## City Council Written Communication

Individuals can complete this form to submit written comments to the City Council for a particular agenda item or for general comments within the City Council's subject matter jurisdiction. Please submit a separate form for each agenda item. Only one written comment per meeting for general public comments.

Please note that while communications will be provided to all Council Members and be part of the official record, they may not be read out loud as part of the meeting.

The City does not allow video files. The public may submit printed copies of their presentation/communications. The City recommends that individuals submit 9 hard copies to the City Clerk for dissemination to City Council and staff.

Written communications are received 24 hours before a regular meeting and 3 hours before a special meeting.

City Council meetings are held on the the 1st and 3rd Wednesdays of every month at 6:30 p.m.

*Monterey Park Municipal Code Section 2.04 et seq. This is a public document and subject to disclosure.*

Written Communication	<p>I am writing to oppose the construction of HMC Capital's data center in Monterey Park.</p> <p>To begin with, the environmental impact of data centers is immense -- they pollute freshwater that is already in short supply in our drought-stricken state, emit particulate matter that degrades air quality, and produce constant noise that disrupts our natural circadian rhythms. A project of this magnitude is a public health concern, especially as evidence comes out of early-adopter municipalities (such as in Georgia) that data centers have rendered their water supply undrinkable and significantly increased the cost of their electricity.</p> <p>From an economic standpoint, the tax revenue that the city would receive is nominal, particularly as compared to the cumulative degradation of real estate value that residents would experience as a result of constructing this data center. Additionally, the generative AI industry is demonstrating the hallmarks of a speculative bubble: intense investment with limited real-world applications, low organic adoption by consumers, and lack of profitability. There are no guarantees that there will be demand for this computing power in five years' time, leaving Monterey Park with the sustained demerits of hosting a data center and significantly curtailed revenue.</p>

Finally, Thomas Wong should recuse himself from voting on this measure. If this data center is approved, his employer, Southern California Edison, is projected to receive over three times the amount that the City of Monterey Park would. As their employee of seven and a half years, he cannot be an impartial contributor to conversations and votes about this measure.

**Written Communication** Dear City Clerk and Councilmembers,

I am writing to express my continued opposition to the proposed data center at 1977 Saturn Street.

In communities across the country, we have seen that data centers suck up a vast amount of energy and water, pollute and restrict access to clean water, and raise utility costs for residents while simultaneously making neighborhoods harder to live in. With current technology, there is no realistic way to operate an environmentally friendly data center, regardless of planned mitigation strategies.

This proposed data center would operate 24 hours a day, seven days a week, and use two times the electricity that the entire city uses now. This will inevitably strain our electrical grid, increasing the potential for outages, particularly during high-demand periods (like heat waves). If SoCal Edison needs to upgrade infrastructure to meet the energy demands of the data center, for example by building a new substation, the cost of those upgrades will likely be passed off to its customers—not just in Monterey Park, but across southern California.

It is unclear what the ongoing water consumption of the data

center would be, or what treatment wastewater will receive before it is released back into the water supply. Unless clear measures are put in place to limit water consumption and require wastewater treatment and purification, we run the risk of losing access to clean water.

Emissions from data center construction alone will exceed the thresholds for safety set by the South Coast Air Quality Management District, posing significant health risks and negatively impacting air quality. Continuing emissions from data center operation may also create ongoing risks of respiratory diseases (or exacerbate existing respiratory issues) and other health problems.

Data center operations also cause noise pollution, emitting a constant, low-frequency hum and vibration at levels that drown out birdsong and can cause insomnia, impact the nervous system, and otherwise harm physical and mental health.

The projected tax revenue from the data center is only a fraction of the City's budget. Please do not rush to approve such a harmful project that brings such minuscule benefits. The residents of Monterey Park are counting on you all.

Sincerely,  
Alice Li

Written Communication	Hi, I am a Monterey Park resident and am very much against the data center being built in Monterey Park due to the environmental impact. This impacts not just current residents, but future residents, including our children. Even Chat GPT itself says there is negative impact from data centers on the immediate community. There are reports of communities with data centers saying energy and water resources are strained and that there are even times when they have run out of water. I am also very concerned that it seems like City Council sought to push this through without full disclosure to the Monterey Park community. Please do not allow the data center to be built in Monterey Park. If you are concerned about the well-being of our city, rejecting the proposal to build should be an easy decision. Signed, Melissa Yee, a very concerned Monterey Park resident

**Written Communication** Dear City Clerk and City Council Members,

I am writing to express my opposition to Item 10B, the proposed data center at 1977 Saturn Street in Monterey Park. I urge the City not to approve or advance this project without a full Environmental Impact Report (EIR) and meaningful community engagement.

