the point of origin to the connection to the point of disposal, i.e. public sewer, private disposal system, and/or holding facility for offsite disposal. All equipment or facilities generating industrial wastewater must be identified on the plans.
  - Detail drawings of all pretreatment systems with dimensions and manufacturer's specifications.

Rain Diversion System Guidelines:

- To obtain guidelines for the discharge of rainwater, please refer to County Sanitation District's website:
  - http://www.lacsd.org/wastewater/industrial_waste/typical_businesses/waterdischarges.asp

Fees:

- A permit processing fee and a plan check fee will be determined based on the type of industry and the facility location. Please contact this office for further information.

INDUSTRIAL WASTE DISPOSAL PERMIT CONDITIONS AND LIMITATIONS

PART A: ON-SITE DISPOSAL – PUBLIC SEWER

1. Disposal of industrial wastewater to the public sanitary sewer shall be limited to the flow indicated on the industrial waste disposal permit.

2. Pretreatment, monitoring and control facilities required under this permit shall consist of the system(s) indicated on the approved plans.

3. Industrial Wastewater shall at all times meet the effluent quality, indicated on the attached Part D, if applicable prior to discharge to the sanitary sewer system.

4. If applicable, the permittee shall submit periodic compliance reports, as indicated on the attached Part E and/or any self-monitoring or industrial wastewater treatment surcharge reports which may be required by the County Sanitation Districts of Los Angeles County. **Note: Self-monitoring reports required by the Sanitation Districts are to be submitted directly to the Sanitation Districts.**

5. All required industrial wastewater collection, pretreatment, monitoring, disposal and sampling facilities must be installed in accordance with approved plans prior to initiating any discharge to the sewer.

6. Dilution prohibited as substitute for treatment. Except where expressly authorized to do so by an applicable Pretreatment Standard or Requirement, no Industrial User shall ever increase the use of process water, or in any other way attempt to dilute a Discharge as a partial or complete substitute for adequate treatment to achieve compliance with a Pretreatment Standard or Requirement. The Control Authority may impose mass limitations on Industrial Users which are using dilution to meet applicable Pretreatment Standards or Requirements, or in other cases where the imposition of mass limitations is appropriate. 40 CFR 403.6(d)

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
INDUSTRIAL WASTE DISPOSAL PERMIT

AP

PART A: ON-SITE DISPOSAL - PUBLIC SEWER (CONTINUED)

6. Discharge of any toxic, flammable, explosive, corrosive, radioactive or non-biodegradable substance to the sewer is prohibited except as provided in **Part A.3** above.

7. Discharge of uncontaminated cooling water, groundwater, storm water or surface drainage water to the sanitary sewer is prohibited except as specifically authorized by this permit.

8. Discharge of industrial wastewater to the sanitary sewer with temperatures exceeding 140° F is prohibited.

9. Other: **PRIOR TO INITIATING ANY DISCHARGE TO THE SANITARY SEWER, THE APPLICANT SHALL SUBMIT A NEW APPLICATION FOR AN INDUSTRIAL WASTE DISPOSAL PERMIT (IWDP) AND SHALL SECURE SUCH IWDP. ALL PRETREATMENT SYSTEMS SHALL BE MAINTAINED IN A DRY AND SANITARY CONDITION AT ALL TIMES.**

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
INDUSTRIAL WASTE DISPOSAL PERMIT

B1

PART B: WASTES NOT AUTHORIZED FOR DISCHARGE OR DEPOSIT IN PART A

1. Industrial wastes not specifically authorized for on-site pretreatment, storage, deposit, discharge or disposal in Part A of this permit shall be stored in leakproof containers within an area designated on plans approved by the Department of Public Works pending transport to a legal point of disposal.

2. The Permittee shall determine if industrial wastes stored pursuant to Part B.1 above are hazardous wastes as defined in the California Health and Safety Code, Chapter 6.5 and as determined by California Administrative Code, Title 22, Division 4, Chapter 30 and shall manage such wastes as prescribed therein.

3. Hazardous wastes shall only be removed from the premises under a Uniform Hazardous Waste Manifest unless a variance from such documentation has been granted by the California EPA Department of Toxic Substances Control (Cal EPA). Generator copies of the Uniform Hazardous Waste Manifest shall be maintained by the Permittee for not less than three years or as directed by Cal EPA.

4. The Permittee shall maintain records of the sources, quantity, name and address of hauler, date hauled, and point of legal disposal for nonhazardous industrial wastes and wastes granted a Cal EPA variance as described in Part B.3 above. Such records shall be kept a minimum of three years. A legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a California Regional Water Quality Control Board and which is in full compliance therewith or a facility authorized to receive such wastes by the jurisdiction(s) regulating the facility and is in full compliance with all permits, regulations and requirements.

5. Discharge of industrial wastewater to a channel, stormdrain, stream, river, lake, ocean or other surface waters is prohibited unless authorized by a National Pollutant Discharge Elimination System (NPDES) permit issued by a California Regional Water Quality Control Board or the U.S. Environmental Protection Agency (EPA).

6. The Permittee shall immediately notify the County of Los Angeles Department of Public Works (LACDPW) at (626) 458-3517 and the Publicly Owned Treatment Works (POTW) of all discharges that could cause problems to the POTW including slug loading, spills, bypasses, upsets, etc. A follow-up written notification describing the discharge is required to be submitted within 5 days of the incident.

7. The Permittee shall conform to the discharge prohibitions outlined in 40CFR 403.5 (a) (1) and 40CFR 403.5 (b).

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
INDUSTRIAL WASTE DISPOSAL PERMIT

C5

PART C: GENERAL CONDITIONS AND LIMITATIONS, NON-USE

1. The owner or operator of an existing industrial waste pretreatment facility who desires to maintain the facility for future reuse shall submit to the County of Los Angeles, Department of Public Works (DPW), Environmental Programs Division an application for revised Industrial Waste Disposal permit and fee pursuant to the Los Angeles County Code, Title 20, or appropriate City Code/Ordinance.

2. This application for maintain only with zero discharge is applicable to only pretreatment facilities which meet current County standards/Policies. Any pretreatment facility not in use which does not meet current County Standards/Policies must be formally closed.

3. All accumulated industrial and hazardous wastes shall be removed from the pretreatment facility to a legal point of disposal.

4. Furnish DPW with evidence of legal disposal for all wastes removed for disposal in the form of completed hazardous waste manifests or other appropriate documents.

5. Outlets associated with the pretreatment facility and which are the last open connection shall have a water tight plug or equivalent approved device installed.

6. All inlets and plumbing receptors (floor sink, floor drains, trenches, etc.) associated with and/or tributary to a pretreatment facility shall have a water tight plug or equivalent approved device installed.

7. Any severing, capping, or plugging of outlet and inlet discharge lines shall be carried out such that all applicable plumbing code regulations are complied with.

8. Any rain diversion devices shall be removed and all operations tributary to a rain diversion system shall cease.

PART C: GENERAL CONDITIONS AND LIMITATIONS, NON-USE (CONTINUED)

9. An adequate treatment system subject to this office's approval shall be installed for any discharge tributary a storm drain system.

10. Upon completion of Item Nos. 2-9 above, an inspection shall be scheduled with a DPW Waste Control Engineering Inspector. Copies of any documentation pertaining to Items 3 and 7 shall be made available to the Inspector at the time of inspection.

11. Compliance with Items 2-10 shall take place within 90 days of the issue date of this permit.

12. Pretreatment facilities capped for future use shall be kept free of dirt, debris, water, wastewater, explosive or toxic gases, and shall not be used for the temporary or permanent storage of any materials without authorization by DPW.

13. The permittee shall inform DPW in writing within five days of any change in facts required to be stated on the application for a permit.

14. The permittee shall obtain approval from DPW prior to effecting any of the following waste discharge conditions:

    A. Change in method of disposal;
    B. Change in disposal point;
    C. Change in discharge volume effecting treatment or storage facilities; or
    D. Change in character of the waste discharge.

15. Prior to this office permitting a pretreatment facility to be reactivated said facility must conform to current County Standards/Policies.

ITEMS CORRESPONDING TO SCHEDULE B-II

9. An easement for public utility purposes and incidental purposes, recorded April 15, 1971 as Book D5027, Page 781 of Official Records.

   In Favor of: Pacific telephone and Telegraph company, a corporation
   Affects: as described therein

   (Affects Parcel 1)
   THIS ITEM IS NOT ON THE SURVEYED PROPERTY.

10. An easement for public utility purposes and incidental purposes, recorded February 27, 1972 as Book D5357, Page 664 and December 22, 1976 in Book D7365, Page 71 of Official Records.

(10) In Favor of: Southern California Edison Company, a corporation
   Affects: as described therein

   (Affects Parcel 1)
   THIS ITEM IS PLOTTED AND SHOWN HEREON. THE SECOND DOCUMENT DOES NOT REFER TO THE SURVEYED PROPERTY.

11. An easement for pole lines, public utility purposes and incidental purposes, recorded January 16, 1951 as Book 35326, Page 49 of Official Records.

(11) In Favor of: Southern California Edison Company, a corporation
   Affects: as described therein

   (Affects Parcel 1)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

12. An easement for water line and incidental purposes in the document recorded March 29, 1954 as Book 44185, Page 409 of Official Records.

(12) (Affects Parcel 2)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

13. An easement for sanitary sewer and incidental purposes in the document recorded May 24, 1960 as Instrument No. 3579 in Book D856, Page 552 of Official Records.

(13) (Affects Parcel 2)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

14. An easement shown or dedicated on the map of Tract No. 31125 recorded May 27, 1971 and on file in Book 807, Page 51-52, of Tract Maps.

(14) For: Public utility, sidewalk, planting and incidental purposes.

   (Affects Parcel 1)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

15. The terms and provisions contained in the document entitled "Agreement" recorded July 06, 1971 as Instrument No. 1762 of Official Records.

   (Affects Parcel 1)
   THIS ITEM REFERS TO THE SURVEYED PROPERTY BUT CONTAINS NO PLOTTABLE SURVEY ITEMS.

16. The terms and provisions contained in the document entitled "Agreement" recorded September 27,1971 as Instrument No. 2940 of Official Records.

   (Affects Parcel 1)
   THIS ITEM REFERS TO THE SURVEYED PROPERTY BUT CONTAINS NO PLOTTABLE SURVEY ITEMS.

17. Covenants, conditions, restrictions and easements in the document recorded February 15, 1972 as Instrument No. 4190 in Book M3983, Page 234 of Official Records, but deleting any covenant, condition, or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, sexual orientation, familial status, disability, handicap, national origin, genetic information, gender, gender identity, gender expression, source of income (as defined in California Government Code § 12955(p)) or ancestry, to the extent such covenants, conditions or restrictions violation 42 U.S.C. § 3604(c) or California Government Code § 12955. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

   Document(s) declaring modifications thereof recorded July 16, 1979 as Instrument No. 79-771035 of Official Records.

   (Affects Parcel 2)
   THIS ITEM REFERS TO THE SURVEYED PROPERTY BUT CONTAINS NO PLOTTABLE SURVEY ITEMS.

18. An easement for cables and conduits and incidental purposes in the document recorded October 14, 1977 as Instrument No. 77-1142595 of Official Records.

(18) (Affects Parcel 1)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

19. An easement shown or dedicated on the map of Tract No. 33910 recorded January 25, 1979 and on file in Book 909, Page 76 to 79, of Tract Maps.

(19) For: Public utility, sidewalk, planting and incidental purposes.

   (Affects Parcel 2)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

20. An easement for public utilities and incidental purposes, recorded April 24, 1979 as Instrument No. 79-437351 of Official Records.

(20) In Favor of: The Pacific Telephone and Telegraph Company
   Affects: Parcel 2, as described therein
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

21. The terms and provisions contained in the document entitled "Notice of Addition of Territory" recorded July 16, 1979 as Instrument No. 79-771035 of Official Records.

   (Affects Parcel 2)
   THIS ITEM REFERS TO THE SURVEYED PROPERTY BUT CONTAINS NO PLOTTABLE SURVEY ITEMS.

23. The terms and provisions contained in the document entitled "Resolution 8329" recorded November 30, 1979 as Instrument No. 79-1352258 of Official Records.

(23) (Affects Parcel 2)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

24. An agreement or covenant to hold land as one parcel recorded December 04, 1979 as Instrument No. 79-1362216 of Official Records.

   (Affects Both Parcels)
   THIS ITEM REFERS TO THE SURVEYED PROPERTY BUT CONTAINS NO PLOTTABLE SURVEY ITEMS.

25. The Terms, Provisions and Easement(s) contained in the document entitled "Road Easement" recorded February 13, 1980 as Instrument No. 80-149582 of Official Records.

(25) (Affects Both Parcels)
   THIS ITEM IS PLOTTED AND SHOWN HEREON.

26. An easement for storm drain and water facilities and incidental purposes in the document recorded June 25, 1980 as Instrument No. 80-613397 of Official Records.

(26) (Affects Both Parcels)
   THIS ITEM IS PLOTTED AND SHOWN HEREON; HOWEVER, THE DEPICTION IS LARGELY ILLEGIBLE, THEREFORE THE INTENDED LOCATION MAY BE DIFFERENT FROM WHAT IS SHOWN HEREON. WIDTH VARIES

32. An easement shown or dedicated on the map of Tract No. 29809 recorded February 24, 1971 and on file in Book 804, Page 80, of Tract Maps.

