  ***
 - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -
- - - - - - - - - - - - - - - - - - - - -

 ** Model Options Selected:
      * Model Allows User-Specified Options
      * Model Is Setup For Calculation of Average CONCentration Values.
      * NO GAS DEPOSITION Data Provided.
      * NO PARTICLE DEPOSITION Data Provided.
      * Model Uses NO DRY DEPLETION. DDPLETE  =  F
      * Model Uses NO WET DEPLETION. WETDPLT  =  F
      * Stack-tip Downwash.
      * Model Accounts for ELEVated Terrain Effects.
      * Use Calms Processing Routine.
      * Use Missing Data Processing Routine.
```

```
      * No Exponential Decay.
      * Model Uses URBAN Dispersion Algorithm for the SBL for   312 Source(s),
        for Total of    1 Urban Area(s):
   Urban Population =   9830000.0 ;  Urban Roughness Length =  1.000 m
      * Urban Roughness Length of 1.0 Meter Used.
      * ADJ_U*   - Use ADJ_U* option for SBL in AERMET
      * TEMP_Sub - Meteorological data includes TEMP substitutions
      * Model Accepts FLAGPOLE Receptor . Heights.
      * The User Specified a Pollutant Type of: PM-2.5

 **Note that special processing requirements apply for the 24-hour PM2.5 NAAQS -
check available guidance.
   Model will process user-specified ranks of high 24-hour values averaged across
the number of years modeled, and
   the multi-year average of individual ANNUAL values, averaged across the number
of years modeled.

 **Model Calculates  1 Short Term Average(s) of:  24-HR
     and Calculates ANNUAL Averages

 **This Run Includes:    312 Source(s);       3 Source Group(s); and     603
Receptor(s)

                with:     24 POINT(s), including
                           0 POINTCAP(s) and      0 POINTHOR(s)
                 and:    288 VOLUME source(s)
                 and:      0 AREA type source(s)
                 and:      0 LINE source(s)
                 and:      0 RLINE/RLINEXT source(s)
                 and:      0 OPENPIT source(s)
                 and:      0 BUOYANT LINE source(s) with a total of     0 line(s)
                 and:      0 SWPOINT source(s)

 **Model Set To Continue RUNning After the Setup Testing.

 **The AERMET Input Meteorological Data Version Date:  16216

 **Output Options Selected:
          Model Outputs Tables of ANNUAL Averages by Receptor
          Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE
Keyword)
          Model Outputs External File(s) of High Values for Plotting (PLOTFILE
Keyword)
          Model Outputs Separate Summary File of High Ranked Values (SUMMFILE
Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing
Hours
```

b for Both Calm
and Missing Hours

 **Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) =   58.00 ; Decay
Coef. =   0.000   ; Rot. Angle =   0.0
                  Emission Units = GRAMS/SEC   ;
Emission Rate Unit Factor =   0.10000E+07
                  Output Units   = MICROGRAMS/M**3

 **Approximate Storage Requirements of Model =   4.5 MB of RAM.

 **Input Runstream File: aermod.inp

 **Output Print File: aermod.out

 **Detailed Error/Message File: SATURN_PM2.ERR

 **File for Summary of Results: C:\LAKES\AERMOD VIEW\SATURN_PM2\SATURN_PM2.SUM

  ***
 - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -
- - - - - - - - - - - - - - - - - - - - - -

 ** Model Options Selected:
      * Model Allows User-Specified Options
      * Model Is Setup For Calculation of Average CONCentration Values.
      * NO GAS DEPOSITION Data Provided.
      * NO PARTICLE DEPOSITION Data Provided.
      * Model Uses NO DRY DEPLETION. DDPLETE  =  F
      * Model Uses NO WET DEPLETION. WETDPLT  =  F
      * Stack-tip Downwash.
      * Model Accounts for ELEVated Terrain Effects.
      * Use Calms Processing Routine.
      * Use Missing Data Processing Routine.
```

```
      * No Exponential Decay.
      * Model Uses URBAN Dispersion Algorithm for the SBL for   312 Source(s),
        for Total of    1 Urban Area(s):
   Urban Population =   9830000.0 ;  Urban Roughness Length =  1.000 m
      * Urban Roughness Length of 1.0 Meter Used.
      * ADJ_U*   - Use ADJ_U* option for SBL in AERMET
      * TEMP_Sub - Meteorological data includes TEMP substitutions
      * Model Accepts FLAGPOLE Receptor . Heights.
      * The User Specified a Pollutant Type of: PM-10

 **Model Calculates  1 Short Term Average(s) of:  24-HR
     and Calculates ANNUAL Averages

 **This Run Includes:    312 Source(s);       3 Source Group(s); and     603
Receptor(s)

                with:     24 POINT(s), including
                           0 POINTCAP(s) and      0 POINTHOR(s)
                 and:    288 VOLUME source(s)
                 and:      0 AREA type source(s)
                 and:      0 LINE source(s)
                 and:      0 RLINE/RLINEXT source(s)
                 and:      0 OPENPIT source(s)
                 and:      0 BUOYANT LINE source(s) with a total of     0 line(s)
                 and:      0 SWPOINT source(s)

 **Model Set To Continue RUNning After the Setup Testing.

 **The AERMET Input Meteorological Data Version Date:  16216

 **Output Options Selected:
          Model Outputs Tables of ANNUAL Averages by Receptor
          Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE
Keyword)
          Model Outputs External File(s) of High Values for Plotting (PLOTFILE
Keyword)
          Model Outputs Separate Summary File of High Ranked Values (SUMMFILE
Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing
Hours
                                                                 b for Both Calm
and Missing Hours

 **Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =    58.00 ;  Decay
Coef. =    0.000     ;  Rot. Angle =     0.0
                  Emission Units = GRAMS/SEC                                ;
Emission Rate Unit Factor =   0.10000E+07
```

Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 4.5 MB of RAM.

**Input Runstream File: aermod.inp

**Output Print File: aermod.out

**Detailed Error/Message File: SATURN_PM10.ERR

**File for Summary of Results: C:\LAKES\AERMOD VIEW\SATURN_PM10\SATURN_PM10.SUM

2027	4	0	12
Total	4	0	12

Notes:

[1] Fuel used for off-road, hauling, and vendor trips assumed to be diesel.

[2] Fuel used for worker trips assumed to be gasoline.

[3] $MTCO_2e$ rates from CalEEMod (3.0 Construction Emissions Details).

[4] For CO2e emissions, see Chapter 13 (page 94); Conversion Ratios: Climate Registry, General Reporting Protocol, 2016.

Construction Water Energy

Daily Soil Disturbance[1]	56.0	acres
Days of Soil Disturbance[2]	68	days
Water Concentration[3]	3,020	gallons/acre
Water Energy Intensity[4]	6,807	kWh/MG
Total Construction Water	11.50	million gallons
Construction Water Energy	78,282	kWh
	0.0783	GWh
Los Angeles County Annual Electricity	68,485	GWh
Percentage Increase	0.000%	
	78.28	MWh
	68,484,956.28	MWh

Notes:

[1] Total daily acres disturbed from offroad equipment per CalEEMod (3.0 Construction Emissions Detail) and maximum SCAQMD LST values for soil-disturbing equipment.

[2] Number of days of construction with soil-disturbing equipment per CalEEMod (5.1 Construction Schedule).

[3] Water application rate per Air and Waste Management Association's Air Pollution Engineering Manual.

[4] Water energy intensity factor for subarea per CalEEMod User Guide, Appendix G, Tab G-32.

Operational Fuel

Vehicle Type	Percent	Annual VMT[1]	MPG[2]	Annual Fuel (Gallons)	Fuel Type	Los Angeles County Gallons[3]	RS Percent
Passenger Cars	0.941	219,715	21.6	10,172	Gas	3,369,809,065	0.0003%
Light/Medium Trucks	0.050	11,624	17.2	676	Diesel	535,939,687	0.0001%
Heavy Trucks/Other	0.009	2,088	6.1	342	Diesel	535,939,687	0.0001%
Total	1.00	233,427		1,018			0.0002%

Land Use[5]	LDA	LDT1	LDT2	MCY	MDV	LHD1	LHD2	MHD	OBUS	UBUS	SBUS	MH	HHD
General Office Building	49.328	4.2329	24.0235	2.2009	14.3400	2.6967	0.6925	1.1011	0.0845	0.0619	0.0649	0.2781	0.8945

Notes:

[1] Total annual operational VMT based on annual VMT from CalEEMod (5.9 Operational Mobile Sources).