This project presents serious concerns for Monterey Park residents. The potential impacts on our health, environment, and quality of life are too significant to move forward based on a Mitigated Negative Declaration.

Key reasons for my opposition include:

The project could increase energy and water demand, raising utility costs for residents.  
Fourteen diesel generators pose air quality, noise, and public health risks.  
The project offers few long-term jobs or community benefits despite heavy resource use.  
Alternative uses such as mixed use, parks, or retail were not seriously considered.  
The community has not been adequately informed, represented,

or included in this process.

Please slow down this process, require a full EIR, and prioritize the needs and well-being of Monterey Park residents over a project that could burden our neighborhoods for decades.

Thank you for your time and consideration.

Written Communication	NO AI DATA CENTERS IN 626. This is disheartening and horrifying to hear that this is even being proposed. The direct negative effects it will have to Monterey Park residents and the 626 as a whole will be devastating and unnecessary. Data centers, especially those for AI/LLM, have far too many negative impacts, the waste, the energy costs, the potential pollution. PLEASE do not do this to us and DO NOT put any data centers in the city

Written Communication	Hello,

I am strongly against the construction of a data center in our highly populated area. The cons of the data center greatly outweigh the pros. You are selling out the community for a short-term monetary gain. The long-term damage to the surrounding home prices, public health, and energy/water prices this data center will cause will have a generational impact. No one is going to want to live in this area with a data center in their backyard or right next to their public park. The fact that the city is actually entertaining this proposal is incredibly embarrassing and shameful.

These are my 3 main areas of concern.

Financial Impact of electrical rate hikes. We are already paying high energy prices; why should we double or triple our current rates for no clear benefit to the community?

Environmental impact of diesel generators and other forms of increased power generation required for the operations of the Datacenter. Increased particulate pollution and a decrease in air quality of surrounding areas.

Most concerning to me is the Health impact of the construction and normal operations of the Datacenter. Most recent example is Amazon's Datacenter in Oregon being linked to increase in cancer and miscarriages due to drinking water contamination. There are many other health concerns including unknown and unstudied issues that certainly become more apparent in the coming years.

Datacenters should not be built near high population centers due to the very high likelihood of increased cancer, disease, and serious future health problems. Coupled with a decrease in quality of life & affordability in the immediate surrounding area. These factors make this project an obvious NO for me.  
Thank you for your time,

## Written Communication

Dear City Clerk and Council Members,

I am writing to express my continued opposition to the proposed data center at 1977 Saturn Street.

In communities across the country, we have seen that data centers suck up a vast amount of energy and water, pollute and restrict access to clean water, and raise utility costs for residents while simultaneously making neighborhoods harder to live in. With current technology, there is no realistic way to operate an environmentally friendly data center, regardless of planned mitigation strategies.

This proposed data center would operate 24 hours a day, seven days a week, and use two times the electricity that the entire city uses now. This will inevitably strain our electrical grid, increasing the potential for outages, particularly during high-demand periods (like heat waves). If SoCal Edison needs to upgrade infrastructure to meet the energy demands of the data center, for

example by building a new substation, the cost of those upgrades will likely be passed off to its customers—not just in Monterey Park, but across southern California.

It is unclear what the ongoing water consumption of the data center would be, or what treatment wastewater will receive before it is released back into the water supply. Unless clear measures are put in place to limit water consumption and require wastewater treatment and purification, we run the risk of losing access to clean water.

Emissions from data center construction alone will exceed the thresholds for safety set by the South Coast Air Quality Management District, posing significant health risks and negatively impacting air quality. Continuing emissions from data center operation may also create ongoing risks of respiratory diseases (or exacerbate existing respiratory issues) and other health problems.

Data center operations also cause noise pollution, emitting a constant, low-frequency hum and vibration at levels that drown out birdsong and can cause insomnia, impact the nervous system, and otherwise harm physical and mental health.

The projected tax revenue from the data center is only a fraction of the City's budget. Please do not rush to approve such a harmful project that brings such minuscule benefits. The residents of Monterey Park are counting on you all.

Sincerely,

Alice Chan

## City Council Written Communication

Individuals can complete this form to submit written comments to the City Council for a particular agenda item or for general comments within the City Council's subject matter jurisdiction. Please submit a separate form for each agenda item. Only one written comment per meeting for general public comments.