   For: Public utility, sidewalk and planting and incidental purposes.

   (Affects Both Parcels)
   THIS ITEM IS NOT ON THE SURVEYED PROPERTY.

33. An easement for underground electrical supply systems and communication systems and incidental purposes, recorded May 5, 1972 as Instrument No. 3135 in Book T7551, Page 88 of Official Records.

   In Favor of: Southern California Edison Company, a corporation, and their successors and assigns
   Affects: as described therein

   (Affects Both Parcels)

   Said offer of dedication was not accepted (or was rejected)

   (Affects Parcel 2)
   THIS ITEM IS NOT ON THE SURVEYED PROPERTY.

MISCELLANEOUS NOTES

SURVEY PERFORMED BY:
BOCK & CLARK CORPORATION, AN NV5 COMPANY
2525 NATOMAS PARK DRIVE STE 350
SACRAMENTO, CA 95833
PHONE: 800-787-8397, EMAIL: maywehelpyou@bockandclark.com

(MN1) THIS SURVEY IS NOT INTENDED FOR CONSTRUCTION OR DESIGN PURPOSES.

(MN2) SOME FEATURES SHOWN ON THIS PLAT MAY BE SHOWN OUT OF SCALE FOR CLARITY. ALL DIMENSIONS SHOWN ARE IN FEET AND DECIMALS THEREOF.

(MN3) BEARINGS SHOWN HEREON ARE BASED ON THE CENTERLINE OF SATURN STREET, LOS ANGELES COUNTY, CALIFORNIA, SHOWN ON MB 909-76, HAVING A BEARING OF N84°14'38"E.

(MN4) AT THE TIME OF SURVEY, THERE WAS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, BUILDING CONSTRUCTION, BUILDING ADDITIONS.

(MN5) AT THE TIME OF SURVEY, NO INFORMATION REGARDING CHANGES IN STREET RIGHT OF WAY LINES WAS MADE AVAILABLE TO THE SURVEYOR FROM THE CONTROLLING JURISDICTION, NOR WAS THERE OBSERVABLE EVIDENCE OF STREET OR SIDEWALK REPAIRS.

(MN6) AT THE TIME OF SURVEY, THERE WAS NO OBSERVABLE EVIDENCE OF SITE USE AS A BURIAL GROUND OR CEMETERY, NOR ANY SUBSTANTIAL AREAS OF REFUSE.

(MN7) SURVEYOR IS NOT LIABLE FOR UTILITIES OBSTRUCTED OR COVERED FROM VIEW. THE LOCATION OF UTILITIES SHOWN HEREON IS FROM OBSERVED SURFACE AND ABOVE GROUND APPURTENANCES IN ORDER TO DEPICT UNDERGROUND UTILITIES, IF POSSIBLE. UTILITY PLANS OR GROUND MARKINGS WERE NOT ABLE TO BE OBTAINED FOR THIS SURVEY

(MN8) ONLY SURFACE AND ABOVE GROUND STRUCTURES WERE LOCATED. NO UNDERGROUND IMPROVEMENTS, SUCH AS FOUNDATION FOOTINGS, WERE LOCATED.

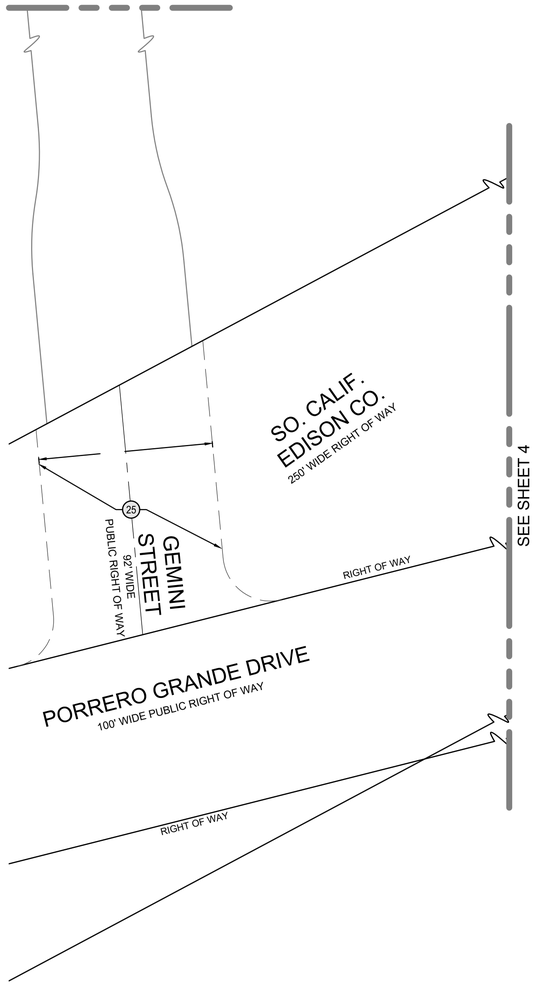
(MN9) THE SURVEYED PROPERTY CONTAINS AN AREA OF 16.026 ACRES (698,100 SQUARE FEET), MORE OR LESS.

(MN10) THE SURVEYED PROPERTY CREATES A MATHEMATICALLY CLOSED FIGURE, WITH NO GAPS, GORES, OVERLAPS OR HIATUS INHERENT TO THE SURVEYED PROPERTY BASED ON THE FIELD SURVEY PERFORMED AND THE TITLE COMMITMENTS PROVIDED. ALL PARCELS OF THE SURVEYED PROPERTY AS DESCRIBED HEREON ARE CONTIGUOUS.

(MN11) THERE ARE 818 STRIPED REGULAR PARKING SPACES AND 15 STRIPED HANDICAPPED PARKING SPACES FOR A TOTAL OF 833 STRIPED PARKING SPACES ON THE SURVEYED PROPERTY. THERE ARE ALSO 3 DOCK HEIGHT SPACES ON THE SURVEYED PROPERTY.

(MN12) THE SUBJECT PROPERTY HAS DIRECT ACCESS TO AND FROM SATURN STREET , BEING A VARIABLE WIDTH DEDICATED AND ACCEPTED PUBLIC RIGHT OF WAY, AS SHOWN HEREON.

(MN13) AN ADDRESS OF 1977 SATURN STREET WAS POSTED ON THE SURVEYED PROPERTY.



(MN14) ADJOINING OWNERSHIP INFORMATION SHOWN HEREON WAS OBTAINED FROM AVAILABLE PUBLIC RECORDS.

(MN15) FENCE OWNERSHIP, IF ANY, WAS NOT DETERMINED UNDER THE SCOPE OF THIS SURVEY.

(MN16) BUILDING SQUARE FOOTAGE WAS CALCULATED FROM THE OBSERVED APPARENT FOOTPRINT OF EACH BUILDING AT GROUND LEVEL.

(MN17) NO DIVISION OR PARTY WALLS WERE DESIGNATED BY THE CLIENT OR LOCATED BY SURVEYOR WITH RESPECT TO ADJOINING PROPERTIES

(MN18)

RECORD DESCRIPTION

The Land referred to herein below is situated in the City of Monterey Park, County of Los Angeles, State of California, and is described as follows:

PARCEL 1:
PARCEL 5 OF THE PARCEL MAP NO. 7972, IN THE CITY OF MONTEREY PARK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP FILED IN BOOK 80 PAGES 45 AND 46 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

ALSO EXCEPTING ALL OIL, GAS, HYDROCARBON SUBSTANCES RESERVED IN THE DEED RECORDED APRIL 8, 1977 AS INSTRUMENT NO. 77-354323, RECORDS OF LOS ANGELES COUNTY.

ALSO EXCEPTING ALL OIL, GAS, HYDROCARBON SUBSTANCES, AND ALL MINERALS OF EVERY KIND, NATURE AND DESCRIPTION BEING MORE THAN 500 FEET BELOW THE SURFACE OF THE REAL PROPERTY WITHOUT THE RIGHT OF ENTRY FOR ANY PURPOSE WHATSOEVER UPON, OVER OR INTO THE SURFACE OR 500 FEET OF THE SURFACE OF THE REAL PROPERTY, AS RESERVED BY LOWRY B. MCCASLIN AND PAULINE C. MCCASLIN, HUSBAND AND WIFE AND MCCASLIN PROPERTIES, A CALIFORNIA GENERAL PARTNERSHIP, BY DEED RECORDED DECEMBER 10, 1985 AS INSTRUMENT NO. 85-1456239, OFFICIAL RECORDS.

PARCEL 2:
LOTS 1, 2, 3 AND 16 OF TRACT NO. 33910, IN THE CITY OF MONTEREY PARK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 909 PAGES 76 TO 79 INCLUSIVE OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

ALSO EXCEPTING ALL OIL, GAS, HYDROCARBON SUBSTANCES, AND ALL MINERALS OF EVERY KIND, NATURE AND DESCRIPTION BEING MORE THAN 500 FEET BELOW THE SURFACE OF THE REAL PROPERTY WITHOUT THE RIGHT OF ENTRY FOR ANY PURPOSE WHATSOEVER UPON, OVER OR INTO THE SURFACE OR 500 FEET OF THE SURFACE OF THE REAL PROPERTY, AS RESERVED BY LOWRY B. MCCASLIN AND PAULINE C. MCCASLIN, HUSBAND AND WIFE AND MCCASLIN PROPERTIES, A CALIFORNIA GENERAL PARTNERSHIP, BY DEED RECORDED DECEMBER 10, 1985 AS INSTRUMENT NO. 85-1456239, OFFICIAL RECORDS.

Office Property For Sale

INVESTMENT HIGHLIGHTS

Campus Setting

Efficient floor plates with Central Artrium

Secure and gated parking

Great location just 6 miles from Downtown LA

located in a campus setting on 15.83 acres. The property has four efficient 50,000 square foot floor plates with a central Atrium,two dock high doors ,2 roll up doors and 3 diesel generators. It is located in Monterey Park CA., just 6 miles from Downtown Los Angeles CA.

1.0 SUMMARY

This report presents the results of a Phase I Environmental Site Assessment (ESA) performed by Northgate Environmental Management, Inc. (Northgate) for EQ Office at 1977 Saturn Street in Monterey Park, California (the Site). The Site consists of one parcel totaling approximately 15.84-acres of land identified as Assessor's Parcel Number (APN) 5265-026-054 in Los Angeles County. The Site is developed with a two-story, split level commercial office building totaling approximately 205,628 square feet that was developed in1980 and is presently vacant but was last occupied by a Bank of the West office. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

Our review indicates that the Site historically consisted of primarily undeveloped land with a former oil and gas exploration well (abandoned in 1967) until 1980 when it was redeveloped. into the current configuration. The Site was not unencumbered as of March 2022 and is developed with a two-story, split level commercial office building in the central portion of the Site with surface parking lots surrounding the structure. The structure is presently vacant but has historically been occupied by Bank of the West since 1980; however, due to several acquisitions, the bank has been identified under several different business names that have included Lloyd's Bank from 1980 to 1986, Sanwa Bank from 1986 to 2001, United California Bank for in 2002, followed by the Bank of the West. Historic operations at the commercial office have been reported to have included a commercial kitchen with a grease interceptor and a small print shop and photo room were historically operated as part of the commercial office building with an industrial waste discharge permit to the sewer. A utility building was constructed to the north of the commercial office building in 1990 that primarily housed an emergency generator system.

Three underground storage tanks (USTs) have historically been operated at the Site that have supplied the emergency generator system. No dispensing operations have been reported for any of the USTs. Two 10,000-gallon single-walled fiberglass tanks containing diesel fuel were installed in 1980 and a 2,000-gallon steel double-walled fiberglass coated tank containing diesel was installed in 1991. The original piping associated with these tanks was reportedly removed in September 2006 and replaced with double walled piping. At the time of piping removal, soil samples were collected that reported low concentrations of diesel at 12 and 15 milligrams per kilogram (mg/kg). A limited subsurface investigation as conducted in 2007 that only reported low concentrations of total petroleum hydrocarbons as diesel (TPH-d) in two of five soil samples collected. TPH-d was reported in soil samples collected from the same location at depths of 14.5 to 15 feet below ground surface (bgs) at 658 mg/kg and at a depth of 17.5 to 18 feet bgs at a concentration of 238 mg/kg. It should be noted that concentrations were shown to attenuate with depth and are below the Regional Water Quality Control Board – Los Angeles Region

(RWQCB) Soil Screening Level of 1,000 mg/kg. An additional limited subsurface investigation conducted in 2014 by the Los Angeles County Department of Public Works (LACDPW) did not report concentrations of TPH-d or volatile organic compounds (VOCs) above the laboratory reporting limits in any of the 23 soil samples collected from four borings advanced to 40 feet bgs at the Site. A no further action letter was recommended and the LACDPW referred the Site to the RWQCB on April 27, 2020. The Site is currently identified as an inactive leaking underground storage tank (LUST) cleanup site as of February 11, 2022, that is under review by the RWQCB. Based on the data provided in the reports, it is Northgate's opinion that there is a reasonable expectation that the RWQCB may grant closure for the Site. The approximate locations of these historic USTs are shown on Figure 2.