[2] Average fuel economy derived from Department of Transportation.

[3] Total annual county fuel per EMFAC 2021 model of projected operational fuel usage.

Operational Water Energy

UNMITIGATED			
Unmitigated Indoor	8.8	million gallons	
Indoor Energy Intensity Factor[1]	6,807	kWh/MG	
Unmitigated Outdoor	0	million gallons	
Outdoor Energy Intensity Factor[2]	6,807	kWh/MG	
Operational Water Energy	61,357	kWh	
Operational Water Energy	0.0614	GWh	
Los Angeles County Annual Electricity	68,485	GWh	
Percentage Increase	0.0001%		
MITIGATED			
Mitigated Indoor	8.8	million gallons	
Indoor Energy Intensity Factor[1]	6,807	kWh/MG	
Mitigated Outdoor	0	million gallons	
Outdoor Energy Intensity Factor[2]	6,807	kWh/MG	
Operational Water Energy	61,357	kWh	
Operational Water Energy	0.0614	GWh	
Los Angeles County Annual Electricity	68,485	GWh	
Percentage Increase	0.0001%		

Land Use[3]	Unmitigated (gal/year)		Mitigated (gal/year)	
	Indoor	Outdoor	Indoor	Outdoor
General Office Building	7744570	218065	7744570	218065
Parking Lot	0	0	0	0
General Office Building (Proxy to substation)	1051200	0	1,051,200	0
Total Operational Water (MG/year)	8.796	0.218	8.796	0

Notes:

[1] Indoor water energy intensity factor for subarea per CalEEMod User Guide, Appendix G, Tab G-32. Factor includes supply, treatment, distribution, and wastewater.

[2] Outdoor water energy intensity factor for subarea per CalEEMod User Guide, Appendix G, Tab G-32. Factor includes supply, treatment, and distribution.

[3] Operational water use values per CalEEMod (5.12 Operational Water and Wastewater Consumption).

Electricity/Natural Gas Energy

UNMITIGATED			
	Unmitigated Project Annual Energy	Los Angeles County Annual Energy[3]	Percentage Increase
Electricity (kWh/yr)	438,014,593	68,484,956,280	0.6396%
Electricity (GWh/yr)	438.0146	68,485	0.6396%
Natural Gas (kBTU/yr)	0	282,028,593,500	0.0000%
Natural Gas (therms/yr)	0	2,820,285,935	0.0000%
MITIGATED

Region: CA	Unit Tag:	Qty: 24	Project: StratCap

Unit Overview	
Model Number	XN-C4-RL35-2000-2C-VI-24F-LC-FC
Vintage	A
Compressor Type	RL35
Number of Compressors	4
Number of Ref. Circuits	2
Refrigerant/ Safety Group/ GWP	R513A-A1-573

Cooling/ Heating Performance	
Selection Mode	Cooling
Rated Net Capacity [ton.R]	522.008
Heat Rejection Capacity [ton.R]	682.166
Full Load Eff. [kW/Ton]	1.092
Part Load Efficiency NPLV [kW/Ton]	0.433
Part Load Efficiency IPLV [kW/Ton]	0
A-Weighted Sound Pressure Level [dBA]	NA

Electrical Information	
Power Supply	460/3/60
Total Power Input [kW]	569.887
Standby Power [Watts]	0.250
Run Load Current [A]	701.0
Minimum Circuit Ampacity [A]	1140.0
Maximum Over-current Protection [A]	1380.0
Recommended Fuse/ Breaker Size [A]	1200

Outside the scope of AHRI Air-Cooled Water-Chilling Packages Certification Program, but is rated in accordance with AHRI Standard 550/590 (I-P) and AHRI Standard 551/591 (SI).

XN CHILLER recommends that the full load operating condition have a minimum of 5.56°C (10°F) margin from any boundary condition. Seek factory guidance for operation outside of the teal polygon. Unloading at lifts greater than 45°C (81°F) should be verified by a factory sales engineer and reviewed with the engineer of record prior to final selection of equipment.