Please note that while communications will be provided to all Council Members and be part of the official record, they may not be read out loud as part of the meeting.

The City does not allow video files. The public may submit printed copies of their presentation/communications. The City recommends that individuals submit 9 hard copies to the City Clerk for dissemination to City Council and staff.

Written communications are received 24 hours before a regular meeting and 3 hours before a special meeting.

City Council meetings are held on the the 1st and 3rd Wednesdays of every month at 6:30 p.m.

Dear Mayor, Councilmembers, and City Clerk,

I'm submitting public comment to oppose the proposed data center at 1977 Saturn Avenue and urge the Council to require a full Environmental Impact Report before any vote.

The project would triple the city's energy use and introduce 24 diesel generators. The City has not disclosed testing schedules, emissions controls, or monitoring plans. Noise exemptions do not cover routine testing, and nearby homes and parks will be affected.

The pocket park and trail deposit do not offset long-term impacts. There is no maintenance plan or community design process. Fiscal claims lack detail and should be independently reviewed.

The SPARC process raises concerns about representation and conflicts of interest. Alternatives were not seriously considered.

Please defer action and require full review and enforceable conditions.

Sincerely,  
Emily Aguirre

Dear Honorable Mayor and Councilmembers,

As a resident in Monterey Park, I am opposed to the proposed data center project on Saturn Street. While the area needs revitalization, data centers should not be part of that.

Data centers cause environmental and economic harm to surrounding communities, including:

- Raising our electricity rates due to increased demand
- Increasing the risk for blackouts due to strain on the electrical grid
- Straining water supply in a region regularly impacted by drought
- Increasing air pollution and cancer risk due to regular operation of diesel generators
- Increasing noise pollution due to 24/7 operation of computer servers

While the area was rezoned to spur development, the community deserves developments that actually serve residents, like mixed-use developments that include shopping and housing.

I urge you to consider what future Monterey Park residents

will benefit from most, and whether that vision should include data centers that will do untold harm to the local environment, economy, and the health of residents.

Sincerely,

Jalina R. Chatzipantsios

**Subject:** Opposition to Proposed Data Center at 1977 Saturn - Petition Results  
**Date:** Tuesday, January 20, 2026 3:08:06 PM

---

[EXTERNAL EMAIL]

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

**NB: There is no specific agenda item for the January 21, 2026 City Council meeting but this letter is related to item 10b from the [December 3 2025 City Council](#) meeting, and should be considered as part of the official record on any future Agenda Item related to the Proposed Data Center at 1977 Saturn.**

Dear Monterey Park City Council and Members of the City Planning Division,

I am a district 2 resident and co-founder of the group **No Data Center in Monterey Park!**, a resident-led group alongside other MPK residents, Steven Kung, Jesse Damon, Emily Chu, and Roxana Farahani. On Saturday, January 10th, we led a Data Center Teach-In in collaboration with SGV Progressive Action, a grassroots organization with a broad reach in the region, which includes Monterey Park. About **120 people attended, mainly Monterey Park residents**, worried about the Data Center proposal and wanting to learn more. It was an extremely diverse group of attendees: families who joined with their young kids, elderly couples who have lived in Monterey Park for 50+ years, and ranging across ethnicities and political leanings.

On that same day, we launched [a petition](#) called "No Data Centers in Monterey Park!", which included a **demand** and a **warning**. **As of this writing, we have a total of 1644 signatures, with about half coming from Monterey Park residents.**

- The demand was that the City Council vote to reject the IS/MND and require a full Environmental Impact Report. There are so many issues with this proposed data center that it is easy to make a "fair argument" that the harm cannot be mitigated. This "fair argument" is the legal threshold required to trigger a full Environmental Review, which we have met, as there is no level of mitigation that would make this Data Center okay.
- The warning was that any Councilmember who votes "yes" on approving the IS/MND will face consequences at the ballot box come next election cycle. Residents feel betrayed and dismissed, and they feel like the City did not effectively or transparently engage them to determine whether the community wants this or if this is actually beneficial.