In summary, Northgate has performed a Phase I ESA of the property located at 1977 Saturn Street in Monterey Park, California in conformance with the scope and limitations of ASTM Practice E 1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exceptions to, or deletions from, these practices are described in Section 2.3 of this report. This assessment revealed the following Recognized Environmental Condition (REC) in connection with the property:

- Two 10,000-gallon and one 2,000-gallon diesel UST were historically present at the Site to supply an emergency generator system. Limited subsurface investigations were conducted in the vicinity of the USTs in 2007 and 2014. Low concentrations of TPH-d that were all below regulatory screening criteria were reported in 2007 and no VOCs or TPH-d were reported above laboratory reporting limits in the 2014 investigation. The tanks were removed from the Site in 2018 with soil and water samples collected at the time of removal from within the excavation cavity and below the former piping. Samples collected at the time of tank removal did not report concentrations of TPH-d above the laboratory method reporting limits within the tank excavation cavity and only low concentration of TPH-d were reported below regulatory screening criteria in samples beneath the former piping. However, it was noted that no soil sampling was conducted beneath the concrete pads below the UST. The Site is currently listed on the RWQCB GeoTracker website as an inactive LUST cleanup site as of February 11, 2022, related to these tanks pending review by the RWQCB. A closure report documenting the above referenced soil sampling dated December 7, 2018, was submitted to and received by the LACDPW in January 2019. The case was referred to the RWQCB on April 27, 2020, and is currently pending their review and response. In the absence of a closure/no further action (NFA) letter from the RWQCB and during this time of review, if redevelopment work is planned in this area, Northgate recommends contacting the RWQCB to ensure work is in compliance with their requirements. Based on the data provided in the reports, it is Northgate's opinion that there is a reasonable expectation that the RWQCB will grant a non-case determination for the Site. Typically, non-case determinations indicate

that the RWQCB will not open a case and will not require any further action, but will indicate that residual concentrations left in place may require management if subsurface activities are implemented, or evaluation if the land use changes from commercial to residential.

2.0 INTRODUCTION

This report presents the results of a Phase I ESA performed by Northgate at the property located at 1977 Saturn Street in Monterey Park, California. The Site consists of approximately 15.84 acres of land developed with a two-story, split level commercial office building totaling, surface parking lots, and associated landscape. The Site consists of one parcel identified as APN 5265-026-054 in Los Angeles County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

2.1 Purpose

The purpose of Phase I ESA has been to identify and evaluate the presence of RECs at the Site. The term "RECs" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Scope of Services

Northgate has performed the ESA in general conformance with the scope and limitations of ASTM E-1527-13, *Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiry – Final Rule*. This investigation was performed by Nicky Robinson, Senior Engineer with assistance and review by Derrick Willis, Northgate Principal. The scope of work for the investigation included the following services:

- Review of readily available information regarding the history of the Site, including historic aerial photographs, maps, previous reports, and other information, and discussions with individuals familiar with the Site;
- Review of environmental lien documents obtained for the Site;
- A reconnaissance of the Site and near vicinity;
- Discussions with regulatory officials and review of regulatory agency publications and files, as applicable;

- Evaluation of RECs, development of conclusions and scope of work to evaluate potential on-Site contamination concerns; and
- Preparation of this report.

2.3 Limitations and Exceptions

2.3.1 Limitations

The purpose of an environmental assessment is to reasonably evaluate the potential for, or actual impact of, past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. No investigation is thorough enough to absolutely rule out the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the Site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at un-sampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

Where the scope of services is limited to interview and/or review of readily available reports and literature, any conclusions and/or recommendations are necessarily based largely on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed by Northgate.

Any opinions and/or recommendations presented apply to Site conditions existing at the time of performance of services. We are unable to report on, or accurately predict, generally unforeseeable events that may impact the Site following performance of services, whether occurring naturally or caused by external forces. Therefore, we cannot assume responsibility for such events or their impact. We also cannot assume responsibility for changes in environmental standards, practices, or regulations.

2.3.2 Exceptions

The time intervals between some historical information sources may exceed five years due to the unavailability of such records. However, in our opinion, this data gap does not significantly impact our ability to evaluate historic land use conditions at the Site given the availability of other sources for this information.

At the time this report was prepared, the transformer storage area that contains transformers owned and operated by Southern California Edison could not be observed. However, in our opinion, this limitation does not impact any results or conclusions presented in this report. There were no other limiting conditions.

There were no other limiting conditions.

2.4 User Reliance

This report has been prepared for the exclusive use of EQ Office and their corporations, subsidiaries, affiliates, partnerships, and lenders in evaluating environmental conditions at the Site. Others may not use or rely on the information contained in this report without the express written consent of Northgate.

3.0 SITE DESCRIPTION

3.1 Site Location and Legal Description

The Site consists of 15.84 acres of land located at 1977 Saturn Street in the City of Monterey Park, California. The Site consists of one parcel identified as APN 5265-026-054 in Los Angeles. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

3.2 Site Vicinity General Characteristics

The Site is entirely developed with a two-story, split level commercial office building, surface parking lots, and associated landscape. The Site is located in an area of mixed residential and commercial development located north of Saturn Street and west of South Orange Avenue in Monterey Park, California. A closed landfill, the Operating Industries, Inc. Landfill Superfund site, is located approximately 0.38-miles southeast and south of the Site.

3.3 Geology and Groundwater

3.3.1 Geology

The Site is located in the northeastern portion of the Montebello Plain of the Los Angeles Basin, south of the Repetto and Merced Hills (CDWR, 1961). The area is underlain by Pleistocene-aged alluvial deposits consisting of unconsolidated gravel, sand, silt, and clay and consolidated sedimentary rocks of the San Pedro Formation (CET Environmental Services, 2011). Investigations at the Site indicated the lithology beneath the pea gravel associated with the former USTs included clayey sand from 8 to 12 feet bgs, sandy clay from 12 to 17 feet bgs, and sand from 17 to 18 feet bgs (BVNAI, 2007a).

3.3.2 Groundwater

The Site is located in the Montebello Forebay Area along the northeastern extent of the Los Angeles Central Groundwater Basin (CDWR, 1961). In 2005, the depth to groundwater in the Site vicinity generally ranged between 68 and 74 feet bgs (LCI, 2014). Groundwater flow was towards the south (LCI, 2014).

3.4 Current Use of the Property

The Site is currently developed with a two-story, split level commercial office building, surface parking lots, and associated landscape. The structure is presently vacant but was last occupied by a Bank of the West office.

3.5 Description of Structures, Roads, Sewage, and Potable Water Sources

The Site is currently developed with a vacant two-story, split level commercial office building and a smaller utility building containing a backup generator. The remainder of the Site is occupied by asphalt paved parking areas and driveways, and landscape. Water and sewer connections are provided by the City of Monterey Park.

3.6 Current Uses of Adjoining Properties

The Site is located in an area of mixed residential and commercial land use. A nursery is located north of the eastern portion of the Site, two large aboveground water storage tanks are located north of the central portion of the Site, and residential development is located north of the western portion of the Site. A recreational park and residential development are located farther north of the Site followed by a reservoir located approximately 0.42-miles north of the Site. To the east, the Site is bordered by East Orange Avenue followed by vacant land and residential development. Saturn Street followed by a commercial development then a substation operated by Southern California Edison and the California Highway 60 is located south of the Site. A closed landfill, the Operating Industries, Inc. Landfill Superfund site, is located approximately 0.38-miles southeast and south of the Site. The Site is bordered to the west by commercial development followed by residential development.

4.0 USER PROVIDED INFORMATION

4.1 Environmental Liens or Activity and Use Limitations

An environmental lien and activity and use limitation (AUL) search was conducted for the Site by Environmental Data Resources (EDR). EDR's review indicates that there are no environmental liens or AULs of record on the Site. A copy of the Environmental Lien and AUL Search is included in Appendix A (EDR, 2022a).

4.2 Valuation Reduction for Environmental Issues

EQ Office has not provided Northgate with any information indicating that the value of the property has been reduced due to environmental issues.

4.3 Owner, Property Manager, and Occupant Information

The Environmental Lien and AUL Search shown in Appendix A indicate that the title to the Site is vested in BRE CA Saturn LLC. The Site is managed by EQ Office. The building is presently vacant.

4.4 Specialized Knowledge

EQ Office currently manages the property as a commercial office complex. EQ Office has not indicated that they possess any additional specialized knowledge regarding the Site.

4.5 Reason for Performing the Phase I ESA

Northgate understands that EQ Office is evaluating the property for potential sale and requires a Phase I ESA to be completed for disclosure purposes.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

To determine if the Site has any documented environmental concerns, or if other sites with documented environmental concerns exist within the search radii of the Site prescribed by ASTM 1527-13 and *All Appropriate Inquiry*, Northgate reviewed a summary of regulatory agency database listings prepared by EDR. In addition, where appropriate, we reviewed local regulatory agency files for additional specific information regarding sites identified in the EDR report judged to be of possible concern to the subject Site. The EDR report presenting a summary of the agency databases reviewed and a map showing the location of the identified sites is provided as Appendix B (EDR, 2022b). The results of the database search and follow-up agency file review are summarized below.

5.1.1 Site

The Site was identified for the presence of historic USTs including two 10,000-galon and one 2,000-gallon UST containing diesel and for the off-Site removal of hazardous wastes including tank bottom wastes. Database listings for the Site address of 1977 Saturn Street included in the EDR environmental database report are shown on the following table.

EDR Site #	Site Listing and Address	Regulatory Database	Information in EDR Report
A1, A2	Sanwa Bank California – 1977 Saturn Street, Monterey Park	RCRA-SQG, SWEEPS UST, HAZNET, Los Angeles Co. HMS, HWTS, and UST	The EDR database report contains a listing for three USTs. One was identified to be a 2,000-gallon capacity tank containing a petroleum product. The capacity and contents of the other two tanks were not listed but appear to be associated with the two 10,000-gallon diesel USTs. It is also listed as a small quantity generator. The EDR database report contains a listing for off-Site hazardous waste removal and transport of tank bottom waste in 2016. It is listed as a closed Los Angeles County Hazardous Materials Site. This EDR report listing does not contain information indicating a hazardous materials release at the Site.

EDR Site #	Site Listing and Address	Regulatory Database	Information in EDR Report
A3, A4, A10	Equity Office – 1977 Saturn Street, Monterey Park	RCRA NonGen/NLR, HAZNET, HWTS, FINDS, and ECHO	The EDR database report contains a listing for the Site as a non-generator. The EDR database report contains a listing for off-Site hazardous waste removal and transport of tank bottom waste in 2018. This EDR report listing does not contain information indicating a hazardous materials release at the Site.
A5	BRE CA Saturn LLC – 1977 Saturn Street, Monterey Park	EMI and Los Angeles Co. HMS	The EDR database report contains listings for the Site for a removed tank and an industrial waste permit. No further information was available. This EDR report listing does not contain information indicating a hazardous materials release at the Site.
A6	1977 Saturn Street – 1977 Saturn Street, Monterey Park	UST	The EDR database report contains a listing for a UST operated at the Site. No further information regarding the tank, it size, contents, or status or any further information was available. This appears to be associated with the two former 10,000-gallon and one 2,000-gallon diesel USTs. This EDR report listing does not contain information indicating a hazardous materials release at the Site.
A7, A8	Bank of the West – 1977 Saturn Street, Monterey Park	HAZNET, HWTS, and FINDS	The EDR database report contains a listing for off-Site hazardous waste removal and transport of unspecified organic liquid mixture, unspecified solvent mixture, hydrocarbon solvents, oil/water separation sludge, waste oil and mixed oil, unspecified alkaline solution, and off-specification, aged, or surplus organics between 2003 and 2015. Tank bottom waste was noted to have been discharged to the sewer/POTW or

EDR Site #	Site Listing and Address	Regulatory Database	Information in EDR Report
			NPDES in 2006 and 2010. It was also listed for the disposal of photochemicals and photo processing waste between 1993 and 2003. This EDR report listing does not contain information indicating a hazardous materials release at the Site.
A9	United CA Bank – 1977 Saturn Street, Monterey Park	FINDS, and ECHO	The EDR database report contains a listing for the Site on the FINDS and ECHO databases related to the Site listings on the HWTS database.