Subject: RE: StratCap Data Center Chiller Selections

Jordan –

Just got this Sound Data on the 24-Fan air-cooled chillers for StratCap – see below:

Here is the sound data:
LwL is the linear sound power level per octave band and overall
LwA is A-Weighted sound power level per octave band and overall
LpL is the linear sound pressure at a distance of 2.5 meters per octave band and overall
LpA is the A-Weighted sound pressure level at a distance of 2.5 meters per octave band and overall

Supply Fan 2	Supply	8000 cfm	8.76 bhp

Fan ID	Maximum BHP	Motor Nameplate HP	Maximum Motor Nameplate HP
Supply Fan 1		10.000 hp	15.000 hp
Supply Fan 2		10.000 hp	15.000 hp
Relief Fan 1	NaN bhp		

Pressure Drop Credits	
Application	Flow Through Device
Particulate filtration credit: MERV 9 through 12	16000 cfm
Particulate filtration credit: MERV 13 through 15	16000 cfm

Expected Output		
Method	Proposed	Max. Allowed
Motor Nameplate HP	20.000 hp	24.000 hp
Brake HP (BHP) - Recommended	17.514 hp	23.124 hp

Notes:
1. Trane recommends using Brake HP method for ASHRAE 90.1 compliance. Motor Nameplate HP method is not intended for large multi-fan systems that are available in IntelliPak rooftop units.
2. Select pressure drop credit when applicable (Ex. unit has high efficiency filters or sound attenuation section)
3. Is the relief fan running when the supply is delivering its highest supply airflow rate (ex. at Fan System Design Condition)?
   * If yes, input into COMcheck the relief fan airflow and BHP when it is operating at the Fan System Design Condition.
   * If not, do not input the relief fan into the COMcheck calculation.
4. Applies to fans internal to the unit only. Other fans in the system must be accounted for separately.
5. IntelliPak relief fans are EC motors. COMcheck will only give maximum nameplate Hp requirements for integral horsepower motors. To check for compliance with ASHRAE 90.1-2016, use two available nameplate motors per fan (6 Hp and 8 Hp).

Pressure Drop Credits	
Application	Flow Through Device
Particulate filtration credit: MERV 9 through 12	28000 cfm
Particulate filtration credit: MERV 13 through 15	28000 cfm

Expected Output		
Method	Proposed	Max. Allowed
Motor Nameplate HP	40.000 hp	42.000 hp
Brake HP (BHP) - Recommended	33.880 hp	40.467 hp

Notes:
1. Trane recommends using Brake HP method for ASHRAE 90.1 compliance. Motor Nameplate HP method is not intended for large multi-fan systems that are available in IntelliPak rooftop units.
2. Select pressure drop credit when applicable (Ex. unit has high efficiency filters or sound attenuation section)
3. Is the relief fan running when the supply is delivering its highest supply airflow rate (ex. at Fan System Design Condition)?
   * If yes, input into COMcheck the relief fan airflow and BHP when it is operating at the Fan System Design Condition.
   * If not, do not input the relief fan into the COMcheck calculation.
4. Applies to fans internal to the unit only. Other fans in the system must be accounted for separately.
5. IntelliPak relief fans are EC motors. COMcheck will only give maximum nameplate Hp requirements for integral horsepower motors. To check for compliance with ASHRAE 90.1-2016, use two available nameplate motors per fan (6 Hp and 8 Hp).

MITIGATION MONITORING AND REPORTING PROGRAM

This Mitigation Monitoring and Reporting Program (MMRP), which is provided in **Table 1: Mitigation Monitoring and Reporting Program**, below, has been prepared pursuant to Public Resources Code (PRC) Section 21081.6 and CEQA Guidelines Section 15097, which require adoption of an MMRP for projects where the Lead Agency has adopted mitigation to avoid significant environmental effects. The City of Monterey Park (City) is the Lead Agency for the 1977 Saturn Data Center Project (Project), and therefore is responsible for administering and implementing the MMRP. The decision-makers must define specific reporting and/or monitoring requirements to be enforced during Project implementation prior to final approval of the proposed Project. The primary purpose of the MMRP is to ensure that the mitigation measures identified in the Initial study/Mitigated Negative Declaration (IS/MND) are implemented, thereby minimizing identified environmental effects.