The words from the petition are the words of residents. They are not the words of "outside agitators". **They reflect our concerns and our demands.** (The full text to the petition and all signatures can be found at the end of this email.) Here are a few quotes directly from your constituents who signed the petition:

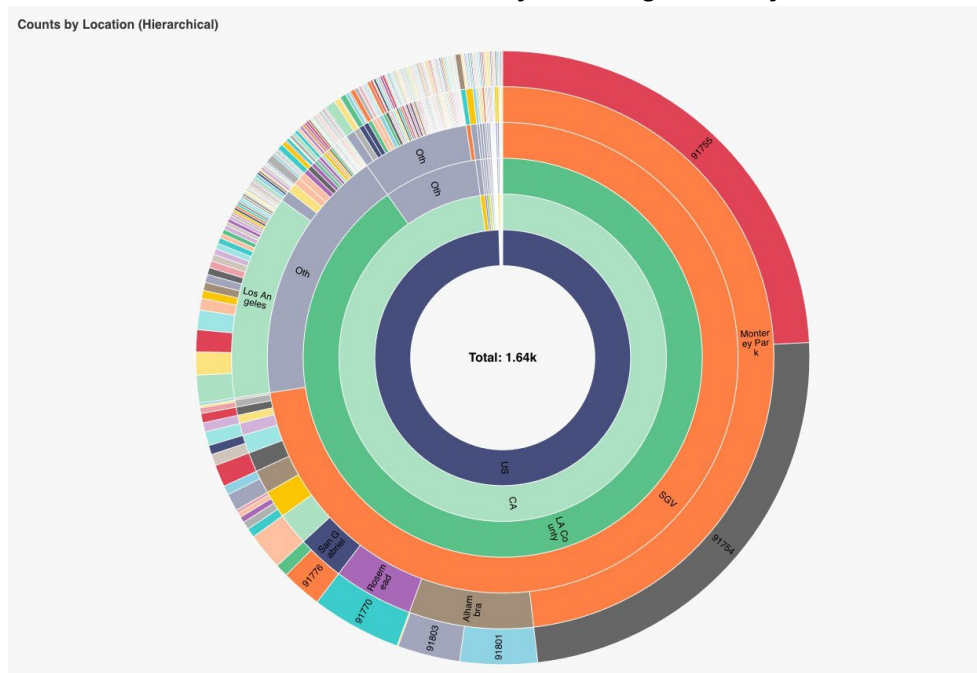

- **"A data center is *antithetical to the community* we've chosen to build a life in. *How is a data center consistent with the community we aspire to be?*" - Resident from 91754**
- **"Think about the environmental impact and long term health complications *for our kids*. *No one in their right mind would ignore the experts that have already analyzed similar projects (I.e META data center)*" - Resident from 91755**

- *“I don’t appreciate them picking such a small residential area and the possibility of property value loss. **My family has lived here 3 generations and it is very disappointing to see. It feels like they are purposely targeting a POC community.**” - Resident from 91755*
- *“Our City is much too small. **We are neighborhoods and families, not an industrial site. Please think of the people who live here firstly, always.**” - Resident from 91754*

The petition was to determine the extent to which concerns about the proposed data center are shared among members of our community. The answer is resoundingly clear: they are **very much shared**. The genuine concerns of our community, and its demands are clear: **we urge you to take whatever action you need to shut this data center proposal down.**

The data reveals **overwhelming opposition** within Monterey Park, with **almost half of the signatures (793) originating from MPK residents alone**. See Figure 1 below. This isn’t external agitation, it’s a resounding voice from our own community, amplified by the fact that **MPK has eight times more signatures than the next highest city, Alhambra**. This definitively establishes this as primarily a **hyper-local concern**.

**Figure 1. Distribution of “No Data Centers in Monterey Park!” signatures by location**

Furthermore, there is a **50/50 split between the zip codes in Monterey Park, 91754 and 91755**, which demonstrates this as a **city-wide concern, uniting residents across all districts**. This indicates that the potential impacts – increased noise, greenhouse gas emissions and air quality, utility rate hikes, devaluation of real estate, among other issues – are viewed as affecting the **entire city, not just those living in close proximity**.

The significance extends beyond our city limits; **75% of all signatures are from the San Gabriel Valley and 90% from LA county, highlighting this as also a regional concern**. Residents clearly understand the potential valley-wide air quality and environmental consequences, or are concerned about industrial development patterns in our region. **The SGV community recognizes that this decision could set a precedent for other cities, and we risk being viewed as irresponsible neighbors.**

I urge you to consider these findings carefully, as your actions on this matter will significantly impact the future of our community and potentially influence your own political ambitions.

The petition is still active and I will continue to send updates to the City as new signatures come in.

## The Petition

The petition is published [here](#). The following is the full text.