5.1.2 Off-Site Sources

The regulatory agency database search prepared by EDR indicates the presence of 114 agency-database listings for facilities located within an approximate one-mile radius of the Site. The EDR database report containing a list of the agency databases searched is attached in Appendix B. Sites with documented releases impacting groundwater located within 0.25-mile upgradient and/or cross-gradient of the Site, or otherwise judged to be of potential impact to soil, soil vapor, or groundwater quality at the Site, are summarized in the following table.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Operating Industries, Inc. Landfill/Getty Synthetic Fuels, Inc. – 900 Portrero Grande Drive, Monterey Park and New Cure, Inc – 2550 Greenwood Avenue, Monterey Park	NPL, SEMS, CORRACTS, RCRA-TSDF, RCRA-SQG, US ENG CONTROLS, ROD, RAATS, PRP, ICIA, CONSENT, ENVIROSTOR, SWF/LF, HIST UST, DEED, LDS, Cortese, ENF, HIST CORTESE, HWP, CIWQS, CERS, WMUDS/SWAT, ODI, HIST Cal-Sites, CA BOND EXP. PLAN, Los Angeles Co LF Methane, SWEEPS UST, HIST UST, RCRA-SQG, ICIS, FINDS, and ECHO	Approximately 0.125-0.25-miles south-southeast (downgradient) of the Site	Operating Industries, Inc. operated a class II landfill on 190 acres in the City of Monterey Park with the 45-acre northern section separated from the 145-acre southern section by the Pomona Freeway in the 1960s. This facility is located approximately 1,950 feet south and southeast (cross- to downgradient of the Site) The landfill accepted solid and liquid wastes with some hazardous wastes between 1948 and 1983. It operated as a municipal landfill between 1948 and 1952 by the City of Monterey Park prior to becoming a privately owned landfill in January 1952 by Operating Industries, Inc. It was permitted by the RWQCB to receive various nonhazardous and hazardous liquid wastes including lead compounds, chrome oxide, pigment sludge, refinery wastes, wastewater from paint manufacturing, and caustic leaning waste. The EPA has evidence that the original landfill included at least some portion of both the northern and southern sections. Leachate generated by the landfill is reported to contain vinyl chloride, benzene type compounds, tetrachloroethylene, heavy metals, and other contaminants. In 1985, plans for a comprehensive remedial investigation to determine the nature and extent of impacts from the landfill including chemical contaminants and methane were initiated. The remedy for the landfill included a landfill cover system, landfill gas control system, surface water management, and perimeter liquid control (PLC) system. A leachate treatment plant was constructed on the northern section of the facility and began operations in September 1994. Groundwater is still routinely monitored for this facility. Given the remedial actions, that the PLC system has been documented to be effectively controlling liquids at the perimeter by reversing the groundwater flow gradient with natural attenuation progressing remediation of groundwater in the downgradient direction, the downgradient location and the regulatory oversight, this facility does not appear to represent a significant potential threat to soil, soil vapor, and/or groundwater at the subject Site.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Bates Shell Service – 745 East Taylor Street, Monterey Park	EDR Hist Auto	Approximately 400-feet north (upgradient) of the Site	The facility is listed on the EDR proprietary (non-regulatory) Historic Automobile database as gasoline service station between 1989 and 1993. No records of contamination or releases at this property impacting the environment or the Subject Property were identified as part of the regulatory review. This address is mapped within a residential area. Based on a review of historic aerial photographs that includes the years 1989 and 1994, this area has historically been occupied by residences and no evidence of a gasoline service station at this location is present. Given that this area has historically been occupied by residential homes and the lack of a documented release, this facility does not appear to represent a potential threat to soil, soil vapor, and/or groundwater quality at the Subject Property.
Alpha Photonics, Inc – 2019 Saturn Street, Monterey Park	ENVIROSTOR, Los Angeles Co., HMS, RCRA-SQG, FINDS, and ECHO	Approximately 425-feet southwest (cross-gradient) of the Site	This facility is identified for the generation of halogenated solvents. It is identified for having a tiered permit from the DTSC. It is listed on the Los Angeles County Site Mitigation database as an abated facility as of October 6, 2011. No further information was available. Given the cross-gradient location and the lack of a documented release, this facility does not appear to represent a potential threat to soil, soil vapor, and/or groundwater quality at the Subject Property.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Montebello Service Center/Southern California Edison – Montebello Service CE/Monterey Park District Office – 1000 Portrero Grande Drive, Monterey Park	LUST, Cortese, HIST CORTESE, NPDES, LA Co. Site Mitigation, CERS, CERS HAZ WASTE, SWEEPS UST, CERS TANKS, CA FID UST, HIST UST, UST, RCRA-LQG, NPDES, RCRA-SQG, AST, HAZNET, HWTS, CERS, and FINDS	Approximately 0.15-miles east-southeast (cross-gradient) of the Site	The facility is listed for a release of diesel impacting soil that was reported in 1988. No further information was available for this release. The facility obtained regulatory closure from RWQCB on September 25, 1996. This facility was also identified for a release of gasoline and waste/motor/hydraulic/lubricating oil impacting soil that was reported in 2002 during tank removal activities. The facility was determined to meet the low-threat closure policy criteria. The facility obtained regulatory closure from RWQCB on January 22, 2019. Given the release to soil only, the cross-gradient location, the relative distance, and the regulatory closure, this facility does not appear to represent a significant potential threat to soil, soil vapor, and/or groundwater at the subject Site.
SCE Mesa Substation – 700 East Portrero Grande Drive, Monterey Park	LUST, Cortese, LA Co. Site Mitigation CERS, RCRA-LQG, RCRA-SQG, HIST UST, AST, CERS HAZ WASTE, SWEEPS UST, CA FID UST, CERS TANKS, and CERS	Approximately 0.15-miles east-southeast (cross-gradient) of the Site	The facility is identified as an electrical substation that is identified as a chemical storage facility and has generated hazardous wastes including ignitable waste, corrosive waste, lead, benzene, tetrachloroethylene, trichloroethylene, and halogenated solvents. It is listed for a release of diesel and gasoline impacting soil that was reported in 1999. A 1,000-gallon containing gasoline was installed in 1955. A site assessment was conducted in 1999 and a subsequent soil and water investigation was conducted in 2003 but no further information was available. The facility obtained regulatory closure from RWQCB on April 23, 2003. Given the release to soil only, the cross-gradient location, the relative distance, and the regulatory closure, this facility does not appear to represent a significant potential threat to soil, soil vapor, and/or groundwater at the subject Site.

5.2 Vapor Encroachment Screening

A vapor encroachment screening (VES) evaluation was performed for the Site using EDR's vapor encroachment condition application (VEC App), which assists in screening for vapor encroachment risk in accordance with ASTM E2600 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." A "Tier I" VES was performed to evaluate the potential for vapors associated with contaminated soil and/or groundwater to impact the Site, whether originating from the Site or from nearby off-Site sources. For properties where a VEC could not be ruled out, existing subsurface investigation reports, if available, were used to evaluate potential impacts to the Site (Tier 2 screening).

The EDR VES report generated during this evaluation is attached in Appendix C (EDR, 2022c). The following table presents a summary of the VES findings:

Potential for Vapor Intrusion on Site	
Areas of Concern	*Conclusion*
Site (existing conditions)	VEC not present
Site (former condition)	VEC could not be ruled out.
Adjoining Property or near-by Property Operations or Existing Conditions	VEC not present
Historical Uses of Adjoining Property or Near-by Properties	VEC not present.

Based on this screening, a VEC could not be ruled out for the subject Site related to the historic USTs. Although no significant release has been documented for either of the former two 10,000-gallon diesel USTs or the 2,000-gallon diesel UST, no formal closure letter with no further action has been provided by the RWQCB. Given that the historic presence of these USTs represents a potential threat of a material release that has not received regulatory closure to note if any controls would be required, a VEC could not be ruled out for the subject Site. Facilities of potential concern to the subject Site are discussed in Section 5.1.2 above.

5.3 Additional Environmental Record Sources

Northgate contacted local regulatory agencies for information regarding the use or storage of hazardous materials at the Site, and reviewed files at any agency maintaining a file for the subject Site. The following agencies were contacted for information regarding the use or storage of hazardous materials at the Site:

- Department of Toxic Substances Control (DTSC) EnviroStor Website;
- State Water Resources Control Board (SWRCB) GeoTracker Website;
- California Environmental Protection Agency (CalEPA) Website;
- Regional Water Quality Control Board – Los Angeles Region (LA RWRCB);

- Los Angeles County Fire Department (LACFD);
- Monterey Park Fire Department (MPFD);
- Los Angeles County, Department of Public Works (LACDPW);
- City of Monterey Park (CMP);
- Los Angeles County, Department of Public Health (LACDPH);
- South Coast Air Quality Management District (SCAQMD); and
- Oil and Gas Wells.

The results of our review are described in the following sections.

5.3.1 Department of Toxic Substances Control EnviroStor Website

The Site is not listed on the DTSC EnviroStor website, and thus, there are no files related to the property.

5.3.2 State Water Resources Control Board GeoTracker Website

The Site is listed on the SWRCB GeoTracker website as an inactive LUST cleanup site as of February 11, 2022. A copy of a December 7, 2018, UST soil sampling and closure report in addition to a letter from the LACDPW referring the case to the SWRCB was available on the GeoTracker website. A summary of both documents is provided in Section 5.7 below. No further information was available.

5.3.3 California Environmental Protection Agency Website

The Site is listed on the CalEPA website as a LUST Cleanup Site as of April 27, 2020, for unauthorized release of petroleum hydrocarbons, surrogates or byproducts from a LUST, referencing the source as GeoTracker (section 5.3.2 above). No other information was provided that was different from GeoTracker.

5.3.4 Regional Water Quality Control Board – Los Angeles Region

Northgate submitted a file review request to the LA RWQCB. The LA RWQCB indicated that all available files were uploaded to the GeoTracker website and referred the request to the SWRCB's GeoTracker website (refer to Section 5.3.2 above).

5.3.5 Los Angeles County Fire Department

The LACFD maintains Certified Unified Program Agency (CUPA) database lists online with property addresses identified as active or inactive facilities, as site mitigation facilities, and California Accidental Release Prevention Program (CalARP) facilities. The Site was listed on

the CUPA database as an inactive facility maintained by the LACFD. No further information was available.

Northgate additionally submitted a file review request to the LACFD. The LACFD further responded that various state and federal regulations prevents certain information from being released to the public (i.e., trade secret information HSC 25512[c] & [d], and Hazardous Material Locations and Site Maps – CA Health & Safety Code [HSC] 25509[b]), and as a result, Northgate received one redacted file. A routine inspection file dated July 1, 2015, was received from the LACFD for Bank of the West with a comment that no significant violations were observed on-Site at the time of the inspection, that Bank of the West had moved out the of location as of June 30, 2015, that the building was vacant, and that the former tenant's Hazardous Materials and Hazardous Waste Program status will be changed to inactive as of June 30, 2015. No further information was available.

5.3.6 Monterey Park City Fire Department

Northgate submitted a file review request to the MPFD, who indicated that they do not maintain their own records and referred the request to the City Clerk for all city fire records requests and inquiries (Refer to Section 5.3.8 below).

5.3.7 Los Angeles County Department of Public Works

Northgate reviewed an online file review system maintained by the LACDPW for industrial waste, USTs, and stormwater discharge permits. The subject Site was identified on the online system with numerous files related to the monitoring, inspection, removal, and closure of the former USTs. A summary of the pertinent documents and reports maintained by the LACDPW is provided in Section 5.7 below.

Northgate additionally submitted a file review request to the LACDPW. The LADPW provided letters of receipt related to a 2018 soil sampling report and closure application and indicating the request for closure transferred from the oversight of the LACDPW to the RWQCB on April 27, 2020. A more detailed summary of these documents is provided in Section 5.7 below.

5.3.8 City of Monterey Park

The CMP maintains an online Citizen Access database for records from their Building, Planning, Engineering and Fire Departments. Building Department (Dept) had records related to the Site for an expired permit in 2007 to replace diesel lines for a generator, an expired permit in 2019 related to electrical wiring for sump sensors, and a notice of violation on November 1, 2021, related to a plan check for replacing a generator. Planning Dept had one record related to an applied conditional permit for hospital use for "OneLegacy," which expired in 2019. The

Engineering Dept had records for the Site related to a crane service rental in 2019. The City's Fire Dept had records from BRE CA Office Owner LLC for an issued industrial waste permit, expiring in 2018. No other information was available from the Fire Dept's online database related to this permit.

Northgate additionally submitted a file review request to the CMP. The CMP referred the request to the online file review system maintained by the LADPW (refer to Section 5.3.7 above).

5.3.9 Los Angeles County Department of Public Health

Northgate submitted a file review request to the LACDPH, who maintains records related to septic tanks, water wells, landfills, residential lead inspection and other public health-related investigations. The LACDPH responded they did not have any records related to the Site.

5.3.10 South Coast Air Quality Management District

Northgate reviewed SCAQMD's online Facility Information Detail database for any files available for the Site. The database contains a listing for the Site identified as Equity Office for an inactive permit for the operation of a diesel powered electrical generator. Only minor violations were reported that included providing boiler tune up records and operation logs for permitted generators and submitting a change of ownership form for refrigerant registration in 2016, which were returned to compliance by the follow-up inspection in 2017.

The Site was also listed as Bank of the West for an inactive permits to operate a diesel powered electrical generator, a storage tank with fuel oil, and a natural gas char-broiler (likely associated with the former cafeteria and kitchen operations) in addition to listings associated with Rule 1415 that is associated with the reduction of refrigerant emission from stationary refrigeration and air conditioning systems. Only one minor violation was reported in 2008 for the submittal of Rule 1415 registration, which was returned to compliance by the follow-up inspection later in 2008.

The Site was identified as Lloyds Bank Operating Center as an inactive facility with a permit to operate a boiler in 1982. The Site was also identified as Sanwa Bank with only one administrative violation in 1989 related to a violation in their employee Trip Reduction Plan related to emissions reductions. The case was resolved later that year.

5.3.11 Oil and Gas Wells

According to the EDR GeoCheck® - Physical Setting Source Addendum located in the EDR Radius Report (Appendix B), there are 57 oil and gas wells located within 1-mile of the Site. As shown on Figure 2, a plugged dry hole is mapped in the southwestern corner of the landscaped

grass area adjacent to the west of the commercial office building in the central portion of the Site. Information available on the California Division of Oil, Gas, and Geothermal Resources (CalGEM) website indicates that there is one plugged dry hole and no oil or wells located on the Site. Information available from CalGEM indicates that this well was drilled in July 1967 to a total depth of 7,920 feet bgs and was abandoned shortly after in late July 1967. No oil or gas were reported to have been generated at this location. The plugged dry hole represents a potential business environmental risk for the Site.