Final clearance shall require all applicable verification as indicated in Table 1. The City will have primary responsibility for monitoring and reporting the implementation of the mitigation measures unless otherwise indicated. The mitigation measures are identified by the impact category and number that correspond with the IS/MND.

Table 1: Mitigation Monitoring and Reporting Program

Mitigation Measure	Responsible for Monitoring	Timing of Verification	Method of Verification	Verified Date/Initials	Sanctions for Non-Compliance
Cultural Resources					
Mitigation Measure CUL-1: In the event that archaeological resources are unexpectedly encountered during ground-disturbing activities, work within 50 feet of the find must halt and an archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (National Park Service 1983) ("qualified archaeologist") must be contacted immediately to evaluate the resource. If the resource is determined by the qualified archaeologist to be prehistoric, a Native American representative must also be contacted to participate in the evaluation of the resource. If the qualified archaeologist and/or Native American representative determines it to be appropriate, archaeological testing for CRHR eligibility must be completed. If the resource proves to be eligible for the CRHR and significant impacts to the resource cannot be avoided via Project redesign, a qualified archaeologist will prepare a data recovery plan tailored to the physical nature and characteristics of the resource, per the requirements of the California Code of Regulations (CCR) Guidelines Section 15126.4(b)(3)(C). The data recovery plan will identify data recovery excavation methods, measurable objectives, and data thresholds to reduce any significant impacts to cultural resources related to the resource. Pursuant to the data recovery plan, the qualified archaeologist and Native American representative, as appropriate, must recover and document the scientifically consequential information that justifies the resource's significance. The City will review and approve the treatment plan and archaeological testing as appropriate, and the resulting documentation must be submitted to the regional repository of the California Historical Resources Information System, per CEQA Guidelines Section 15126.4(b)(3)(C).	City Planning Division City Building and Safety Division Project Applicant Qualified Archaeologist (if needed) Native American Representative (if needed)	During grading if any artifacts or other cultural materials are encountered	City verifies that the Applicant retained a qualified archaeologist In the event that archaeological resources are unexpectedly encountered during ground-disturbing activities, City and Native American Representative to be notified if any historic or prehistoric resources are found during construction City coordinates with qualified archaeologist, who will prepare a data recovery plan tailored to the physical nature and characteristics of the resource City reviews and approves the treatment plan and archaeological testing Resulting documentation to be submitted to the regional repository of the California Historical Resources Information System		
Geology and Soils					
Mitigation Measure GEO-1: If construction personnel encounter paleontological resources during ground-disturbing activities, they must inform the site construction superintendent who will notify the City and Project Applicant. The Project Applicant must then contact a qualified paleontologist as defined by the Standard	City Planning Division City Building and Safety Division	During grading if any artifacts or other cultural materials are	City verifies that the Applicant has retained a Qualified Paleontologist If construction personnel		

Mitigation Measure	Responsible for Monitoring	Timing of Verification	Method of Verification	Verified Date/Initials	Sanctions for Non-Compliance
Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources by the SVP (SVP, 2010) and all ground-disturbing activity must cease in the immediate area of the find (within a 50-foot buffer) until the paleontologist can evaluate the find. If the discoveries are determined to be significant, full-time paleontological monitoring will be recommended for the remainder of ground disturbance for the project. Paleontological monitoring must entail the visual inspection of excavated or graded areas and trench sidewalls. If a paleontological resource is discovered, the monitor will have the authority to temporarily divert the construction equipment around the find until it is assessed for scientific significance and collected. Monitoring efforts can be reduced or eliminated at the discretion of the project paleontologist. Upon completion of fieldwork, all significant fossils collected will be prepared in a properly equipped paleontology laboratory to a point ready for curation. Preparation will include the careful removal of excess matrix from fossil materials and stabilizing and repairing specimens, as necessary. Following laboratory work, all fossil specimens must be identified to the most specific taxonomic level possible, cataloged, analyzed, and delivered the Natural History Museum of Los Angeles County for permanent curation and storage. The cost of curation is assessed by the repository and is the responsibility of the Project Applicant. At the conclusion of laboratory work and museum curation, a final Paleontological Monitoring Report will be prepared describing the results of the paleontological mitigation monitoring efforts associated with the Project. The report must include a summary of the field and laboratory methods, an overview of the Project area geology and paleontology, a list of taxa recovered, an analysis of fossils recovered and their scientific significance, and recommendations. A copy of the report must be submitted to the Natural History Museum of Los Angeles County.	Project Applicant Qualified Paleontologist (if needed) Paleontological Monitor (if needed)	encountered	encounter paleontological resources during ground-disturbing activities and if a discovery is determined to be significant, City verifies that Paleontological Monitor is present during grading activities City verifies preparation of Final Paleontological Monitoring Report submitted by Applicant to the Natural History Museum of Los Angeles County		
Hazards and Hazardous Materials					
Mitigation Measure HAZ-1: Before the Building Official issues grading permits, a site-specific Soil Management Plan (“SMP”)	City Planning Division	Prior to the issuance of	City verifies the preparation of a Soil Management Plan		