—

### The Issue

In January of 2024, a private Australian developer, HMC StratCorp (the Applicant), with their subsidiary DigiCo REIT, proposed building a **hyperscale data center**. This is a facility housing computer servers to be used to train AI, among other uses, at 1977 Saturn Avenue in Monterey Park. This would be an approximately **250,000 square foot industrial facility** that would be operating **24 hours a day, 7 days a week, 365 days a year** in the middle of Monterey Park, tripling the city's energy consumption. A project of this scale would undoubtedly create negative environmental and health-related consequences, raise utility costs, and decrease property values.

### HMC Wants to Push The Project Through Without a Full Environmental Review

***We do not want a data center in Monterey Park. There is no level of mitigation that would make this project okay. We demand that the City Council vote for a full environmental review to measure the full impact of the proposed project, which would effectively shut this project down.***

City Council Did Not Effectively Engage the Public About This Project and Most Residents Are Just Finding Out About It

***City Council has an opportunity to demonstrate its commitment to Monterey Park residents and regain their trust. City Council's continued accommodation of HMC demonstrates a disregard for Monterey Park and its residents. Approving HMC's proposal would be a betrayal of trust, especially considering the widespread opposition and the absence of meaningful public benefits for our community. Council members who vote "yes" on approving HMC's proposal will face the consequences at the ballot box.***

### Background

On October 31, 2024, HMC submitted an Initial Study (IS) and Mitigated Negative Declaration (MND) for this data center. In response to some feedback received on December 2, 2024 from organizations like Advocates for the Environment and others, HMC submitted revised technical details with design enhancements on October 27, 2025. The **IS/MND is a streamlined environmental review** process that allows projects to **move forward quickly**, but only if all impacts are deemed "less than significant." For a facility of this scale, that conclusion deserves scrutiny.

The applicant's consultants (Kimley-Horn) prepared the IS/MND. They chose the assumptions, set the

study boundaries, and selected the comparisons. Not surprisingly, they concluded their client's project poses no significant impacts. **But "less than significant" is a legal threshold, not a measure of whether there are actual impacts or whether real people will be affected.**

Thresholds are imperfect measures of experienced reality.

- **They are often arbitrary:** Noise limits (54–56 dB) are set for regulatory convenience, not based on health research about sleep disruption or stress.
- **They may be outdated:** Air quality thresholds don't always reflect current science on cumulative health effects.
- **Impacts below thresholds still cause harm:** A continuous 50 dB hum 24/7 may comply with the law but still degrade quality of life.
- **"Mitigated" ≠ "Eliminated":** Sound barriers reduce noise; they don't make it disappear. Biofiltration treats stormwater; it doesn't purify it.

**You have the right to define what matters to your community – even if they're deemed legally "insignificant."** The phrase "less than significant" is a regulatory conclusion, not a statement that nothing bad will happen. It means that by **some measures** impacts will fall below a **regulatory threshold** set by an agency (e.g., The City of Monterey Park). That's all it means. It does **not** mean the impact is harmless, negligible, or unnoticeable; that no one will be affected; or that the threshold itself is scientifically or morally defensible.

Applicants have strong incentives to produce MNDs and avoid Environmental Impact Reports (EIRs): they save time and money, face less public scrutiny, and avoid identifying alternatives or additional mitigation measures. **But MNDs are also easier to challenge legally.** If opponents can show a **"fair argument"** that significant impacts exist – even if the applicant's consultants disagree – a court can require a full EIR.

On this project, the MND is quite weak and it is easy to meet this standard. Here are a couple of selected issues:

- **Noise from chillers narrowly within permitted levels:** Operational noise from chillers will be 50–55 dBA at property lines. These fall within City limits, but will be **constant** and with **margins as narrow as 1 decibel** -- essentially no room for error. For context, [this](#) is what that could sound like. Their conclusion is "*less than significant impact.*"
- **Energy consumption:** The facility would draw an estimated 434 GWh/year from the SoCal Edison grid (which is only one-third renewable). This triples Monterey Park's total energy consumption, yet the IS/MND dismisses it as merely 0.64% of SoCal Edison's total demand. Their conclusion is "less than significant."

- **Scope 2 greenhouse gas emissions:** The project would generate approximately 77,000 metric tons of CO2 annually -- equivalent to roughly 17,000 cars on the road. The bulk of these emissions (75,181 metric tons) come from offsite grid power generation. The IS/MND *excludes* these Scope 2 emissions from its analysis, saying it shouldn't count, even though they are real and should be counted; they are simply experienced by communities near power plants rather than in Monterey Park. Their conclusion: "less than significant."