According to the EDR GeoCheck® - Physical Setting Source Addendum located in the EDR Radius Report (Appendix B), the nearest oil and gas wells are located nearly one-quarter of a mile to the south (downgradient) of the Site. Information available on the CalGEM website indicates that there is one oil and gas well located approximately one-quarter of a mile south (downgradient) of the Site. Several pugged dry holes are mapped to the southeast, south, and southwest of the Site. The Montebello oil field is located approximately 1,950-feet to the southeast (cross- to downgradient) of the Site. Thus, there are no off-Site wells that appear to represent an environmental concern to the Site based on their relative locations and/or distances.

5.4 Other Environmental Issues

5.4.1 Floodplain Maps

Northgate viewed an online version of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for the City of Monterey Park, Panel 1665F. According to the FIRM, the Site is located in Zone X – areas of minima flood hazard determined to be outside of 0.2% the annual chance flood area (FEMA, 2008). The Site does not lie within the 100- or 500-year flood zones.

5.4.2 Radon

The California Department of Health Services' (DHS') online list of indoor radon levels indicates that radon concentrations from all five indoor air samples collected in zip code area 91755 were all less than 4.0 pico-curies per liter (pCi/L) (DHS, 2010). According to the EDR Radius Report (Appendix B), the federal Environmental Protection Agency (EPA) radon zone for Los Angeles County is Zone 2 (indoor average level greater than or equal to 2 pCi/L but less than or equal to 4 pCi/L).

The State of California Division of Drinking Water and Environmental Management maintains a database of radon test results indicating that out of 63 samples collected in Los Angeles County in California, in the living area-first floor, 98% were below 4 pCi/L and 2% were between 4 and

20 pCi/L. The DHS and the EPA recommend that some form of mitigation be conducted for houses with indoor radon concentrations of 4 pCi/L or greater.

These results indicate that radon gas does not appear to constitute a significant environmental concern at the Site.

5.5 Land Use History

Information on historical land use at the Sites and adjacent area was evaluated by reviewing historic aerial photographs, maps, and other documents. A summary of our investigation findings is presented below.

5.5.1 Aerial Photographs

Northgate reviewed historic aerial photographs of the Sites 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 obtained from EDR (EDR, 2022d). Copies of the aerial photographs are provided in Appendix D. A summary of our aerial photograph review is presented below.

Year: 1928	**Scale:** 1" = 500'	**Source:** FAIR
Site Description: The Site is occupied by undeveloped land with a dirt road extending through the southern portion of the Site and a stream through the eastern portion of the Site.		
North:	Undeveloped vacant land with several streams.	
East:	Undeveloped vacant land followed by a road then additional undeveloped vacant land.	
South:	Undeveloped vacant land followed by a road then additional undeveloped vacant land and a stream.	
West:	Undeveloped vacant land with several streams.	

Year: 1938	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1928 photograph.		
North:	Appears similar to the 1928 photograph.	
East:	Appears similar to the 1928 photograph.	
South:	Appears similar to the 1928 photograph.	
West:	Appears similar to the 1928 photograph.	

Year: 1948	**Scale:** 1" = 500'	**Source:** USGS
Site Description: The Site appears similar to the 1938 photograph.		
North:	Appears similar to the 1938 photograph.	
East:	Appears similar to the 1938 photograph.	
South:	Appears similar to the 1938 photograph, except that a substation is now present farther south of the Sit beyond a road in the location of present day Portrero Grande Drive.	
West:	Appears similar to the 1938 photograph.	

Year: 1952	**Scale:** 1" = 500'	**Source:** USGS
Site Description: The Site appears similar to the 1948 photograph.		
North:	Appears similar to the 1948 photograph, except that limited residential development is now shown to the northwest of the Site.	
East:	Appears similar to the 1948 photograph.	
South:	Appears similar to the 1948 photograph, except a portion of the vacant and adjacent to the south of the Site appears to be a gravel pit or similar operation.	
West:	Residential development with limited vacant land to the southwest of the Site.	

Year: 1964	**Scale:** 1" = 500'	**Source:** USGS
Site Description: The Site appears similar to the 1952 photograph, except that a small area in the southeastern portion of the Site is now shown as vacant, graded land.		
North:	A water tank is located north of the central portion of the Site followed by a park. Limited vacant land is present adjacent to the north of the Site followed by residential development. A water reservoir is located farther north of the Site.	
East:	Vacant undeveloped land followed by apparent agricultural land then Portrero Grande Drive and additional vacant, undeveloped land.	
South:	Undeveloped land that appears to be a gravel pit or similar operation followed by Portrero Grande Drive then a substation and additional undeveloped vacant land.	
West:	Appears similar to the 1952 photograph, except that residential development has expanded farther west of the Site.	

Year: 1970	**Scale:** 1" = 500'	**Source:** EDR
Site Description: The Site appears similar to the 1964 photograph, except that the small area in the southeastern portion of the Site appears to be occupied by agricultural land.		
North:	Appears similar to the 1964 photograph.	
East:	Appears similar to the 1964 photograph, except that apparent agricultural land is now shown farther to the east of the Site.	
South:	Appears similar to the 1964 photograph, except that operations at the gravel pit or similar operation appear to have expanded and the 60 Freeway is now shown farther south of the Site.	
West:	Appears similar to the 1964 photograph.	

Year: 1977	**Scale:** 1" = 500'	**Source:** EDR
Site Description: The Site appears similar to the 1970 photograph, except that an area in the central portion of the Site and the western portion of the Site are shown as vacant, graded land.		
North:	Appears similar to the 1970 photograph.	
East:	Appears similar to the 1970 photograph.	
South:	Undeveloped land that appears to have been filled with no further gravel pit or similar operations followed by limited commercial development farther to the southwest of the Site.	
West:	Appears similar to the 1970 photograph.	

Year: 1983	**Scale:** 1" = 500'	**Source:** EDR
Site Description: The Site is fully developed with a large commercial office building in the south-central portion of the Site. A large grass area is located adjacent to the west of the building in the south-central portion of the Site. The reminder of the Site is occupied by paved surface parking areas and landscape.		
North:	Appears similar to the 1977 photograph.	
East:	Appears similar to the 1977 photograph.	
South:	Saturn Street followed by undeveloped, graded land then Portrero Grande Drive and a substation with apparent agricultural land. Additional commercial development is now present including adjacent to the southwest of the Site.	
West:	Appears similar to the 1977 photograph.	

Year: 1989	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1983 photograph.		
North:	Appears similar to the 1983 photograph.	
East:	Appears similar to the 1983 photograph.	
South:	Saturn Street followed by commercial development then Portrero Grande Drive then a substation and undeveloped land that appears to be occupied by agricultural land.	
West:	Appears similar to the 1983 photograph.	

Year: 1994	**Scale:** 1" = 500'	**Source:** USGS/DOQQ
Site Description: The Site appears similar to the 1989 photograph, except that a smaller structure is now located in the parking lot to the north of the commercial structure.		
North:	Appears similar to the 1989 photograph.	
East:	Appears similar to the 1989 photograph.	
South:	Appears similar to the 1989 photograph.	
West:	Appears similar to the 1989 photograph.	

Year: 2002	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1994 photograph.		
North:	Appears similar to the 1994 photograph, except that two aboveground water tanks are now shown adjacent to the north of the Site.	
East:	Appears similar to the 1994 photograph.	
South:	Appears similar to the 1994 photograph.	
West:	Appears similar to the 1994 photograph.	

Year: 2005	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2002 photograph.		
North:	Appears similar to the 2002 photograph.	
East:	Appears similar to the 2002 photograph.	
South:	Appears similar to the 2002 photograph.	
West:	Appears similar to the 2002 photograph.	

Year: 2009	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2005 photograph.		
North:	Appears similar to the 2005 photograph.	
East:	Appears similar to the 2005 photograph.	
South:	Appears similar to the 2005 photograph.	
West:	Appears similar to the 2005 photograph.	

Year: 2012	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2009 photograph.		
North:	Appears similar to the 2009 photograph.	
East:	Appears similar to the 2009 photograph.	
South:	Appears similar to the 2009 photograph, except that a portion of the former apparent agricultural land adjacent to the substation land farther south of the Site across Portrero Grande Drive is shown as a paved area.	
West:	Appears similar to the 2009 photograph.	

Year: 2016	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2012 photograph.		
North:	Appears similar to the 2012 photograph.	
East:	Appears similar to the 2012 photograph.	
South:	Appears similar to the 2012 photograph.	
West:	Appears similar to the 2012 photograph.	

5.5.2 Sanborn Maps

Northgate requested Sanborn fire insurance maps for the Site from EDR. However, maps covering the Site and vicinity were not found. A copy of the Sanborn Map Report is provided in Appendix E (EDR, 2022e).

5.5.3 Topographic Maps

Northgate reviewed historic topographic maps for the Site obtained from EDR for the years 1894, 1896, 1900, 1923/1924, 1926, 1953, 1966, 1972, 1981, 1991, 1994, 2012, 2015, and 2018. Copies of the topographic maps are provided in Appendix F (EDR, 2022f). Information from the topographic maps is summarized below.

Quadrangle: Los Angeles		**Scale:** 1:62,500	**Series:** 15 Minute
1894:	The Site is shown as undeveloped land. Several roads are mapped farther to the north, south, and west of the Site. Topography in the Site vicinity varies and generally slopes downward to the south.		
Quadrangle: Pasadena		**Scale:** 1:62,500	**Series:** 15 Minute
1896:	The Site and vicinity appear similar to the 1894 map.		
Quadrangle: Pasadena/Los Angeles		**Scale:** 1:62,500	**Series:** 15 Minute
1900:	The Site and vicinity appear similar to the 1896 map.		
Quadrangle: El Monte/Alhambra		**Scale:** 1:24,000	**Series:** 7.5 Minute
1923/1924:	The Site and vicinity are shown as vacant land on sloping terrain. Stream is mapped through the eastern portion of the Site. Power lines are mapped to the north, northeast, and southeast of the Site. A grid of streets identified as the City of Monterey Park is mapped farther north of the Site. An oil well field is mapped farther southeast of the Site.		
1926:	The Site and vicinity appear similar to the 1923/1924 map, except that a grid of streets in an area identified as the City of Montebello is now mapped farther south and southeast of the Site.		
Quadrangle: Los Angeles/El Monte		**Scale:** 1:24,000	**Series:** 7.5 Minute
1953:	The Site appears similar to the 1926 map and is still shown as vacant land on a sloping terrain. The Site vicinity has been further developed. Vacant land on sloping terrain is mapped adjacent to the north, east, and south of the Site. A quarry is mapped adjacent to the south of the Site followed by a major road identified as Potrero Boulevard then vacant land, a stream, and a substation. Power lines are still mapped to the north, northeast, and southeast of the Site. Residential development is now present to the west of the Site and has expanded farther to the north and south of the Site.		
1966:	The Site is mapped as vacant land with a stream extending through the eastern portion of the Site and along the southern perimeter of the Site. A water tank and power lines are mapped to the north of the Site followed by residential development and a reservoir. Vacant land followed by power lines then additional vacant land and residential development are located to the east of the Site. A gravel pit followed by Potrero Boulevard then a substation, power lines, and a gravel pit are located to the southeast and south of the Site followed by the 60 Freeway then an oil well field followed by residential development farther south of the Site. Vacant land and residential development are mapped to the west of the Site.		
1972:	The Site and vicinity appear similar to the 1966 map, except that residential development has expanded farther east and south of the Site and limited commercial development is now mapped to the southwest of the Site.		

1981:	The Site and vicinity appear similar to the 1972 map, except that commercial development has expanded adjacent to the west of the Site, the gravel pit operations have expanded to the southeast and south of the Site, and residential development has expanded farther to the east and south of the Site.
Quadrangle: El Monte	**Scale:** 1:24,000 **Series:** 7.5 Minute
1991:	The Site and vicinity appear similar to the 1981 map.
Quadrangle: El Monte/Los Angeles	**Scale:** 1:24,000 **Series:** 7.5 Minute
1994:	The Site and vicinity appear similar to the 1991 map.
2012:	The Site and vicinity are mapped as urban development. The Gorsey Reservoir is located to the north of the Site followed by the City of Monterey Park. The 60 Freeway is mapped to the south of the Site followed by the City of Montebello and the Montebello Hills.
2015:	The Site and vicinity appear similar to the 2012 map.
2018:	The Site and vicinity appear similar to the 2015 map.

5.5.4 City Directories

Northgate reviewed a summary of local city directory listings for the Site and nearby vicinity available at approximate five year intervals from 1920 to 2014 obtained from EDR. A copy of the EDR city directory search is provided in Appendix G (EDR, 2022g).

The Site is identified at 1977 Saturn Street as a commercial office building between 1994 and 2014. It has been occupied by an office and data center for a bank since 1980 but the City Directory listings only show the office and data center for the bank dating back to 1994. Due to several acquisitions, it has been identified under multiple names. The listings identified in the City Directory search include Sanwa Bank in 1994, an unknown occupant in 1999, and Bank of the West between 2004 and 2014. It was additionally identified as Marriott International, Inc between 2004 and 2009 and as SODEXHO Corp. in 2009.

