Dear Mayor Yang, Mayor Pro Tem Lo, Honorable City Council Members and City Staff:

As a long-time resident of Monterey Park, I write in support of the three proposed ordinances that prohibit data centers within our city. Given the relatively small land area of our city and dense population, data centers are inappropriate for Monterey Park. The following are some of the problems associated with data centers:

1)Air quality: Harmful pollutants emission would be the result of diesel backup generators used in the operation of data centers. Our region is already subject to high levels of air pollution.

2)Energy demand: Data centers would create a high demand of energy from an already strained energy grid. This could infringe on the energy reliability needs of other businesses and residents. Unless energy usage costs are appropriately absorbed by data centers, costs would be passed on to other businesses and residents.

3)Water consumption: Data centers consume massive amounts of water. In our drought prone region, this could negatively impact water availability for other businesses and residents.

4)Noise pollution: Data centers require massive cooling systems that operate around the clock, seven days a week. These cooling systems emit low-frequency noise that affects the environmental quality of local neighborhoods.

The establishment of a data center in Monterey Park would provide little economic benefit to the city because it would create few jobs yet would strain local resources and cause environmental harm. Therefore, I urge you to pass the three proposed ordinances and to not weaken their intent.

Respectfully,

Christine Gonzalez

Dear Mayor Yang, Mayor Pro Tem Lo, Honorable Council Members -

I am a resident of Monterey Park. Upon reviewing the proposed ordinances for tonight's meeting, we noticed that while Data Processing Facilities are being struck from Saturn Park, they will still remain a permitted use in the Monterey Pass and Corporate Center zones under § 21.12.020 (Office Professional Non-McCaslin Business Park Zone).

To ensure consistency and remove any ambiguity, we respectfully request that Data Processing Facilities also be struck from O-P non-McCaslin Business Park Zone — not just Saturn Park.

A citywide approach closes the loophole and sends a clear message that this use is no longer permitted anywhere in our community.

Thank you for your consideration.

Respectfully,
Tsam Wong

[EXTERNAL EMAIL]

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I am a SGV resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Maggie Chen

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Anita Shih

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I am a Monterey Park resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for listening to our community. Thank you for protecting our community. Thank you for taking a stand for planet earth. You are on the right side of history and you are helping us invest in a brighter, more safe and just future.

Respectfully,
Madeline Ocampo

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I hope you are all well. I am a long-time Monterey Park resident who lives in Councilperson Wong's district.

I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is irrefutable:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Dear Mayor Yang, Mayor Pro Tem Lo, and Honorable Council Members,

I am a Monterey Park resident, and I am writing to express my strong support for all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community for several reasons:

- Noise: Industrial-scale cooling systems run 24/7, generating constant low-frequency noise that degrades the quality of life for nearby residents.
- Water Consumption: These facilities can consume millions of gallons of water annually, which is unsustainable given our region's persistent drought conditions.
- Energy Demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air Quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- Minimal Benefit: These facilities generate very few local jobs, no foot traffic, and no sales tax revenue while consuming significant public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without any weakening amendments.

Furthermore, I ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present similar concerns—including industrial noise, a massive footprint, and minimal job creation—along with serious fire risks. As these facilities are appearing across the San Gabriel Valley, Monterey Park should act now before one is proposed in our city.

Thank you for protecting our community.

Respectfully,

Conrad Perez

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

We are Monterey Park resident and strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Ben Wong and Phuong Truong

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I am a Monterey Park resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Tiffany

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Ziming Yu

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I am a Monterey Park resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Ziming Yu

- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. They are a completely unnecessary evil. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. We just went through the devastating Eaton and Palisades fires a Year ago!!! This is a horrible decision to make- allowing BESS facilities right after something so catastrophic for the San Gabriel Valley and beyond. It's a liability to our community with no positive aspects, we would be ignorant to do it. Unfortunately, these facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Erika C Medina

Lifelong South El Monte resident, with extended family members living in Monterey Park and

my only daughter being born there!!!! I care about this community it's my home!!!!

I am a Monterey Park resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully, Eva Wong

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I am a Monterey Park resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
[Sophia Cun]

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Nicolás G. Tomsio

Dear Mayor Yang, Mayor Pro Tem Lo and Honorable Council Members,

I am a Monterey Park resident and I strongly support all three proposed ordinances to prohibit data centers citywide.

Data centers are incompatible with our community. The evidence is clear:

- Noise: Data centers require industrial-scale cooling systems that run 24/7, generating constant low-frequency noise that degrades quality of life for nearby residents.
- Water consumption: A single data center can consume millions of gallons of water annually, a burden our region cannot afford during persistent drought conditions.
- Energy demand: Data centers strain the electrical grid, increasing costs and reducing reliability for residents and local businesses.
- Air quality: Diesel backup generators emit harmful pollutants, worsening air quality in a community already disproportionately impacted by pollution.
- No community benefit: Data centers generate almost no local jobs, no foot traffic, and no sales tax revenue, while consuming enormous public resources.

The Council is right to declare these facilities a public nuisance. I urge you to adopt all three ordinances without weakening amendments.

Further, I also ask that you direct staff to research standalone Battery Energy Storage Systems (BESS) and prepare a separate ordinance to prohibit them. BESS facilities present many of the same concerns — industrial noise, massive footprint, minimal jobs — along with serious and poorly understood fire risks. These facilities are already appearing across the San Gabriel Valley. Monterey Park should act now, before one is proposed here.

Thank you for protecting our community.

Respectfully,
Omar Aguilera

Subject: Online Form Submittal: City Council Written Communication
Date: Thursday, April 16, 2026 10:31:56 PM

[EXTERNAL EMAIL]

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

City Council Written Communication

Individuals can complete this form to submit written comments to the City Council for a particular agenda item or for general comments within the City Council`s subject matter jurisdiction. Please submit a separate form for each agenda item. Only one written comment per meeting for general public comments.

Please note that while communications will be provided to all Council Members and be part of the official record, they may not be read out loud as part of the meeting.

The City does not allow video files. The public may submit printed copies of their presentation/communications. The City recommends that individuals submit 9 hard copies to the City Clerk for dissemination to City Council and staff.

Written communications are received 24 hours before a regular meeting and 3 hours before a special meeting.

City Council meetings are held on the the 1st and 3rd Wednesdays of every month at 6:30 p.m.

Monterey Park Municipal Code Section 2.04 et seq. This is a public document and subject to disclosure.

Council Meeting Date	4/20/2026

Written Communication	Hi. Thanks for doing this. Yes, we must prohibit Data Centers in Monterey Park. They use too much electricity and water. Our electricity bills are too high already and another drought is coming. Our water treatment plants have limited capacity. Data Centers also have a continuous disturbing hum. Yukio