Throughout the IS/MND, Kimley-Horn appears to minimize each number in ways that obscure its significance -- seemingly to avoid triggering an EIR.

Your voice matters!

Your signature here and your testimony can help establish the record needed to argue that significant impacts weren't adequately analyzed.

**The applicant wanted a quick approval; with your engagement, you can make the case that this project deserves a closer look.** Together, we can make our voices hard to ignore.

What you can do right now

- **Sign this petition and engage on this page**
- **Attend public hearings** (date TBD; postponed indefinitely as of December 2025).
- **Attend City Council meetings** (every second Wednesday @ 6:30) and make public comment that you are opposed to this Data Center and object to the lack of engagement of the City with the community.
- **Submit written comments** to the City of Monterey Park Planning Division citing specific concerns and requesting responses (see contact information below)
- **Schedule 1:1s with City Council Members** and ask them your questions and share your concerns directly (see contact information below). When you reach out, they may not respond immediately -- so it's important to follow-up with them to remind them that this is important to you.
- **Request an EIR** if you believe there's a "fair argument" that significant impacts haven't been adequately analyzed.
- **Talk with your neighbors and organize** to amplify concerns about cumulative and

localized impacts. Learn more about the details of the project [here](#).

- Team-up with community-based organizations** by following their Instagram ([SGV Progressive Action](#)), joining a Facebook Group ([Monterey Park Against Data Centers](#)), joining a Signal group ([MPK Data Center Opposition](#)), or joining an email list to stay up-to-date (send an email to [sgvprogressiveaction@gmail.com](mailto:sgvprogressiveaction@gmail.com) to join)

There is no cost-efficient way after construction, versus detailed pre-planning, to try to mediate

							poor consequences due to noise, air pollution, or stresses to the power grid, especially in hot summers when rolling block outs and heat waves are not uncommon in Southern California. Even if the data center can prove mitigation to their operational "side effects," construction will also create intense noise pollution and increase breathable particulate matter in a high traffic area where residents and children live, go to school, play, and shop within 1 square mile of the site.

364	Lieu	Phillip	<a href="mailto:philliplieu@gmail.com">philliplieu@gmail.com</a>	Monterey Park	CA	91755	I'm concerned about the proposed data center in Monterey Park because, while it would consume a very large amount of electricity and place long-term strain on our infrastructure, it

							offers very limited direct benefit to residents. These facilities primarily serve corporate and regional business interests, not the local community. If the City is going to dedicate valuable land, power capacity, and environmental resources, that land should be reserved for uses that clearly benefit Monterey Park residents. Housing, community-serving development, or mixed-use projects would provide far greater long-term value. If residential use is not being considered, then I strongly urge the City to prioritize development that brings everyday benefits to the community — such as retail shops, local businesses, walkable commercial areas, and services that create jobs and improve quality of life for residents. Monterey Park should not bear the environmental and infrastructure impacts of a project unless there is a clear and meaningful benefit to the people who live here. I ask the Council to carefully reconsider this proposal and explore alternatives that better serve our community

508	Peppard	Samuel	<a href="mailto:sampeppard@gmail.com">sampeppard@gmail.com</a>	Monterey Park	CA	91755	This will cause a drop in air quality in Monterey Park.
509	Pethtel	Beth	<a href="mailto:bpethtel@gmail.com">bpethtel@gmail.com</a>	Monterey Park	CA	91755	As a resident of Monterey Park, I am firmly against installing a data center in our lovely town. It is hard enough to find an affordable, yet beautiful town with good schools but MPK has been my home for nearly 10 years. The residents have been speaking out (loudly!) that we do not want a data center in our town. It does not benefit residents (unless you are on the take at city council and got offered a nice bonus for presenting it to the city), the entire scope of environmental impacts are unknown, and the potential for dramatically increased utility bills are some of the many reasons that Monterey Park residents like myself and my family say WE DO NOT WANT A DATA CENTER IN MPK!
510	Pethtel	Jason	<a href="mailto:pethtel@gmail.com">pethtel@gmail.com</a>	Monterey Park	CA	91755	No data center in our beautiful town!
511	Pham	Morgan	<a href="mailto:morganpham@me.com">morganpham@me.com</a>	Monterey Park	CA	91755	The proposed data center threatens to substantially escalate energy consumption and place undue stress on public infrastructure, leading to lasting environmental and social consequences. Furthermore, the municipal approval process has proceeded without a comprehensive Environmental Impact Report or adequate community engagement
512	Pham	Scott	<a href="mailto:scottpham1029@gmail.com">scottpham1029@gmail.com</a>	Monterey Park	CA	91755	An establishment of a data center at