Listings adjacent to the north has historically included private residences since at least 1960 along Taylor Drive. No listings were identified adjacent to the east along Orange Drive; however, private residences were listed farther to the northeast of the Site along Taylor Drive since at least 1960. A bank and data center, primarily identified as Union Bank, was listed adjacent to the south of the Site at 1980 Saturn Street between at least 1994 and 2014. A commercial building located adjacent to the west of the Site at 2001 Saturn Street was identified as an unknown occupant in 2004 and a construction company in 2006. Listings farther west of the Site along Saturn Street and Red Plum Circle have included Ross Name Plate Company, a potential industrial operation located approximately 500 feet west of the Site, between at least 1985 and 2014.

Listings in the general vicinity of the Site consist primarily of residential and commercial development. Listings in the Site vicinity evaluated to determine if they are of potential environmental concern to the Site are described in detail in Section 5.1.2.

5.6 Interviews

5.6.1 Owner Interview

Mr. Rodel Salvio, a representative from EQ Office for the Site owner, was interviewed during the Site reconnaissance performed on February 10, 2022. Relevant information related to the Site and its current operations is incorporated into the Site reconnaissance section below. Mr. Salvio indicated that he has been associated with the Site for approximately seven years. He was not aware of any specific chemicals, spills, or environmental cleanups at the Site.

5.6.2 Key Site Manager Interview

The Site owner/manager, Mr. Robert Del Hierro, was interviewed during the Site reconnaissance performed on February 10, 2022. A summary of the responses provided in this interview are resented in Section 5.6.1 above.

5.6.3 Site Occupant Interview

The Site is presently vacant and as a result, no Site occupant was interviewed as part of this Phase I ESA. The Site owner/manager was interviewed as presented in Section 5.6.1 above.

5.7 Previous Reports

Northgate reviewed previous reports for the Site provided by EQ Office or obtained from the agency file reviews as summarized below. Copies of pertinent documents and reports for the Site are included in Appendix H.

Phase I Environment Site Assessment, Bank of the West, 1977 Saturn Street, Monterey Park, California prepared by Bureau Veritas North America, Inc. dated June 18, 2007 (BVNAI, 2007a).

Bureau Veritas North America, Inc. (BVNAI) prepared a Phase I ESA for the Site in 2007 that indicated that the Site was developed with a four-story 205,628-square foot office building with associated asphalt-paved parking. The Site was occupied by s bank data center that included a cafeteria with kitchen on the fourth floor. The Site was reported to have been developed in 1980 and occupied by Bank of the West since the time of completion. Due to several acquisitions, the report indicated that the bank has been identified under several different business names that

have included Lloyd's Bank from 1980 to 1986, Sanwa Bank from 1986 to 2001, United California Bank for nine months, followed by the Bank of the West. The Phase I ESA indicated that the Site was undeveloped prior to construction of the bank building in 1980. A utility building was constructed to the north of the main building in 1990.

The BVNAI Phase I ESA indicated that an industrial waste disposal permit was issued to the Site on August 18, 1988, for the operation of a 1,500-gallon grease interceptor that appears to have been associated with the former kitchen. This area also included a floor drain that was closed in 1998 by the LADPW and a trench and sump pump were reportedly installed in 1993. BVNAI also noted the presence of potential polychlorinated biphenyl (PCB)-containing equipment at the Site that included two concrete-pad mounted transformers owned and operated by Southern California Edison and elevator equipment that is owned and operated by the Site.

BVNAI concluded that the following REC was identified associated with the Site:

- Three USTs, two 10,000-gallon and one 2,000-gallon diesel tanks were present at the Site. Two 10,000-gallon single-walled fiberglass tanks containing diesel fuel were installed in 1980 and a 2,000-gallon steel double-walled fiberglass coating tank containing diesel was installed in 1991. The old piping was reportedly removed in September 2006 and replaced with double walled piping. At the time of piping removal, soil samples were collected that reported low concentrations of diesel at 12 and 15 mg/kg. No further investigation was recommended. A Veeder Root Monitoring system was reported to be in place to detect and log leaks in the tanks and pipes and monthly inspections were reported to be conducted. It was noted that the 2,000-gallon UST and double-walled product lines passed a Secondary Containment Test conducted in October 2006 and the 10,000-gallon USTs passed their last tightness test in February 1997. BVNAI recommended soil sampling in the vicinity of the USTs.

Additionally, BVNAI indicated that a survey for ACM was conducted at the Site in October 1989 that consisted of the visual inspection of accessible areas, construction material sampling, and air monitoring. ACM were reported to be detected in samples of construction materials that included pipe run insulation (east roof hot water heater room), floor tile mastic (print shop), and roofing mastic. An operations and Maintenance Program was noted to be in place for the Site. BVNAI concluded that this was not a REC for the Site.

Limited Subsurface Investigation Report for Two 10,000-Gallon Diesel USTs at 1977 Saturn Street, Monterey Park, California prepared by BVNAI dated June 26, 2007 (BVNAI, 2007b).

BVNAI conducted a limited subsurface investigation in the vicinity of two 10,000-gallon diesel USTs at the Site to assess potential diesel impacted soil in the area of the tanks. The investigation included conducting a geophysical survey, advancing five soil borings to 18 feet bgs, and

collecting soil samples. Due to refusal encountered at 8 feet bgs at one location, only four borings were advanced at the corners of the UST area. Diesel staining was observed at a depth of approximately 14 feet bgs in one boring. The report indicated that according to the Chief Engineer, Mr. Joe Robelo, approximately five-gallons of diesel were released in the area of this boring in 1991 during a piping re-modification project. Mr. Robelo indicated that the contractor cleaned up the release and no further information was available.

Soil samples were collected from each of the four boring at the total depth of the boring, approximately 17.5 to 18 feet bgs and an additional sample was collected at a depth of 14.5 to 15 feet bgs from boring BVSB-1 where diesel staining was observed. TPH-d were only reported in the two samples collected at depths of 14.5 to 15 feet bgs and 17.5 to 18 feet bgs in boring BVSB-1 at concentrations of 658 and 238 mg/kg, respectively. A map was not provided to indicate the location of the borings relative to the USTs or the Site.

Phase I Environment Site Assessment Report, 1977 Saturn Street, APN 5265-026-054, Monterey Park, Los Angeles County, California prepared by Leighton Consulting, Inc. dated December 10, 2014 (LCI, 2014).

Leighton Consulting, Inc. (LCI) prepared a Phase I ESA for the Site in 2014 that indicated that the Site was vacant, undeveloped land prior to development of the present office building in 1980. At the time of the report, the Site was occupied by a banking operations and office center. A utility building was constructed in 1991 to the north of the office building that housed a generator room with three 55-gallon day-tank aboveground storage tanks and a 2,000-gallon diesel UST. Two additional 10,000-gallon diesel USTs were also reportedly operated at the Site at the time. The USTs were reported to be used for the emergency generator system with no dispensing activities reported. Hazardous materials observed during the reconnaissance as part of this Phase I ESA included up to 55-gallon drum-sized containers that included compressed oil, oil pit sludge and water, waste diesel/water mix, and chemicals for the cooling equipment located on the roof. The hazardous materials were stored in the generator room, “Level A” storage room, and on the roof. Additionally, a former print and photo center were reportedly operated within the office building, a commercial grease interceptor was installed at the facility that appeared to be associated with the kitchen area, and an industrial wastewater discharge permit to the sewer was closed for the Site in December of 1998.

A subsurface environmental assessment was conducted in 2014 by the LACDPW to assess potential releases associated with the USTs. The assessment did not identify any significant soil staining and no evidence suggesting a fuel release from the USTs was reported. The LACDPW concluded that the Site was not impacted in the areas assessed and no further assessment was recommended.

One plugged and abandoned oil well (API 03720192) was identified by LCI to potentially be located on the subject Site or possibly offsite to the south as the precise location could not be determined. This well was listed to have been drilled in July 1967 to a total depth of 7,920 feet bgs and was abandoned shortly after in late July 1967. Further research conducted by Northgate as part of the current Phase I ESA indicates that this is a plugged and abandoned dry hole that did not produce oil or gas that was located on the subject Site.

LCI did not identify any RECs associated with the subject Site; however, their report identified the following environmental conditions of potential concern and provided associated recommendations.

- One plugged and abandoned oil well may be located in the southwestern portion of the Site. The well was abandoned in 1967 and never produced petroleum hydrocarbons. LCI recommended direct field investigation to assess the location of the former oil well prior to new construction in this portion of the Site. If an oil well is identified, LCI noted that the Division of Oil, Gas, and Geothermal Resources (presently identified as CalGEM) should be contacted to evaluate requirements for investigation and possible re-abandonment to current regulatory standards before any improvements commence at the Site.
- Three diesel USTs are present at the Site for the operation of a backup generator system. A fuel release was not identified during the Phase I ESA conducted by LCI or during a recent subsurface investigation conducted by the LACDPW. LCI indicated that recommendations to rectify code violations were provided under a separate cover. LCI recommended that if the USTs are not going to be used for proposed future operations that they be properly removed according to applicable regulatory guidelines with observation for evidence of releases beneath the tanks and piping.
- A small onsite print shop and photo room with an industrial waste permit to discharge the waste to the sewer were identified as part of the assessment. No inappropriate discharge or leaks were identified as part of the assessment; however, LCI recommended that observations for evidence of releases beneath the sewer lines be conducted if the building and associated utilities are demolished.
- ACMs, LBP, and universal waste were reported to be located within the onsite structures. The locations, estimated quantities, and recommendations for their handling if disturbed during renovation or demolition activities are noted to be reported under a separate cover that was not made available to Northgate.

Observation of Limited Subsurface Investigation Activities, 1977 Saturn, Monterey Park, California prepared by URS dated December 11, 2014 (URS, 2014).

URS prepared a letter summary of their observations of a limited subsurface investigation conducted by the LACDPW, which appears to be the investigation referenced in the LCI Phase I ESA above, dated December 11, 2014. Field activities were conducted on October 4 and 5, 2014 and included advancing three borings to 40 feet bgs. Four borings were originally proposed to a total depth of 50 feet bgs; however, pea gravel was encountered in one boring (B-3) and the LACDPW decided not to continue to advance this boring so as not to compromise the integrity of the overlying surface parking lot. The total depth was not extended to the originally proposed 50 feet bgs as no field evidence of impacts were observed through 40 feet bgs.

URS collected split samples concurrent with the LACDPW investigation to evaluate the analytical laboratory. Soil samples were collected at depths of 15 and 25 feet bgs from two borings (B-1 and B-2) and at depths of 10 and 20 feet bgs from the third boring (B-4). The soil samples were selected based on the judgement of the field geologist and were generally determined to be below the depths of the tank bottoms. Soil samples were analyzed for TPH-d and VOCs. It was noted that the LACDPW collected eight soil samples from borings B-1 and B-4 and seven soil samples from boring B-2. No VOCs or TPH-d were reported above their laboratory method reporting limits in any of the six soil samples collected for analysis by URS.

A copy of the laboratory analytical report for the samples collected by the LACDPW was provided as an appendix to this summary letter. A review of this analytical report indicated that no VOCs or TPH-d were reported above the laboratory method reporting limits in any of the 23 soil samples collected for analysis by LACDPW.

Soil Sampling Results Related to UST System Removals, 1977 Saturn Street, Monterey Park, California 91755 prepared by ALTA EM, Inc. dated December 7, 2018 (ALTA, 2018).

ALTA EM, Inc. (ALTA) prepared report summarizing the results of tank system removals and associated soil sampling activities at the Site in 2018. The three USTs were confirmed to include two 10,000-gallon diesel USTs located adjacent to one another and a 2,000-gallon diesel UST located approximately 140 feet east of the larger tanks. All three tanks were used to supply emergency generators and all were reported to be buried 3 to 4 feet bgs.

Soil samples were collected along the fuel product lines at depths ranging from 3.5 to 5 feet bgs and at least 2 feet below the removed lines. The tank pit containing the two larger USTs contained groundwater at approximately 11.5 feet bgs and a larger concrete pad beneath the tanks at approximately 13.5 feet bgs. As a result, soil sampling could not be performed and representative samples were collected of the groundwater at this location. The tank pit for the

smaller UST also contained a concrete pad at the bottom of the tank pit at approximately 11.5 feet bgs, but no groundwater was present. Soil samples could not be collected due to the presence of the concrete pad so sidewall samples were collected instead at this location just above the concrete pad. With the exception of one sample location beneath the former piping at a depth of approximately 4 feet bgs where a slight hydrocarbon odor was observed, there were no other field indications of a release including odor or discoloration of the soil.

The soil and groundwater samples were analyzed for TPH-d, benzene, toluene, ethylbenzene, and xylenes (BTEX), and fuel oxygenates. It was noted that two minor detections of TPH-d were reported in a sample collected at 4 feet bgs below the piping system (15.2 mg/kg) and at 10 feet bgs in the sidewall of the smaller tank pit (10.5 mg/kg) were reported. BTEX, and fuel oxygenates were not detected above their respective laboratory method reporting limits in any of the soil or groundwater samples and TPH-d was not detected above the laboratory method reporting limit in either of the groundwater samples.

No evidence indicating a major fuel impact was reported. The three USTs were removed from the Site. ALTA concluded that no further action is recommended and requested a no further action letter was requested for the Site. A copy of this closure report and request is included in Appendix H.

Hazardous Substances Underground Storage Closure/Site Assessment Report, Closure Application No 905166, 1977 Saturn Street, Monterey Park (3M) prepared by LACDPW dated April 27, 2020 (LACDPW, 2020).