Mitigation Measure	Responsible for Monitoring	Timing of Verification	Method of Verification	Verified Date/Initials	Sanctions for Non-Compliance
must be prepared by a qualified environmental professional approved by the City and submitted to the City of Monterey Park Building and Safety Division. The SMP must include the following elements, as applicable: • Provisions for personal protection and monitoring exposure to construction workers, • Requirements for construction workers to be Hazardous Waste Operations and Emergency Response ("HAZWOPER") trained, • Procedures to be undertaken in the event that contamination is identified above action levels or previously unknown contamination is discovered, • Procedures for the safe storage, stockpiling, and disposal of any impacted soils, • Emergency procedures and responsible personnel. In the instance that previously unknown soil constituents are discovered during site excavation, the contractor shall ensure that any soil contaminated beyond acceptable regulatory levels, shall be contained, remediated if necessary, and disposed of pursuant to the performance standard levels established by federal OSHA, Cal/OSHA, SCAQMD, RWQCB, and any other regulatory agency with jurisdiction over CRECs or RECs on the Project Site.	City Building and Safety Division Qualified Environmental Professional	grading permits	by a qualified environmental professional City verifies that the Applicant and Contractors properly dispose of any soil contaminated pursuant to applicable performance standards		
Tribal Cultural Resources					
Mitigation Measure TCR-1: The Project Applicant must retain a professional Native American monitor from or approved by a consulting Tribe. The monitor will be present during construction excavations such as clearing/grubbing, grading, trenching, or any other construction excavation activity associated with the Project. If cultural resources are encountered, the Native American monitor will have the authority to request ground disturbing activities cease within 50-feet of discovery to assess and document potential finds in real time. Monitoring activities will cease when potential for significant buried resources have been exhausted (e.g., at the completion of construction excavation activity), as determined by the Qualified Archaeologist and in consultation with the Native American monitor. The Native American monitor and archaeological monitor will be present during construction excavation activity. Personnel needs would be determined during a pre-construction meeting.	Native American Monitor Qualified Archaeologist City Planning Division City Building and Safety Division	Prior to the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity During construction at the time that	City verifies Native American Monitor that is from or approved by a consulting Tribe Native American monitor and archaeological monitor to be present during construction excavation activity		

Mitigation Measure	Responsible for Monitoring	Timing of Verification	Method of Verification	Verified Date/Initials	Sanctions for Non-Compliance
		cultural resources are encountered			
Mitigation Measure TCR-2: If significant Pre-Contact (predating Native American contact with Europeans) and/or Post-Contact (postdating Native American contact with Europeans) cultural resources are discovered and avoidance cannot be ensured, the qualified archaeologist must develop a treatment plan, the drafts of which will be provided to the City for review and approval, as detailed within MM CUL-1.	Qualified Archaeologist (if needed) City Planning Division City Building and Safety Division	During construction if significant Pre-Contact and/or Post-Contact cultural resources are discovered and avoidance cannot be ensured	If significant Pre-Contact and/or Post-Contact cultural resources are discovered and avoidance cannot be ensured, Qualified Archaeologist prepares a treatment plan for City review and approval		
Mitigation Measure TCR-3: The Applicant must, in good faith, consult with the Tribe or Tribal Government that requested consultation under AB 52 retained Native American monitor on the disposition and treatment of any artifacts or other cultural materials if encountered during the Project grading.	City Planning Division Native American Representative	During construction grading if any artifacts or other cultural materials are encountered	Applicant to consult with the Tribe or Tribal Government that requested consultation