It is ridiculous. The City should have been more open with the residents before accepting the offers from the Australian asset management company.
700	Wong	Natalie	<a href="mailto:nwong715@yahoo.com">nwong715@yahoo.com</a>	Monterey Park	CA	91754	My family and I have been residents of Monterey Park for over three decades. I am extremely concerned about the negative environmental and economic impacts that a data center would have in our community and would like to voice my firm opposition to the project. A data center would benefit corporate interests while harming residents with increased

							utility rates and environmental harms - the full extent of which we cannot know as the city has decided to forgo a full Environmental Impact Report (EIR) in an attempt to rush this project forward. Not to mention being a major eyesore to the aesthetics of our city and a waste of public space that could be used for parks or small businesses. I join my community members in calling for a full EIR so that the public can better understand the potential impacts of this data center. It is your responsibility as city officials to prioritize community health and ensure transparency to your constituents.

720	Yan	Choi Yuen	<a href="mailto:pololee1997@yahoo.com">pololee1997@yahoo.com</a>	Monterey Park	CA	91755	I work in the tech field and am familiar with how data centers work. Data centers require very few employees and will not bring job opportunities for local residents. I have multiple family members that own homes and live in this city, including my immediate family. I do not support building a data center near my home.

City Council must vote for a full environmental review and shut this project down immediately. We do not need a data center in Monterey Park, or any area nearby for that matter. This will affect the cost of living in innumerable ways, not just financially. The community's health is at risk, their livelihoods are at risk, and City Council HAS to vote for a full environmental review. We want clean water, clean air, and community spaces. Nobody wants a data center in Monterey Park, EVER.

408	Moreno	Xavi	<a href="mailto:xavi@thelatc.org">xavi@thelatc.org</a>	Los Angeles	CA	90032	I urge the City not to approve this project because it would negatively impact the health, wellness, and quality of life of Monterey Park and the surrounding communities. A large, 24/7 industrial data center does not belong in the

							<p>middle of a residential city. The constant operation would introduce ongoing noise, heat, and heavy energy demand that directly affect residents' physical and mental health, disrupt sleep, and increase stress. Tripling the city's energy consumption will strain local infrastructure and inevitably lead to higher utility costs for residents and small businesses. This project would also increase environmental burdens through excessive electricity and water use, undermining the city's sustainability and climate goals. In addition, it would destabilize surrounding neighborhoods by reducing property values and eroding the sense of safety and livability that families rely on. Monterey Park should prioritize community health, environmental responsibility, and long-term neighborhood stability. Approving this project would put private industry needs ahead of residents' well-being, and for that reason, it should be rejected.</p>

481	Yuen	Melissa	<a href="mailto:melissa.w.yuen@gmail.com">melissa.w.yuen@gmail.com</a>	Los Angeles	CA	90044	I understand data centers are a necessity in the evolving technology industry, but locations must be thoughtfully and fairly chosen. The citizens of Monterey Park, a well-established, safe, family-oriented community, may be negatively impacted by the noise and environmental demands of a data center. There are other locations like parts of DTLA that could be better options to fix parts of the city while creating less negative impacts for communities.

767	Segovia	Leslie	<a href="mailto:les.segovia218@gmail.com">les.segovia218@gmail.com</a>	South El Monte	CA	91733	I oppose any AI data centers being built within the San Gabriel Valley. All residents of the SGV do not need to experience loss of our water supply as well as our energy. AI data centers not only create noise pollution with their mass servers, but they also pollute the air we breathe. Further, these data centers use as much energy as an entire city to be powered. As seen in other cities across the U.S, these data centers increase the electricity bills of residents in the surrounding area. Why should residents have to pay the price for these money hungry companies who want to use up all of our resources? I demand for all city councils within the community to think about the

							people who reside in them and put them first. NO to AI data centers being built in the SGV.

**Subject: Public Comment - Item 10: Data Center Proposal at 1977 Saturn Street**

Dear Honorable Mayor and Councilmembers,

As a resident in Monterey Park, I am opposed to the proposed data center project on Saturn Street. While the area needs revitalization, data centers should not be part of that.