The LADCPW issued a letter to the RWQCB on April 27, 2020, that indicated their review of the soil sampling report dated December 7, 2018, and referring the matter to the RWQCB for further action. The case is currently pending their review and response. A copy of this referral letter is included in Appendix H.

6.0 SITE RECONNAISSANCE

Current Site conditions were observed during a reconnaissance of the Site and near vicinity by Mr. Ricardo Munoz of Northgate on February 10, 2022. Mr. Munoz was escorted by Mr. Rodel Salvio and Mr. Hierro of EQ Office. Site photographs from the reconnaissance are attached at the end of this report. A Site Plan is shown on Figure 2.

6.1 Methodology and Limiting Conditions

The Site reconnaissance was performed by traversing the Site on foot and the general Site vicinity by car. At the time of the Site reconnaissance the weather was clear and there were no limiting conditions.

6.2 General Site and Vicinity Conditions

6.2.1 Site

The Site is occupied by a two-story, split level commercial office building in the central portion of the Site with a small utility building located to the north of the office building. The remainder of the Site is occupied by associated paved parking and landscape. The commercial office building totals approximately 205,628 square feet and is currently entirely vacant. In general, the commercial office building includes offices, hallways, janitorial rooms, electrical rooms, restrooms, and an elevator. One elevator with an associated elevator maintenance room located adjacent to the elevator with pulley equipment is located within the commercial office building. No chemicals or hazardous materials or wastes were observed to be generated, stored, or used in any portion of the commercial office building.

Three chiller towers are located on the roof of the commercial office building. The chiller towers use water treatment chemicals made by Chem Aqua including Formula 42171 (5 gallons), Formula 40215 (10 gallons), Formula 51999 (10 gallons), and Formula 31155 (10 gallons). These chemicals are stored adjacent to the chiller towers in secondary containment. No staining or evidence of a release was noted.

A smaller utility building is located to the north of the commercial office building. It is occupied by a diesel powered emergency backup generator. The building is also used for general storage. No staining or evidence of a release was observed at the generator or in this area.

A large, landscaped grass area is present adjacent to the west of the commercial office building. No evidence of the plugged dry hole was observed in this area. The remainder of the Site is occupied by asphalt paved parking areas. De minimis staining was observed throughout the parking areas.

6.2.2 Site Vicinity

The Site is located in an area of mixed residential and commercial land use. A nursery is located north of the eastern portion of the Site, two large aboveground water storage tanks are located north of the central portion of the Site, and residential development is located north of the western portion of the Site. A recreational park and residential development are located farther north of the Site followed by a reservoir located approximately 0.42-miles north of the Site. To the east, the Site is bordered by East Orange Avenue followed by vacant land and residential development. Saturn Street followed by a commercial development then a substation operated by Southern California Edison and the California Highway 60 is located south of the Site. A closed landfill, the Operating Industries, Inc. Landfill Superfund site, is located approximately 0.38-miles southeast and south of the Site. The Site is bordered to the west by commercial development followed by residential development.

7.0 PHASE I ESA CONCLUSIONS AND RECOMMENDATIONS

This report presents the results of a Phase I ESA performed at the property located at 1977 Saturn Street in Monterey Park, California. The purpose of the investigation is to identify the potential presence of RECs at the Site.

A REC refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following REC was identified during the course of this assessment:

- Two 10,000-gallon and one 2,000-gallon diesel UST were historically present at the Site to supply an emergency generator system. Limited subsurface investigations were conducted in the vicinity of the USTs in 2007 and 2014. Low concentrations of TPH-d that were all below regulatory screening criteria were reported in 2007 and no VOCs or TPH-d were reported above laboratory reporting limits in the 2014 investigation. The tanks were removed from the Site in 2018 with soil and water samples collected at the time of removal from within the excavation cavity and below the former piping. Samples collected at the time of tank removal did not report concentrations of TPH-d above the laboratory method reporting limits within the tank excavation cavity and only low concentration of TPH-d were reported below regulatory screening criteria in samples beneath the former piping. However, it was noted that no soil sampling was conducted beneath the concrete pads below the UST. The Site is currently listed on the RWQCB GeoTracker website as an inactive LUST cleanup site as of February 11, 2022, related to these tanks pending review by the RWQCB. A closure report documenting the above referenced soil sampling dated December 7, 2018, was submitted to and received by the LACDPW in January 2019. The case was referred to the RWQCB on April 27, 2020, and is currently pending their review and response. In the absence of a closure/NFA) letter from the RWQCB and during this time of review, if redevelopment work is planned in this area, Northgate recommends contacting the RWQCB to ensure work is in compliance with their requirements. Based on the data provided in the reports, it is Northgate's opinion that there is a reasonable expectation that the RWQCB will grant a non-case determination for the Site. Typically, non-case determinations indicate that the RWQCB will not open a case and will not require any further action, but will indicate that residual concentrations left in place may require management if subsurface activities are implemented, or evaluation if the land use changes from commercial to residential.

A Controlled REC (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Northgate did not identify any CRECs during the course of this assessment.

A Historical REC (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Northgate did not identify any HRECs during the course of this assessment.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/20/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NEW CURE, INC. Cerclis ID:: 902673 EPA Id: CAT080012024	***2550 GREENWOOD AVENU***	***SSE 1/8 - 1/4 (0.159 mi.)***	***0***	***45***

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/20/2021 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NEW CURE, INC. EPA ID:: CAT080012024	***2550 GREENWOOD AVENU***	***SSE 1/8 - 1/4 (0.159 mi.)***	***0***	***45***

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 33 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 05/05/2021 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

Facility Id: 20440				

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/18/2021 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 10/12/2021 has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Permitting Agency:	Los Angeles County Fire Department
CERSID:	10268983
Latitude:	34.04046
Longitude:	-118.11416

A7 **BANK OF THE WEST** **HAZNET** **S113016282**
Target **1977 SATURN ST** **HWTS** **N/A**
Property **MONTEREY PARK, CA 91755**

Site 7 of 10 in cluster A

Actual: **382 ft.**

HAZNET:

Name:	BANK OF THE WEST
Address:	1977 SATURN ST
Address 2:	Not reported
City,State,Zip:	MONTEREY PARK, CA 917557418
Contact:	TRINIDAD STELLA
Telephone:	3237273017
Mailing Name:	Not reported
Mailing Address:	1977 SATURN ST
Year:	2015
Gepaid:	CAD982463895
TSD EPA ID:	CAD982444481
CA Waste Code:	343 - Unspecified organic liquid mixture
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.748
Year:	2015
Gepaid:	CAD982463895
TSD EPA ID:	CAD008364432
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.198
Year:	2012
Gepaid:	CAD982463895
TSD EPA ID:	CAT000613893
CA Waste Code:	213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.22935
Year:	2012
Gepaid:	CAD982463895
TSD EPA ID:	NVT330010000
CA Waste Code:	222 - Oil/water separation sludge
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid

BANK OF THE WEST (Continued) **S113016282**

Regeneration, Organics Recovery Ect
Tons: 0.03

Year: 2010
Gepaid: CAD982463895
TSD EPA ID: CAD028409019
CA Waste Code: 241 - Tank bottom waste
Disposal Method: H135 - Discharge To Sewer/Potw Or Npdes(With Prior Storage--With Or Without Treatment)
Tons: 0.7506

Year: 2008
Gepaid: CAD982463895
TSD EPA ID: CAT080013352
CA Waste Code: 221 - Waste oil and mixed oil
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons: 0.209

Year: 2007
Gepaid: CAD982463895
TSD EPA ID: TXD077603371
CA Waste Code: 221 - Waste oil and mixed oil
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.08

Year: 2006
Gepaid: CAD982463895
TSD EPA ID: CAT080013352
CA Waste Code: 241 - Tank bottom waste
Disposal Method: H135 - Discharge To Sewer/Potw Or Npdes(With Prior Storage--With Or Without Treatment)
Tons: 0.417

Year: 2003
Gepaid: CAD982463895
TSD EPA ID: AZD049318009
CA Waste Code: 123 - Unspecified alkaline solution
Disposal Method: T03 - Treatment, Incineration
Tons: 0.125

Year: 2003
Gepaid: CAD982463895
TSD EPA ID: AZD049318009
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: T03 - Treatment, Incineration
Tons: 0.025

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

UNITED CA BANK (Continued) **1008152327**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NEW CURE, INC. (Continued) **1000353881**

Summary Details:

Conditions at proposal October 15, 1984): Operating Industries, Inc., operated a landfill on 190 acres in the City of Monterey Park, Los Angeles County, California. The 45-acre northern section was separated in the 1960s from the southern 145-acre section by the Pomona Freeway. EPA has evidence that the original landfill included at least a portion of both sections. From l948 to l983, solid and liquid wastes, some ha ardous, were disposed of at the site. Leachate generated by the landfill contains vinyl chloride, ben ene-type compounds, tetrachloroethylene, heavy metals, and other contaminants, according to testing by the Los Angeles County Sanitation District LACSD), the California Department of Health Services CDHS), and the company. In July l983, the South Coast Air Quality Management District SCAQMD) detected vinyl chloride above ambient standards in air at and around the landfill, which is adjacent to a large residential area. SCAQMD, CDHS,and the Los Angeles County Department of Health Services have taken enforcement actions against the facility. About 23,000 people use wells within 3 miles of the site as a source of drinking water. The company acquired Interim Status when it filed Part A of a permit application under Subtitle C of the Resource Conservation and Recovery Act RCRA). The company submitted a draft plan for closing the landfill under RCRA, but CDHS, in conjunction with other State agencies and EPA, determined that the plan had numerous deficiencies, most notably the failure to 1) provide financial assurance requirements for closure and 2) develop an adequate plan for monitoring ground water and for collecting and disposing of leachate. The company has not submitted complete and adequate closure and postclosure documents. Status February 1986): EPA collected gas samples in November 1984 from 16 subsurface probes in an adjacent housing development. Some samplesconfirmedthe presence of methane and vinyl chloride in subsurface soils. Interior home samples collected in November 1984 had low levels of methane and nondetectable levels of vinyl chloride. Elevated levels of methane and vinyl chloride werealso detected in a home adjacent to the landfill in October 1985. EPA installed six monitoring wells around the landfill in 1984-85. Quarterly samples collected since March 1985 contain organic chemicals and trace metals. In July 1985, EPA started planning for a comprehensive remedial investigation to determine the nature and extent of the problems associated with the landfill. When the investigation is complete, various alternatives to remedy the problems will be evaluated in a feasibility study. Interim measures are planned to stabili e and control the landfill, including slope stabili ation and upgrading of existing gas leachate collection systems. EPA trucked leachate to an off-site treatment facility from October 1985 to February 1986, when the State took over. Status June 10, 1986): This site is placed on the NPL because the potentially responsible party declined to initiate work, and CERCLA-funded remedial activities are underway.Thus, the site meets one of the requirements of EPA s policy for placing RCRA-related sites on the NPL.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	63025
Site Name:	ROSS NAME PLATE COMPANY
Violation Date:	06-06-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 07/18/2019. OBSERVATION: The used spray booth filters located in the spray booth room was observed being accumulated in waste container and a proper waste determination has not been made. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the used spray booth filter has been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future.

Violation Date: 04-07-2016
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Observed no training plan and training record for reviewing on site at time of inspection. Provide training plan with procedures and job specific title and training records on site.
Violation Division: Los Angeles County Fire Department

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of

UNION BANK (Continued) **S112995260**

flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Site Name:	UNION BANK
Violation Date:	02-06-2017
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 02/06/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. Observed the reporting of business plan was on 11/17/2016. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS). Observed operator has completed the business plan update and reporting on site at time of inspection.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS,

ALPHA PHOTONICS (Continued) **1004676637**

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Date: 11/30/1994
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 09/28/1990
Comments: The amended Gas Migration Control ROD at the site addresses the landfill gas (LFG) migration control and landfill cover. The major component of this amendment is the addition of landfill cover to the previously selected gas migration control remedy. The major components of the Gas Migration Control ROD include: 1) landfill cover designed to reduce surface gas emissions and odors, prevent oxygen intrusion into the refuse, prevent surface water infiltration, provide erosion control, and improve site aesthetics; perimeter LFG extraction wells with placement focused on minimizing off site LFG migration; LFG extraction wells on the top deck of the landfill with placement focused on maximizing source control of LFG; shallow and deep slope wells with placement focused on reducing surface emissions and controlling intermediate to deep subsurface migration at the perimeter; integrated above-grade LFG headers and condensate sumps; LFG monitoring wells at the site boundary; upgraded thermal destruction facility for landfill gas; and pumps in appropriate gas wells with above-grade collection sumps to dewater saturated zones. The amended gas control remedial action will be integrated with the two additional operable units, Site Control and Monitoring, and Leachate Management, now being implemented.

Quarterly Update:	Operating Industries, Inc. (OII) is an inactive Class II landfill surrounded by residential areas on the south and west borders. From 1948 to 1952, the OII site was operated as a municipal landfill by the

OPERATING INDUSTRIES, INC. LANDFILL (Continued) **S100460541**

City of Monterey Park. In January 1952, the site became a privately owned landfill under the ownership of OII. The site was permitted by the RWQCB in 1976, to receive various nonhazardous and hazardous liquid wastes, including lead compounds, chrome oxide, pigment sludge, refinery wastes, waste water from paint manufacturing, and caustic cleaning waste. It was not until 1984 that OII stopped accepting waste. The pathways of contamination are through inhalation of land fill gases and direct contact of leachate entering the ground water. Possible receptors are the residents near the facility and the potential impact of the contaminated groundwater on drinking water supplies. The Department of Toxic Substances Control took over the site when the owner and operator failed to continue with the site closure activities. In May 1986, the landfill was listed on the NPL and EPA became the lead agency. EPA initiated a remedial investigation to define the extent of environmental problems. A hydrogeologic investigation to study the groundwater was performed in September of 1989. In May of 1989, a Partial Consent Decree was entered in the Federal Court between EPA and over 100 PRPs. The PRPs agreed to undertake the site control and monitoring, and construct a leachate treatment system, as well as conducting several site improvements. Site work pursuant to the Consent Decree began in November 1989, when daily operation, including operation and maintenance/monitoring of the existing gas and leachate control system, and erosion and drainage control were assumed by the settling PRPs'.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	EPA, with State participation, is negotiating with the PRP's for PRP financing of the site RI/FS. For purposes of this document, DHS is assuming that final remediation activities will be jointly funded by EPA and DHS.
Site Description:	The site is an inactive Class II landfill bounded by Highway 60 on the north and residential areas of the City of Montebello on the south and west.
Hazardous Waste Desc:	The site was permitted by the RWQCB in 1976 to receive liquid wastes. Wastes include lead compounds, chrome oxide, pigment sludge, refinery slop oil, emulsion solids, leaded tank bottoms, waste water from paint manufacturing, and caustic cleaning waste.
Threat To Public Health & Env:	Landfill gases including vinyl chloride and methane continue to migrate offsite and has been detected in residential water meter boxes and offsite probes and inside one home adjacent to the site. Leachate containing hazardous substances has been detected in monitoring wells in the center of the landfill. An unknown quantity of leachate has accumulated and poses a threat since it may migrate and thus threatens surface and ground water.
Site Activity Status:	An interagency committee consisting of 15 federal, State and local agencies is coordinating efforts to properly mitigate and close this site. The State agencies have filed suit to order Operating Industries, Inc., to undertake specific characterization and remedial actions. A preliminary injunction has been issued. Operating Industries, Inc., failed to provide proper financial assurances for closure and post-closure, claiming that funds are not available. Transportation offsite of leachate collected by the perimeter drain system was paid for by Operating Industries, Inc., until October, 1985. This task has since been paid for by EPA and DHS with emergency funds, at a cost of approximately $50,000 per month. EPA is conducting an RI/FS with review and oversight by DHS and other State agencies. In addition, the EPA ROD for an operable unit to control gas migration from the landfill was signed in September, 1988.

Background Info:	Operating Industries, Inc. (OII) is an inactive Class II landfill surrounded by residential areas on the south and west borders. From 1948 to 1952, the OII site was operated as a municipal landfill by the City of Monterey Park. In January 1952, the site became a privately owned landfill under the ownership of OII. The site was permitted by the RWQCB in 1976, to receive various nonhazardous and hazardous liquid wastes, including lead compounds, chrome oxide, pigment sludge, refinery wastes, waste water from paint manufacturing, and caustic cleaning waste. It was not until 1984 that OII stopped accepting waste. The pathways of contamination are through inhalation of land fill gases and direct contact of leachate entering the ground water. Possible receptors are the residents near the facility and the potential impact of the contaminated groundwater on drinking water supplies. The Department took over the site when the owner and operator failed to continue with the site closure activities. In May 1986, the landfill was listed on the NPL and EPA became the lead agency. EPA initiated a remedial investigation to define the extent of environmental problems. A hydrogeologic investigation to study the groundwater was performed in September of 1989. In May of 1989, a Partial Consent Decree was entered in the Federal Court between EPA and over 100 PRPs. The PRPs agreed to undertake the site control and monitoring, and construct a leachate treatment system, as well as conducting several site improvements. Site work pursuant to the Consent Decree began in November 1989, when daily operation, including operation and maintenance/monitoring of the existing gas and leachate control system, and erosion and drainage control were assumed by the settling PRPs'.

Name:	SCE MONTEBELLO SERVICE CENTER
Address:	1000 POTRERO GRANDE DR
City,State,Zip:	MONTEREY PARK, CA 91770
Site ID:	155272
CERS ID:	T10000004493
CERS Description:	Leaking Underground Storage Tank Cleanup Site

Violations:

Site ID:	155272
Site Name:	SCE Montebello Service Center
Violation Date:	10-20-2014
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 01/28/2015. OBSERVATION: The Owner/Operator failed to properly train personnel who handle hazardous waste. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for automatic waste feed cut-off systems; 3) communications or alarm systems; 4) response to fires or explosions; 5) response to ground-water contamination incidents; and 6) shutdown of operations. The owner or operator shall maintain the following documents and records at the facility: 1) the job title for each position at the facility related to hazardous waste

SCE MONTEBELLO SERVICE CTR (Continued) **1011861636**

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D008
Waste Description: LEAD

Waste Code: D018
Waste Description: BENZENE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

SCE MESA SUBSTATION (Continued) **1012176387**

Waste Description: LEAD

Waste Code: D018
Waste Description: BENZENE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Date Data Arrived at EDR: 07/07/2005

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/11/2021
Date Data Arrived at EDR: 11/12/2021
Date Made Active in Reports: 02/01/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

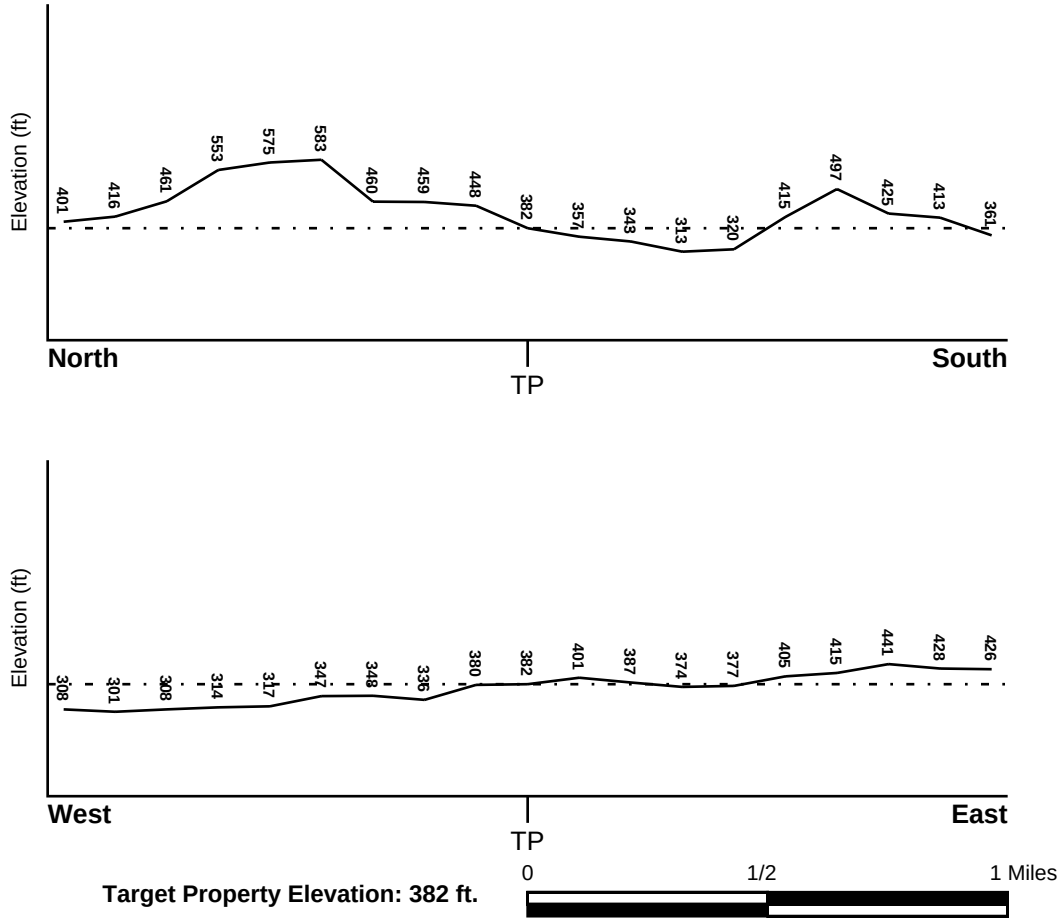
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1665F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1645F	FEMA FIRM Flood data
06037C1663F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL MONTE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Pliocene
Code:	Tp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Summary Details:

Conditions at proposal October 15, 1984): Operating Industries, Inc., operated a landfill on 190 acres in the City of Monterey Park, Los Angeles County, California. The 45-acre northern section was separated in the 1960s from the southern 145-acre section by the Pomona Freeway. EPA has evidence that the original landfill included at least a portion of both sections.
From l948 to l983, solid and liquid wastes, some ha ardous, were disposed of at the site. Leachate generated by the landfill contains vinyl chloride, ben ene-type compounds, tetrachloroethylene, heavy metals, and other contaminants, according to testing by the Los Angeles County Sanitation District LACSD), the California Department of Health Services CDHS), and the company. In July l983, the South Coast Air Quality Management District SCAQMD) detected vinyl chloride above ambient standards in air at and around the landfill, which is adjacent to a large residential area. SCAQMD,

NEW CURE, INC., 2550 GREENWOOD AVENUE, MONTEREY PARK, CA 91755-7419 (Continued)

CDHS,and the Los Angeles County Department of Health Services have taken enforcement actions against the facility. About 23,000 people use wells within 3 miles of the site as a source of drinking water. The company acquired Interim Status when it filed Part A of a permit application under Subtitle C of the Resource Conservation and Recovery Act RCRA). The company submitted a draft plan for closing the landfill under RCRA, but CDHS, in conjunction with other State agencies and EPA, determined that the plan had numerous deficiencies, most notably the failure to 1) provide financial assurance requirements for closure and 2) develop an adequate plan for monitoring ground water and for collecting and disposing of leachate. The company has not submitted complete and adequate closure and postclosure documents. Status February 1986): EPA collected gas samples in November 1984 from 16 subsurface probes in an adjacent housing development. Some samplesconfirmedthe presence of methane and vinyl chloride in subsurface soils. Interior home samples collected in November 1984 had low levels of methane and nondetectable levels of vinyl chloride. Elevated levels of methane and vinyl chloride werealso detected in a home adjacent to the landfill in October 1985. EPA installed six monitoring wells around the landfill in 1984-85. Quarterly samples collected since March 1985 contain organic chemicals and trace metals. In July 1985, EPA started planning for a comprehensive remedial investigation to determine the nature and extent of the problems associated with the landfill. When the investigation is complete, various alternatives to remedy the problems will be evaluated in a feasibility study. Interim measures are planned to stabili e and control the landfill, including slope stabili ation and upgrading of existing gas leachate collection systems. EPA trucked leachate to an off-site treatment facility from October 1985 to February 1986, when the State took over. Status June 10, 1986): This site is placed on the NPL because the potentially responsible party declined to initiate work, and CERCLA-funded remedial activities are underway.Thus, the site meets one of the requirements of EPA s policy for placing RCRA-related sites on the NPL.

NPL:

NPL Status:	Currently on the Final NPL
Category Description:	Depth To Aquifer-> 100 Feet
Category Value:	300
NPL Status:	Currently on the Final NPL
Category Description:	Distance To Nearest Population-> 0 And <= 1/4 Mile
Category Value:	100

▲ A1	Target Property 382 ft. Above Sea Level	Lists of Federal RCRA generators Local Lists of Registered Storage Tanks Other Ascertainable Records

Worksheet:

Impact on Target Property: Undetermined

Comments: A VEC could not be ruled out for the subject Site related to the historic USTs. Although no significant release has been documented for either of the former two 10,000-gallon diesel USTs or the 2,000-gallon diesel UST, no formal closure letter with no further action has been provided by the RWQCB. Given that the historic presence of these USTs represents a potential threat of a material release that has not received regulatory closure to note if any controls would be required, a VEC could not be ruled out for the subject Site.

EQUITY OFFICE 1977 SATURN ST, MONTEREY PARK, CA, 91755		1024651250
▲ A4	Target Property 382 ft. Above Sea Level	Other Ascertainable Records

Worksheet:

Impact on Target Property: Undetermined

Comments: A VEC could not be ruled out for the subject Site related to the historic USTs. Although no significant release has been documented for either of the former two 10,000-gallon diesel USTs or the 2,000-gallon diesel UST, no formal closure letter with no further action has been provided by the RWQCB. Given that the historic presence of these USTs represents a potential threat of a material release that has not received regulatory closure to note if any controls would be required, a VEC could not be ruled out for the subject Site.

Conditions:

Petroleum Hydrocarbon Chemicals of Concern: YES

FINDS: Other Ascertainable Records

Registry ID: 110070439637

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

▲ A8	Target Property 382 ft. Above Sea Level	Other Ascertainable Records

Worksheet:

Impact on Target Property: Undetermined

Comments: A VEC could not be ruled out for the subject Site related to the historic USTs. Although no significant release has been documented for either of the former two 10,000-gallon diesel USTs or the 2,000-gallon diesel UST, no formal closure letter with no further action has been provided by the RWQCB. Given that the historic presence of these USTs represents a potential threat of a material release that has not received regulatory closure to note if any controls would be required, a VEC could not be ruled out for the subject Site.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Click here to access additional FINDS: detail in the EDR Site Report. database contains