Data centers cause environmental and economic harm to surrounding communities, including:

- Raising our electricity rates due to increased demand
- Increasing the risk for blackouts due to strain on the electrical grid
- Straining water supply in a region regularly impacted by drought
- Increasing air pollution and cancer risk due to regular operation of diesel generators
- Increasing noise pollution due to 24/7 operation of computer servers

While the area was rezoned to spur development, the community deserves developments that actually serve residents, like mixed-use developments that include shopping and housing.

I urge you to consider what future Monterey Park residents will benefit from most, and whether that vision should include data centers that will do untold harm to the local environment, economy, and the health of residents.

Sincerely,  
Graciela Ruiz

## City Council Written Communication

Individuals can complete this form to submit written comments to the City Council for a particular agenda item or for general comments within the City Council's subject matter jurisdiction. Please submit a separate form for each agenda item. Only one written comment per meeting for general public comments.

Please note that while communications will be provided to all Council Members and be part of the official record, they may not be read out loud as part of the meeting.

The City does not allow video files. The public may submit printed copies of their presentation/communications. The City recommends that individuals submit 9 hard copies to the City Clerk for dissemination to City Council and staff.

Written communications are received 24 hours before a regular meeting and 3 hours before a special meeting.

City Council meetings are held on the the 1st and 3rd Wednesdays of every month at 6:30 p.m.

*Monterey Park Municipal Code Section 2.04 et seq. This is a public document and subject to disclosure.*

Attached please find the Resolution of the Montebello Teachers Association regarding the proposed Data Center in Monterey Park, close to schools in the Montebello USD. Please give this document to the members of the Monterey Park City Council.

Best regards,  
Doug Patzkowski

# Resolution

**mta** **Montebello Teachers Association**

918 West Whittier Boulevard • Montebello, CA 90640 • (323)722-5005  
www.montebelloteachers.org • mta@montebelloteachers.org

## **RESOLUTION REGARDING PROPOSED DATA CENTER IN MONTEREY PARK**

**WHEREAS** the Montebello Teachers Association, a local chapter of the California Teachers Association, exists to protect and promote the health and well-being of its members and of all students enrolled in the schools of the Montebello Unified School District;

**WHEREAS** the Montebello Teachers Association represents certificated employees working within 3 miles of the proposed Saturn Street Data Center that is requesting a permit to open a data center in Monterey Park, and these staff members serve thousands of students in schools within the Montebello Unified School District that are located in proximity to the proposed data center;

**WHEREAS**, the proposed Saturn Street Data Center has not submitted an Environmental Impact Report to the City of Monterey Park, and a Mitigated Negative Declaration was filed by the City of Monterey Park in lieu of an Environmental Impact Report;

**WHEREAS**, the affect of data centers on human health, including increases in cancer rates, is not fully known, and has not been addressed in the Mitigated Negative Declaration;

**THEREFORE, BE IT RESOLVED** that the Montebello Teachers Association encourages the City of Monterey Park to require that the proposed Saturn Street Data Center submit a comprehensive Environmental Impact Report which includes information on the potential harm to humans who spend a significant amount of time in proximity to data centers prior to granting a permit for the data center.

**THEREFORE, BE IT FURTHER RESOLVED** that the Montebello Teachers Association opposes the development of any data center within close proximity of the schools of the Montebello Unified School District without extensive research that affirms the health and safety of the students and staff of these schools will not be compromised by the proposed data center.

This resolution was passed by the members of the Montebello Teachers Association Executive Committee on Tuesday, January 13, 2026.

  
Victoria Landeros-Lopez, President

**Subject:** Public Comment to Oppose Data Center Project  
**Date:** Sunday, January 18, 2026 7:09:09 PM

---

[EXTERNAL EMAIL]

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Mayor, Councilmembers, and City Clerk,

I'm submitting public comment to oppose the proposed data center at 1977 Saturn Avenue and urge the Council to require a full Environmental Impact Report before any vote.

The project would triple the city's energy use and introduce 24 diesel generators. The City has not disclosed testing schedules, emissions controls, or monitoring plans. Noise exemptions do not cover routine testing, and nearby homes and parks will be affected.

The pocket park and trail deposit do not offset long-term impacts. There is no maintenance plan or community design process. Fiscal claims lack detail and should be independently reviewed.

The SPARC process raises concerns about representation and conflicts of interest. Alternatives were not seriously considered.

Please defer action and require full review and enforceable conditions.

Sincerely,  
Feng Su Chang
